DroneShield Assigned with NATO Stock Numbers

- **DroneShield assigned with NATO Stock Numbers (NSNs) for RfPatrol Mk2, DroneGun Mk3, DroneGun Mk4, and DroneSentry-X.**
- **This follows up on the earlier assignment of NSN for DroneGun Tactical.**
- **NATO militaries, which are the largest existing customer segment for DroneShield, now able to purchase these additionally listed products "off the shelf".**

DroneShield Ltd (ASX:DRO) ("DroneShield" or the "Company") is pleased to announce that several of its products have been assigned a NATO Stock Number (NSN) as follows:

Product	Image	NSN
RfPatrol Mk2 handheld drone sensor		5865661674795
DroneGun Mk3 ultra-light handheld drone defeat		5865661675106
DroneGun Mk4 handheld drone defeat (the latest product in DroneGun series)		5865661674802

DroneSentry-X vehicle/ship based detection and defeat		5865661674803
DroneSentry-X vehicle/ship based detection		5865661674804

This follows up on the earlier NSN assignment for DroneGun Tactical (5865661650137) in February 2019, which significantly contributed, and continues to contribute, towards that product becoming one of DroneShield's best-selling items.

An NSN is a 13-digit numeric code, identifying all the "standardised material items of supply" as they have been recognised by all NATO countries including United States Department of Defense, and allows for any of the 31 NATO militaries to purchase the items on a "military catalogue" basis, significantly simplifying the procurement process.

The assignment of an NSN is also relevant to non-NATO customers in that it is considered to signify that the product has achieved a certain level of acceptance by the world's most discerning military customers, the members of NATO and NATO's allies.

The Company expects that the receipt of these additional NSNs for will assist its sales efforts in both NATO and non-NATO countries.
