

Dear Fellow Shareholder,

Investment portfolio performance

Inflation continued to be a key theme during the month. Company profit margins were impacted by increased input and operating costs and consumer discretionary spending also eased under the weight of continued interest rate hikes. The S&P/ASX All Ordinaries Accumulation Index decreased 2.5% in February and the S&P/ASX 200 Accumulation Index was down 2.4%. The Dow Jones Industrial Average Index fell 4.2% and the NASDAQ Composite Index was also down 1.1% in local terms during the month.

The Future Generation Global (ASX: FGG) investment portfolio increased 0.6% in February, while the MSCI AC World Index (AUD), rose 1.4%. The Future Generation Australia (ASX: FGX) investment portfolio decreased 1.7% for the month, outperforming the S&P/ASX All Ordinaries Accumulation Index which fell 2.5%.

Future Generation Australia announced an 8.3% increase in fully franked full-year dividend

The Future Generation Australia Board of Directors [declared](#) a fully franked final dividend of 3.25 cents per share, bringing the fully franked full-year dividend to 6.5 cents per share, an 8.3% increase on the previous year. The fully franked full-year dividend of 6.5 cents per share represents a fully franked dividend yield of 5.7%* and a grossed-up dividend yield of 8.1%*. The profits reserve of 30.5 cents per share as at 28 February 2023 represents 4.7 years of dividend coverage for shareholders, before the payment of the fully franked final dividend of 3.25 cents per share.

Future Generation Global announced a 16.7% increase in fully franked full-year dividend

The Future Generation Global Board of Directors [declared](#) a fully franked final dividend of 3.5 cents per share, bringing the fully franked full-year dividend to 7.0 cents per share, a 16.7% increase on the previous year. The fully franked full-year dividend of 7.0 cents per share represents a fully franked dividend yield of 6.0%* and a grossed-up dividend yield of 8.6%*. The profits reserve of 46.3 cents per share as at 28 February 2023 represents 6.6 years of dividend coverage for shareholders, before the payment of the fully franked final dividend of 3.5 cents per share.

In 2022, the Future Generation companies delivered an annual investment of \$12.3 million to our social impact partners and other not-for-profit organisations, bringing the total social investment since inception to \$65.2 million.

FY2022 Full-Year Results Webinar

Please register and join the [Future Generation FY2022 Full-Year Results Webinar](#) this Friday, 17 March at 2:30pm (Sydney time) to hear from myself, Geoff Wilson AO, Founder and Director of Future Generation, Chairman and Chief Investment Officer (CIO) of Wilson Asset Management, Mark Landau, Co-Founder, Joint Managing Director and CIO of L1 Capital and Jacob Mitchell, Founder, CIO and Lead Portfolio Manager at Antipodes Partners, who manage funds for Future Generation Australia and Future Generation Global on a pro bono basis.

In the media

Tony Waters, Co-Founder of QVG Capital, a pro bono fund manager for Future Generation Australia, was featured in [The Australian](#) following our [Meet the Manager](#) interview. I also discussed the benefits of the listed investment company structure with Tony Featherstone, Consulting Editor of ASX's [Investor Update](#). Sean Farrington, Director and Portfolio Manager at Holowesko Partners, a pro bono fund manager for Future Generation Global, was featured in the [Australian Financial Review](#). For this month's Meet the Manager, I spoke to Sean about his market outlook, views on cryptocurrency and stocks tips. The video and transcript are available [here](#), and we have included a summary of the interview in this investment update.

Please enjoy our [Q&A Interview](#) with Andy Hamilton, Founder of Human Nature, a social impact partner of Future Generational Global.

Thank you,

Caroline Gurney
CEO, Future Generation

Please enjoy our latest edition of Investment Insights. You can access the full [video](#) and [transcript](#). Read a summary of the interview below.

From where you live in the Bahamas, you had a ringside seat of what was happening with the great crypto crash. Do you think that this has damaged market sentiment?

I think it has had an impact. Every generation needs to see or experience these phenomenon that we get, these bubbles that occur. I think of crypto very much along the lines of what I experienced back in the dot.com boom when you had companies like Pets.com and e-stamps.com, spending big on advertising at the US Super bowl. We had the same thing with the crypto companies last year. Those dot.com companies all went bankrupt eventually and disappeared. But they left behind an incredible infrastructure, that was the internet, which changed all of our lives. I think crypto may do a bit of the same sort of thing. The crypto side may disappear but we'll be left with the infrastructure of block chain and decentralised finance which will have a big impact in the future for a lot of industries.

The International Monetary Fund has recently said they thought everybody had been a bit pessimistic in terms of their predictions of 'market doom and gloom'. What do you see in terms of the global markets? What is your outlook?

I think we have all been surprised by the strength in the US recently. That said, if you look at a lot of leading economic indicators, they're all consistent with levels where you would expect to be if you were about to see a recession. What has held the US up has really been the strength of the consumer. The consumer has been buoyed in the US by all of the savings that they effectively accumulated coming out of the pandemic, thanks to a lot of the stimulus programmes that were put in place. I think what has sustained the economic picture in the US in the near term has just been the strength of the consumer, but we worry a bit more about that going into the second half of the year as those savings are worked down and I think that the probabilities of a recession are better than fifty-fifty as we get in the second half. We do still have some economic concerns in the US.

If you look at excess savings in China, they had a similar phenomenon, increased by almost 50.0% from where they were pre-pandemic. That's bigger than the GDP of the UK. And like the rest of us, they want to spend and they want to get out their apartments and homes and go and travel. That spending will help places, such as Europe and some of the surrounding Asian markets.

We are really grateful that you are one of our pro-bono fund managers. Why do you do it?

In many ways my career began in Australia because the first portfolios I was given to manage at Templeton were in Australia. I started coming here in the mid-90's and have visited almost every year since. Australia's been a place I have a lot of affection for and we've had a lot of support in this market. We've been very grateful for that, and to be able to give back a bit is really gratifying and we appreciate you giving us the opportunity to do that.

In the current environment of rising interest rates, is the scene finally set finally for a resurgence in value investing?

I think so. We've been through an extraordinary period over the last 15 years coming out of the Global Financial Crisis (GFC) and I think people may have lost perspective on just how strange and unique that period was. Nine of the 14 years following the GFC, we had the Federal Reserve keep interest rates at zero. They went from owning 5.0% of assets relative to GDP to 35.0% of assets relative to GDP. They bought back a third of all mortgage backed securities and a quarter of all Treasury securities. That is a very unique environment and the consequence kept the cost of capital for companies virtually non-existent. It meant if you were a company that was going to grow, you could do it regardless of cost because you could finance the loss with a cheap loan, or even better you could get cheap financing in the form of equity because the market was willing to give you the big valuation with the promise of these future cash flows discounted back at a very low rate. And I think that contributed to this incredible disparity in performance between growth companies, what were considered growth companies, and value.

Now that's changing. The Federal Reserve is increasing rates in the US pretty dramatically. There is talk of winding down the balance sheet buying that they've done. The inflation genie has come out of the bottle. When you have 6.5% inflation like you do in the US today, interest rates can't stay at 4.5%. So we think that the kind of malaise that you had over the last 15 years coming out of the GFC is changing and cost of capital matters more. When cost of capital matters cash flow, earnings, dividends, fundamentals, balance sheet strength, all of that matters. The here and now matters rather than the hope and promise in the future.

Social impact partner in focus:

Human Nature

Founded in 2015 in the Northern Rivers region of NSW, Human Nature started as an expedition-focused program for young people with behavioural, social and mental health issues who were falling through the cracks of conventional services.

Human Nature's multi-disciplinary team provides mentoring and therapy, skill building, volunteering and physical adventure activities that focus on overcoming trauma, building resilience and lifelong wellbeing skills.

"The idea that people feel better when they're out in nature, breathing in fresh air and doing physical activity now has mainstream acceptance. But I do have to fight the assumption that all we do is take young people out into nature to make them feel good. In truth, we're a professional mental health service, with qualified and experienced clinicians, who just happen to do their work in those contexts."
