Felix Gold Limited (ASX: FXG) (Felix or the Company) provides a summary of its operational and corporate activities for the quarter ended 31 December 2023.

## Operations

### Treasure Creek Project - Extension of Gold Mineralisation

Near surface, oxidised gold mineralisation extended at NW Array with a large zone of gold mineralization over an area of approximately 2km by 600m. Drilling is relatively shallow with sampling down to an average depth of 60m below surface. In more closely drilled areas associated with higher grades, drilling depths are down to around 100m below surface with gold mineralisation remaining open at depth. Further exploration work is required at the prospect to determine the limits of gold mineralisation which remains open.

The results open more extensive potential strike length and reveal the potential for parallel trends supported by soil anomalies. Notably, primary gold mineralisation remains open at varying depths and directions. The strategic drilling approach is concentrated on targeting near-surface oxide gold mineralisation, displaying grades comparable to, or surpassing, the current head grades of nearby Kinross's Fort Knox Mine, a local Tier 1 gold mine searching for additional ore supply.

Bottle Roll metallurgical test work is being undertaken to assess the potential gold recoveries. These results are expected in Q1 2024 and subject to these results, resource modelling will be undertaken.

### **Treasure Creek Project – Discovery of High-Grade Antimony**

High-grade antimony assays have been received at the NW Array Prospect in Treasure Creek. The recent drilling and previous exploration work has confirmed the presence of high-grade stibnite arsenopyrite bearing quartz veins and vugs in the felsic porphyry sill, usually in association with shear zones striking 290° to 300° dipping steeply to vertically.

The critical nature of Antimony as a strategic metal for the US provides a unique opportunity to assess the potential for a near term, at surface extraction of antimony for domestic supply requirements. This work is ongoing.

### **NE Fairbanks Project**

No active exploration activity was conducted at NE Fairbanks during the quarter.

### **MHT**

No active exploration activity was conducted at MHT during the quarter.

### **Grant-Ester Project**

No active exploration activity was conducted at Grant-Ester during the quarter.

### **Liberty Bell Project**

No active exploration activity was conducted at Liberty Bell during the quarter.

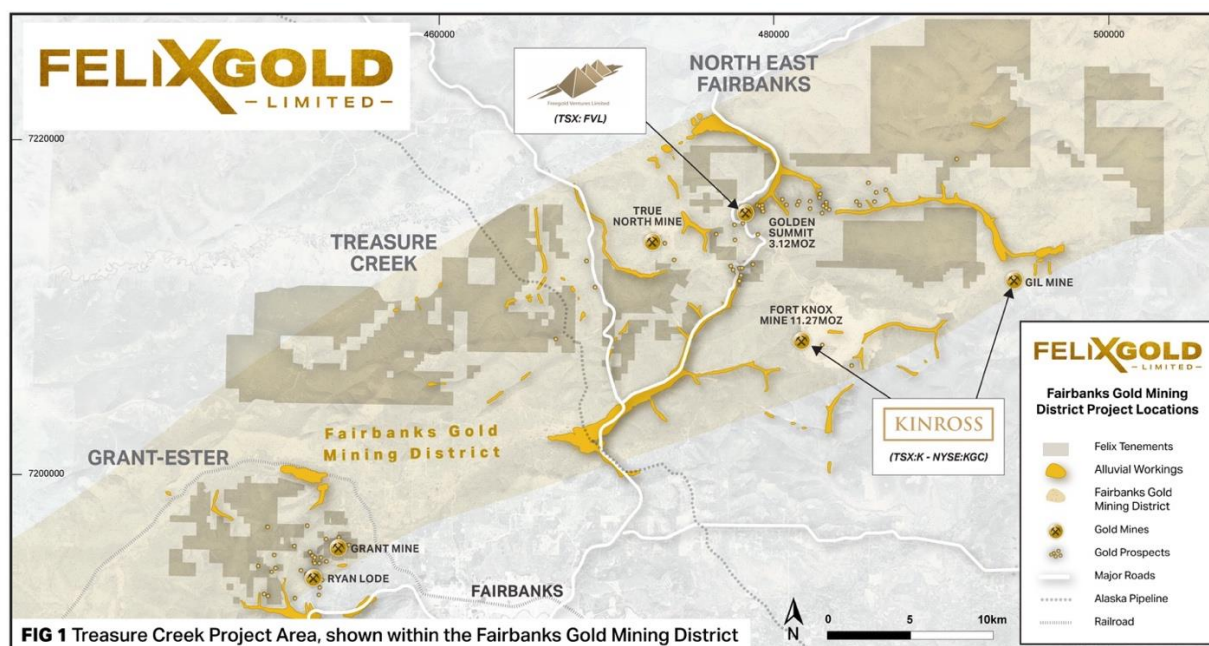

### **Upcoming Activities**

Metallurgical test work for NW Array gold mineralisation results expected Q1 2024

Subject to the metallurgical test work results, resource modelling of the NW Array gold system will be undertaken in Q1 2024.

Further antimony results are expected Q1 2024 from re-assay of 2022 gold exploration throughout Treasure Creek.

Ongoing acquisitions complimentary to our existing assets ongoing.

## About Felix Gold

Felix Gold Limited (ASX: FXG) is an ASX-listed gold discovery business operating in the highly endowed Tintina Gold Province of Alaska in the United States.

Our flagship asset is a substantial landholding in the world-class Fairbanks Gold District, where historical gold production exceeds 16 Moz. In Fairbanks, our tenements sit within one of the largest gold production centres in the entire Tintina belt and lie in close proximity to both Kinross Gold's Tier 1 gold mine, Fort Knox, and the rapidly growing Freegold Ventures' discovery, Golden Summit. We hold four key projects across over 392 km<sup>2</sup> of tenure in the heart of this premier gold production district.

Felix's key projects are located only 20 minutes from our operational base in the central mining services hub of Fairbanks City, Alaska. This base is a huge advantage for Felix with its existing infrastructure, low-cost power, skilled workforce and long history of gold production. It allows us to explore year-round and delivers genuine potential development pathways for our assets.

Our key projects are located along the main Fairbanks gold trend and contain dozens of identified prospects, extensive alluvial gold production, large gold-in-soil anomalies and historical drill intercepts which remain wide open and mimic other major deposits in the district. We have multiple walk-up drill targets with evidence of large-scale gold potential. We also possess an existing Mineral Resource at Grant-Ester with significant upside opportunity.

Felix's value proposition is simple: we are striving to be the premier gold exploration business in the Tintina Province through the aggressive pursuit and realisation of Tier 1 gold discoveries.
