Australian Bond Exchange, an innovative financial technology and services company providing access to the OTC bond market for private investors, funds and financial institutions, is pleased to report another quarter of strong revenue growth for Q3 FY23. ABE continues on its path to make bonds more accessible to Australian private investors and service this largely untapped market in Australia.

Australian Bond Exchange CEO Bradley McCosker said “We are very pleased to report another consecutive quarter where revenue exceeded \$1 million. We also continue to see high demand for our Bond Linked Securities, reflecting the fact that investors are looking for stable investment returns from bonds as an alternative to shares.”

Net operating cash flow for the quarter was negative \$1,320,000, showing an improvement of 20% compared to the previous quarter. ABE remains committed to enhancing its net operating cash flow performance in the upcoming quarters. The company aims to achieve sustainable levels of cash flow by maintaining strict discipline on expenses while continuing its focus on growth. This will ensure

that ABE maintains a healthy cash flow position over the longer term, allowing it to invest in future growth opportunities and create value for its stakeholders.

### Operational Activities

During the period ABE launched and delivered to market \$12 million of the Ford AUD denominated 6.25% Bond Linked Security. Due to high client demand for the Dell Bond Linked Security, two additional tranches were delivered to market, taking the total value of the issuance to \$13 million.

ABE has now delivered in excess of \$100 million worth of Australian dollar denominated bond linked securities into the Australian market. These securities are linked to large multinationals such as Xerox Corporation, Dell Inc, Marks and Spencer amongst others.

ABE has continued to increase its sales and marketing activities to support its client acquisition strategy. During the quarter this resulted in an increase of new clients by 63%.

### Central Bank Digital Currency ("CBDC") in Australia

As set out in the Prospectus, one of Australian Bond Exchange's strategic goals is to leverage its innovative technologies to reduce settlement trade times from T+2 to T+0 and significantly reduce settlement risk and transaction costs for our clients. This quarter ABE reached a significant milestone towards achieving this strategic goal.

Australian Bond Exchange was selected from 140 applicants as one of 13 successful use cases to participate in the CBDC Pilot. Australian Bond Exchange is now working with the DFCRC and the RBA on a transactional CBDC pilot that will explore Corporate Bond Settlement using the RBA central bank issued digital currency "eAUD" as a use case. The findings of the CBDC pilot are scheduled to be released around mid-2023.

Australian Bond Exchange Managing Director and CEO Bradley McCosker said: "We are excited to be part of the RBA pilot program and test how CBDC could provide investors with a more efficient and transparent settlement solution in the future. This aligns closely to Australian Bond Exchange's strategy to provide all investors with equal access to the financial markets."
