Calix and CEMEX working towards decarbonisation of the construction value chain

Sydney, Australia | 23 November 2022 – Australian environmental technology company, Calix Limited (ASX: CXL) (“Calix” or “the Company”) is pleased to provide an update following a press release from global building materials company, CEMEX, S.A.B. de C.V. (“CEMEX”) titled, “CEMEX strengthens commitment to decarbonize the construction value chain” published on its website on 21 November 2022 (EST).

The CEMEX press release announced new Carbon Capture, Utilisation, and Storage (CCUS) projects, including:

“Three Front End Engineering (FEED) studies to scale CCUS technologies at CEMEX plants in Germany, Poland, and the US. The studies fall under the scope of a new global license agreement with Leilac, a subsidiary of Australian technology company Calix. The agreement enables CEMEX to leverage Leilac’s highly efficient direct separation technology, to capture CO₂ at a low cost in its operations.”

Leilac, Calix’s 93% owned subsidiary focused on the decarbonisation of cement and lime, and CEMEX have a longstanding partnership. CEMEX is a founding and valued member of a consortium of companies and institutions partnering to develop and apply the Leilac technology through the Leilac-1 and Leilac-2 projects.

Calix and Leilac are working closely with CEMEX to progress the three projects mentioned in the press release as well as a global licence agreement, currently under negotiation, covering CEMEX’s global operations. Calix and Leilac will continue to work with CEMEX towards the shared goal of decarbonised cement and lime.

The official press release from CEMEX can be found at: <https://www.cemex.com/-/cemex-strengthens-commitment-to-decarbonize-the-construction-value-chain>

About Calix

Calix is a team of dedicated people who are urgently developing great businesses, leveraging our patented technology, that deliver positive global impact.

The core technology is being used to develop more environmentally-friendly solutions for water treatment, CO₂ mitigation, biotechnology, advanced batteries, and more sustainable mineral and chemical processing.

Calix develops its technology via a global network of research and development collaborations, including governments, research institutes and universities, some of world's largest companies, and a growing customer base and distributor network for its commercialised products and processes.

Because there's only one Earth – Mars is for Quitters.
