About American Rare Earths:

American Rare Earths Limited is emerging as an alternative international supply chain to China's market dominance of a global rare earth market expected to expand to US\$20 billion by the mid-2020s. The Company's mission is to supply Critical Materials for Renewable Energy, Green Tech, Electric Vehicles, National Security, and a Carbon-Reduced Future. American Rare Earths are one of the few ASX listed companies with exposure to the rapidly expanding US rare earths market, developing its 100% owned magnet metals projects, Halleck Creek in Wyoming and La Paz in Arizona. Both can potentially be among North America's largest rare earth deposits. The Company is concurrently evaluating other exploration opportunities while collaborating with US Government supported R&D to develop a sustainable domestic supply chain for the renewable future.
