Meridian Energy investor presentation

31 October 2022

Attached is a presentation Meridian Energy will be making at investor meetings during November.

ENDS

Neal Barclay Chief Executive Meridian Energy Limited

For investor relations queries, please contact: Owen Hackston Investor Relations Manager 021 246 4772 For media queries, please contact: Polly Atkins External Communications Manager 021 174 1715

Why Meridian?

Leading sustainability performance

Dow Jones
Sustainability Indices

Powered by the S&P Global CSA

DRIVING AMBITIOUS CORPORATE CLIMATE ACTION

Why Meridian?

High quality investment

New Zealand electricity market

- A reliable, affordable and environmentally sustainable electricity system
- A well functioning competitive market with high level of renewable resources and rational competition
- Vertical integration is the prevailing market structure
- Wholesale and retail market regulation provided by an independent regulator – The Electricity Authority (EA)
- EA's mandate is to promote efficient market operation, security of supply, promote competition
- No price controls, the non-competitive transmission and distribution sectors have regulated rates of return

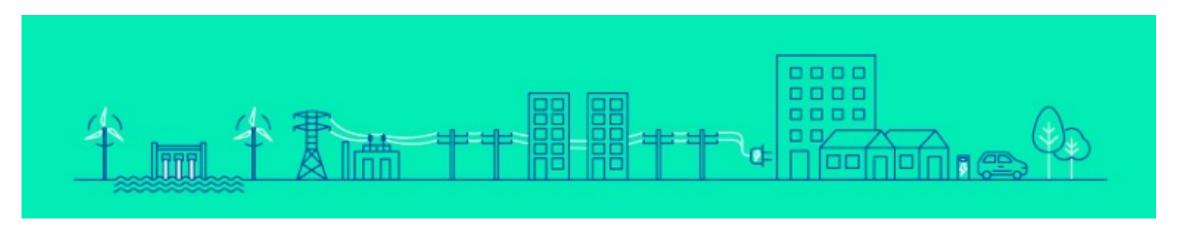

New Zealand electricity market

- New Zealand's hydro generation is managed against limited controlled storage
- Bulk of hydro inflow is anti-correlated to winter demand peak
- Thermal capacity and fuel storage has historically managed potential hydro inflow deficit and other renewable intermittency
- Efficient and well-functioning wholesale market manages this supply risk
- Significant oversupply has existed, older thermal plant closure has brought balance
- Demand growth in the last decade has been modest, strong outlook from decarbonisation
- \$2.3B of recent or in progress renewable builds

New Zealand electricity market

5 major generators (all listed, 3 majority Govt owned)

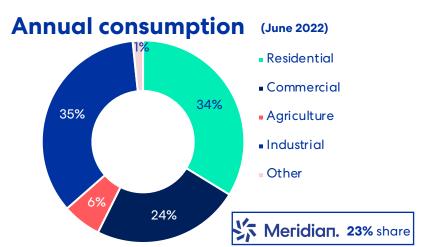

1 transmission grid owner (state owned)

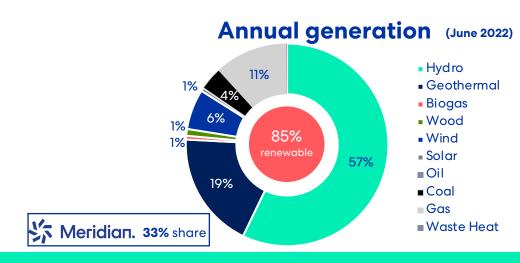

l very large industrial user (Rio Tinto/Sumitomo smelter), ~13% of national demand **29** distribution businesses (various ownership structures)

44 retail brands

2.1 million consumers (41 TWh pa)

Policy and regulation

Emissions Reduction Plan

- Released in May 2022, it sets out how NZ will meet its first emissions budget for 2022-2025
- Requires additional emissions reductions of 4%
- Plan targets transport and energy emissions
- Supported by \$2.9B of funding from the Government's Climate Emergency Fund
- \$1.2B earmarked for transport, including increased access to low and zero emissions vehicles
- \$0.7B in funding for industrial decarbonisation

Average annual emissions

Policy and regulation

Resource management reform

- Reform programme risks renewable projects needing to clear a higher consenting hurdle
- Generator CEs have collectively written to Ministers outlining issues that need addressing, supported by independent advice

Low carbon commitment

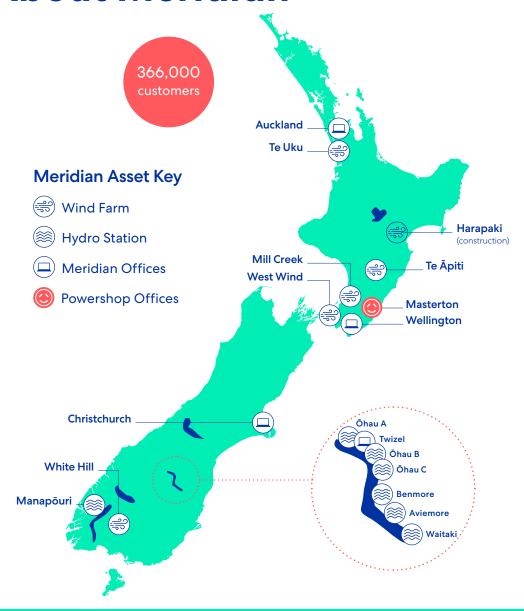

- Meridian is part of a collective sector commitment to deliver a low carbon energy system
- Development of an independent roadmap by BCG for decarbonisation of the energy system

Wellington's Ika Rere is the first full-electric ferry in the southern hemisphere

About Meridian

Total shareholder return¹

¹share price change plus gross dividend yield

About Meridian

- New Zealand's largest generator, all production from renewable sources
- Seven big hydro stations flexible plant with the country's largest storage
- With low operating costs and capital needs
- Five New Zealand wind farms, a sixth under construction and proven success operating in a high wind environment
- Backed with more than a decade of construction and operational experience
- The largest retailer of electricity in New Zealand
- Exposure to new generation and demand growth in New Zealand's low carbon future

Our purpose

Clean energy for a fairer and healthier world.

We're New Zealand's largest renewable energy generator and a major retailer.

Our strategy

	—		-W		1 1
initiatives	Champion Competitive markets	Optimise Trading and asset management		Grow Retail	
ij	Sustainability	Re-consenting		Generation	
. .	Climate action	Financing		Flux	
targets	Grow a clear sustainable leadership position			NZ's highest customer satisfaction	
	Use our 5,000 GWh renewable opportunity to fast-track NZ's decarbonisation		Provide the most rele options for ou	the state of the s	
	Execute on options that op	timise system and		Develop a high quality and diverse suite of renewable energy options	
	portfolio needs and reduce transition risks			3 million ICP's on Flux	
	A resilient wellbeing and safety culture				
position	Asia Pacific Dow Jones Sustainability Index inclusion 1,500 GWh new demand opportunities identified		Powershop market leading customer satisf Meridian leading gentailer 300 GWh of process heat under MOU 61 public EV chargers installed		
	385 GWh of new swaption			2.3 GW of sites/opportunities	
	smelter demand	esponse		540,000 ICP's on Flux	
	NZ top quartile staff engagement, improving injury frequency rates				

Our Climate Action Plan

Our purpose

Meridian's purpose of Clean energy for a fairer and healthier world is at the centre of everything we do on our journey to net zero.

Our business Our energy generation is from 100% renewable sources through:

Sun.

We are continuing development of

- additional renewable energy generation
- electrifying process heat
- vehicle charging infrastructure
- green hydrogen production

Our priorities

These priorities align with our commitment to contribute meaningfully to the United Nations (UN) Sustainable Development Goals (SDGs) where we can have most impact – such as SDG13 Climate Action. See our **Sustainability Policy** for further detail.

Half by 30

We are focused on reducing our gross operational emissions by half by FY30*.

Forever Forests

Our nature-based commitment to emission removals.

Helping customers and Aotearoa to decarbonise

Increasing consumption of renewable electricity through electrification.

Where we can't reduce our operational emissions right now, we offset using Gold Standard Verified Emission Reductions and have done since FY19.

* Mendian's operational emission boundary includes all scope 1, 2 and 3 categories, excluding all one-time construction emissions from major projects and all activities that are capitalised as part of renewable energy projects. From our FY21 baseline (excluding Meridian Australia).

Our Half by 30 focus areas

Land Transport

Farms

Fugitive emissions

Air travel

Ferry and barge

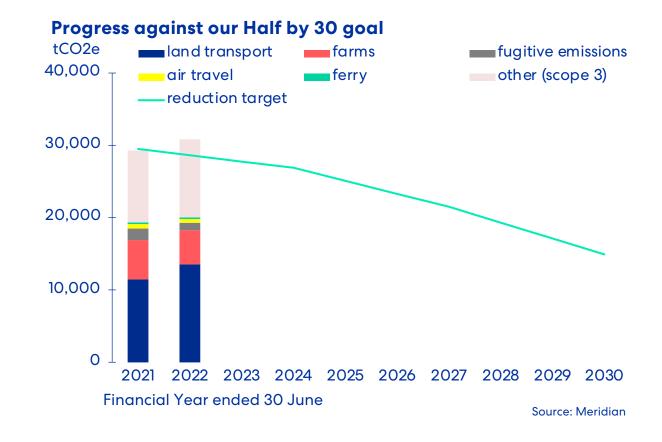

Waste

Half by 30

- Goal to halve our 2021 operational emissions by 2030
- An approved science-based target
- Today all Meridian's operational emissions are offset

Forever forests

- Creating a carbon sink by planting 1.5 million trees
- Will offset the emissions we can't remove through Half by 30
- A mixed planting model of natives and exotics
- To act as an effective carbon sink and leave a native forest legacy

Social focus

Local communities

- Long term relationships, community relationship managers
- \$9M of local project support over 15 years

<u>lwi</u>

- Recognise the mana whenua of Ngāi Tahu
- Close association with local rūnanga
- Focus on strengthening our iwi partnerships

KidsCan

 \$1M annual contribution towards supporting under-privileged children

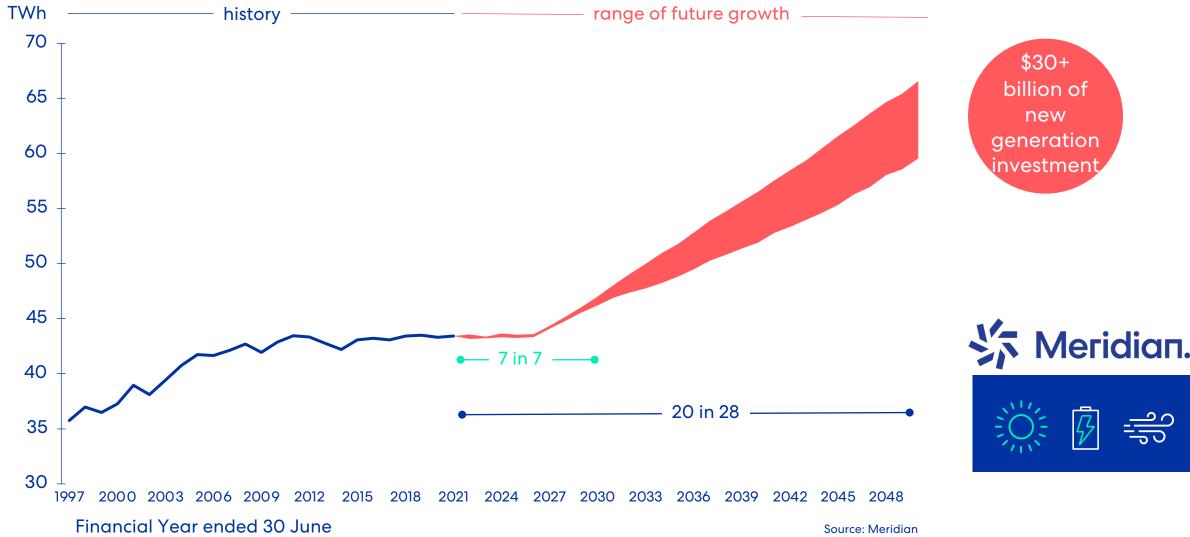

Kākāpō Recovery Programme, Project River Recovery

 Cornerstone partnerships with the Department of Conservation

Renewable growth

Annual market demand for generation

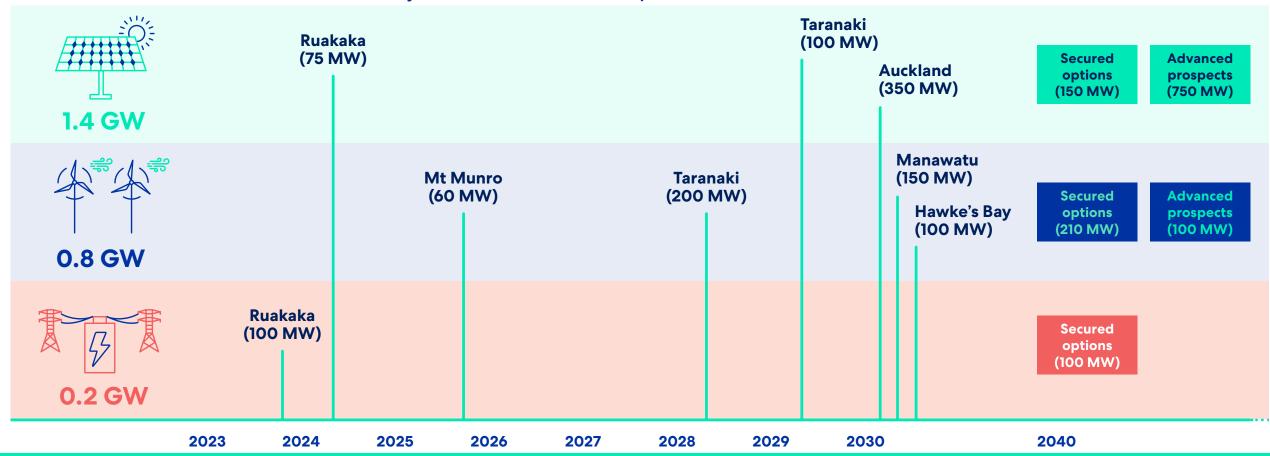

Renewable development pipeline

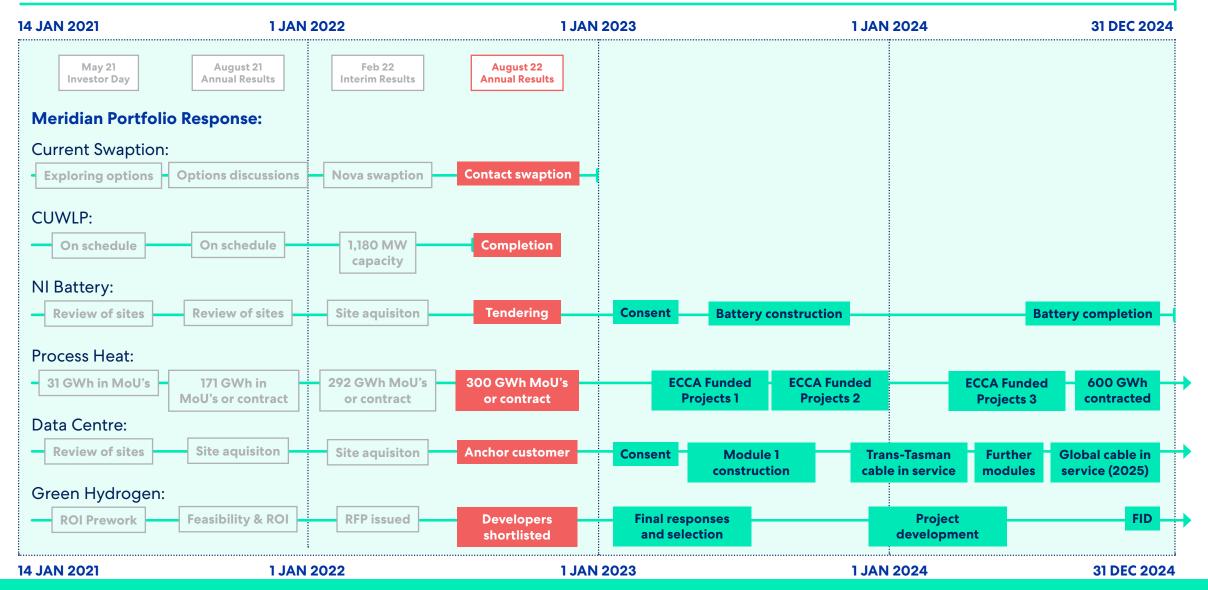

- Deep pipeline of 2.3 GW (5.4 TWh) of development options
- 1.1 GW secured, 1.2 GW in advanced prospects, further battery site acquired
- North Island focus, flexibility on South Island options maintained

Portfolio response to NZAS contract termination

NZAS Contract:

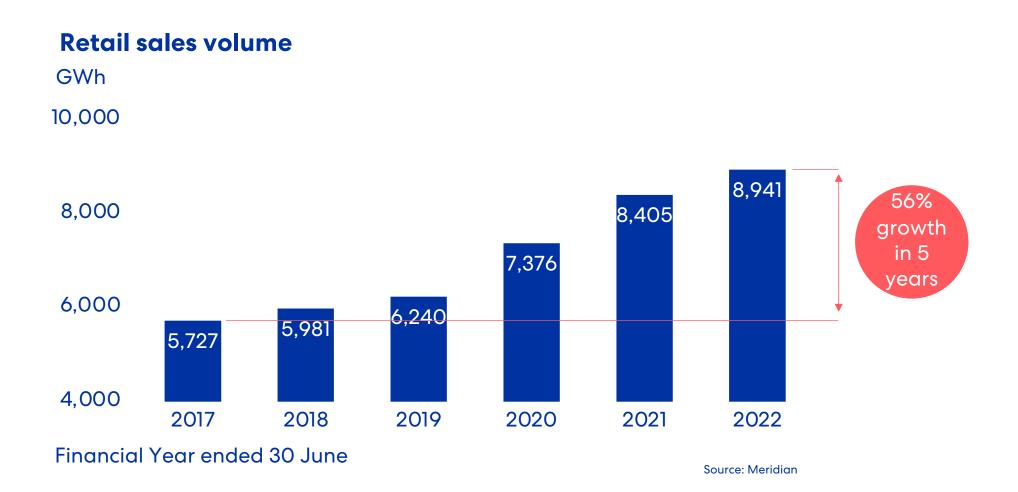

Green hydrogen

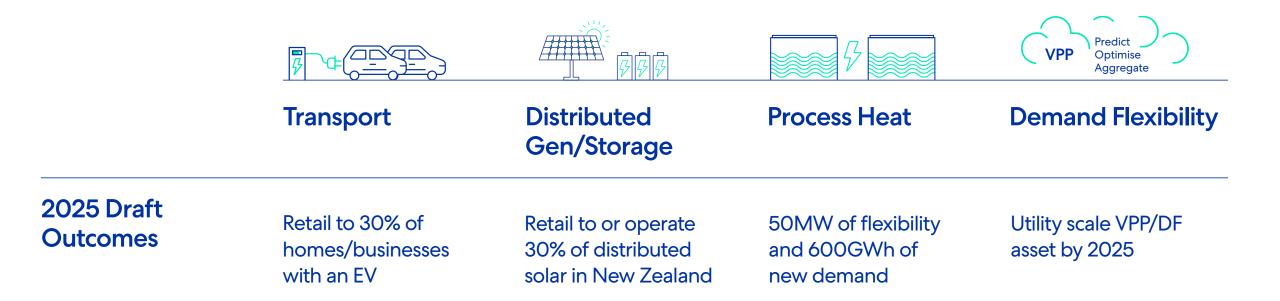

Evolving our customer approach...from sales growth

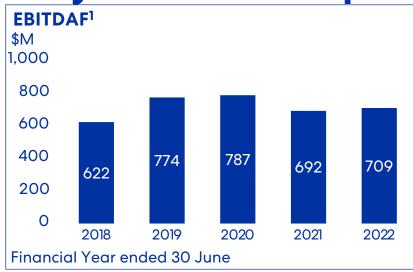

To energy solutions that enable customers to decarbonise

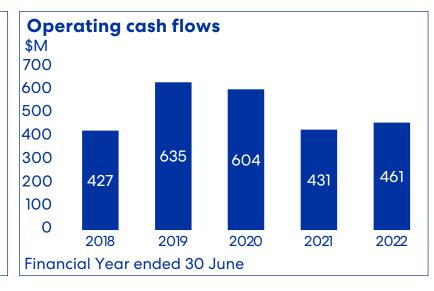

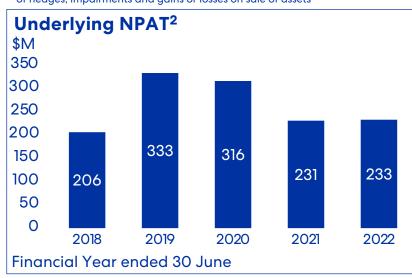

5-year financial performance

 2 Net profit after tax adjusted for the effects of changes in fair value of hedges and other non-cash items
