

27 January 2023

QUARTERLY ACTIVITIES REPORT FOR THE PERIOD ENDED 31 DECEMBER 2022

During the December 2022 Quarter, the Company's main field activities were the continuation and implementation of the Future Work Program described in the ASX announcement dated 17 February 2022. While Covid related restrictions on travel and personnel availability further eased during the Quarter, frequent rain events and flooding continued to impact on the implementation of field programs. Central New South Wales regions were affected by widespread floods in October and November 2022, including devastation of the town of Molong near Copper Hill.

REVIEW OF PROJECTS

The Golden Cross Resources Ltd (GCR) portfolio of projects is diversified both by commodity and by geological province (**Figure 1**). It includes projects located in well-established mineral provinces where prospectivity is underlined by significant operating mines, known mineral deposits and high levels of current exploration activities:

- ❖ Palaeozoic Lachlan Fold Belt in New South Wales (NSW):
 - Macquarie Arc Ordovician Porphyry Province – Copper/Gold;
 - Silurian VMS (volcanic-associated massive sulphide) Province – Zinc/Copper/Gold;
 - Cobar Region – Base Metals/Gold;
- ❖ South Australian Gawler Craton – Iron Oxide/Copper/Gold/Rare Earths (IOCG);
- ❖ Northwest Queensland – Phosphate/Uranium/Rare Earths.

Golden Cross Resources Australian Projects

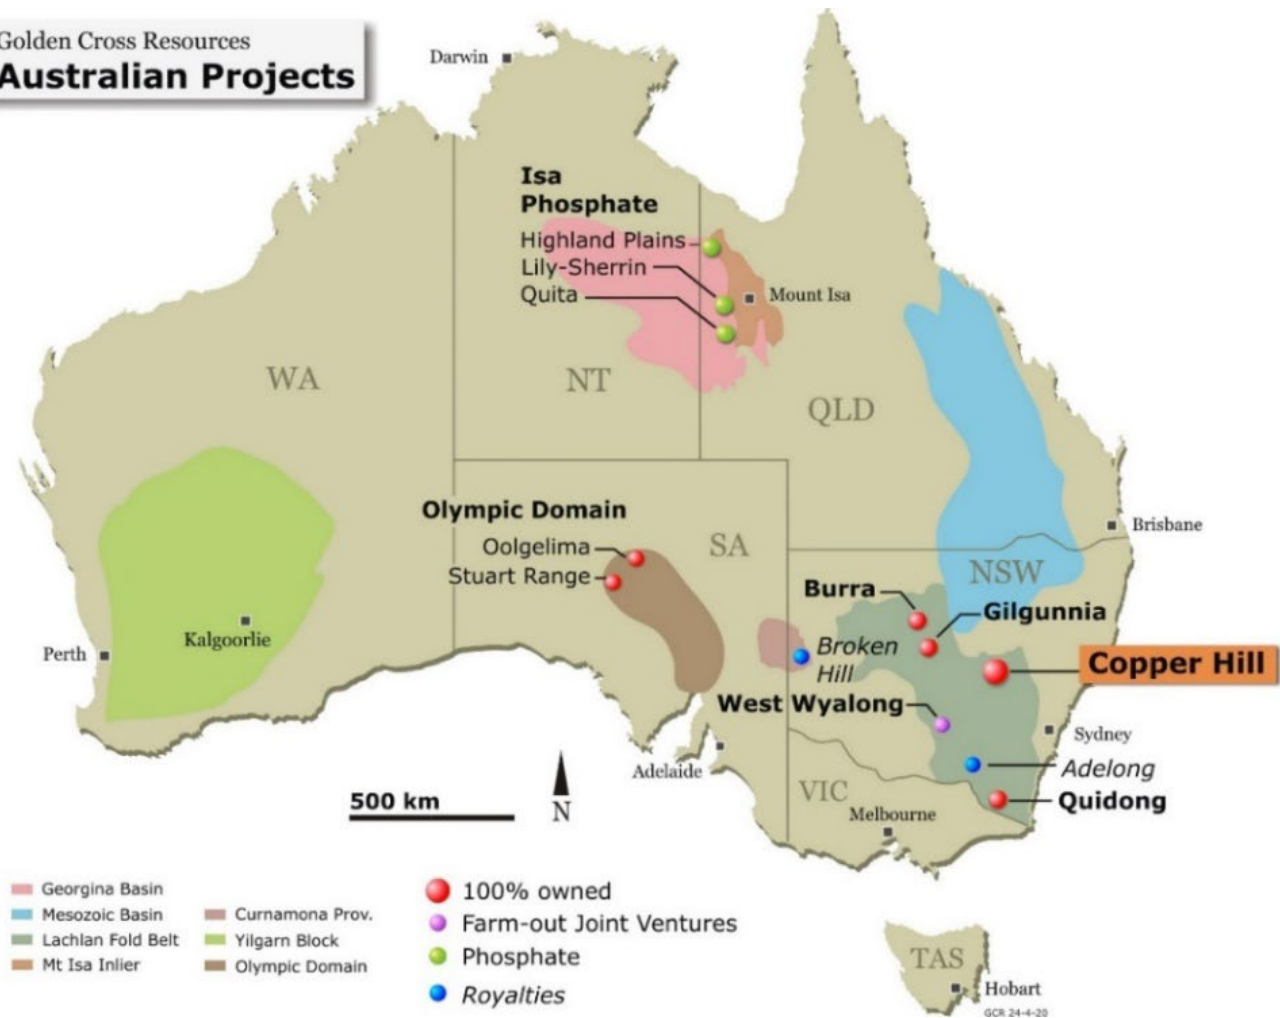

Figure 1: GCR Projects Status Map
[details of current projects are included in the Mineral Tenements Table at the end of this report]

COPPER HILL – NEW SOUTH WALES (NSW) GCR 100% interest

Copper Hill is within the same Ordovician-age Macquarie Arc volcanic belt (the Molong Volcanic Belt – “MVB”) that hosts Cadia-Ridgeway and other significant gold-copper deposits in the Central West Region of NSW (**Figure 2**).

Copper Hill is approximately 50 kilometres north of Cadia on the northern edge of a structural corridor formed by the interpreted west-northwest (WNW) trending Lachlan Transverse Zone (LTZ). Cadia is one of Australia’s larger producing gold mines with annual production of 560,702 ounces gold and 85,383 tonnes copper in FY 2022 from ore grading 0.87 g/t gold and 0.39% copper [ASX announcement of Newcrest Mining Limited (ASX: NCM) Quarterly Report to 30 June 2022]. In the September 2022 Quarter, treated ore grades were 0.81g/t gold and 0.40% copper [ASX announcement of Newcrest Mining Limited (ASX: NCM) Quarterly Report to 30 September 2022].

A resource estimate for the Boda Prospect, also in the Molong Volcanic Belt, 60 kilometres north of Copper Hill, reported 624 million tonnes grading 0.26 g/t gold, 0.14% copper and 0.47 g/t silver, at a 0.3 g/t gold equivalent cut-off [ASX announcement of Alkane Exploration Limited (ASX: ALK) 30 May 2022 - “Boda Resource Estimate of ~10.1M Gold Equivalent Ounces”].

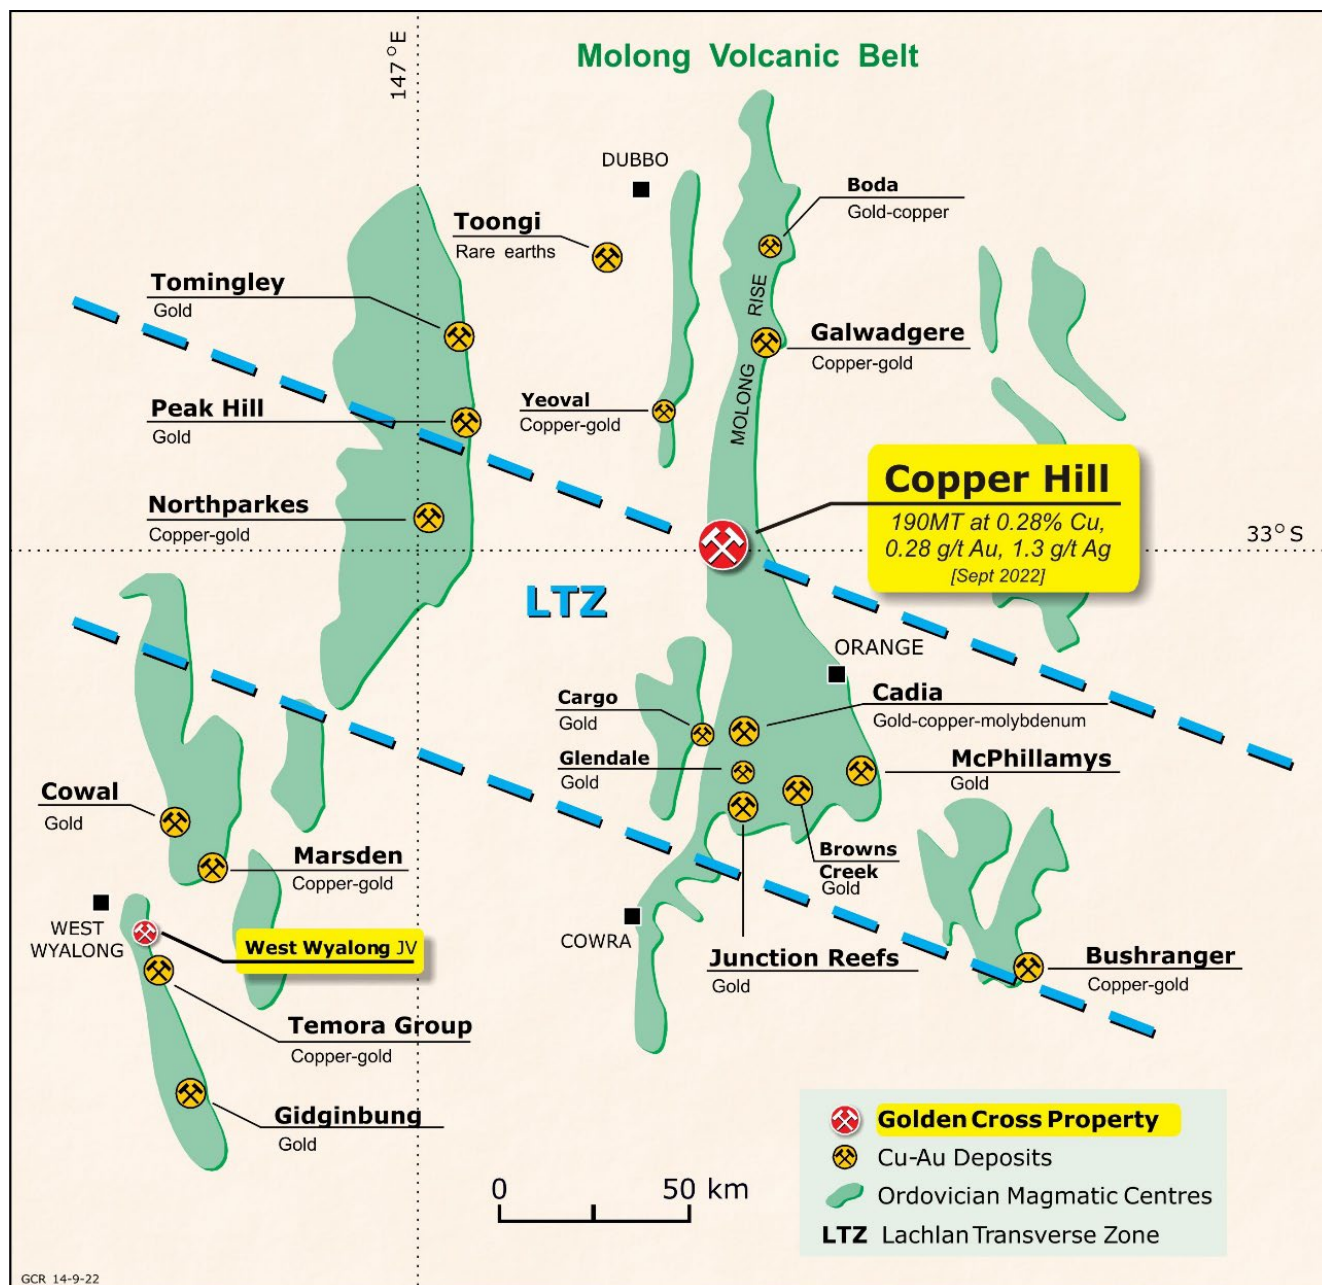

Figure 2: Copper-gold deposits of the Macquarie Arc

During the December 2022 Quarter, work programs at Copper Hill were largely disrupted by weather events and access restrictions. Tenement geochemistry and geophysics activity included planning and review of recent datasets.

Mineral Resource Estimate

Following the review by H&S Consultants of the resource estimates history at Copper Hill during the March 2022 Quarter, an updated Mineral Resource Estimate (MRE) was completed during the September 2022 Quarter [GCR: ASX announcement on 6 September 2022].

The updated MRE was completed at a range of copper or gold cut-off grades within the constraint of an updated optimised reporting pit with a focus on 0.2% copper only cut-offs to facilitate comparisons with previous estimates and also by applying combined cut-off grade criteria that includes gold blocks outside the blocks defined by the copper only cut-off, and not previously reported in 2015.

The 2022 MRE has been subdivided by classification and material type (Table 1 and Table 2).

Table 1: 2022 MRE by Classification
(above either 0.2% Cu or 0.2g/t Au Cut-off Grades, within 2022 Pit Shell)

Class	Mt	%Cu	g/t Au	g/t Ag	% S	SG	Mt Cu	Moz Au	Moz Ag
Measured	58	0.32	0.34	1.5	2.3	2.61	0.19	0.65	2.8
Indicated	74	0.27	0.26	1.3	2.5	2.63	0.20	0.62	3.1
Inferred	58	0.23	0.25	1.1	2.5	2.65	0.14	0.45	2.1
Total	190	0.28	0.28	1.3	2.4	2.63	0.52	1.72	7.9

The 2022 MRE Classification using combined cut-off criteria has 31% Measured, 39% Indicated and 30% Inferred material and includes 176Mt of sulphide mineralisation.

Table 2: 2022 MRE by Oxidation Type
(above either 0.2% Cu or 0.2g/t Au Cut-off Grades, within 2022 Pit Shell)

Class	Mt	%Cu	g/t Au	g/t Ag	% S	SG	Mt Cu	Moz Au	Moz Ag
Oxide	8.7	0.18	0.28	1.0	0.2	2.23	0.02	0.08	0.3
Transition	5.4	0.30	0.24	1.3	1.1	2.38	0.02	0.04	0.2
Sulphide	176	0.28	0.28	1.3	2.6	2.66	0.49	1.60	7.4
Total	190	0.28	0.28	1.3	2.4	2.63	0.52	1.72	7.9

Note: All volume, tonnage, density, grade and metal figures are rounded to 2 significant figures.

Oxide material in the 2022 MRE is 5% of total MRE tonnes. Copper is depleted by weathering in parts of the oxide zone, leaving residual gold with potential to be treated in a separate extraction process.

Silver estimates have been reported for the first time and with grades that are higher than comparable copper-gold deposits, which are typically around 0.6 to 0.8 g/t silver.

The Mineral Resource Estimate report is based on work compiled by Mr Arnold van der Heyden, a Member and Chartered Professional (Geology) of the Australasian Institute of Mining & Metallurgy (AusIMM) and a director of H&S Consultants Pty Ltd (HSC). The information that relates to database information and review for the report was supplied by Mr Glenn Coianiz, a Member and Registered Professional Geoscientist of the Australian Institute of Geoscientists (AIG) and an employee of Exploris Pty Ltd, a consultancy that provides geoscience and geographic information systems services to GCR. The Reporting Pit optimisation modelling for the report was undertaken by mining engineer Mr Mark Moddejongen, a Fellow of the Australasian Institute of Mining & Metallurgy (AusIMM), an employee of Mining Dynamics Pty Ltd, a mining engineering consultancy, and an independent non-executive director of GCR.

Details from the report were released in an ASX announcement on 6 September 2022. GCR confirms that it is not aware of any new information or data that materially affects the information included in the ASX announcement of 6 September 2022. GCR confirms that all material assumptions and technical parameters underpinning the Mineral Resource Estimate in that ASX announcement continue to apply and have not materially changed. GCR confirms that the form and context in which the Competent Persons findings are presented have not been materially modified from the original ASX announcements.

The MRE will contribute to valuation update and design of the feasibility study components for the ongoing work program. Feasibility component activities include: metallurgical test work and evaluation of processing technologies; mining and engineering studies and costing updates; environmental studies and baseline data; water supply sources and usage; land tenure and ownership; and development permit procedures at state and local government levels.

In addition, additional drilling may be required to bring peripheral zones of mineralisation into future resource estimate updates. Potential drilling types are oxide follow-up; resource infill and extensions along strike and down dip; metallurgical sampling; geotechnical sampling; hydrology targets, and satellite deposit targets in the licence areas adjacent to Copper Hill itself (**Figure 6**).

The ongoing work program is anticipated to provide the supporting information for a Mining Lease Application and associated Development Consent requirements at Copper Hill.

Figure 3: Copper Hill: Drillhole distribution by type; showing the outline of the 2022 optimised reporting pit and prospect names.

COBAR REGION – NSW

GCR 100% interest

The Cobar region is well endowed with high grade polymetallic deposits supporting long life mining operations. After divestments, GCR has a residual holding of strategically located tenements (**Figure 4**) in two areas.

Canbelego – along strike from Mt Boppy Goldmine and recent activity at the Canbelego Copper deposit [refer HLX ASX announcement: 19 December 2022 – Canbelego Deep drilling Update] Further geochemical research consisting of innovative biogeochemical sampling techniques has been completed and results are being evaluated for extension over a wider tenement area. Geophysical surveys are planned over the mineralised trends, subject to land access.

Gilgunnia – the Kilparney Extended tenement is well located relative to recent exploration and discovery activity in the region at Wagga Tank, Mallee Bull and Federation. Following the previous gravity survey, infill stations are planned when site access through thick scrub can be achieved.

GCR is well placed to seek new opportunities based on its long term operating experience in the region.

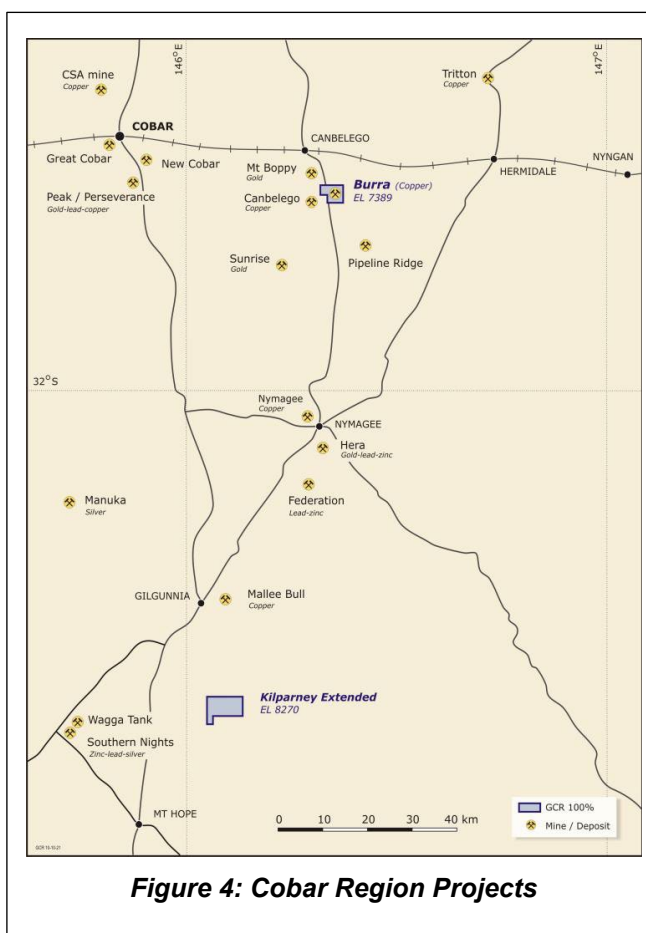

Figure 4: Cobar Region Projects

LACHLAN VMS PROVINCE – NSW

Silurian formations prospective for volcanic-associated massive sulphide (VMS) deposits extend over 300 kilometres from the Orange-Bathurst region in NSW through Woodlawn and Captain's Flat and southwards into eastern Victoria.

Quidong

GCR 100% interest

Quidong has extensive occurrences of carbonate-hosted zinc/lead and gold mineralisation, and potential intrusive-related gold mineralisation, which occurs elsewhere in the region. Previous data and GCR field reconnaissance have identified high grade zinc-lead-gold drill targets which remain to be tested. Electrical prospecting methods were previously trialled but the large amount of conductive sulphidic rocks in the area has rendered the results inconclusive and alternative geophysical techniques for refining drill targets are being evaluated.

No activity was implemented during the December 2022 Quarter, after the landholder advised access to previous drill site to assess rehabilitation requirements has been interrupted by frequent rain events and flooding of the access causeway over the Delegate River.

SOUTH AUSTRALIA (SA)
Iron Ore Copper-Gold (IOCG)
GCR 100% interest

The Exploration Program for Environment Protection and Rehabilitation (“EPEPR”) lodged with the SA Department for Energy and Mining (“DEM”) on 20 December 2021 covers three proposed drillholes located northeast of Coober Pedy, South Australia, to test geophysical targets (**Figure 5**).

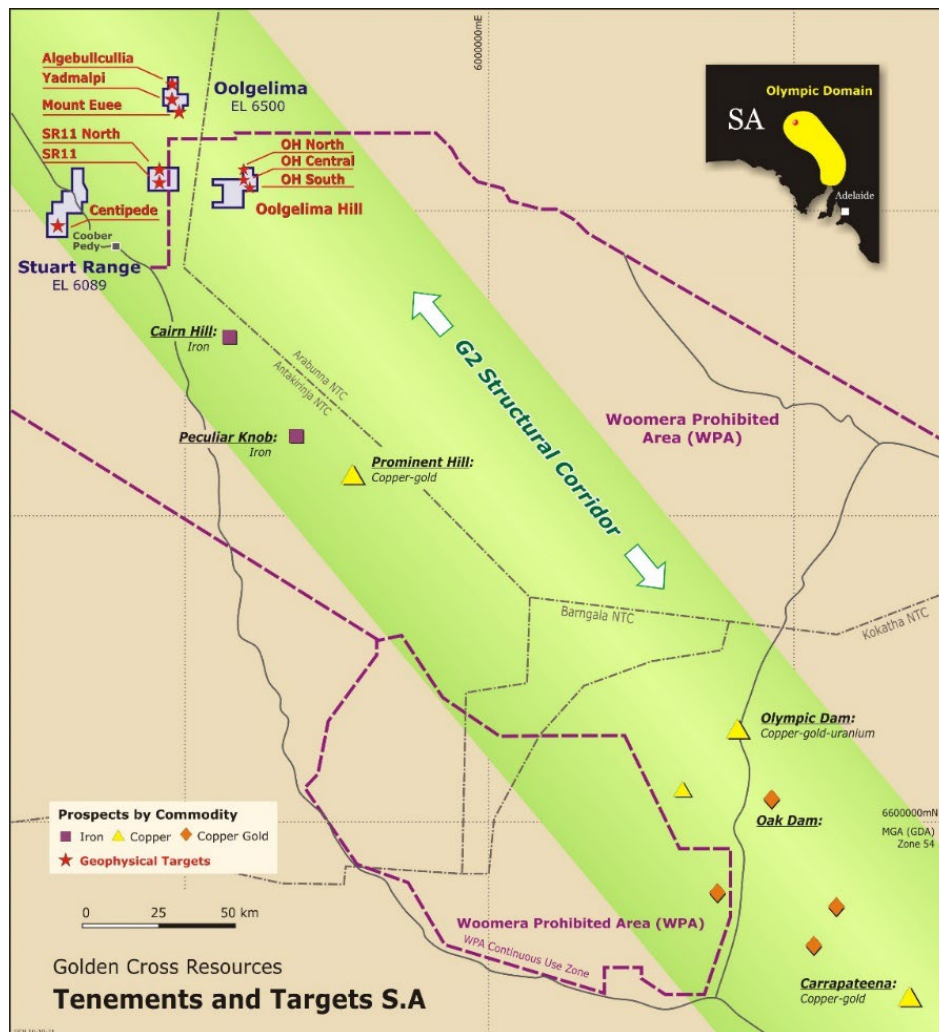

Figure 5: Gawler Craton Projects: Location & Drill Targets

During the December 22 Quarter, land access requirements continued to be assessed before the proposed Financial Year 22-23 drilling can be commenced, including:-

1. Notice of Entry to land stakeholders 42 days prior to entry [Pastoral Leaseholders, Native Title Holders (two), overlapping Petroleum Licence Holders];
2. Confirmation of existing Native Title Heritage surveys over proposed drill sites;
3. Reconnect with Native Title Groups – Antakirinja Matu Yakunytjatjara (“AMY”) and Arabana and their representatives;
4. Liaison with Department of Environment & Water (DEW) regarding drilling near Artesian Basin aquifers; also Coober Pedy Shire Council [location of drilling near existing town water bores];
5. Woomera Prohibited Area (“WPA”) permit – clarify permit requirements for foreign controlled explorers, and if required, seek approved independent operator to implement work program, or consider divestment to an exploration entity that can achieve access.
6. Confirm status of work programs for EL6089 relative to conditions attaching to the Coober Pedy Precious Stones Field. A renewal application for EL6089 was lodged on 25 July 2022.

ISA PHOSPHATE – QUEENSLAND

GCR 100% interest

GCR subsidiary, King Eagle Resources Pty Ltd, holds 100% of three deposits: Highland Plains, Lily & Sherrin Creek and Quita Creek, which account for a third of the historical phosphate resources of the province.

During the December 2022 Quarter, compilation and review of the historical data continued to evaluate high grade phosphate zones and evaluate the potential for other metals such as uranium and rare earths.

Potential for rare earth elements (REE) was highlighted by a research paper published in 2021 that cited recently identified enrichments of rare earth elements in phosphate-rich rocks currently mined for phosphate fertiliser, concluding that “phosphorites are now considered an important potential source for industrial supply of REE into the future”.

[Valetich, M & others, 2021. REE enrichment of phosphorite: An example of the Cambrian Georgina Basin of Australia. J. Chemical Geology #588]

Following a presentation to the Qld Department of Resources on 5 October 2022, renewal applications were subsequently processed.

WEST WYALONG – NSW

JV with Argent Minerals Ltd (ARD or Argent). ARD 79.46%; GCR 20.54%*

The West Wyalong project is located immediately north along strike from the Temora Group of porphyry deposits. A renewal application was granted for a further 3-year term to 20 April 2025.

Following a detailed gravity survey in 2019, Argent completed RC percussion drilling in 5 holes in early 2021, with one hole, AWN002, extended by coring to 503m length [*refer ARD ASX announcement 29 March 2021*], and three significant visual zones reported. A review of geophysical modelling was planned [*refer ARD ASX announcement: 22 September 2021 Quarterly Report*].

No further information has been received from JV partner Argent.

**GCR has elected to dilute its interest in West Wyalong JV to preserve funds for other projects. Current equity confirmation is pending receipt of updated expenditures from JV operator ARD.*

INTERESTS IN MINERAL TENEMENTS

Pursuant to ASX Listing Rule 5.3.3, the Company reports as follows in relation to minerals tenements held as at 31 December 2022 and their locations. No tenements were acquired or disposed of during that quarter.

LOCATION	TENEMENT NAME	TENEMENT	km ²	HOLDER	HOLDING	EXPIRY DATE	COMMENT
NEW SOUTH WALES							
Orange Region	Copper Hill	EL 6391	95	GCO	100	9 Mar 25

Notes

EL = Exploration Permit/Licence/Application; EPM = Exploration Permit for Metals.

Full names for abbreviations are as follows:

- GCO Golden Cross Operations Pty Ltd, a wholly owned subsidiary of GCR;
- KER King Eagle Resources Pty Limited, a wholly owned subsidiary of GCR;
- ARD Argent Minerals Limited (ASX: ARD);
- GCRP GCR Panama, Inc, a wholly owned dormant subsidiary of GCR;
- MTI MapIntec Technologies Inc.

- (1) ARD earned 51% in the West Wyalong Joint Venture by spending \$750,000 by 1 June 2011. On 21 April 2017 ARD advised additional expenditure totalling \$600,000 (for a total expenditure of \$1,350,000) by 30 June 2017 was achieved, increasing its JV interest to 70%. Further expenditure by ARD has increased its JV interest to *79.46% [refer ARD ASX announcement 27 January 2022: Quarterly Report December 2021] with GCR diluting to *20.51%. Royal Gold Inc holds a 2.5% net smelter return royalty.
*Current equities remain to be confirmed when updated expenditure figures are provided by ARD.
- (2) Subject to EL2007-95 being re-activated, MapIntec Technologies Inc., a Panamanian company, has a 10% interest free-carried to a decision to mine.

EXPLORATION EXPENDITURE

During the Quarter, the Company incurred \$105,000 (paid and due to be paid for expenditure in the Quarter) in mineral exploration and evaluation expenditure.

There were no mining production and development activities during the Quarter.

PAYMENTS TO RELATED PARTIES OF THE ENTITY AND THEIR ASSOCIATES

The aggregate amount of payments to related parties and their associates for the Quarter reported in Appendix 5B Cash Flow Report Items 6.1 and 6.2 is as follows:

	\$'000
Item 6.1:	
Fees to Directors	51
Item 6.2	
Field Base Rent - Copper Hill	14
TOTAL	65

Technical Releases relevant to the December 2022 Quarter

This Quarterly Activities Report contains information extracted from GCR's ASX market announcements reported in accordance with the 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (2012 JORC Code). Further details (including 2012 JORC Code reporting tables where applicable) of exploration results can be found in the following announcements lodged on the ASX:

6 September 2022: Substantial Increase in Mineral Resource Estimate – Copper Hill.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original ASX announcements.

Competent Person Statement

The information in this report that relates to Exploration Results is based on information compiled by Mr Bret Ferris, who is a Member of the Australasian Institute of Geoscientists (AIG). Mr Ferris is an exploration consultant to, and Acting CEO of, Golden Cross Resources Limited and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Ferris consents to the inclusion in this report of the matters based on that information in the form and context in which it appears.

Forward-Looking Statement

This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning planned exploration program and other statements that are not historical facts. When used in this document, the words such as "could", "plan", "estimate", "expect", "intend", "may", "potential", "should" and similar expressions are forward-looking statements. Although Golden Cross Resources Ltd believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.

8.	Estimated cash available for future operating activities	\$A'000
8.1	Net cash from / (used in) operating activities (item 1.9)	(141)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(109)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(250)
8.4	Cash and cash equivalents at quarter end (item 4.6)	922
8.5	Unused finance facilities available at quarter end (item 7.5)	101
8.6	Total available funding (item 8.4 + item 8.5)	1,023

8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	4.1
<p><i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i></p>		
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	Answer:	
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
	Answer:	
8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
	Answer:	

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 27 January 2023

Authorised by: Jordan Li – Executive Chairman
(Name of body or officer authorising release – see note 4)

Notes

- 1 This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
- 2 If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: *Exploration for and Evaluation of Mineral Resources* and AASB 107: *Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3 Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
- 4 If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
- 5 If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
