Introduction

Macquarie Bank Limited (MBL) is an Authorised Deposit-taking Institution (ADI) regulated by the Australian Prudential Regulation Authority (APRA). MBL is accredited under the Foundation Internal Ratings Based Approach (FIRB) for credit risk and the Internal Model Approach (IMA) for market risk and interest rate risk in the banking book. These advanced approaches place a higher reliance on a bank's internal capital measures and therefore require a more sophisticated level of risk management and risk measurement practices. Operational risk is subject to the Standardised Measurement Approach (SMA).

APRA has implemented the Basel Committee's Basel III framework, and in some areas has introduced stricter requirements (APRA super equivalence). This report details MBL's disclosures as required by APRA Prudential Standard APS 330 Public Disclosure (APS 330) as at 31 December 2023 together with the 30 September 2023 comparatives where appropriate. References to Macquarie in this report refer to the Level 2 regulatory group which includes MBL, further details are provided in Section 1.1 Scope of Application.

This report outlines the key components of Macquarie's capital structure, key risk exposures and associated capital requirements. Key risk exposures include credit risk (including securitisation exposures, credit valuation adjustment, and exposures to central counterparties), market risk, operational risk and interest rate risk in the banking book. This report also contains the reporting requirements for the leverage and liquidity coverage ratios. Macquarie's Risk Management Framework (RMF) along with the supporting frameworks and policies, and the monitoring, reporting of the RMF are described in the half year and full year Pillar 3 reports.

Ratios for Capital, Leverage and Liquidity are set out below.

APS 330 Table 3 (f)

	As at	As at
Capital, Liquidity and Leverage Ratios - Level 2 regulatory group	31 December 2023	30 September 2023
Common Equity Tier 1 capital ratio	13.4%	13.2%
Tier 1 capital ratio	15.3%	15.2%
Total capital ratio	20.7%	20.8%
Leverage ratio	5.0%	5.0%
Liquidity coverage ratio ^{1,2}	217%	199%

The minimum Common Equity Tier 1 (CET1) ratio in accordance with Prudential Standard APS 110 Capital Adequacy (APS 110) is 9%. This includes the industry minimum CET1 requirement of 4.5%, capital conservation buffer (CCB) of 3.75% and a countercyclical capital buffer (CCyB) of 0.75%³. The corresponding ratios for Tier 1 and Total capital are 10.5% and 12.5% respectively. APRA also requires ADIs to maintain a minimum leverage ratio of 3.5%. In addition, APRA may impose ADI-specific minimum ratios which may be higher than these levels. At 31 December 2023, the Macquarie Level 2 regulatory group capital and liquidity ratios are above the regulatory minimum required by APRA, and the Board imposed internal minimum requirement.

¹ The Liquidity Coverage Ratio for the 3 months to 31 December 2023 is calculated from 62 daily LCR observations (30 September 2023 is calculated from 64 daily LCR observations).

² APRA imposed a 15% add-on to the Net Cash Outflow component of the LCR calculation, effective from 1 April 2021. This add-on increased to 25% from 1 May 2022. Accordingly, the 3 month average LCR to 31 December 2023 and the 3 month average LCR to 30 September 2023 includes a 25% NCO add-on.

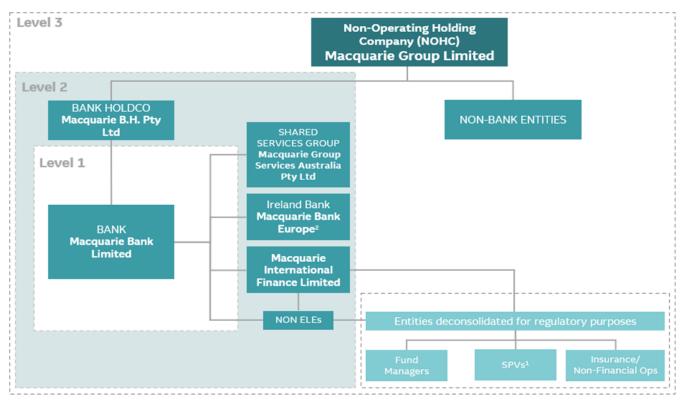

³ The CCyB of the Level 2 regulatory group as at 31 Dec 2023 is 0.71%, which is rounded to 0.75% for presentation purposes. The individual CCyB varies by jurisdiction and the CCyB of the Level 2 regulatory group is calculated as a weighted average based on exposures in different jurisdictions at period end.

1. Overview

1.1 Scope of Application

MBL, as an approved ADI, is required to comply with the disclosure requirements of APS 330 on a Level 2 basis.

The regulatory consolidated group is different to the accounting consolidated group and identifies three different levels of consolidation as illustrated below:

 $^{^{\}mathrm{1}}$ These are securitisation vehicles that achieve Regulatory Capital Relief per APS 120.

Reporting levels are in accordance with APRA definitions contained in APRA Prudential Standard APS 110: Capital Adequacy.

References to Macquarie in this report refer to the Level 2 regulatory group which consists of MBL, its subsidiaries and its immediate parent (Macquarie B.H. Pty Ltd) but excludes certain subsidiaries of MBL which are required to be deconsolidated for APRA reporting purposes. Unless otherwise stated, all disclosures in this report represent the Level 2 regulatory group prepared on an APRA Basel III basis.

1.2 Report Conventions

The disclosures in this report are not required to be audited by an external auditor. However, the disclosures have been prepared on a basis consistent with information submitted to APRA. Under the revised APS 310 Audit and Related Matters, the information submitted to APRA is required to be either audited or reviewed by an external auditor at Macquarie's year end, being 31 March.

All numbers in this report are in Australian Dollars and have been rounded to the nearest million, unless otherwise stated. Where necessary, comparative information has been restated to conform with changes in the current year, unless otherwise stated. Averages have been prepared in this report for certain disclosures as required by APS 330.

The Appendices include a Glossary of Terms used throughout this document.

² Disclosure of Macquarie Bank Europe's Pillar 3 document is available on Macquarie's website https://www.macquarie.com/au/en/investors/regulatory-disclosures.html

2. Risk Weighted Assets (RWA)

RWA are a risk-based measure of exposures used in assessing overall capital usage of the Level 2 regulatory group. When applied against eligible regulatory capital the overall capital adequacy ratio is determined. RWA are calculated in accordance with APRA Prudential Standards.

The table below sets out the RWA exposures for the Macquarie Level 2 regulatory group.

APS 330 Table 3(a) to (e)

	As at	As at
	31 December 2023	30 September 2023

Residential Mortgages	692	729
Other Retail	815	848
Total RWA subject to Standardised approach	3,389	3,811
Credit risk RWA for securitisation exposures	719	685
Credit Valuation Adjustment RWA	9,567	8,679
Exposures to Central Counterparties RWA	567	594
RWA for Other Assets ⁵	3,917	3,788
Total Credit risk RWA	99,480	97,783
Market risk RWA	8,993	9,011
Operational risk RWA	15,828	15,828
Interest rate risk in the banking book RWA	3,173	3,706
Total RWA	127,474	126,328

¹ 'Corporate' asset class includes Large Corporates.

 $^{^{\}rm 2}$ 'Financial Institution' asset class includes banks and other corporate financial institutions.

³ Residential mortgages RWA as at 31 December 2023 includes a \$2.3bn overlay as advised by APRA for the purpose of calibrating MBL's IRB residential mortgages model.

⁴ Specialised lending exposures subject to supervisory slotting criteria are measured using APRA determined risk weightings.

⁵ The major components of Other Assets are unsettled trades, fixed assets and residual value of operating leases.

3. Credit Risk Measurement

3.1 Macquarie's Credit Risk Exposures

Disclosures in this section have been prepared on a gross credit exposure basis. Gross credit risk exposure relates to the potential loss that Macquarie would incur as a result of a default by an obligor. The gross credit risk exposures are calculated as the exposure at default on drawn and undrawn facilities along with derivatives and repurchase agreements. The exposure at default is calculated in a manner consistent with APRA Prudential Standards.

Exposures have been based on a Level 2 regulatory group as defined in Section 1.1. The gross credit risk exposures in this section will differ from the disclosures in the MBL and its subsidiaries, the Consolidated Entity financial report as gross credit risk exposures include off balance sheet exposures and exclude the exposures of subsidiaries which have been deconsolidated for APRA reporting purposes.

The exposures below exclude the impact of:

- Credit risk mitigation
- · Securitisation exposures
- CVA
- Central counterparty exposures
- · Trading book on balance sheet exposures; and
- Equity exposures.

5. Securitisation

5.1 Securitisation Activity

Over the 3 months to 31 December 2023, Macquarie has undertaken the following securitisation activity. Macquarie may or may not retain an exposure to securitisation SPVs to which Macquarie has sold assets.

¹ Included in the above are assets of \$68,506 million in securitisation entities where Macquarie continues to hold capital behind the underlying pool of securitised assets in Level 2 regulatory group (30 September 2023: \$66,613 million).

6. Leverage Ratio Disclosures

The leverage ratio is a non-risk-based ratio that is intended to restrict the build-up of excessive leverage in the banking system and acts as a supplementary measure to create a back stop for the risk-based capital requirements.

Prudential Standard APS 110 Capital Adequacy requires a minimum leverage ratio of 3.5% effective 1 January 2023. Macquarie's leverage ratio was 5.0% at 31 December 2023. There was an increase in the total exposures primarily driven by growth in the mortgages portfolio and liquidity holdings, offset by higher Tier 1 Capital, resulting in a neutral impact to the leverage ratio quarter on quarter.

	31 December 2023	30 September 2023	30 June 2023	31 March 2023

¹ APRA imposed a 15% add-on to the Net Cash Outflow (NCO) component of the LCR calculation, effective from 1 April 2021. This add-on increased to 25% from 1 May 2022. For the 3 months to 31 December 2023 an average NCO overlay of \$4,466 million is included in the disclosed balance of \$22,332 million (3 months to 30 September 2023 overlay of \$4,876 million is included in the disclosed balance of \$24,382 million).

² The LCR for the 3 months to 31 December 2023 is calculated from 62 daily LCR observations (3 months to 30 September 2023 was calculated from 64 daily LCR observations).

The Liquidity Coverage Ratio (LCR)

The LCR requires unencumbered liquid assets be held to cover expected net cash outflows (NCOs) under a regulatory-defined stress scenario lasting 30 calendar days. Macquarie's 3 month average LCR to 31 December 2023 was 217% (based on 62 daily observations). This represents an increase of 18% from the 3 month LCR to 30 September 2023, as a result of a reduction in NCOs and an increase in liquid assets.

Liquidity management is performed centrally by Group Treasury, with oversight from the MGL and MBL Asset and Liability Committees (ALCO), the MGL and MBL Boards and the Risk Management Group (RMG). Furthermore, the Board approved Liquidity Policy and Risk Tolerance is designed to ensure Macquarie maintains sufficient liquidity to meet its obligations as they fall due.

Macquarie sets internal management and Board approved minimum limits for the LCR above the regulatory minimum level and monitors its aggregate LCR position against these limits on a daily basis. Macquarie also monitors the LCR position on a standalone basis for major currencies in which it operates, with the high-quality liquid assets (HQLA) portfolio being denominated and held in both Australian Dollars and a range of other currencies. This ensures that liquid assets are maintained consistent with the distribution of liquidity needs by currency, allowing for an acceptable level of currency mismatches.

Macquarie actively considers the impact of business decisions on the LCR, as well as internal liquidity metrics that form part of the broader liquidity risk management framework. Macquarie's LCR fluctuates on a daily basis as a result of normal business activities and, accordingly, ongoing fluctuations in the reported LCR are expected and are not necessarily indicative of a changing risk appetite. Some examples of factors that can influence the LCR include wholesale funding activities (such as upcoming maturities and prefunding expected future asset growth), the degree of activity in Macquarie's capital markets facing businesses, the composition and nature of liquid asset holdings, and a variety of other external market considerations that could impact day to day collateral requirements.

Liquid Assets

In addition to notes and coins and balances held with central banks, Macquarie's LCR liquid assets include Australian Dollar Commonwealth Government and semi-Government securities as well as certain HQLA-qualifying foreign currency securities.

Net Cash Outflows (NCOs)

NCOs in the LCR include contractual and assumed cash outflows, offset by certain allowable contractual cash inflows. Some of the key drivers of Macquarie's NCOs include:

Retail and SME deposits: assumed regulatory outflow relating to deposits from retail and SME customers that are at call or potentially callable within 30 days.

Unsecured wholesale funding: includes remaining deposits which are not received from retail or SME customers along with unsecured debt balances contractually maturing within 30 days.

Secured wholesale funding and lending: represent inflows and outflows from secured lending and borrowing activities contractually maturing within 30 days, such as repurchase, and reverse repurchase agreements.

Outflows relating to derivative exposures and other collateral requirements: includes gross contractual cash outflows relating to contractually maturing derivative contracts (with gross inflows on maturing derivative contracts profiled in 'other cash inflows'). Further, contingent liquidity outflows such as potential collateral requirements from market movements, a 3-notch credit ratings downgrade and withdrawal of excess collateral placed with Macquarie are also included in this category.

Inflows from fully performing exposures: In Macquarie's LCR, a large component of this balance relates to excess liquidity placed on an overnight or very short-term basis with third parties (internally considered part of the cash and liquid asset portfolio).

Other contractual funding obligations and other cash inflows: includes other gross flows not profiled elsewhere in the LCR. The volumes in these categories are large relative to Macquarie's total cash outflows and inflows. In addition to derivative inflows noted above, key balances in these categories include:

- Segregated client funds placed with Macquarie: Macquarie acts as a clearing agent for clients on various futures exchanges. Clients place margin with Macquarie and Macquarie places this margin either directly with the exchange, holds it in other segregated external asset accounts or retains a portion on deposit with Macquarie. Some of the balances are recorded on a gross basis on Macquarie's balance sheet and APRA require these to be profiled as gross inflows and outflows in the LCR.
- Security and broker settlement balances: these represent securities that have been purchased or sold by Macquarie that have not yet settled and broker balances where stock has been bought or sold on behalf of clients, but payment has not been made to / received from the client. APRA require these balances to be reflected on a gross basis in the LCR as 100% weighted inflows and outflows. The net effect of these balances on Macquarie's average LCR is minimal.

Appendix 1 Glossary of Terms

ADI	Authorised Deposit-taking Institution.
Additional Tier 1 Capital	A capital measure defined by APRA comprising high quality components of capital
	that satisfy
	the following essential characteristics:
	 Provide a permanent and unrestricted commitment of funds
	Are freely available to absorb losses
	 Rank behind the claims of depositors and other more senior creditors in the event of
	winding up of the issuer; and
	Provide for fully discretionary capital distributions.
Additional Tier 1	An amount deducted in determining Additional Tier 1 Capital, as defined in Prudential
Capital deductions	Standard APS 111 Capital Adequacy: Measurement of Capital.
ALA	Alternative Liquid Assets.
APRA	Australian Prudential Regulation Authority.
ADI Prudential	APRA's ADI Prudential Standards. For more information refer to APRA website.
Standards (APS)	
Bank Group	MBL and its subsidiaries.
Central counterparty	A clearing house or exchange that interposes itself between counterparties to
	contracts traded in one or more financial markets, becoming the buyer to every
	seller and the seller to every buyer, and therefore ensuring the future performance or
	open contracts.
Common Equity	A capital measure defined by APRA comprising the highest quality components of
Tier 1 capital (CET1)	capital that fully satisfy all the following essential characteristics:
	 Provide a permanent and unrestricted commitment of funds
	Are freely available to absorb losses
	 Do not impose any unavoidable servicing charge against earnings; and
	 Rank behind the claims of depositors and other creditors in the event of winding up.
	 Common equity tier 1 capital comprises Paid Up Capital, Retained Earnings, and
	certain reserves.
Common Equity	An amount deducted in determining Common Equity Tier 1 Capital, as defined in
Tier 1 Capital deductions	Prudential Standard APS 111 Capital Adequacy: Measurement of Capital.
Common Equity Tier 1	Common Equity Tier 1 Capital net of Common Equity Tier 1 deductions expressed as a
Capital Ratio	percentage of RWA.
CVA	Credit Valuation Adjustment. The risk of mark-to-market losses on the expected
	counterparty risk to OTC derivatives.
Deconsolidated entities	Entities involved in conducting insurance, funds management and non-financial
	operations including special purpose vehicles (SPV) for which Macquarie has satisfied
	APS 120 Attachment A operational requirements for regulatory capital relief.
EAD	Exposure at Default - the gross exposure under a facility (the amount that is legally
	owed to the ADI) upon default of an obligor.
EL	Expected Loss, which is a function of EAD, Probability of Default and Loss
	given Default.
ELE	Extended Licensed Entity is an entity that is treated as part of the ADI ('Level 1') for the
	purpose of measuring the ADI's capital adequacy and exposures to related entities. The
	criterion for qualification as an ELE is detailed in the APRA Prudential Standards.
FIRB	Foundation Internal Ratings Based Approach (for determining credit risk)
HQLA	High Quality Liquid Assets
Impaired assets	An asset for which the ultimate collectability of principal and interest is compromised.
LCR	Liquidity Coverage Ratio
Level 1 Regulatory Group	MBL and certain subsidiaries which meet the APRA definition of Extended Licensed
•	Entities

Level 2 Regulatory Group	MBL, its parent Macquarie B.H. Pty Ltd and MBL's subsidiaries but excluding
	deconsolidated entities for APRA reporting purposes.
Level 3 Regulatory Group	MGL and its subsidiaries but excluding entities required to be deconsolidated for
	regulatory reporting purposes.
Macquarie	Level 2 regulatory group
Macquarie Group	MGL and its subsidiaries
MBL	Macquarie Bank Limited ABN 46 008 583 542
MBL Consolidated Group	MBL and its subsidiaries
NCO	Net Cash Outflows
NSFR	Net Stable Funding Ratio
Risk-weighted	A risk-based measure of an entity's exposures, which is used in assessing its overall
assets (RWA)	capital adequacy.
SME	Small - Medium Enterprises
SPV's	Special purpose vehicles or securitisation vehicles.
Tier 1 Capital	Tier 1 capital comprises of (i) Common Equity Tier 1 Capital; and (ii) Additional Tier 1 Capital
Tier 1 Capital Deductions	Tier 1 capital deductions comprises of (i) Common Equity Tier 1 Capital deductions; and (ii) Additional Tier 1 Capital deductions.
Tier 1 Capital Ratio	Tier 1 Capital net of Tier 1 Capital Deductions expressed as a percentage of RWA.
Tier 2 Capital	A capital measure defined by APRA, comprising other components of capital which
	contribute to the strength of the entity.
Tier 2 Capital Deductions	An amount deducted in Tier 2 Capital, as defined in Prudential Standard APS 111
	Capital Adequacy: Measurement of Capital.
Total Capital	Tier 1 Capital plus Tier 2 Capital less Total Capital Deductions.
Total Capital Ratio	Total Capital expressed as a percentage of RWA.

Disclaimer

The material in this document has been prepared by Macquarie Bank Limited ABN 46 008 583 542 (MBL) purely for the purpose of explaining the basis on which MBL has prepared and disclosed certain capital requirements and information about the management of risks relating to those requirements and for no other purpose. Information in this document should not be considered as advice or a recommendation to investors or potential investors in relation to holding, purchasing or selling securities or other financial products or instruments and does not take into account your particular investment objectives, financial situation or needs. Before acting on any information you should consider the appropriateness of information having regard to the matters, any relevant offer document and in particular, you should seek independent financial advice. No representation or warranty is made as to the accuracy, completeness or reliability of the information. All securities and financial product or instrument transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments and, in international transactions, currency risk.

This document may contain forward looking statements that is, statements related to future, not past, events or other matters – including, without limitation, statements regarding our intent, belief or current expectations with respect to MBL's businesses and operations, market conditions, results of operation and financial condition, capital adequacy, provisions for impairments and risk management practices. Readers are cautioned not to place undue reliance on these forward looking statements. Macquarie does not undertake any obligation to publicly release the result of any revisions to these forward looking statements or to otherwise update any forward looking statements, whether as a result of new information, future events or otherwise, after the date of this document. Actual results may vary in a materially positive or negative manner. Forward looking statements and hypothetical examples are subject to uncertainty and contingencies outside MBL's control. Past performance is not a reliable indication of future performance. Unless otherwise specified all information is at 31 December 2023.

Although Pillar 3 disclosures are intended to provide transparent disclosures on a common basis the information contained in this document may not be directly comparable with other banks. This may be due to a number of factors such as:

- The mix of business exposures between banks.
- Pillar 2 capital requirements are excluded from this disclosure but play a major role in determining both the total capital requirements of the bank and any surplus capital available.
- Difference in implementation of Basel III framework i.e. APRA has introduced stricter requirements (APRA super equivalence).
