

A NEW FOCUS FOR 2023

AGM PRESENTATION NOVEMBER 2022

OUR MISSION

Resolution Minerals Ltd (RML) is a junior mineral explorer with a focus on discovering critical new energy metals that will enable the global energy transition to a carbon-neutral economy. It's projects are prospective for in-demand commodities copper, cobalt, manganese, zinc, uranium and gold.

RML believes the best value creation for shareholders is through discovery success.

AN EXPERIENCED TEAM

Duncan Chessell

Non-Executive Chairman

Geologist with 25 years' experience in business, precious and battery metals exploration and project generation in Australia, Alaska and Papua New Guinea. Triple Mt Everest summiteer. Previous directorships held in the mining and NFP sectors, currently CEO of Copper Search Ltd (ASX:CUS).

Dr Paul Kitto

Non-Executive Technical Director

Geologist with 35 years' experience in the mining industry and an impressive track-record including numerous multi-million ounce gold discoveries in Africa, Australia and Papua New Guinea. He is also a Technical Director of Tietto Minerals Ltd (ASX: TIE) Meteoric Resources Ltd (ASX: MEI) and Peako Limited (ASX: PKO).

Mark Holcombe Executive Director of Corporate Development

Mr Holcombe is US-based with over 30 years of experience in corporate and investment banking, M&A advisory, corporate development and asset management. Mr Holcombe has an extensive global network, focusing on the battery materials and precious metals sectors. He is currently a senior advisor to Nebari Holdings which provides global financial solutions to the resource sector and works 1/3 time for Resolution.

Christine Lawley

Exploration Manager

Christine has 15 years' mineral exploration experience in gold, base and strategic metals with Newmont, Musgrave Minerals and Iluka and holds a Masters Degree in Ore Deposit Geology. Christine has a wealth of experience from mine site geology, resource modelling to early-stage exploration. Christine is also Principal Geologist.

Dr David Rawlings

Consulting Geologist

Dr Rawlings has extensive Lithium expertise and served as the exploration manager for Core Lithium (ASX: CXO) for six years from 2016-2021 and drove much of the exploration success to which Core owes it's success. Dr Rawlings has extensive sediment-hosted battery metals expertise and worked for uranium producer Cameco and Toro Energy as the exploration manager throughout a 30-year career in the industry.

RESOLUTION MINERALS PROJECTS

PROJECT NAME: WOLLOGORANG

Location: Northern Territory
Lat-Long: 17°S, 137°E
Key Commodities: Copper, Cobalt
Ownership: 100% Resolution
JV Partner: 02 Minerals earning in

Global uncertainty and volatility retains gold's attractiveness

PROJECT NAME: 64NORTH

Location: Alaska
Lat-Long: 64°N, 144°W
Key Commodities: Gold, Copper
Ownership: 42% Resolution
JV Partner: RML earning in

PROJECT NAME: CARRARA RANGE

Location: Northern Territory
Lat-Long: 18°S, 137°E
Key Commodities: Manganese, Iron Ore,
Battery Metals
Ownership: 100% Resolution

PROJECT NAME: BENMARA

Location: Northern Territory
Lat-Long: 18°S, 136°E
Key Commodities: Battery Metals
Ownership: OZ Minerals earning in

AUSTRALIA

The voracious appetite for copper, cobalt, nickel, aluminum and other battery metals required to convert the world from fossil fuels to green elctrical alternatives is now a short, medium and long term reality

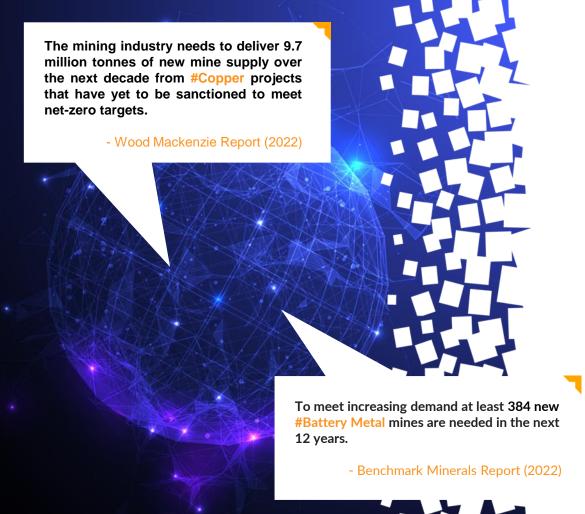

A NEW FOCUS

Over the next year Resolution Minerals is sharpening its focus on critical new energy metals that will enable the global energy transition to a carbon-neutral economy.

Resolution already holds multiple Australian projects prospective for copper, cobalt, manganese, lead, zinc, uranium and holds ~5% stake in Midwest Lithium – all commodities in high demand and critical for the transition to a carbon-neutral economy

Drilling is currently underway at the Wollogorang Copper Project

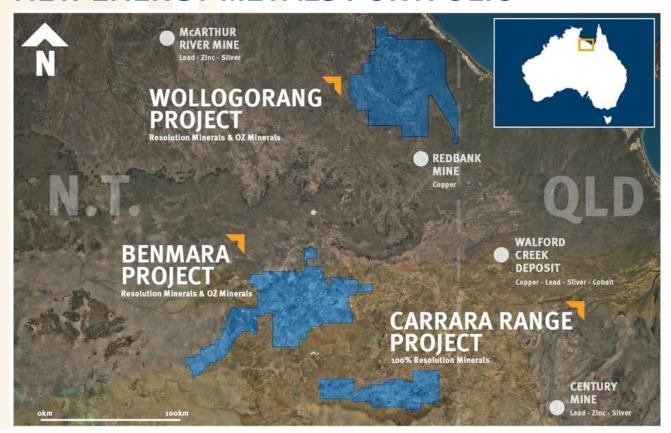

NEW ENERGY METALS

Resolution Minerals believes that the transition to a carbon-neutral economy is going to create a lot of opportunities to make the next big new energy metals discovery.

RML is positioning itself to leverage this emerging super-cycle by growing its portfolio of projects that are prospective for indemand commodities such as copper, cobalt, manganese, zinc, uranium and lithium.

NEW ENERGY METALS PORTFOLIO

The Benmara,
Wollogorang and
Carrara Range
Projects are part of
Resolution's strategy to
make the next big
energy metals discovery
in under explored
regions of Northern
Australia

WOLLOGORANG PROJECT (Cu, Co, U)

The underexplored Wollogorang Project is located in the highly prospective McArthur Basin, with surrounding ground held by Teck, BHP, Rio Tinto, Redbank and South 32.

STATUS:

~6500m drilling program underway

OVERVIEW

- Covering 3,825km² in the McArthur Basin prospective for sedimentary hosted battery metals: copper, cobalt and hard rock uranium.
- Wollogorang is positioned on Geoscience Australia's newly defined base metal corridor - (Hoggard et al 2020).
- · Proven mineralisation with the Stanton Cobalt Deposit.
- Farm-in & JV agreement struck with Australian copper producer OZ Minerals. OZL can earn a 51% interest by spending ~\$4.9m over 5 years.

KEY NEWS

RML has commenced it's first drilling program with input from the OZ Minerals team. The program is been designed to test significant geophysical anomalies in favourable stratigraphic and structural positions for hosting mineralisation.

WHAT'S NEXT:

Drilling assays due in early 2023.

BENMARA PROJECT (Cu, Pb, Zn, Co, U)

The Benmara Project gives RML a commanding ground position in the South Nicholson Basin, one of the most under-explored parts of Australia.

The rocks are analogous to world-class McArthur River Mine and other significant deposits in the region.

STATUS:

Drilling planned

OVERVIEW

- Covering 3,840km² of the South Nicholson Basin margin and positioned on the Fish River Fault analogous rocks to worldclass McArthur River Mine and other significant deposits in the region.
- A successful 'proof of concept' RC drilling program confirmed up to ~200m thick shale units ideal trap rocks for base metals.

KEY NEWS:

Farm-in & JV agreement struck with Australian copper producer OZ Minerals.

The recent agreement will see OZ Minerals (ASX: OZL) sole fund exploration activities in stages, potentially through to Final Investment Decision (FID) to mine. OZL can earn a 51% interest by spending \$4m over 5 years.

WHAT'S NEXT:

Heritage surveys completed and drilling planned for 2023.

CARRARA RANGE PROJECT (Mn, Fe, Cu, Pb, Zn)

The Carrara Range Project is prospective for sediment hosted battery metals. The project is complementary to Resolution's nearby Benmara and Wollogorang Projects.

STATUS:

Detailed desktop review underway

OVERVIEW

- The project covers 1,271 km² in the South Nicholson Basin
- Q4, 2021 successful proof of concept RC drilling program confirmed up to ~200m thick shale units ideal trap rocks for base metals to the north on the adjacent Benmara Project.

KEY NEWS:

Geoscience Australia identified a manganese mineral occurrence within the project area, untested by drilling, highlighting the underexplored and prospective nature of the project. Land access negotiations and heritage surveys are ongoing to access this exciting prospect.

WHAT'S NEXT:

Native title access agreements and heritage surveys in 2023

A GROWING PORTFOLIO FOR A GROWING MARKET

Throughout 2022 Resolution Minerals has added several new projects as part of its commitment to grow its exposure to new energy metals.

MIDWEST LITHIUM (Li)

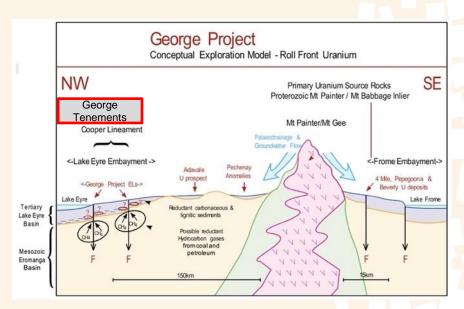

RML has a ~5% stake in North American focussed hard rock lithium exploration company Midwest Lithium and is part of RML's commitment to growing its exposure to new energy metals.

OVERVIEW

- Midwest Lithium has acquired ground in the Black Hills Region of South Dakota, an underexplored known spodumenepegmatite lithium field in an area with significant past spodumene (lithium) production.
- Dakota is a top-rated North American mining jurisdiction with established large-scale mining operations.

GEORGE PROJECT (Uranium)

Schematic diagram of the conceptual model for the George Project

STATUS:

Detailed desktop review underway

OVERVIEW

- The George Project encompasses 2,839km² in South Australia.
- Conceptual Kazakhstan style sediment hosted uranium project to the west of the Mt Painter inlier in northern flinders. The Mt Painter inlier is the source of mineralisation of the Beverly and 4-Mile deposits to the East of the inlier. Underexplored.

LATEST NEWS:

Tenements granted in late 2022

WHAT'S NEXT:

Native title land access agreements and preliminary ground work, followed by airborne EM geophysics surveys in 2023.

64NORTH PROJECT

The 64North Gold Project is in the highly prospective Tintina Gold Province, home of <u>GIANT</u> size gold deposits.

Deposit sizes stated as Endowment (Resources + Reserves + Historic Production), from Company websites, as listed on disclaimer slide

STATUS:

Assays pending

OVERVIEW

- **357km**² surrounding the 12M oz Au Pogo Gold Mine (~227km²tenure) owned by Northern Star (ASX:NST).
- Prospective for high-grade Pogo-style gold and Cu-Mo-Au porphyry mineral systems
- Expenditure requirements to earn 51% interest have been completed, final shareholder approval (at this AGM) is required for 10m milestone shares to be issued to vendor and US\$100K cash by 31/07/23.
- Since 2019, RML has built a strong pipeline of prospects, acquired new geophysical data sets and built jurisdictional expertise.

LATEST NEWS

A 5-hole, 2,324m drill program at Tourmaline Ridge was completed in August 2022.

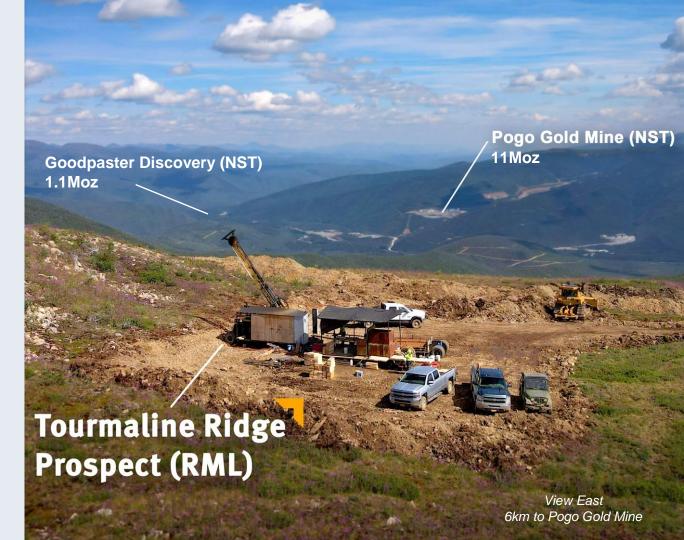

The program targeted Pogo-style highgrade gold in a NW dipping shear coincident with a large surface Au geochemical anomaly and up to 4.8g/t Au in trenching results.

Early Results:

Select assay results (16% of the samples) have been received. Although there were no significant gold results (>0.5g/t) low-level elevated gold (0.04 – 0.2g/t) is common and shows distinctive trends in both holes associated with Pogo Style quartz veins. It also indicates that a gold-bearing hydrothermal event has occurred across a wide area at Tourmaline Ridge.

More Results:

The remaining results (84%) are expected in December based on current lab turn-around times.

WHAT'S NEXT

- Remaining assays (84%) from the Tourmaline Ridge due in late 2022. These results will determine the exploration program in 2023.
- A pipeline of high-quality targets to test, including Cu-Mo-Au porphyry mineral systems on the Divide Block.
- Resolution is evaluating multiple strategic alternatives to advance the 64North Gold Project in order to maximize shareholder value and create a new precious metals platform company.

INVESTMENT HIGHLIGHTS

- Strong technical team with track record of exploration success
- A growing portfolio of projects that have exposure to in demand commodities
- A pipeline of high quality targets to put in front of the drill bit
- A de-risked approach with JV partners sole funding exploration on the Wollogorang and Benmara Projects.

DISCLAIMER, JORC INFORMATION & COMPETENT PERSONS STATEMENT

This presentation has been prepared by Resolution Minerals Ltd (Resolution). This document contains background information about Resolution current at the date of this presentation. The presentation is not summary form and does not purport to be all inclusive or complete. Recipients should conduct their own investigations and perform their own analysis in order to satisfy themselves as to the accuracy and completeness of the information, statements and opinions contained in this presentation is for information purposes only. Neither this presentation nor the information contained in it constitutes an offer, invitation, solicitation or recommendation in relation to the purchase or sales of shares or other securities in any jurisdiction. Competent Persons Statement

The information in this report that relates to Exploration Results is based on information compiled by Mr Duncan Chessell who is a member of the Australasian Institute of Mining and Metallurgy and Australian Institute of Geoscientists. Mr Chessell is a Director and full-time employee of the company. Mr Chessell holds Shares, Options and Performance Rights in the Company as has been previously disclosed. Mr Chessell has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Duncan Chessell consents to the inclusion in the report of the matters based on his information in the form in which it is appears.

Project Ownerships

JORC Information

64North Project - RML holds a 42% Interest and is earning to a 60% interest with a pathway to earn up to 80% on a "best block", see ASX:RML Announcement 31/1/22. Benmara and Wollogorang Projects, RML holds a 100% interest with Farm-in Agreement with OZL to earn-in, see RML Announcement 24 August 2021 and 13 May 2022. Carrara Range Project – RML has a 100% ownership ASX Announcement 3 February 2022.

Australian Projects Location Map – source of data Geoscience Australia (LAB 170km Depth Corridor - Hoggard et al 2020), Northern Territory Government of Australia (STRIKE Tenure and Geoscience Information, Queensland Government (Open Data Portal Queensland Mining and Exploration Tenure Series).

Tintinta Gold Province Map – source of data: Kensington (Coeur Mining, www.noven.coeur.com), Pogo (Northern Dynasty, www.noven.coeur.c

PROJECT OWNERSHIP SUMMARY

64North Project: 42% Interest in 64North Project*							
Stage	RML US\$ CASH SPEND	% Earn in RML	RML Shares to	Stage Completion	Due Date		
Year 3	Required Completed	51%	Millrock 10m*	Fee US\$ \$100,000	31/7/2023		
Right to form JV on co-funding basis or continue to earn-in							
Year 4	\$2.35m	60%	10m	\$100,000	31/1/2024		

*shares issued subject to shareholder approval at 2022 AGM. RML holds right of first refusal (ROFR) over vendor interest (Millrock Resources). Vendor (Millrock Resources) is a project generator listed on the TSXV: MRO. Pathway to 80% on one "best Block" of 9 blocks, by loan carrying vendor to first production. Minor NSR royalties to historic prospectors range from 0% to maximum 1.5% on certain areas with buy downs. *One off 6 month "grace period" can extend in any one due date by 6 months. i.e. Year 3 would become 31/7/2023 (as above in table) — see ASX:RML Announcement 31 January 2022 for more details.

Project	Current Interest	Details	
Benmara	100%	 Subject to Farm-in Agreement with OZ Minerals (ASX: OZL) OZL can earn a 51% interest by spending ~\$4m over 5 years RML may retain 49% interest by electing to participate from year 6 If RML elects not to participate, OZL has the option to earn a 75% interest, by sole-funding and delivering a Positive Final Investment Decision to Mine (at a minimum spend of \$1m/year OZL has a further 5 years to complete) 	
Wollogorang	100%	 Subject to Farm-in Agreement with OZ Minerals (ASX: OZL) OZL can earn a 51% interest by spending ~\$4.9m over 5 years RML may retain 49% interest by electing to participate from year 6 If RML elects not to participate, OZL has the option to earn a 75% interest, by sole-funding and delivering a Positive Final Investment Decision to Mine (at a minimum spend of \$1m/year OZL has a further 5 years to complete) 	
Carrara Range	100%	Early Stage new acquisition, undergoing full review. Highly prospective for manganese from surface, battery metals and iron ore.
