Gold Mountain Limited (ASX:GMN)

Gold Mountain Investor Q&A Webinar

In response to questions from shareholders, Gold Mountain (ASX:GMN) would like to invite shareholders and interested parties to participate in a Q&A webinar with the Gold Mountain team. On this webinar, Gold Mountain's Chief Geologists, Peter Temby and Luziane Souza, will respond to shareholders' and investors' questions about the Company's projects including the copper and rare earths projects.

We invite investors to ask questions in advance of the webinar through the 'ask a question' section on this link:

<https://investorhub.goldmountainltd.com.au/activity-updates/gold-mountain-investor-q-a>

Questions asked in advance will be addressed during the webinar. The Gold Mountain team will continue to respond to all questions after the webinar via our investor hub.

Q&A Webinar Details:

Date: 20 February 2024

Time: 1pm AEST (10am AWST)

Duration: 30 mins

To be notified when the webinar is released, please sign up to our investor hub:

<https://investorhub.goldmountainltd.com.au/auth/signup>

If you're already signed up to our investor hub, you will receive an email with a link to the webinar as soon as it is live.

About Us

Gold Mountain (ASX:GMN) is a mineral explorer with projects based in Brazil and Papua New Guinea (PNG). These assets, which are highly prospective for a range of metals including rare earth elements, lithium, nickel, copper and gold, are now actively being explored.

Gold Mountain has gradually diversified its project portfolio. The Company has a 75% holding in a package of highly prospective rare earth element, copper and lithium licenses located within the eastern Brazilian lithium belt, spread over parts of the Borborema Province and São Francisco craton in north-eastern Brazil including in Salinas, Mines Gerais.

In PNG, Gold Mountain is exploring the Wabag Project, which covers approximately 950km² of highly prospective exploration ground in the Papuan Mobile belt. This project contains three targets, Mt Wipi, Monoyal and Sak Creek, all lying within a northwest-southeast striking structural corridor. The three prospects have significant potential to host a porphyry copper-gold-molybdenum system and, or a copper-gold skarn system. Gold Mountain's current focus is Mt Wipi, which has been subjected to several phases of exploration, and the potential to host a significant copper-gold deposit is high. The current secondary targets are, in order of priority, Monoyal and Sak Creek.

Gold Mountain has also applied for a 491 km² exploration licence at Green River where high-grade Cu-Au and Pb-Zn float has been found and porphyry style mineralisation was identified by previous explorers. Intrusive float, considered to be equivalent to the hosts of the majority of Cu and Au deposits in mainland PNG, was also previously identified.
