### Market commentary

In April, global infrastructure stocks rose +3.5% (in A\$ terms) to post a second consecutive month of gains. Broader global equities also moved higher (up +3.1% in A\$ terms) despite mixed economic data, persistently high inflation and continued monetary tightening by most central banks.

Most listed infrastructure subsectors posted positive returns for the month. Toll Roads was the best performing subsector surging +5.1% led by several French operators, including Vinci and Eiffage. In March, these stocks were negatively impacted by France's widespread anti-pension reform protests. Our position in Vinci contributed positively to the portfolio's performance - the company reported solid earnings during the month which lifted its share price.

Argo Infrastructure's portfolio gained +3.5% for the month.
