About Spacetalk Ltd.

Spacetalk Ltd. (ASX:SPA) is the developer of technology providing tools to support family safety and security at every stage of life.

The ASX-listed company is recognised globally as a leader in the connected wearables industry thanks to its unique proprietary ecosystem that keeps families safe. This market-leading hardware and trusted, parent-controlled software platform enable children and families to experience the benefits of mobile technology securely and with confidence.

With the Spacetalk App, parents can prevent their child's access to the open internet, social media and inappropriate adult content while blocking calls and messages from unknown senders. The app also keeps track of a child's location and is customisable so every feature can be enabled and disabled as needed.

Spacetalk's best-in-class software platform supports children's development by facilitating engaging, confidence-building experiences that the whole family can participate in and enjoy.

The Spacetalk smartphone-watch is a child's first mobile phone, offering all the benefits of a smartphone and operating on a secure, private and parent-controlled ecosystem that can be customised to reflect each family's needs and values. Together, the watches and software platform provide a complete digital communication solution that families can always rely on.

Spacetalk was founded in 2001 and listed on the ASX in 2003 as MGM Wireless Limited, which developed the world's first SMS student absence notification platform for schools and went on to become Australia's most successful school messaging company. On 12 November 2020 the Company changed its name to Spacetalk Ltd.
