3Q23 Performance update

QBE updates on recent trading performance and reiterates full year outlook. QBE continues to expect FY23 Group constant currency GWP growth of around 10%, and a FY23 Group combined operating ratio of around 94.5%.

Growth and pricing momentum

3Q23 gross written premium growth was 7% on the prior corresponding period, on both a reported and constant currency basis. Group-wide renewal rate increases averaged 9.6% in 3Q23, while ex-rate growth was broadly flat due to the continuation of portfolio exits, alongside the large first half bias for written premium across a number of growth focus areas. Retention has remained at favourable levels.

In the year to September, gross written premium growth was 10% on the prior corresponding period, or 11% in constant currency, with ex-rate growth of 5%. Excluding Crop, Group gross written premium increased by 11% in constant currency, with ex-rate growth of 4%.

Claims update

Natural catastrophe activity continued over recent months, underscored by multiple storm, flood and wildfire events in Europe and North America, alongside hurricanes Idalia, Otis and Hillary. Catastrophe claims through the period have however trended favourably relative to QBE's revised FY23 catastrophe cost assumption of ~\$1.3B. The net cost of catastrophe claims in the four months to October is expected to be ~\$250M, resulting in catastrophe costs of ~\$950M in the year to October.

Claims inflation trends remain broadly similar with those outlined at QBE's 1H23 result. Whilst some early moderation is clear in certain lines, inflation has remained more persistent across a small number of portfolios including Australia Pacific personal lines, and North America non-core lines and Accident & Health.

This is expected to result in some strain on the current year, and modest adverse prior year development. These impacts, alongside a weaker North America Crop result are expected to be offset by lower catastrophe costs in 2H23.

North America Crop

The North America Crop result is expected to be adverse to Plan in 2023, reflecting the impact of lower commodity prices and drier conditions across certain states. Based on currently available data, QBE expects a current accident year Crop combined operating ratio of around 93-97%.

Investment performance

Despite weaker risk asset performance, strong fixed income returns underpinned favourable investment performance in 3Q23. Interest rates were relatively stable across our key markets, and the core fixed income running yield exited 3Q23 at 5.0%, slightly higher relative to the 1H23 exit running yield of 4.9%.

Total investment FUM for 3Q23 was \$28.2B, increasing from \$27.4B at 1H23, with risk assets accounting for ~13% of the portfolio. During the third quarter, the net impact from asset liability management activities was broadly neutral.

Outlook

QBE reiterates full year outlook, and continues to expect:

- FY23 Group constant currency GWP growth of around 10%, and we expect the supportive premium rate environment should continue into 2024.
- FY23 Group combined operating ratio of around 94.5%. QBE's FY23 combined ratio outlook continues to exclude the upfront impact of the reserve transaction completed in 1H23.
