- Any material used in this presentation is only an overview and summary of certain data selected by the management of Tempest Minerals Ltd ("TEM").
- The presentation does not purport to contain all the information that a prospective investor may require in evaluating a possible investment in TEM nor does it contain all the information which would be required in a disclosure document prepared in accordance with the requirements of the Corporations Act and should not be used in isolation as a basis to invest in TEM. Recipients of this presentation must make their own independent investigations, consideration and evaluation of TEM.
- TEM recommends that potential investors consult their professional advisor/s as an investment in TEM is considered to be speculative in nature.
- Statements in this presentation are made only as of the date of this presentation unless otherwise stated and the information in this presentation remains subject to change without notice. Reliance should not be placed on information or opinions contained in this presentation.
- To the maximum extent permitted by law, TEM disclaims any responsibility to inform any recipient of this presentation on any matter that subsequently comes to its notice which may affect any of the information contained in this document and presentation and undertakes no obligation to provide any additional or updated information whether as a result of new information, future events or results or otherwise.
- No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions or conclusions contained in or derived from this presentation or any omission from this presentation or of any other written or oral information or opinions provided now or in the future to any person.
- To the maximum extent permitted by law, neither TEM nor, any affiliates, related bodies corporate and their respective officers, directors, employees, advisors and agents, nor any other person, accepts any liability as to or in relation to the accuracy or completeness of the information, statements, opinions or matters (express or implied) arising out of, contained in or derived from this presentation or any omission from this presentation or of any other written or oral information or opinions provided now or in the future to any person.

Competent Persons Statement

The scientific and technical information contained within this Presentation is based on, and fairly represents information prepared by Mr Don Smith, a Competent Person who is a Member of the Australian Institute of Mining and Metallurgy (Ausimm), Australian Institute of Geoscience (AIG) and Geological Society of Australia (GSA). Mr Smith is the Managing Director of Tempest Minerals Ltd and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resource and Ore Reserves". Mr Smith consents to the inclusion in this presentation of the matters based on his information in the form and context in which it appears.

The Board of the Company has authorised the release of this presentation to the market.

Key Points

-  Derisked multi-commodity multi-jurisdiction explorer developer
-  Attractively priced with huge potential upside
-  Exciting newsflow from ongoing exploration and corporate activity

People

BRIAN MOLLER
Non-executive Chairman

Brian has been a partner at the legal firm HopgoodGanim for 30 years and leads the Corporate Advisory and Governance practice. Brian is the chair or a non-executive director of several ASX listed companies; and was critical in the progression of LSE listed SolGold PLC to becoming one of the largest copper gold developments in the world.

DON SMITH
Managing Director

Don Smith is a Geologist and entrepreneur who holds a Bachelor of Science from Newcastle University and an MBA from The Australian Institute of Business. With over 20 years in the mining industry, he has held roles in junior through to multinational firms on projects spanning 6 continents and numerous commodities. Don is involved with a number of private and publicly listed resource companies.

ANDREW HAYTHORPE
Non-executive Director

Andrew Haythorpe has 30 years experience in geology, funds management and involved in over A\$300 million of mergers, acquisitions and capital raisings. He has been a Director and Chairman of a number of TSX and ASX listed companies including and is currently Managing Director of Allup Silica Ltd.

OWEN BURCHELL
Non-executive Director

Owen Burchell is a Mining Engineer with 20 years of technical, operational and corporate experience including management positions at Rio Tinto, BHP and Barrick Gold through to numerous mining start-ups, closures and operational turnaround projects.

Our Projects

-  ~2,000 square kilometers of highly prospective territory
-  High quality targets
-  Derisked multi-commodity portfolio

World Class. Potential.

- 400 km from Perth
- Major infrastructure
- Adjacent world class mines
- >1,000km² (100% TEM)
- Largely unexplored
- Initial mineralised discoveries
 - Orion/Clover
- Multiple drill targets to test in 2024
 - Remorse (Copper)
 - Sanity (Gold)

Previously....

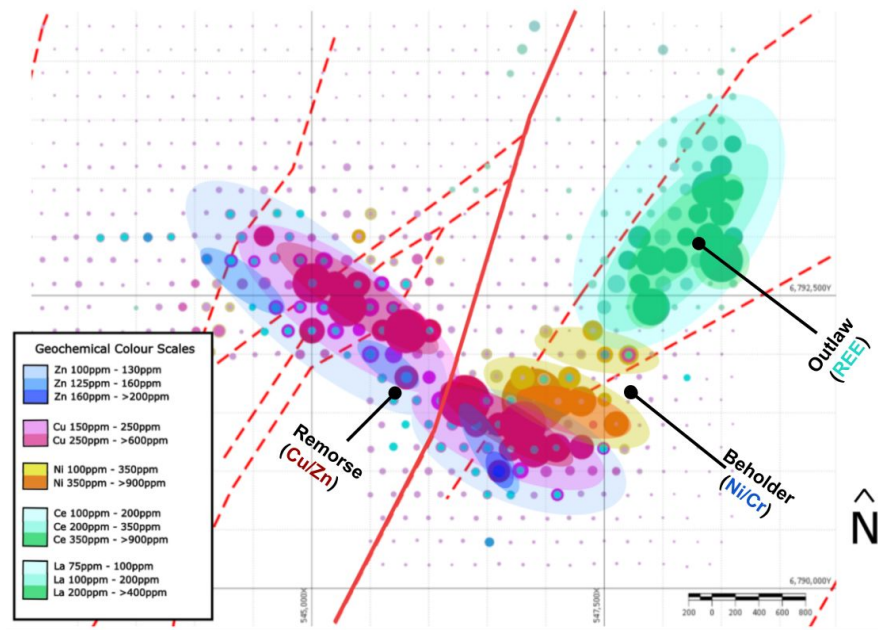

[Learn more](#) 

Drill Target: Remorse (Copper)

Highlights

-  4 kilometre base metal anomaly
-  Extremely coherent surface geochemistry
-  Matches strong geophysical (EM) anomaly
-  Drilling program in preparation

Drill Target: Sanity (Gold)

Highlights

Rock chip results up to:

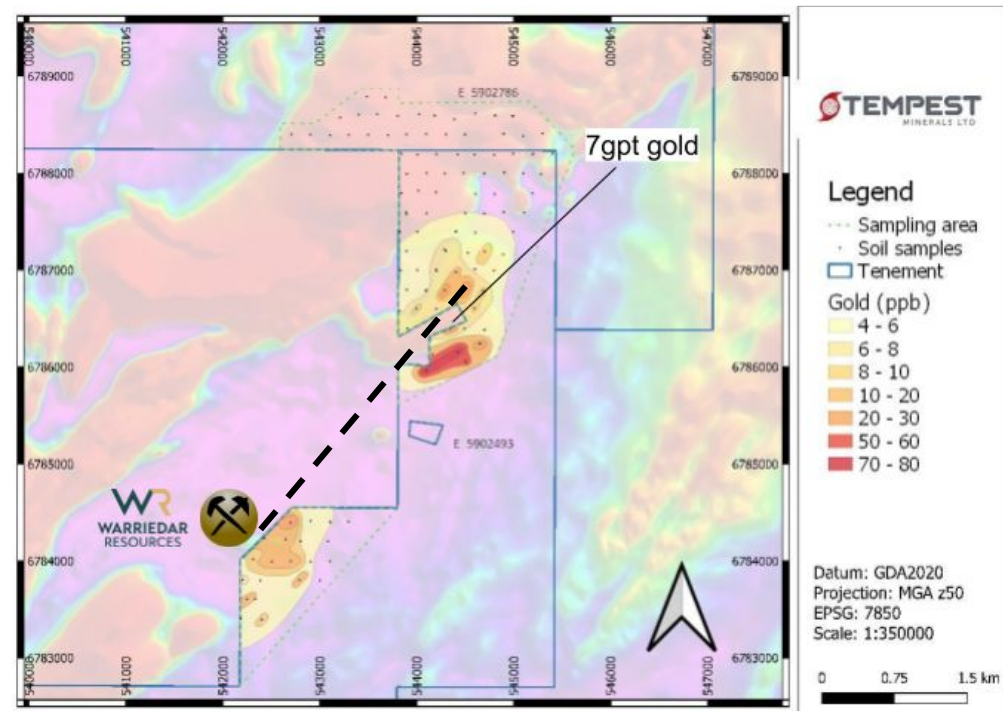

- 7gpt gold,
- 0.2% copper,
- >60% iron

Large envelope (80ppb gold)

Beside known gold deposit currently being drilled - potential extension?

Near Mine. Potential.

- >20km² - TEM 100%
- Operating neighbours
- 5 km from processing facility
- Low bar for development
- Recent work shows gold at surface
- Untested historic workings and mineralised outcrops along strike from open pit
- Multiple New Drill Targets
 - Wrangler

Drill Target #3: Wrangler

-  1gpt gold rock chips in new target area along strike from existing open pits
-  Identification of multiple new exploration targets
-  Preparation for further fieldwork and drilling in progress

[Learn more](#) 

Mammoth. Potential.

- 194km²
- Exciting Fraser Range Region
- Large geological structures
- Multi million ounce targets
- Main drill target
 - Large geophysical signature
 - 8km soil geochemistry

New Frontiers. Potential.

- 266km² 100% TEM
- 50km of strike length of high profile Earaheedy Basin
- 30km from major Copper/Zinc discoveries
- Base metals in legacy iron exploration not follow up
- Initial fieldwork completed 2023
- Drill targeting in 2024
