About Critical Minerals Group Limited

Critical Minerals Group Limited (**ASX:CMG**, **CMG** or the **Company**) is an exploration company with the principle focus of developing critical minerals projects. CMG was formed to identify, secure, acquire and develop critical mineral resource tenements in proven regions in Australia.

CMG is building its position in the vanadium market, holding a tenement in north-west Queensland near the town of Julia Creek which is its flagship project known as the Lindfield Vanadium Project. CMG also holds tenements for projects at Figtree Creek and Lorena Surrounds, both exciting greenfield copper-gold projects that support CMG's focus on critical mineral opportunities. CMG has also applied for three tenements within close proximity to the Lindfield Vanadium Project, forming its Whinmoor Project, Lara Downs Project and Lindfield North Project.

CMG is founded on the outlook of the global energy disruption and the transition that is currently underway and the chance to grasp the opportunities arising from the substantial changes in the world around us. The rising standard of living of a growing global population is likely to continue to drive demand for critical minerals for years to come, particularly during the phase of decarbonisation and electrification. The world will need to find a way to meet this growing demand for such minerals, and CMG is well-positioned to meet this new economy mineral demand as the world turns towards a more renewable future.
