DIRECTORS' REPORT

Your Directors present their report together with the consolidated interim financial report for the half-year ended 30 June 2023 and the Independent Auditor's Review Report. All Directors, except for one director who retired from office at the Group's May 2023 AGM, were in office for the full reporting period, from 1 January 2023 to 30 June 2023 and up to the date of this report.

PRINCIPAL ACTIVITIES DURING HY23

Achieved production of 14,346 gold equivalent ounces at the Group's Guanaco/ Amancaya mine complex

Completed construction of the Heap Reprocessing project that is expected to provide ten years of production

Reported final assay results from the 7,000-meter drilling campaign at Casposo-Manantiales, supporting the Company objective to commence mining operations

Actively pursued new discoveries with exploration activity undertaken at the Company's high-quality land portfolio including over 4,000 meters of drilling at the Jaguelito Project in Argentina

Completed the sale of the Pingüino advanced exploration project to ASX listed Unico Silver Limited ("Unico") for total consideration of approximately US\$10 million

Executed a letter of intent with TSXV listed Colossus Resources to sell Austral's Chilean Calvario and Mirador copper projects, and become their largest shareholder with a 19.9% interest

Secured related party loans of approximately US\$1.6 million including US\$1.4 million from the Company's major shareholder

Provided bridge funding of US\$0.5 million to the Rawhide mine to obtain a takeover option. Post diligence, the Group decided not to exercise the option and retained its 24.7% interest

Mr. Eduardo Elsztain was appointed as the new non-Executive Chair of the Company after Mr. Wayne Hubert retired as a director at the Group's AGM.

There were no other significant changes in our principal activities during the period. A summary of key operating results for the half year ended 30 June 2023 and 2022 are set out in the following tables for comparative purposes.

OPERATING AND FINANCIAL RESULTS OF THE GROUP

During HY23, the Group realised a loss before and after income tax of US\$2.9m (HY22: US\$5.6) and US\$2.5m (HY22: US\$4.4m)

Revenue at existing operations in HY23 increased to US\$28.3m (HY22: US\$25.8m) with gross profit (including depreciation and amortization) of US\$3.5m (12.4% margin) compared to negative US\$0.3m (negative 1.2% margin) in HY22.

The increase in gross profit in HY23 from HY22 was mainly a result of (i) lower depreciation and amortisation expense in HY23 due to an increase in estimated mineral resources at the Guanaco-Amancaya mine complex per the March 2022 NI 43-101 Technical Report ⁽¹⁾, (ii) an increase of 6% in the number of gold equivalent ounces sold, (iii) an increase of 3% in the average sales price realised, offset partially by a 5% increase in production costs before depreciation and amortisation expense, mainly due to a weaker US dollar versus the Chilean peso.

The Group's results during HY23 were also impacted by the following:

- i. Decrease in administration costs by US\$0.6m to US\$3.6m (HY22: US\$4.2m) mainly due to a decrease in consulting expenses, staff costs and withholding taxes.
- ii. Increase in other income by US\$2.1m to US\$2.5m (HY22: US\$0.4m) mainly due to a US\$2.0m gain on the sale of SCR Properties Ltd. to ASX listed Unico, whose major asset was the Pinguino project.
- iii. Increase in other expenses by US\$4.0m to US\$6.0m mainly due to the following:
 - a. a non-cash US\$2.1m impairment on exploration and evaluation properties, mainly due to the expiry of the option agreement with Pampa Metals on 27 July 2023.
 - b. Unrealised losses on financial assets to US\$1.9m related to the Group's equity investments,
 - c. Rawhide bridge funding of US\$0.6m in exchange for takeover options which were not exercised.

HY23 production at Guanaco/Amancaya increased by 478 GEOs (3%) to 14,346 GEOs (13,769 gold ounces and 48,724 silver ounces) from 13,868 GEOs (13,388 gold ounces and 39,293 silver ounces) during HY22. The cash cost of production ("C1") per GEO increased to US\$1,451 in HY23 from US\$1,404 in HY22 while the all-in sustaining cost ("AISC") per GEO increased to US\$1,857 in HY23 from US\$1,797 in HY22.

The primary factors impacting C1 and AISC during HY23 were higher than budgeted tonnes of ore mined, higher than budgeted plant repairs, a weaker US dollar versus the Chilean peso, and higher exploitation costs including development activities at underground sectors due to increased fortification requirements.

The commencement of the new heap reprocessing project in Q3 2023, as announced on 20 July 2023, is expected to result in higher production in the second half of 2023, with annual guidance remaining at 34,000-38,000 gold equivalent ounces.

FINANCIAL POSITION

Cash and cash equivalents held by the Group remained constant at US\$0.9m as of 30 June 2023 (31 December 2022: US\$0.9m) or US\$1.5m when combined with the fair value of 329 unsold and unrefined gold equivalent ounces in inventory of US\$0.6m (31 December 2022: 900 unrefined gold equivalent ounces with a fair value of US\$1.8m)

Combined financial debt (borrowings and financial leases net of cash & cash equivalents) increased by US\$3.4m to US\$14.0m at 30 June 2023 (31 December 2022: US\$10.6m).

Trade and other receivables (current and non-current) increased by US\$2.3m to US\$5.6m at 30 June 2023 (31 December 2022: US\$3.3m). The increase was mainly due to the discounted value of three installments totaling US\$2.3m of the US\$2.5m due from Unico over the next two and a half years on the sale of SCR N Properties.

At 30 June 2023, the Group had net current liabilities of US\$16.4m (31 December 2022: US\$7.5m). The increase was primarily due to expenditures incurred on the drilling campaign at the Jaguelito project under the option agreement with Mexplor t and costs incurred to complete construction at the heap reprocessing project.

Inventories increased by US\$0.5m to US\$9.4m at 30 June 2023 (31 December 2022: US\$8.9m) mainly due to an increase in materials and supplies and a decrease in the gold equivalent ounces available for sale at the Guanaco-Amancaya mine complex.

Other financial assets (current and non-current) increased by US\$3.4m to US\$4.2m at 30 June 2023 (31 December 2022: US\$0.6m) mainly due to Unico shares and options acquired by the Group from the sale of SCR N Properties Ltd. These shares are currently in escrow, with 50% becoming available on the first anniversary of the closing date (25 November 2023) and the remaining 50% on the second anniversary (25 November 2024), resulting in half of the shares being classified as non-current assets. Other financial assets were also impacted by the decrease in the value of the Group's investment in shares of CSE listed Pampa Metals Corp.

Property, plant and equipment increased by US\$4m to US\$46.2 primarily due to sustaining capital expenditures and construction activities at the new heap reprocessing project.

Prepaid income taxes (current and non-current) decreased by US\$1.1m to US\$0.5 at 30 June 2023 (31 December 2022: US\$1.6m) mainly due to the refund of US\$1.0m in Chilean taxes during the year.

Current trade and other payables increased by US\$2.8m to US\$18.5m at 30 June 2023 (31 December 2022: US\$15.7m). The main reasons for the increase were the capital expenditures and construction activities at the heap reprocessing project, as well as the higher exploration activities that led to more days of payable in HY23. Non-current trade and other payables were US\$nil at 30 June 2023 (31 December 2022: US\$1.0m).

Net assets decreased by US\$2.5m from 31 December 2022 to US\$46.3m at 30 June 2023 (31 December 2022: US\$48.8m) following the net loss of for the 6 month period.

CASH FLOW

Net cash provided from operating activities before and after changes in assets and liabilities increased to US\$3.4m and US\$5.0m during HY23 (HY22: US\$3.3m and US\$4.6m) following higher production and margins per ounce during the period.

Cash used in investing activities totaled US\$7.2m during HY23 (HY22: US\$5.6m). Investments of US\$6.1m in HY23 were primarily used for additions to plant, property and equipment (HY22: US\$3.2m), exploration and evaluation activities of US\$3.6m, (HY22: US\$2.4m), which was partially offset by US\$2.5m received from Unico as the first cash installment from a total of US\$5m, in addition to the shares and warrants disclosed above, to be received on the sale of SCR N Properties Ltd. to Unico Silver.

Net cash from financing activities increased by US\$2.0m to US\$2.2m during HY23 due to the net proceeds from loans and borrowings, partially offset by the payments on financial leases and the payment of interest (HY22: US\$0.2m).

LIQUIDITY

Guidance

The Group forecasts 2023 production to be in the 32,000-36,000 gold equivalent ounces range with production to be higher in the second half of the year and annual C1 and AISC to decrease to US\$1,250-US\$1,350 and US\$1,470-US\$1,570 respectively per gold equivalent ounce.

Access to capital

The Group has strong relationships with its bankers and its major shareholders which it expects can provide additional financing if required.

NOTES TO THE FINANCIAL STATEMENTS

1. REPORTING ENTITY

Austral Gold Limited (“the Company”) is a company limited by shares that is incorporated and domiciled in Australia. The Company’s shares are publicly traded on the Australian Securities Exchange under the symbol AGD and on the TSX Venture Exchange under the symbol AGLD.

These interim financial statements (“financial statements”) as at and for the six months ended 30 June 2023 comprise the Company and its subsidiaries (together referred to as the “Group”) are presented in United States dollars (US\$), which is the presentation and functional currency of the Group. The nature of the operations and principal activities of the Group are described in the Directors’ Report.

The consolidated annual financial statements of the Group as at and for the year ended 31 December 2022 are available upon request from the Company’s registered office at Level 5, 126 Phillip Street, Sydney NSW 2000, Australia and at www.australgold.com.

2. BASIS OF PREPARATION

The consolidated financial statements are general purpose financial statements which have been prepared in accordance with *Australian Accounting Standards (AASB) 134 Interim Financial Reporting and Corporations Act 2001*, and with *IAS 34 Interim Financial Reporting*.

The half-year financial report does not include full note disclosures of the type normally included in an annual financial report. As a result, the half-year financial report should be read in conjunction with the 31 December 2022 Annual Financial Report and any public announcement by Austral Gold Limited during the half-year in accordance with continuous disclosure obligations under the *Corporations Act 2001*.

These interim financial statements were authorised for issue by the Company’s Board of Directors on 24 August 2023.

The Company is of a kind referred to in ASIC Corporations (Rounding in Financial/Directors’ Reports) Instrument 2016/191 and in accordance with the legislative instrument, amounts in the consolidated interim financial statements have been rounded off to the nearest thousand dollars, unless otherwise stated.

Change in classification

During the period ended 30 June 2023, the Group updated the classification of certain income, expenses and cash flow items to better reflect the nature of the items. The effects of such reclassifications on the comparative period are disclosed in Note 25 to the financial statements.

3. GOING CONCERN

The financial report has been prepared on a going concern basis, which contemplates the continuity of normal business activities and the realisation of assets and settlement of liabilities in the ordinary course of business. For the 6 months ended 30 June 2023, the market fundamentals of gold and silver remained strong and the Group produced 14,346 gold equivalent ounces with sales revenue totalling US\$28.290 million from sales of 14,658 gold equivalent ounces at an average selling price per ounce of US\$1,931 (6 months period ended 30 June 2022: production of 13,868 gold equivalent ounces and sales revenue of US\$25.848 million from sales of 13,831 gold equivalent ounces at an average selling price per ounce of US\$1,869).

During the 6-month period ended 30 June 2023, the Group incurred a net loss after tax of US\$2.503 million (2022: US\$4.355 million net loss after income tax) with net cash flows of US\$5.007 million in 2023 (2022: US\$4.580 million) generated through operating activities. At 30 June 2023, the Group has net assets of US\$46.315 million and net current liabilities of US\$16.391 million (31 December 2022: US\$48.815 million and US\$7.515 million, respectively). For the 6-month period ended 30 June 2023, the net increase of loans and borrowings was US\$3.996 million (6 months ended 30 June 2022: US\$2.115 million).

The Directors have prepared cashflow forecasts underpinning the basis of preparation as a going concern. These include acknowledgement of the intrinsic operational risks of the business, the existing cash position of the Group, the ongoing loan repayment requirements, and the strategy to further support capital investment at the Amancaya/Guanaco mine and other exploration and investment activities.

The 12-month cashflow forecast underpins the basis of preparation of the Group as a going concern and are dependent on a combination of the following main assumptions:

- Continued support of existing financiers for short term and longer-term financing through the renewal of existing loan facilities maturing in the following 12 months; and source ongoing funding support as required from related parties;
- Continued cash management controls including supply chain financing arrangements with trade creditors to defer payment terms as required;
- Production at the Heap Reprocessing Project (“Project”) at full capacity in Q4 2023 at its Guanaco-Amancaya Mine Complex in Antofagasta, as the project was commissioned during August 2023;
- For the financial year ended 31 December 2023, 5,000 – 7,000 gold equivalent ounces (“GEOs”) are forecast to be produced at a cash cost of production lower than current production from the Guanaco-Amancaya underground mine.
- Average 2023 prices realised per gold equivalent ounce of approximately US\$1,900;

NOTES TO THE FINANCIAL STATEMENTS

- Sale of SCRN Properties Ltd., owner of the Pingüino project (completed) - the Group received cash of US\$2.5M on 1 March 2023 and an additional \$2.5m is forecast to be received in 2023-2025; and
- Deferral of certain exploration expenditures.

The going concern basis presumes a combination of the above operational and funding solutions, as deemed appropriate by the Directors, will be achieved, and that the realisation of assets and settlement of liabilities will occur in the normal course of business. The combined effect of the above represents a material uncertainty as to whether the Group would continue as a going concern.

The Directors of the Group consider it appropriate that the Group will continue to fulfil all obligations as and when they fall due for the foreseeable future and accordingly consider that the Group's financial statements should be prepared on a going concern basis. Accordingly, no adjustments have been made to the financial report relating to the recoverability and classification of recorded asset amounts or to the amounts and classification of liabilities that might be necessary should the Group not continue as a going concern.

4. USE OF ESTIMATES AND JUDGEMENTS

In preparing these financial statements, Management has made judgements, estimates and assumptions that affect the application of the accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

The significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as at and for the year ended 31 December 2022. Information about judgments related to going concern are disclosed in Note 3.

Measurement of fair values

The Group has established a control framework with respect to the measurement of fair values. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively. Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment in the 6 months ended 30 June 2023 are detailed below:

A number of the Group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

When measuring the fair value of an asset or a liability, the Group uses market observable data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1 — quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2 — inputs other than quoted prices within Level 1 that are observable for the asset or liability, either directly (i.e. as prices), or indirectly (i.e. derived from prices)
- Level 3 — inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability might be categorised in different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

The Group holds listed equity securities on the Australian and Canadian stock exchanges and listed Argentine sovereign bonds at fair value, which are measured at the closing bid price at the end of the reporting period. These financial assets are held at fair value fall within Level 1 of the fair value hierarchy. The Group also holds options which rely on estimates and judgements to calculate a fair value for these financial instruments using the Black Scholes model. These financial assets held at fair value fall within Level 3 of the fair value hierarchy.

Further information about the assumptions made in measuring fair values is included in Note 24 — Financial instruments.

NOTES TO THE FINANCIAL STATEMENTS

5. SIGNIFICANT ACCOUNTING POLICIES

Except as described below, the accounting policies applied in these interim consolidated financial statements are the same as those applied in the Group's consolidated financial statements as at and for the 12 months ended 31 December 2022.

The changes in accounting policies are also expected to be reflected in the Group's consolidated financial statements as at and for the year ended 31 December 2023.

i. Adoption of other narrow scope amendments to IFRSs and IFRS Interpretations

A number of new standards and amendments to standards are effective for annual periods beginning after 1 January 2023 and earlier application is permitted; the Group has early adopted amendments effective for IAS 7 *Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures*. The amendments introduce additional disclosure requirements for companies that enter into supplier finance arrangements.

The Group has not early adopted any other new or amended standards in preparing these consolidated financial statements as the impact of adoption was not significant to the Group's Consolidated Financial Statements

12. OPERATING SEGMENTS

Management have determined the operating segments based on reports reviewed by the Chief Operating Decision Maker (“CODM”). The CODM considers the business from both an operations and geographic perspective and has identified two reportable segments, Guanaco/Amancaya which is based in Chile and Casposo which is based in Argentina. The CODM monitors the performance in these two regions separately. During the 6 months ended 30 June 2023, the Group earned 100% of its consolidated revenue from sales made to one customer (30 June 2022-90% of its consolidated revenue from sales made to two customers).

*Ore stock inventories require estimates and assumptions, most notably in regard to grades, volumes, densities, future completion costs and ultimate sale price. Such estimates and assumptions may change as new information becomes available which may impact upon the carrying value of inventory. The allowance for inventory obsolescence forming part of the above balance is US\$1,572k (31 December 2022:US\$1,572k).

16. ASSETS FOR SALE

All figures are reported in thousands of US\$	As at	
	30 June 2023	31 December 2022
Transfers from property, plant and equipment	-	951
Transfers from exploration and evaluation expenditures	-	7,343
Assets held for sale	-	8,294

On 25 November 2022, the Group entered into a Share Sale Agreement (“Agreement”) with E2 Metals Limited, whose name was subsequently changed to Unico Silver Limited (“Unico”) to sell the common shares of its subsidiary, SCR N Properties Ltd. (“SCR N”), whose major assets are exploration assets and property and equipment. As closing of the transaction was subject to several conditions including Unico shareholder approval of the total shares and options to be issued by Unico, the Group recorded the transaction as an asset held for sale at its carrying value on 31 December 2022.

All conditions for closing the transaction were met and the sale was completed on 1 March 2023.

A gain on the sale of US\$1.964 million was recognized (note 7) based on the difference between the US\$8.3 million carrying value of the assets held for sale and the total consideration of US\$10.2 million related to:

- Total cash consideration of US\$5.0 million (\$2.5 million received at closing, while US\$2.5 million is due over three subsequent years on the anniversary of the Agreement date) which fair value has been estimated at US\$4.8 million);
- 49,751,970 shares of Unico valued at US\$4.7 million (A\$6.2 million) that are being held in escrow with 50% released on the first anniversary of the closing date and 50% released on the second anniversary of the closing date, which was equal to 19.9% Unico's's shareholding on a non-diluted basis on 1 March 2023 and;
- 15 million options of Unico. The value of the options using the Black-Scholes model at closing was US\$0.7 million using the following key assumptions:

Strike price A\$0.26

Annual volatility 97.81

Interest rate 4.06%

Expiration date 27 February 2026

The US\$2.5 million in deferred cash payments is secured by a share mortgage over 51% of SCR N's common shares until the second cash installment is paid, at which time the share mortgage is to be reduced to 19%. The deferred cash payments are to be received as follows:

- US\$0.75 million on the first anniversary of the Agreement date;
- US\$0.75 million on the second anniversary of the Agreement date; and
- US\$1 million on the third anniversary of the Agreement date

Carrying value – Guanaco/Amancaya

The Guanaco and Amancaya mines have been determined by Management to be a single cash generating unit (“CGU”). The fair value less cost of disposal, is used to assess the recoverable value of the CGU. The mine properties noted above and the property, plant and equipment that is an intrinsic part of the mine and its structure (included in note 18) with a total book value of US\$46 million are included in determining the carrying value of the CGU for the purposes of assessing for impairment.

Management have assessed the fair value to be above book value of the Guanaco/Amancaya project and therefore no impairment charge has been applied to the assets for the current year. An impairment test was also performed internally using the discounted cash flow model (DCF) as the primary valuation methodology along with a crosscheck method using comparable listed market values.

Main assumptions of the DCF model for impairment test purposes are as follows:

- Forecast Gold price (2023-2033): US\$1,940/oz-1,750/oz (31 December 2022 (2022-2033): US\$1,800/oz – US\$1,720/oz
- Forecast Silver price (2023-2033):US\$24/oz-22.8/oz (31 December 2022 (2022-2033) US\$20/oz– US\$23.25/oz
- Life of mine operations based on the current model are forecast to end in 2033.
- Discount Rate: 9.3% (31 December 2022: 7.5%)

The sensitivity to +/- 10% variation in the gold price (US\$1,575-2,134/oz) on the fair value of the Guanaco/Amancaya project results in an impact of +/- US\$16.0 million.

The sensitivity to +/- 10% variation in the discount rate (8.4%-10.2%) fair value of the Guanaco/Amancaya project results in an impact of +/- US\$1.8 million.

The sensitivity to +/- 10% variation in production costs on the fair value of the Guanaco/Amancaya project results in an impact of +/- US\$9.1 million.

None of these reasonable possible changes would result in a fair value below the book value of any of the projects.

20. INVESTMENTS ACCOUNTED FOR USING THE EQUITY METHOD

The Group's interests in equity-accounted investees comprise an interest in a Rawhide Acquisition Holding LLC. ("Rawhide") that owns Rawhide Mining LLC, a gold and silver operating mine in Nevada, USA and which carrying value is US\$nil (31 December 2022: US\$nil) and an interest in Ensign Gold Limited ("Ensign") that is engaged in the acquisition, exploration, and development of precious metal mineral properties primarily in the state of Utah, United States through its subsidiary, Ensign Gold (US) Corp. Subsequent to acquiring the interest, Ensign changed its name to Ensign Minerals Inc.

20.1 Investment in Rawhide

During the six months ended 30 June 2023, the Group provided bridge funding of US\$555,000 to the Rawhide Mine in exchange for takeover options with the other unitholders to acquire an equity position of approximately 99.98% of the Mine, subject to due diligence. Total expenses related to the takeover option, which include due diligence expenses and the bridge funding, were US\$617,000. As the Group did not exercise the takeover options, the Group recognised these expenses in the consolidated statement of profit or loss and other comprehensive income as Other expenses (note 8). During the six month period ended 30 June 2022, the Group advanced Rawhide US\$123,686. As the Group did not expect to recover this amount, the Group recognised this amount in share of loss of associates in the consolidated statement of profit or loss and other comprehensive income during that period.

Comparable trade payables that are not part of the arrangements	30-60 days	30-60 days

The Group participates in a supply chain financing arrangement (SCF) under which its supplier may elect to receive early payment of their invoice from a bank by factoring their receivable from the Group. Under the arrangement, a bank agrees to pay amounts to a participating supplier in respect of invoices owed by the Group and receives settlement from the Group at a later date. The principal purpose of this arrangement is to facilitate efficient payment processing and enable the willing suppliers to sell their receivables due from the Group to a bank before their due date.

The Group has not derecognised the original liabilities to which the arrangement applies because neither a legal release was obtained, nor the original liability was substantially modified on entering into the arrangement. From the Group's perspective, the arrangement extends payment terms to six months. The Group incurs interest ranging from 8%-9% per 180 days to the bank on the amounts due to suppliers. The Group therefore discloses the amounts factored by suppliers within trade payables because the nature and function of the financial liability remain similar to those of other trade payables but discloses disaggregated amounts in the notes. All payables under SCF are classified as current as at 30 June 2023.

The payments to the bank are included within operating cash flows because they continue to be part of the normal operating cycle of the Group and their principal nature remains operating-i.e. payments for services required to earn revenue. The payments to a supplier by the bank are considered non-cash transactions and amount to US\$690,818 plus accrued interest of US\$41,512 as at 30 June 2023 (6 months ended 30 June 2022-non-cash transactions of US\$758,073 plus accrued interest of US\$23,326).

Mine closure provision

Provision for rehabilitation work has been recognised in relation to estimated future expenditures including rehabilitating mine sites, dismantling operating facilities and restoring affected areas. These future cost estimates are discounted to their present value. The calculation of this provision requires assumptions such as application of environmental legislation, mine closure dates, available technologies and engineering cost estimates.

As at 30 June 2023, the total restoration provision amounts to US\$7.81 million (31 December 2022-US\$7.2 million) for the Guanaco/Amancaya mine. The present value of the restoration provision was determined based on the following assumptions:

Undiscounted rehabilitation costs: US\$8.4 million; (31 December 2022 – US\$ 7.7 million) and

Discount period: 3.5 years (Discount period based on expected timing of restoration activities). Discount rate: 2.07% (31 December 2022- 1.67%)

As at 30 June 2023, the total restoration provision amounts to US\$3.7 million (31 December 2022 – US\$ 3.8 million) for the Casposo mine. The present value of the restoration provision was determined based on the following assumptions:

Undiscounted rehabilitation costs: US\$3.9 million; and Discount rate: 2.93% (31 December 2022–US\$3.9 million and 2.2%)

24. FINANCIAL INSTRUMENTS

Financial risk management objectives

The Group's principal financial instruments comprise borrowings, receivables, listed equity securities, cash and short-term deposits. These activities expose the Group to a variety of financial risks: market risk (interest rate risk and foreign currency risk), credit risk, price risk and liquidity risk.

The Group recognises the importance of risk management and has adopted a Risk Management and Internal Compliance and Control policy which describes the role and accountabilities of management and of the Board. The Directors manage the different types of risks to which the Group is exposed by considering risk and monitoring levels of exposure to the main financial risks by being aware of market forecasts for interest rates, foreign exchange rates, commodity and market prices. The Group's exposure to credit risk and liquidity risk is monitored through general business budgets and forecasts.

The Group holds the following financial instruments:

NOTES TO THE FINANCIAL STATEMENTS

a. Market Risk

i. Foreign Currency Risk

The Group undertakes certain transactions denominated in foreign currency and is exposed to foreign currency risk through foreign currency exchange rate fluctuations.

Foreign exchange rate risk arises from future commercial transactions and recognised financial assets and financial liabilities denominated in a currency that is not the functional currency of the Group. The risk is measured using cash flow forecasting. Foreign currency risk is minimal as most of the transactions are settled in US\$.

At 30 June 2023, the Group was exposed to foreign exchange risk through the following financial assets and liabilities denominated in currencies other than the Group's functional currency (thousands of US\$).

The following significant exchange rates have been applied.

USD	Average rate for the 6 months ended 30 June		Spot rate	
	2023	2022	30 June 2023	31 December 2022

Sensitivity analysis

A reasonably possible strengthening (weakening) of the Argentine peso, Chilean peso, Australian dollar, Canadian dollar and US dollar against all other currencies at 30 June 2023 would have affected the measurement of financial instruments denominated in a foreign currency and affected equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant and ignores any impact of forecast sales and purchases.

NOTES TO THE FINANCIAL STATEMENTS

ii. Price Risk

The Group's revenues are exposed to fluctuations in the price of gold, silver and other prices. Gold and silver produced is sold at prevailing market prices in US\$.

The Group has resolved that for the present time production should remain unhedged. The Group considers exposure to commodity price fluctuations within reasonable boundaries to be an integral part of the business.

Sensitivity to Changes in Commodity Prices (Gold and Silver)

The below sensitivity analysis demonstrates the after tax effect on the profit/(loss) and equity which could result if there were changes in the gold and silver commodity prices by +/- 10% of the actual commodity prices realised by the Group.

All figures are reported in thousands of US\$	Effect on profit/(loss) For the 6 months ended 30 June		Effect on equity	
	2023	2022	30 June 2023	31 December 2022
10 % increase in gold and silver prices	2,829	2,585	2,829	4,971
10 % decrease in gold and silver prices	(2,829)	(2,585)	(2,829)	(4,971)

iii. Interest Rate Risk

The Group's main interest rate risk arises from finance leases. The Group's borrowings are at fixed rates and therefore do not carry any variable interest rate risk. Changes in interest rates are not expected to have a significant impact on the Group.

b. Financial Market Risk

The financial market risk is the risk that the fair value or future cash flows of the financial instruments will fluctuate because of changes in market prices, which occurs due to the Group's investment in listed securities where share prices can fluctuate over time. This risk, however, is not deemed to be significant as these investments are held for long term strategic purposes and therefore movement in the market prices do not impact the short-term profit or loss or cash flows of the Group.

The group holds listed government bonds, and listed equity securities (note 4). These are classified as level 1 within the fair value hierarchy as per AASB 7 "Financial Instruments".

c. Credit Risk

The maximum exposure to credit risk at the reporting date to recognised financial assets is the carrying amount, net of any allowance for doubtful debts, as disclosed in the statement of financial position and notes to the financial statements.

The Group trades only with recognised, creditworthy third parties, and as such collateral is not requested nor is it the Group's policy to securitise its other receivables.

In addition, receivable balances are monitored on an ongoing basis with the result that the Group's exposure to bad debts is not significant. There are no significant concentrations of credit risk.

d. Liquidity Risk

The liquidity of the Group is managed to ensure sufficient funds are available to meet financial commitments in a timely and cost effective manner.

Management continuously reviews the Group's liquidity position through cash flow projections based upon the current life of mine plan to determine the forecast liquidity position and maintain appropriate liquidity levels.

e. Maturities of financial liabilities

The tables below analyses the Group's financial liabilities into relevant maturity groupings based on the remaining period at the reporting date to the contractual maturity date.

The amounts disclosed in the table are the contractual undiscounted cash flows.

INDEPENDENT AUDITOR'S REPORT

Independent Auditor's Review Report

To the shareholders of Austral Gold Limited

Conclusion

We have reviewed the accompanying **Half-year Financial Report** of Austral Gold Limited.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the Half-year Financial Report of Austral Gold Limited does not comply with the *Corporations Act 2001*, including:

- giving a true and fair view of the **Group's** financial position as at 30 June 2023 and of its performance for the Half-year ended on that date; and
- complying with *Australian Accounting Standard AASB 134 Interim Financial Reporting* and the *Corporations Regulations 2001*.

The **Half-year Financial Report** comprises:

- Consolidated statement of financial position as at 30 June 2023
- Consolidated statement of profit or loss and other comprehensive income, Consolidated statement of changes in equity and Consolidated statement of cash flows for the Half-year ended on that date
- Notes 1 to 26 comprising a summary of significant accounting policies and other explanatory information
- The Directors' Declaration.

The **Group** comprises Austral Gold Limited (the Company) and the entities it controlled at the Half year's end or from time to time during the Half-year.

Basis for Conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the *Auditor's Responsibilities for the Review of the Financial Report* section of our report.

We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the *Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with these requirements.

Material uncertainty related to going concern

We draw attention to Note 3, “Going Concern” in the Half-year Financial Report. The events or conditions disclosed in Note 3, indicate a material uncertainty exists that may cast significant doubt on the Group’s ability to continue as a going concern and, therefore, whether it will realise its assets and discharge its liabilities in the normal course of business, and at the amounts stated in the Half-year Financial Report. Our conclusion is not modified in respect of this matter.

Responsibilities of the Directors for the Half-year Financial Report

The Directors of the Company are responsible for:

- the preparation of the Half-year Financial Report that gives a true and fair view in accordance with *Australian Accounting Standards* and the *Corporations Act 2001*
- such internal control as the Directors determine is necessary to enable the preparation of the Half-year Financial Report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

Auditor’s Responsibilities for the Review of the Half-year Financial Report

Our responsibility is to express a conclusion on the Half-year Financial Report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the Half-year Financial Report does not comply with the *Corporations Act 2001* including giving a true and fair view of the Group’s financial position as at 30 June 2023 and its performance for the Half-Year ended on that date, and complying with *Australian Accounting Standard AASB 134 Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a Half-year Financial Report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with *Australian Auditing Standards* and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
