

31 July 2023

Quarterly Activities Report for the period ended 30 June 2023

Significant Events

- Renascor entered into a non-binding Strategic Cooperation Memorandum of Understanding (**MOU**) with Japanese anode material manufacturer Mitsubishi Chemical Corporation (**Mitsubishi Chemical**).
 - Mitsubishi Chemical is Japan's largest chemical corporation and one of the world's largest producers of lithium-ion battery anode materials.
 - The MOU provides for the potential purchase by Mitsubishi Chemical of Graphite Concentrates, Purified Spherical Graphite and other graphite products from Renascor's Siviour Graphite and Battery Anode Material Project (**BAM Project**) in South Australia.
- Drilling confirmed a major extension to the Siviour Graphite Deposit, with assays demonstrating the continuity of widespread, high-grade graphite over an area extending over 3 km immediately north of the Siviour Mineral Resource.
 - Renascor considers the new drilling to offer potential for a significant increase to the Siviour Mineral Resource and to support extensions to the current pit design for future expansions beyond the capacity being currently being considered under the updated, optimised Battery Anode Material Study (**BAM Study**).
- Renascor commenced the procurement of long-lead time items for the proposed Siviour Mine and Concentrator, the upstream portion of the BAM Project. The initial procurement relates to upgrades in electrical infrastructure to permit the proposed Siviour Mine and Concentrator to connect with SA Power Network's existing electricity grid connection.
- Renascor has completed all technical and financial works for the optimised BAM Study, which has assessed an increase to the previously planned PSG production capacity of 28,000tpa¹ and additional staged expansion to meet projected demand. The results are expected to be announced in early August.
- Renascor's cash position as of 30 June 2023 was approximately A\$129 million.

Strategic Cooperation Memorandum of Understanding with Mitsubishi Chemical

On 19 July 2023, Renascor announced a non-binding Strategic Cooperation Memorandum of Understanding (**MOU**) with Mitsubishi Chemical Corporation (**Mitsubishi Chemical**).

The MOU provides for the potential purchase by Mitsubishi Chemical of both Graphite Concentrates and Purified Spherical Graphite (**PSG**) sourced from Renascor's Siviour Graphite Deposit in South Australia.

The MOU also provides a framework for Mitsubishi Chemical to work with Renascor to consider a commercial partnership with Renascor to help facilitate the development of the BAM Project in South Australia.

The parties have agreed to work to assess the feasibility of Renascor supplying to Mitsubishi Chemicals Graphite Concentrates, PSG and other refined graphite products consistent with Renascor's projected construction schedule for the BAM Project.

Following the successful completion of preliminary product validation tests, the parties have agreed to undertake further product testwork on Renascor's Graphite Concentrates, Purified Spherical Graphite and other products and to progress negotiations to determine potential volume, price and other key supply terms, as well as a potential commercial partnership.

This MOU with Mitsubishi Chemicals compliments Renascor's previously announced product offtake workstreams which are well progressed, including with the following groups, with whom Renascor has previously announced non-binding MOUs for the supply for PSG:

- South Korean conglomerate POSCO, with whom Renascor has entered into a non-binding strategic cooperation and offtake agreement². POSCO is one of South Korea's largest conglomerates and the largest anode manufacturer outside of China.
- Chinese anode company Shanxi Minguang New Material Technology Co. Ltd. (**Minguang**)³. Minguang is a subsidiary of Fujian Metallurgical Holding Co. Ltd, a large, Chinese state-owned enterprise active in the battery minerals sector.
- Chinese anode company Jiangxi Zhengtuo New Energy Technology Co. Ltd. (**Zeto**)⁴. Zeto is a leading global anode producer, with current anode production capacity of 45,000tpa and plans to add additional capacity of 150,000tpa⁵.
- Japanese trading company Hanwa Co. Ltd. (**Hanwa**)⁶. Hanwa is amongst the largest traders of battery chemicals in the Asian region and operates a dedicated Battery Team focussed on supplying graphite and other metals across the global battery value chain.

Renascor is currently discussing potential binding PSG and Graphite Concentrate offtake terms with its existing non-binding offtake partners, with discussions focusing on price, delivery schedules and other material contract terms.

In addition, Renascor continues to have discussions with other leading anode, battery and electric vehicle manufacturers in Northeast Asia, Europe and North America concerning potential PSG and Graphite Concentrate offtake.

Resource Extension Drilling

During the recently completed quarter, Renascor completed a drill program that has confirmed widespread, high-grade graphite mineralisation over an area extending over 3 km immediately north of the Siviour Mineral Resource. See Figure 1.

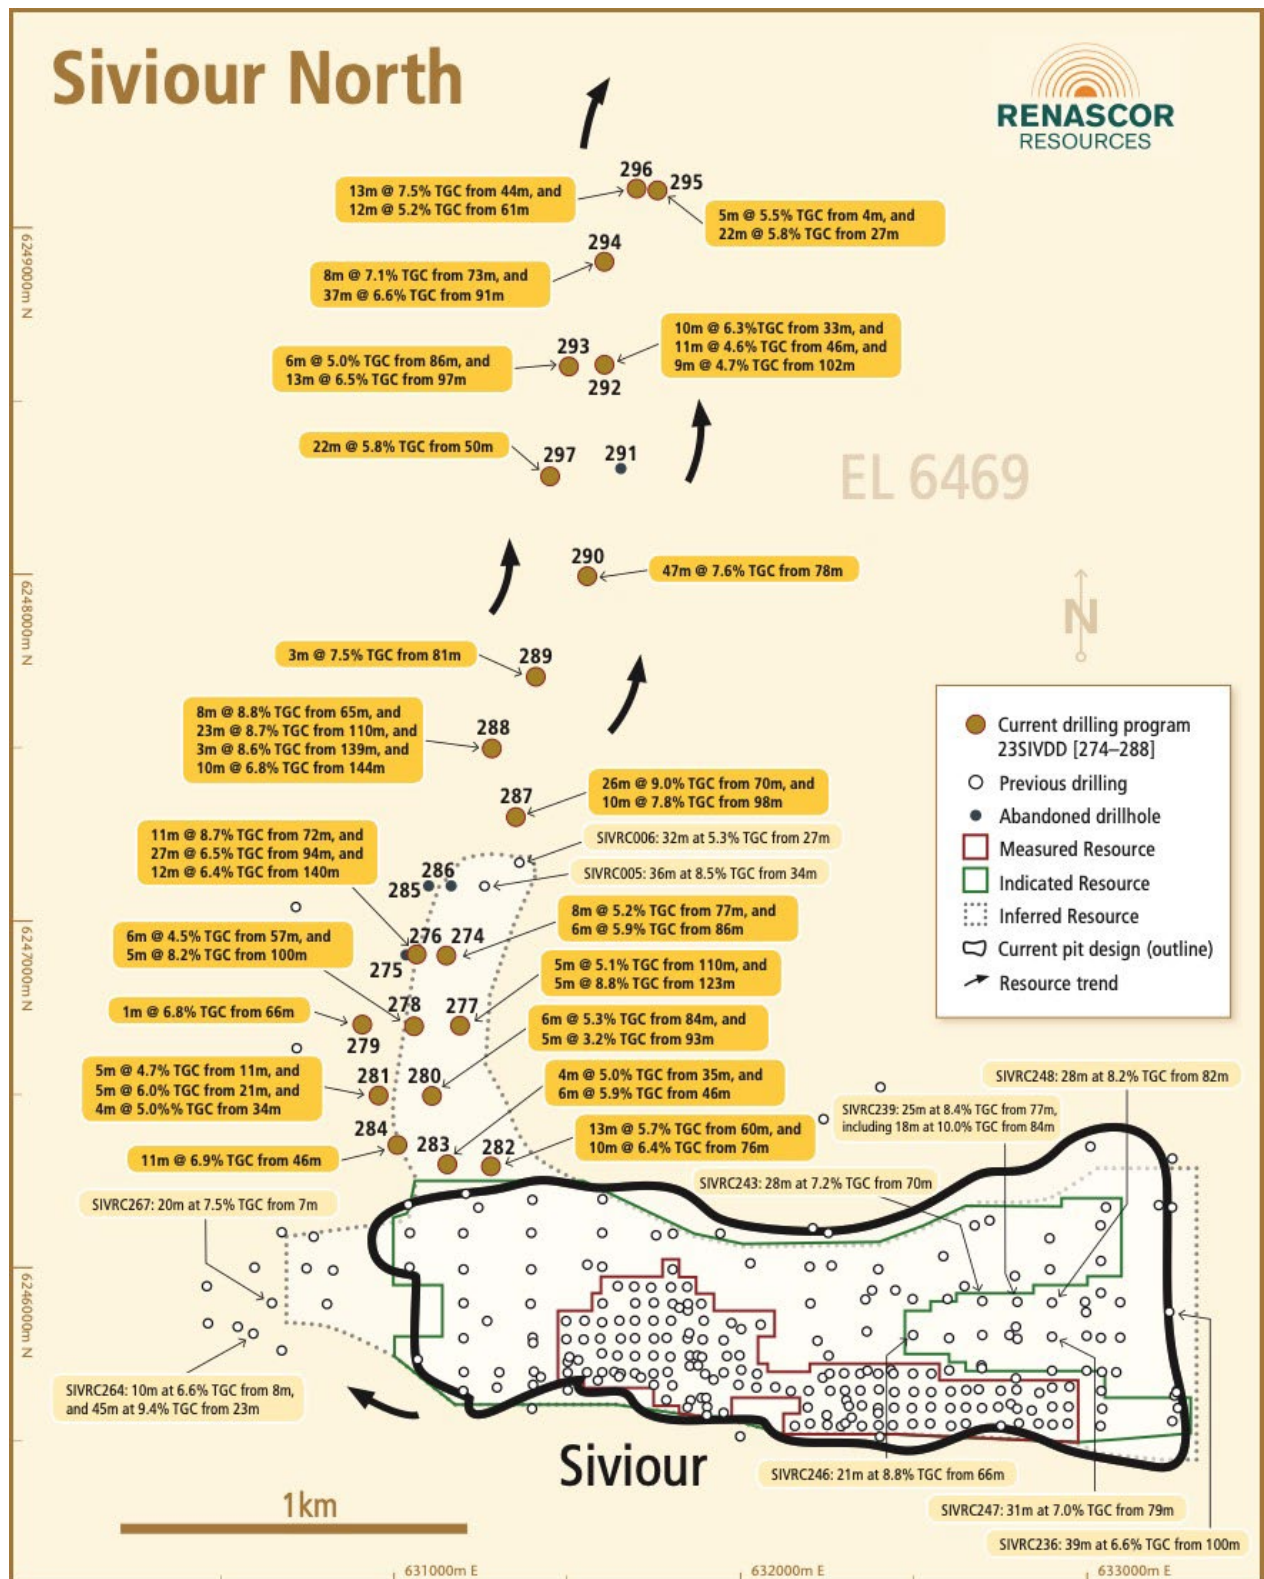

Figure 1. Siviour Graphite Deposit, showing results from recently completed drilling northwest of the existing Mineral Resource

The primary aim of the drilling program was to confirm the continuity to, and to test for possible extensions of, mineralisation to the north of the Siviour Mineral Resource. See Figure 2.

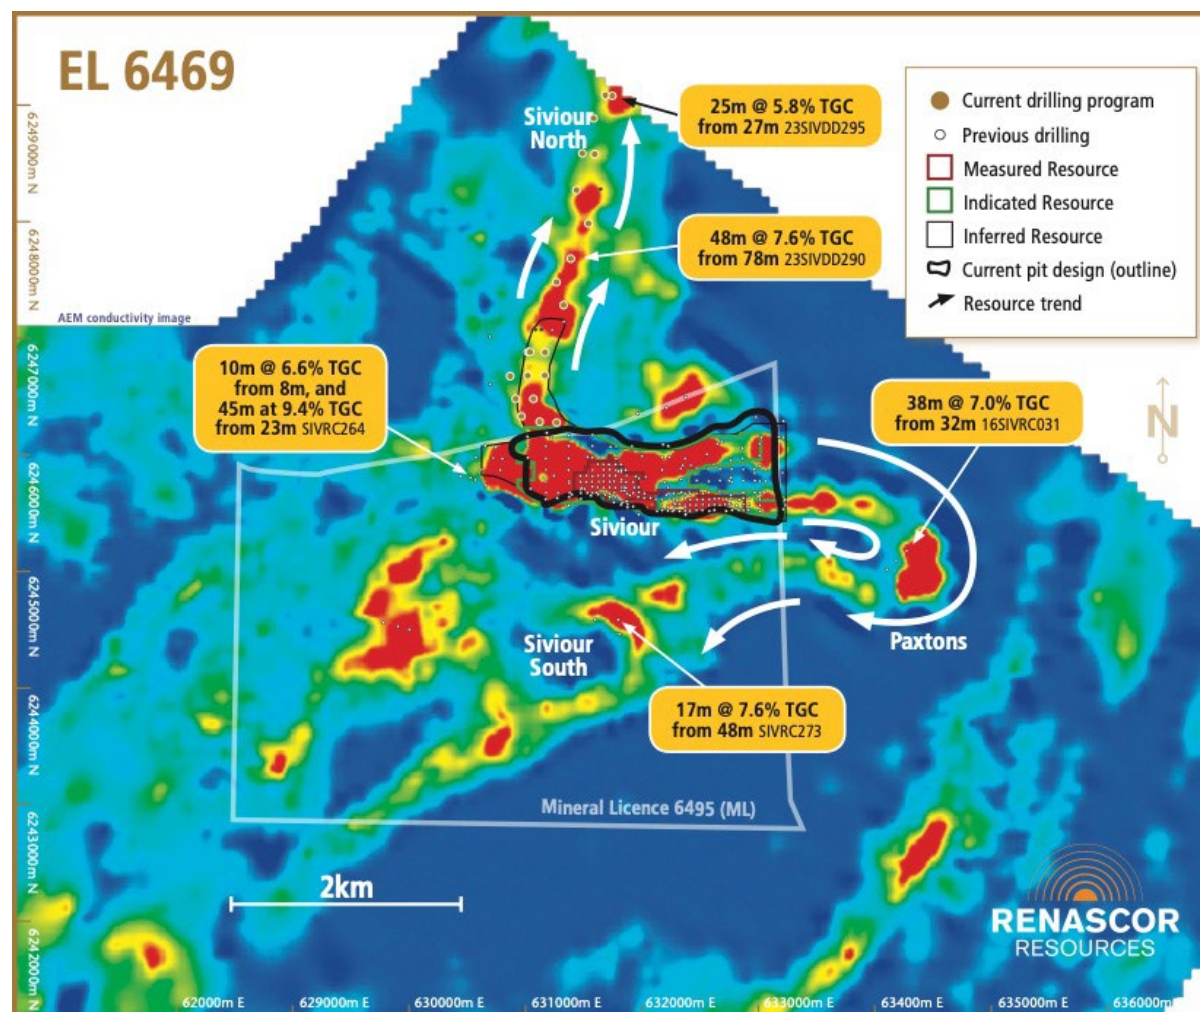

Figure 2. Siviour Graphite Deposit, showing existing Mineral Resource over airborne electromagnetic conductivity image

Drilling was carried out over an area extending approximately 3 km from the current pit design that has been incorporated into the mine plan for the optimised BAM Study and included areas within the current northwestern portions of the Siviour Inferred Resource and areas extending immediately to the north.

In total, Renascor completed 26 diamond drill holes for 2,963 metres, with six of the 26 holes abandoned prior to intersecting mineralisation.

The drill assays have confirmed the continuity of widespread, high-grade graphite over an area extending over 3 km, with results including:

- 47m @ 7.6% Total Graphitic Carbon (TGC) from 78m (SIVDD290),
- 38m @ 6.6% TGC from 91m (SIVDD 294),
- 26m @ 9.0% TGC from 70m, including 7m @ 14.1% TGC from 79m (SIVDD287),
- 24m @ 8.7% TGC from 110m, including 12m @ 11.4% TGC from 110m (SIVDD288) and
- 11m @ 8.7% TGC from 72m and 27m @ 6.5% TGC from 93m (SIVDD276).

Results from the drill program are included in Table 1 below, with complete details included in Appendix 1 and Appendix 2 of Renascor's ASX announcement dated 7 July 2023.⁷

Significance

The results from the recent drilling suggest the potential to extend the current mine plan into the northwestern extension of the Siviour Mineral Resource and areas immediately north over a wide area, extending over 3 km.

This would support future expansions to production beyond the capacity considered under the optimised BAM Study. Since the mineralisation extends from the current pit design, the results further suggest the potential for efficiencies in mine scheduling by extending the initial mining pits for continuing and efficiently mining from the current pit limits in the mine plan.

The results also suggest the potential to expand the Siviour Mineral Resource estimate.

Siviour is already amongst the world's most significant graphite deposits, with the world's largest reported Reserve outside of Africa and the second largest Proven Reserve globally⁸.

The assay results reported above, which focus only on the northwestern extension of the Siviour Resource, offer the potential to increase the Mineral Resource estimate in this area.

In addition, as shown in Figure 2 (see page 3), previous drilling and airborne electromagnetic surveys show the potential to further extend the Resource into additional areas along strike from the current pit design.

Next steps

The results from this recent drill program are now being incorporated into a revised geological interpretation and will be used update the resource model, with an updated Mineral Resource estimate expected in the current quarter.

Sample material obtained from the diamond drilling will also be used in metallurgical testwork.

Commencement of Long Lead Time Procurement

During the recently completed quarter, Renascor commenced the procurement of long-lead time items for its proposed Siviour Mine and Concentrator, the upstream portion of the BAM Project.

The initial procurement relates to work with SA Power Networks to upgrade the existing electrical infrastructure to permit the proposed Siviour Mine and Concentrator to connect with the existing electricity grid.

The early procurement activities being undertaken to enable an accelerated commencement of construction of the upstream operation in response to projected near-term shortages of Graphite Concentrates. See Figure 3.

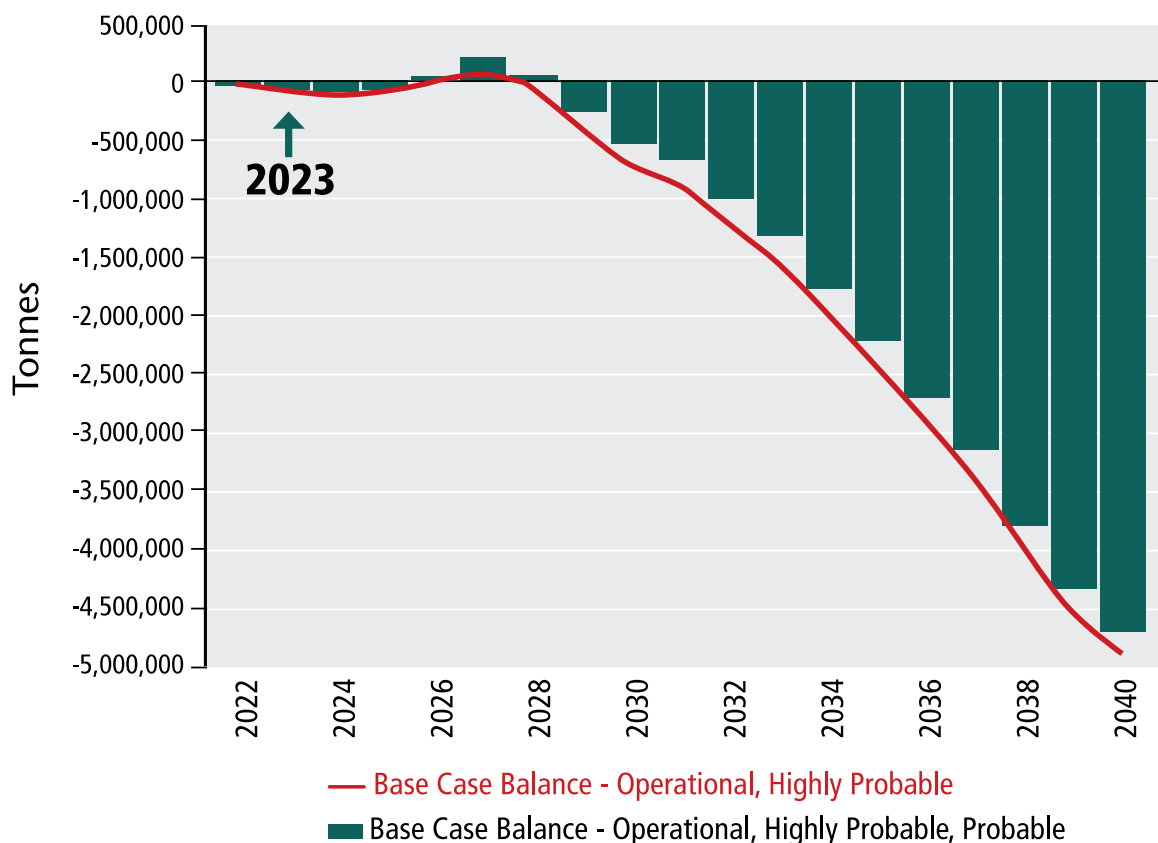

Figure 3. Graphite Concentrate market balance (source: Benchmark Mineral Intelligence)

In addition, the Company has commenced tendering for Early Contractor Involvement (ECI) in respect of the front-end engineering design for the Siviour Mine and Concentrator. The ECI tendering packages are being developed to permit additional procurement of long-lead time items relating to the processing plant and other enabling works.

BAM Study

Work programs during the recently completed quarter focused on completing the optimised Battery Anode Material Study (**BAM Study**).

The BAM Study contemplates a vertically integrated operation in South Australia that will combine the Siviour Graphite Deposit in South Australia, the largest reported graphite Reserve outside of Africa⁹; and a state-of-the-art processing facility in South Australia to manufacture PSG through Renascor's eco-friendly purification process.

The BAM Study, which builds on previous feasibility studies for both the planned upstream and downstream operations¹⁰, has assessed an increase to the previously planned PSG production capacity of 28,000tpa and additional staged expansions to meet projected demand.

Figure 4. Artist's rendition of Renascor's proposed PSG facility in Bolivar, South Australia

Renascor has completed all technical and financial works for the BAM Study, including cost estimates and indicative scheduling. Results of the optimised BAM Study are expected to be announced in early August.

Corporate Events

Cash position

Renascor's cash position as of 30 June 2023 was approximately A\$129 million.

Notes in relation to Appendix 5B

The Company had development asset costs of A\$5.9m during the quarter relating principally to the Siviour project as detailed above.

Payments to related parties and their associates during the recently completed quarter and outlined in Section 6 of Appendix 5B to this quarterly activities report were A\$439,000. These payments are related to salaries, superannuation and service and consultancy fees paid to directors and director-related entities during the quarter.

Competent Person's Statements

Exploration Results

The results reported herein, insofar as they relate to exploration activities and exploration results, are based on information provided to and reviewed by Mr G.W. McConachy (Fellow of the Australasian Institute of Mining and Metallurgy) who is a director of the Company. Mr McConachy has sufficient experience relevant to the style of mineralisation and type of deposits being considered to qualify as a Competent Person as defined by the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the JORC Code, 2012 Edition). Mr McConachy consents to the inclusion in the report of the matters based on the reviewed information in the form and context in which it appears.

This report may contain forward-looking statements. Any forward-looking statements reflect management's current beliefs based on information currently available to management and are based on what management believes to be reasonable assumptions. It should be noted that a number of factors could cause actual results, or expectations to differ materially from the results expressed or implied in the forward-looking statements.

Renascor confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. Renascor confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

This ASX announcement has been approved by Renascor's Board of Directors and authorised for release by Renascor's Managing Director David Christensen.

6.2	Aggregate amount of payments to related parties and their associates included in item 2	318
<i>Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.</i>		

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7. Financing facilities	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
<i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>		
7.1 Loan facilities	-	-
7.2 Credit standby arrangements	-	-
7.3 Other (please specify)	-	-
7.4 Total financing facilities	-	-
7.5 Unused financing facilities available at quarter end		-
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (item 1.9)	784
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	193
8.3 Total relevant outgoings (item 8.1 + item 8.2)	977
8.4 Cash and cash equivalents at quarter end (item 4.6)	129,270
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	129,270
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	N/A
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: N/A	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: N/A	

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 31 July 2023

Authorised by: The Board of Directors of Renascor Resources Limited
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg *Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
