AFT's Crystaderm® antiseptic approved for sale in China

AFT Pharmaceuticals (ASX: AFP, NZX: AFT) today announces its first aid antiseptic cream Crystaderm has been approved for sale in China, the world's second largest healthcare market.

The registration by China's relevant government agency will allow the medicine to be sold in China. Currently AFT sells the medicine into China via its Cross Border E-Commerce (CBEC) site on Tmall China.

AFT Managing Director Dr Hartley Atkinson says: "We are delighted with the approval of this medicine and excited about the growth opportunities it opens for the company. This is consistent with our International expansion plans.

"Crystaderm is one of our most popular products in New Zealand and is a key focus on our Tmall site. We believe it has the potential for success in Chinese E-commerce sites and over the counter medicine outlets. We are still firming up plans for the distribution of this medicine in China, but we expect it to be launched in the market in the 2024 calendar year."

Crystaderm is a preservative-free first aid cream used for the treatment and prevention of minor skin infections such as acne, cuts, scrapes, grazes, burns and school sores (impetigo). Unlike topical antibiotics it carries no known risk of bacterial resistance and consequently in New Zealand has been widely prescribed by doctors. Hydrogen peroxide, its active ingredient, is a potent agent against many types of bacteria. The medicine is designed to melt at skin temperature and to release the active ingredient to both moist and dry areas, and doesn't stain skin, hands, or fabric.

Released for and on behalf of AFT Pharmaceuticals limited by Malcolm Tubby, Chief Financial Officer.
