Dear Yulia,

REQUEST FOR VOLUNTARY SUSPENSION

In accordance with ASX Listing Rule 17.2, Gold Mountain Limited (ASX: GMN) requests a voluntary suspension of its securities pending the release of an announcement in relation to further reconnaissance rock chip sampling results from the Company's lithium JV projects, Brazil ("Announcement").

The Company requests the voluntary suspension remains in place until the release of the Announcement, which it expects to make prior to the commencement of trading on Friday, 6 January 2023.

The Company is not aware of any reason why the request should not be granted.

This ASX announcement has been authorised by the Board of Gold Mountain Limited

About Us

Gold Mountain (ASX:GMN) is a mineral explorer with projects based in Brazil and Papua New Guinea (PNG). These assets, which are highly prospective for a range of metals including lithium, copper and gold, are now actively being explored.

Gold Mountain has gradually diversified its project portfolio. In November 2022, the company acquired an initial 20% holding in a package of highly prospective lithium licences located within the eastern Brazilian lithium belt, spread over parts of the Borborema Province and São Francisco craton in north-eastern Brazil. The company can earn an additional 55% interest through incurring project expenditure of \$2.75 million over a 2-year period. More recently, Gold Mountain announced plans to acquire a 75% interest in a package of seven highly prospective lithium exploration licenses located in the Salinas II Project area in eastern Brazil.

In PNG, Gold Mountain is exploring the Wabag Project, which covers approximately 950km² of highly prospective exploration ground in the Papuan Mobile belt. This project contains three targets, Mt Wipi, Monoyal and Sak Creek, all lying within a northwest-southeast striking structural corridor. The three prospects have significant potential to host a porphyry copper-gold-molybdenum system and, or a copper-gold skarn system. Gold Mountain's current focus is Mt Wipi, which has been subjected to several phases of exploration, and the potential to host a significant copper-gold deposit is high. The current secondary targets are, in order of priority, Monoyal and Sak Creek.
