

ASX Announcement (ASX: NRZ)

20 December 2023

## Director resignation

NeuRizer Ltd (NeuRizer or the Company) wishes to advise that after more than 7 years as non-executive director, Mr Murray Chatfield has decided to step down from the NeuRizer Board effective immediately.

Executive Chairman Mr Peters stated:

*“Murray joined the board in 2015 as an independent director. In that time he has provided valuable input and guidance to the Company. His endless energy, vast knowledge of financial markets and products combined with a passion for relevant targeted innovation has been a valuable and deep resource for NeuRizer. Murray attended every board and audit committee meeting over his 7 years and has always worked to ensure that the best interests of our shareholders were at the forefront in the decision making of the Company. We all wish Murray well in anything he does in the future.”*

The NeuRizer Executive Chairman has authorised this announcement for release to the ASX.

## About NeuRizer Ltd

NeuRizer Ltd. (NeuRizer) is the company responsible for progressing the NeuRizer Urea Project (NRUP). NRUP is a nationally significant project that, when developed, will deliver low-cost, high-quality nitrogen-based fertiliser ensuring a secure supply for local and export agriculture markets. Located in South Australia, 550 kilometres north of Adelaide, the NRUP is intended to initially produce 1Mtpa of urea fertiliser with potential to increase to 2Mtpa.

NeuRizer is a certified carbon neutral organisation having been awarded Climate Active certification in March 2022 and is a signatory to the United Nations Global Compact. NRZ has developed a decarbonisation pathway for the NRUP seeking to ensure that the NRUP achieves net zero carbon emissions from its operations planned to commence in 2025.

The NRUP will significantly increase Australia's sovereign manufacturing capability for fertiliser, supporting Australian agricultural food production. The NRUP will strengthen supply chain resilience that will benefit Australian farmers and, to a lesser extent, the industrial sector where urea is used as a supply input (eg. diesel additive (AdBlue), industrial resins, etc.) by reducing the nation's reliance on imports.

The NRUP will be one of the biggest infrastructure projects of its type in Australia, providing long term economic development and employment opportunities (2,000+ construction jobs plus 2,450+ ongoing positions) for the communities of the Upper Spencer Gulf region, northern Flinders Ranges and South Australia.

The NRUP will be the only fully integrated urea production facility in Australia, with all major inputs for production (gas, power, and CO<sub>2</sub>) on-site, meaning NRZ will control both supply and price of these major inputs, regardless of prevailing market conditions and supply chain dynamics.

## A message for NeuRizer Shareholders

NeuRizer is committed to being a carbon neutral organisation and successfully achieved this in March 2022. To assist us in continuing to reduce our CO<sub>2</sub> footprint, we are asking all our shareholders to provide an email address to receive their communications online.
