Our Investment Beliefs and Differentiation

What Qualitative Information Sources Does NAOS Use?

The NAOS Investment Team undertakes fundamental analysis on potential and current investments. Some examples of our key focus areas include:

Reasons Not to Invest with NAOS

Our LICs are not for everyone. Some reasons why you may not choose to invest with NAOS include:

- Concentrated portfolios (0-15 investments & shareholdings often >20%)
- Long-term investment philosophy (5+ years)
- Focus on emerging companies (\$20 million - \$500 million market capitalisation)
- Benchmark unaware (no core NAOS investments are within the XSOAI)
- We do not invest in very early-stage businesses
- Smaller fund size (increases ability to gain a meaningful exposure to smaller businesses)
- ESG aware with a focus on positive impact
- LICs can often trade at discounts and premiums to their underlying net asset backing

Investment Portfolio Performance Summary

	Q4 Performance FY23		1 Year Performance		3 Year Performance (p.a.)		5 Year Performance (p.a.)		Inception Performance (p.a.)	
	NAOS LIC	Benchmark [^]	NAOS LIC	Benchmark [^]	NAOS LIC	Benchmark [^]	NAOS LIC	Benchmark [^]	NAOS LIC	Benchmark [^]
NCC Investment Portfolio Performance*	-4.35%	-0.54%	+0.34%	+8.45%	+8.10%	+5.16%	+1.91%	+2.25%	+9.00%	+4.68%
NAC Investment Portfolio Performance*	+15.12%	+2.16%	+18.15%	+11.65%	+11.42%	+8.92%	+8.35%	+5.67%	+11.19%	+6.62%
NSC Investment Portfolio Performance*	-1.77%	-0.54%	+2.62%	+8.45%	+11.51%	+5.16%	+4.28%	+2.25%	+3.18%	+3.44%

*Investment Portfolio Performance is post all operating expenses, before fees, interest, taxes, initial IPO commissions and all subsequent capital raising costs. Performance has not been grossed up for franking credits received by shareholders. Since inception (P.A. and Total Return) includes part performance for the month of February 2013 (NCC), November 2014 (NAC) and December 2017 (NSC). Returns compounded for periods greater than 12 months. All figures as at 30 June 2023.

[^]NAC Benchmark= S&P/ASX 300 Industrials Accumulation Index, NCC & NSC Benchmark= S&P/ASX Small Ordinaries Accumulation Index.

NAOS LIC Franked Dividend History and Profit Reserves

Each LIC has consistently paid dividends and holds healthy profit reserves

All figures as at 30 June 2023

Q4 FY23 Summary

- The S&P/ASX 200 Accumulation Index (XJOAI) returned +1.01% for Q4 FY23, and the S&P/ASX Small Ordinaries Accumulation Index (XSOAI) returned -0.54%, bringing FY23 returns to +14.78% and +8.45% respectively.
- Technology stocks roared their way back into bull market territory with the Nasdaq returning +13.05% in Q4 FY23 and +25.02% for FY23 with renewed interest due to developments in artificial intelligence.
- After 10 interest rate rises out of 11 RBA meetings in FY23, consumer discretionary businesses started to experience slower trading conditions with downgrades from Adairs (ASX: ADH), Baby Bunting (ASX: BBN) and Universal Store Holdings (ASX: UNI) to name just a few.
- Unemployment remains stubbornly low (albeit a lagging indicator) as government and monetary officials battle with productivity matters.
- In smaller companies share/trading liquidity remains extraordinarily low with many companies valued between \$100-\$200 million trading on total monthly values of just \$1-\$2 million.

Impact of rising rates – Consumer Discretionary Stocks

The consumer discretionary sector benefited strongly during the pandemic as consumers were flush with stimulus, however with rising rates, several consumer discretionary stocks downgraded earnings expectations as consumers start to reduce spending.

Q4 FY23 Summary Cont.

- The tone of interest rate expectations has changed from “how high will they go?” to “how long will they remain at this level and how aggressive will the future cuts be?”.
- In the US where effective rates are currently 5.08%, ~67% of economists expect US rates to be between 3.75% and 4.50% at the end of CY25.
- Several longer term thematic have gained more exposure and momentum, even in times of heightened macro uncertainty. These include:

<p>Housing Supply</p>	<p><i>“Slowing supply, together with increasing household formation is expected to lead to a supply household formation balance of around -106,300 dwellings (cumulative) over the 5 years to 2027”</i> - (Aus Gov NHFIC Housing 2022-23 Report).</p>
<p>Novated Leasing</p>	<p>Boom in Novated Leases as a result of recently legislated EV incentives.</p> <p><i>“Since [the legislation] announcement MMS has seen increased enquiries and orders from customers for EVs. Novated lease EV orders up 331% on prior corresponding period”.</i> - McMillan Shakespeare Ltd, 1H FY23 results presentation</p> <p><i>“Electric vehicles represented 36% of all Novated leases delivered in 3Q23, increasing to 45% in the month of June 23”.</i> - FleetPartners 3Q23 Business Update July 2023</p>
<p>Renewable Energy</p>	<p>Recent data from the AEMO indicates that Australian Solar and Wind generation continues to hit record highs, increasing 11% from last year.</p>

Big River

The image shows a large, modern interior space, likely a lobby or atrium. The ceiling is a prominent feature, composed of numerous wooden panels with intricate, geometric, and perforated designs. Some panels are flat, while others are angled, creating a dynamic, three-dimensional effect. Small, recessed lights are integrated into the ceiling panels, casting a warm glow. The walls are also covered in perforated wooden panels, allowing light to filter through. In the background, there are multiple levels of a building, with glass railings and walkways. The overall atmosphere is one of sophisticated, contemporary architecture.

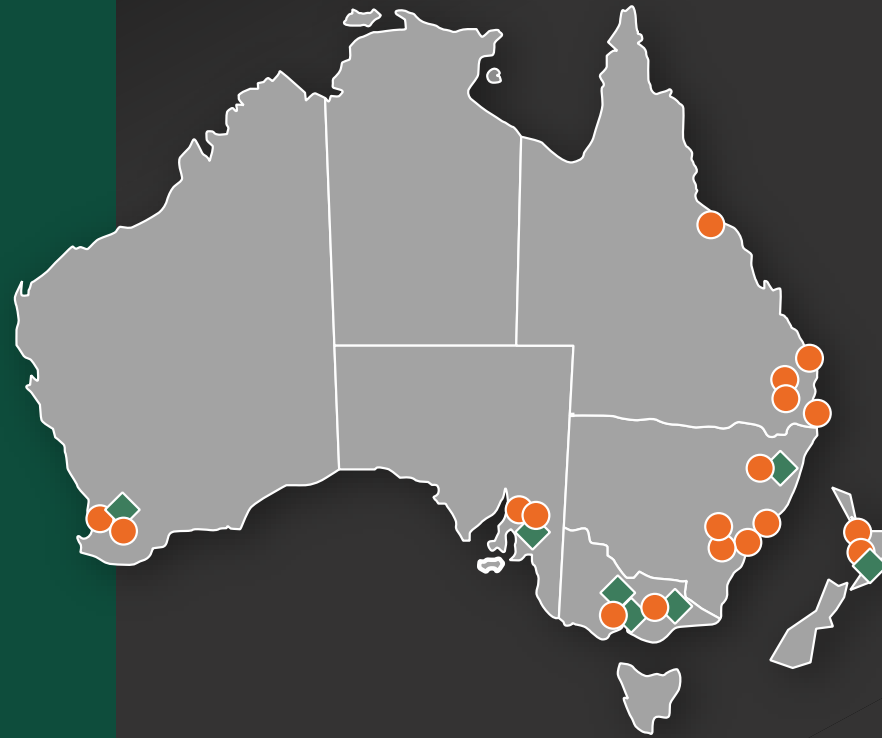

Big River

NAOS Investor Update

Industry Trends

01 Market performance diversity

- BRI diversified by geography, industry segment, construction type and customer
- Performance of market has differed significantly by segment and geography
- Supply chains impacted by recent events – impacting profitability of market and delivery of construction

- ◆ Big River manufacturing facilities
- Big River sales / distribution sites

Construction markets

- 41% Detached housing
- 15% Multi-residential
- 9% Alterations & Additions
- 21% Commercial
- 7% Civil
- 7% OEM (re-manufacturing)

Regions

- 27% Queensland
- 24% Victoria
- 23% New South Wales/ACT
- 19% SA/WA
- 7% New Zealand

Supply chain diversity

- 21% of revenue
Manufactured by BRI
- 20% of revenue
Direct Import by BRI
- 59% of revenue
Sourced from local supply partners

- Approvals record high in Dec 2020 – significant delays 3 years (labour, materials & land)
- Housing completions remain strong but starts falling away
- Commencements versus completions
- Multi residential on historical lows
- Commercial strong but also delayed
- Civil/Infrastructure projects at peak
- Delivery of construction delayed – backlog of work

Figure 3.10 Immigration and population growth (persons, 000s)

Note: ERP=Estimated Resident Population
Source: ABS, AUSM and CFC forecasts

HIA Trade Availability Index

Housing demand will be strong

- Low vacancy rates
- 650k immigrants next two years

Builders/developers struggling

- Trade availability historical lows
 - Delays in housing
- Lending tight
- Delays in securing title of land
- Fixed price contracts
- Cashflow - deposit & delays

Capital City Vacancy Rates, March 2023

Lending for Construction and Purchase of New Dwellings - Australia

- Regionally – performance will differ across geographies
- Short, medium and longer-term outlooks differ
- Segments:
 - Housing delivery will continue – set a new base before growth
 - Multi res will grow – driven by medium density
 - Infrastructure strong – hit a peak
 - Commercial continue to be strong – particularly Hospitals, Aged Care
 - A&A and retail soft as discretionary spend dries up
- Fundamentals all point to sustained growth but:
 - Construction built on confidence – Government uncertainty
 - Labour
 - Land
 - Loans
 - Businesses able to manage cash and pivot in a changing market will succeed

FULLY FRANKED DIVIDEND HISTORY

Overview & Outlook Q1 FY24

- Q1 FY24 will see the release of FY23 financial reports for most of our investee businesses.
- Investor focus will be less on the FY23 results and more on Q4 FY23 trading updates (and any July/August detail) to gauge the impact of interest rate rises on demand, and how businesses have been able to adjust if necessary.
- We will be looking for the following updates:

MOVE Logistics (ASX: MOV)	A detailed strategy update from new CEO Craig Evans, who was appointed just prior to the 1H FY23 result.
Saunders International (ASX: SND)	Update on any unresolved issues for recently terminated Caymus project. Update on the order book and progress on expanding into desired adjacent industries.
Big River Industries (ASX: BRI)	What is BRI experiencing from a demand given market expectations of a sharp slowdown? How is BRI's diversified model performing in the current environment?
Urbanise.com (ASX: UBN)	Has UBN been able to convert its customer pipeline at a faster rate? Has the successful implementation of client Colliers led to further opportunities?

Overview & Outlook Q1 FY24

We believe many of our investee companies have exposure to long-term structural tailwinds such as:

Renewable Energy Transition

- GTK provides the billing platforms to utilities that are well suited for renewable energy.
- COG will benefit from the shift to EV's, and increased demand for funding of equipment purchases from clients working on large renewable energy projects.

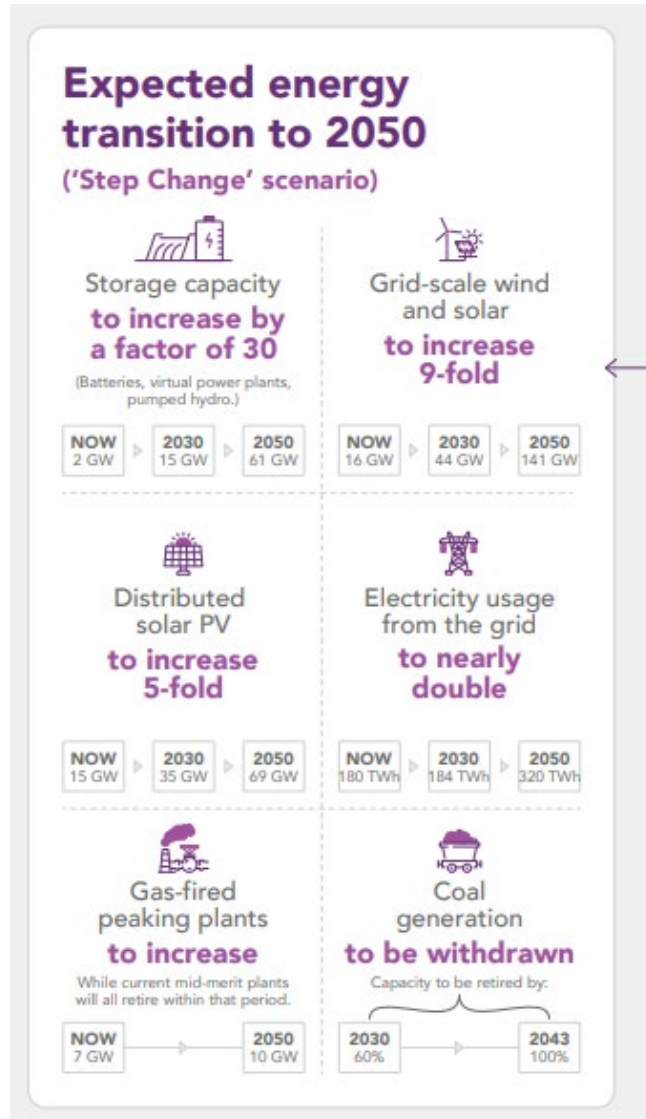

Infrastructure Spending

- BRI will benefit from continual investment in infrastructure projects across Australia.
- Many of COG's clients will require financing to purchase equipment required for various infrastructure related contracts.
- SND has a large exposure to the construction and maintenance of infrastructure-type assets.

Technological Efficiency

- UBN's core products are designed to improve efficiency and outcomes in industries that are relatively low margin but recurring in nature.
- GTK's core product provides its utilities customers with a lower price to service and also a cloud-based platform offers a superior consumer experience.

Structural Tailwinds: Renewable Energy Transition

Funding requirement for the transition to renewable energy is a once-in a generation event.

- AEMO estimate that total renewable investment required for the energy transition by 2050 will be ~\$181bn.
- 7% of the total investment is forecasted to be related to construction and development of the transmission network.
- AEMO have already identified the need for 10,000km of new transmission lines across network projects. (For reference, a trip from Perth to Cape York via Melbourne and Sydney is 7,753km).

NAOS LICs Director Alignment

Directors' shareholdings have significantly increased since the inception of each LIC

The Case for Concentrated Investing

Holding too many stocks in a portfolio can lead to poor risk adjusted performance

Source: NAOS Asset Management

NAOS Strong Long-term Risk-adjusted Returns*

NCC Investment Portfolio Risk and Performance Metrics

NAC Investment Portfolio Risk and Performance Metrics

* Investment Portfolio Performance is post all operating expenses, before fees, interest, taxes, initial IPO commissions and all subsequent capital raising costs. Performance has not been grossed up for franking credits received by shareholders. Since inception (p.a.) includes part performance for the month of February 2013 (NCC) and November 2014 (NAC), returns compounded for periods greater than 12 months. All risk metrics are calculated from the inception date of each portfolio. All Figures are as at 30 June 2023. Since NCC's inception (124 months) there have been 79 positive months for the market and 45 negative months and since NAC's inception (104 months) there have been 64 positive months for the market and 40 negative months.

NAOS Strong Long-term Risk-adjusted Returns*

NSC Investment Portfolio Risk and Performance Metrics

* Investment Portfolio Performance is post all operating expenses, before fees, interest, taxes, initial IPO commissions and all subsequent capital raising costs. Performance has not been grossed up for franking credits received by shareholders. Returns compounded for periods greater than 12 months. All risk metrics are calculated from the inception date of each portfolio. All Figures are as at 30 June 2023. Since NSC's Investment Portfolio inception (68 months) there have been 34 positive months for the market and 34 negative months.

Capital Management Initiatives

Performance	<ul style="list-style-type: none">• Maintain a focus on long term performance without deviating from the NAOS investment philosophy.
Dividends	<ul style="list-style-type: none">• Continue to focus on a growing stream of dividends, franked to the maximum extent possible, whilst maintaining an adequate reserve balance.
Alignment	<ul style="list-style-type: none">• Continue to be aligned with shareholders as Directors and Staff are some of the largest shareholders across all 3 of the LICs.
Communication	<ul style="list-style-type: none">• Maintain a very high standard of marketing materials and communications so all current and prospective shareholders have a clear understanding of the NAOS offering.
NSC	<ul style="list-style-type: none">• The share buyback remains active. 32 million shares, or 19% of shares on issue, have been bought back on market since the buyback commenced in April 2019.• One-for-three bonus Options (ASX: NSCOA) were issued in May 2021, allowing shareholders to acquire fully paid ordinary shares exercisable at \$1.02 per Option on or before 28 June 2024.
NAC	<ul style="list-style-type: none">• The share buyback remains active. 24% of shares on issue have been bought back on market since the buyback commenced in June 2019 to date, which has been significantly accretive for shareholders.
DRP	<ul style="list-style-type: none">• Shares purchased on-market to satisfy DRP requirements when shares are trading at a discount to NTA, thus eliminating any dilution for shareholders.

Historical Shareholder Numbers

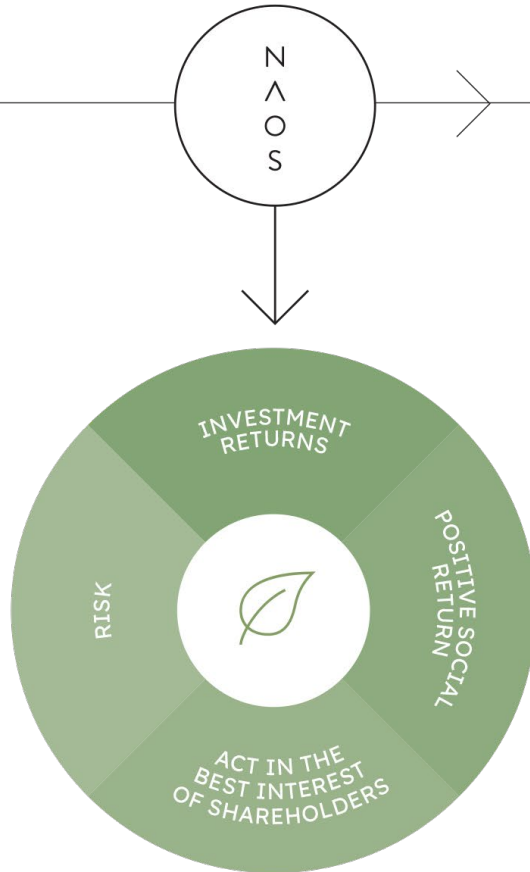

NAOS ESG Framework

01 OUR COMMITMENT TO RESPONSIBLE INVESTMENT

As an investment manager, NAOS recognises and accepts its duty to act responsibly and in the best interests of shareholders. We believe that a high standard of business conduct and a responsible approach to environmental, social and governance (ESG) factors is associated with a sustainable business model over the longer term that benefits not only shareholders but also the broader economy.

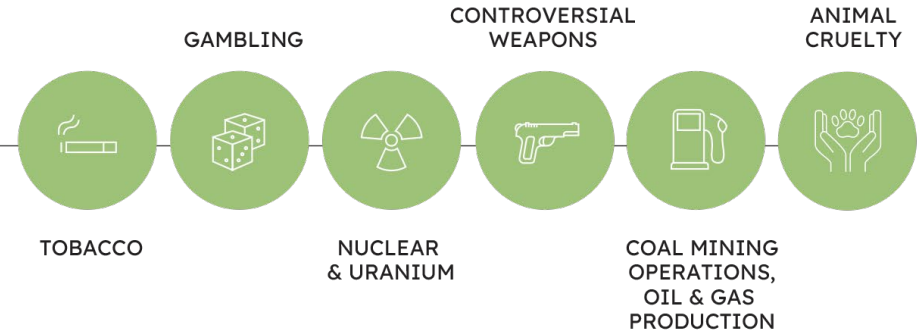

We recognise the material impacts that ESG factors can have on investment returns and risk, and also the wider implications for achieving a positive social return.

NAOS is a signatory to the United Nations-supported Principles for Responsible Investment (PRI) and is guided by these principles in incorporating ESG into its investment practices.

02 NEGATIVE SCREENS

NAOS systematically excludes investing in specific industries and companies that do not align with our responsible investment goals.

03 ESG FRAMEWORK

The types of ESG factors we consider are represented by the following, although from time to time we will consider factors outside this group.

04 THE INCORPORATION OF ESG

The incorporation of ESG considerations into the investment process applies across all NAOS investments. NAOS aims to have a thorough understanding of the companies it invests in. Once invested, NAOS regularly reviews and monitors the ESG performance of its investee companies through questionnaires. The results provide valuable information and allow us to assess ESG opportunities and risks, and to assist and support our investee companies in attaining their ESG goals.

Signatory of:

Key Business & Industry Traits for Maximising Long-term Performance and Reducing the Risk of Permanent Capital Loss Events

<p>Industry Tailwinds Supporting Long-Term Revenue Growth</p>	<p>A growing revenue base provides companies with a number of competitive advantages such as the ability to scale their fixed cost base and increase margins, the opportunity to reinvest to improve their product or service offering, or the chance to enter new markets and compete on a number of considerations other than just price.</p>
<p>Pricing Power</p>	<p>Certain products and/or services around the globe can charge a price that is largely irrelevant to the consumer, due to the simple fact that it provides such a sound consumer experience.</p>
<p>Scalability</p>	<p>Ideally, a business structure is built from the ground up and is structured in such a way that it has the systems and processes to handle significant scaling without an equivalent dollar of cost being added to the cost base. Businesses that can demonstrate a trend of increasing profits over the long term have generally been able to increase margins as well.</p>
<p>Capability to Internally Fund Expansion Opportunities</p>	<p>The ability to invest in organic business initiatives such as research and development, new product or service launches into adjacent markets, or small bolt on acquisitions that bring with them a new capability.</p>
<p>Business Moat</p>	<p>If a business has a sustainable competitive advantage and can also increase this advantage over time, this will generally lead to significant organic revenue growth over the long term. This is driven by a strong customer proposition as well as significant pricing power. With such organic growth, the business should have the financial resources to support further innovation to ensure they maintain and even enhance this moat over time.</p>
<p>Alignment</p>	<p>A company with the ability to support the interests of all shareholders can have substantial compounding effects over time. If the Board of Directors, key executives and staff are material shareholders then a business is more likely to develop a culture, values and a business strategy that aligns with total shareholder return outcomes over the long term.</p>

Why Invest via a Listed Investment Company?

We strongly believe LICs are a highly effective structure to give investors the highest quality exposure to specific asset classes, which in the case of NAOS is emerging businesses.

A Listed Investment Company structure:

- Allows the investment manager to build a concentrated portfolio of high-quality investments **without needing to worry about short-term liquidity requirements.**
- **Fund size is generally limited** to the upside, allowing investors to maintain a significant exposure to the underlying investments and not be diluted by new investors, which may occur in an open-ended fund.
- Enables a **smoother distribution profile** as profits can be retained, as opposed to managed funds which distribute all taxable income annually. Dividends from a LIC may also be fully franked.
- Can provide **access to a range of alternative asset classes** which may not be suited to an open-ended structure.
