The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

The Directors will determine the recipients of all the Shares. The Directors reserve the right to reject any Application Form or to allocate any Applicant fewer Shares than the number applied for. Where the number of Shares issued is less than the number applied for, the surplus monies will be returned by cheque as soon as practicable after the Closing Date. The Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

Residents of countries outside Australia should consult their professional advisers as to whether any government or other consents are required, or whether any formalities need to be observed should they wish to make an Application to take up Shares on the basis of this Prospectus. 4. RISK FACTORS

4.1 Introduction

The Shares offered under this Prospectus should be considered as highly speculative and an investment in the Company is not risk free.

The Directors strongly recommend that prospective investors to consider the risk factors set out in this Section 4, together with information contained in this Prospectus.

The future performance of the Company and the value of the Shares may be influenced by a range of factors, many of which are largely beyond the control of the Company and the Directors. The key risks associated with the Company's business, the industry in which it operates and general risks applicable to all investments in listed securities and financial markets generally are described below.

The risks factors set out in this Section 4, or other risk factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Shares. This Section 4 is not intended to provide an exhaustive list of the risk factors to which the Company is exposed.

If you do not understand any matters contained in this Prospectus or have any queries about whether to invest in the Company, you should consult your accountant, financial adviser, stockbroker, lawyer or other professional adviser.

4.2 Company specific

Risk Category	Risk
Litigation and investigations risks	<p>The Company is exposed to possible litigation risks including contractual disputes and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position.</p> <p>As previously announced, the Company is currently engaged in litigation both commenced by and brought against the Company. The Company is also subject to an ongoing investigation in relation to the alleged misappropriation or fraudulent use of the Company's funds by previous employees, advisors and associated,</p> <p>As with all complex fraud investigations and litigation, they are costly, conduct of the investigations and proceedings is time consuming for the Board and management and the length of such processes is not certain and the recovery of funds (if any) is not guaranteed. There is also a risk that the Company is unsuccessful with the ongoing investigations and litigation which may result in costs being ordered against the Company.</p> <p>The Directors' view is that the Company has a strong prospect of defending any claims in any event.</p>

Risk Category	Risk
<p>Additional requirements for capital</p>	<p>The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing to develop its business. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its programmes as the case may be. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.</p>
<p>Privacy and data collection</p>	<p>The Company's services involves the storage, transmission, and processing of data from clients in order to provide services to clients. Personal privacy, information security, and data protection are significant issues. The regulatory framework governing the collection, processing, storage, and use of business information, particularly information that includes personal data, is rapidly evolving and any failure or perceived failure to comply with applicable privacy, security, or data protection laws, regulations or contractual obligations may adversely affect the Company's business.</p>
<p>Competition</p>	<p>The fintech industry in which the Company operates is subject to competition, in particular as a result of the nature of the contracts available. Current or future competitors may come up with new, better or cheaper methods of mobile banking, SMS marketing and email marketing.</p> <p>The Company's competitors include both small and medium enterprises and large, established corporations or multinationals. Those may decide to enter the Company's target markets and be able to fund aggressive marketing strategies. They may also have stronger financial capabilities than the Company which may negatively affect the operating and financial performance of the business,</p>
<p>Going Concern</p>	<p>The Company's Half Yearly Report and Accounts for the half-year ended 31 December 2023 (Financial Report) includes a note on the financial condition of the Company and the possible existence of a material uncertainty about the Company's ability to continue as a going concern.</p> <p>Notwithstanding the 'going concern' qualification included in Financial Report, the Directors believe that upon the successful completion of the Offer, the Company will have sufficient funds to adequately meet the Company's current commitments and short term working capital requirements.</p>

Risk Category	Risk
Development	The Company's products and services are the subject of continuous development and need to be substantially developed further in order to gain and maintain competitive and technological advantage, and to improve the products' and services' usability, scalability and accuracy. There are no guarantees that the Company will be able to undertake such development successfully. Failure to successfully undertake such research and development, anticipate technical problems, or estimate research and development costs or timeframes accurately will adversely affect the Company's results and viability.
Technology	The Company's market involves rapidly evolving products and technological change. The Company cannot guarantee that it will be able to engage in research and development at the requisite levels. The Company cannot assure investors that it will successfully identify new technological opportunities and continue to have the needed financial resources to develop new products in a timely or cost-effective manner. At the same time, products, services and technologies developed by others may render the Company's products and services obsolete or non-competitive.
Government regulation	The Company is subject to federal and state laws and regulations that govern its business activities in the jurisdictions in which it operates, Malaysia and Indonesia. Government regulation and oversight of the digital economy is constantly evolving and may change in a manner that is unfavourable to the Company. While the Company is increasingly focusing attention on the development of internal compliance procedures, these may not be sufficiently sophisticated enough to ensure compliance with all relevant laws and regulations across all the jurisdictions it operates. Failure to comply with government regulations may affect the Company's ability to generate revenues from the sale of goods and services internationally, which could have a material adverse effect on the Company's business, financial condition and results of operations.
Foreign exchange	The Company will be operating in a variety of jurisdictions, including Malaysia and Indonesia, and as such, expects to generate revenue and incur costs and expenses in foreign currencies. Consequently, movements in currency exchange rates may adversely or beneficially affect the Company's results or operations and cash flows. For example, the appreciation or depreciation of the US dollar relative to the Australian dollar would result in a foreign currency loss or gain. Any depreciation of currencies in foreign jurisdictions in which the Company operates may result in lower than anticipated revenue, profit and earnings of the Company.

4.3 Industry specific

Risk Category	Risk
Disputes	<p>The activities of the Company may result in disputes with third parties, including, without limitation, the Company's investors, competitors, regulators, partners, distributors, customers, directors, officers and employees, and service providers. The Company may incur substantial costs in connection with such disputes.</p> <p>Further, a change in strategy may involve material and as yet unanticipated risks, as well as a high degree of risk, including a higher degree of risk than the Company's strategy in place as of the date of this Prospectus.</p>
Information technology	<p>With any technical project there are risks with the chosen technology, vendors and employees and in execution. Whilst the Company has employed and engaged subject-matter experts, employs experienced persons, standard security technologies and approaches there are risks that delivery will fail to meet expectations or deadlines, that technologies become obsolete, natural disasters occur, the Company is the subject of a fraud or malicious attack or platforms are compromised resulting in a negative impact on the Company's performance.</p>
User experience	<p>The Company's business model is primarily based on recurring service revenue arising from technology users and customers. Notwithstanding efforts placed on the user interface and experience, a poor user experience may occur and may affect growth of customer numbers and repeat purchases.</p>
Reputational	<p>Any negative publicity regarding the Company, or its Board, officers or employees, or the performance of its products, will adversely affect the Company's ability to generate revenue.</p>
Loss of customers	<p>The Company has established important relationships through development of its business to date. The loss of one or more customers through termination or expiry of contracts may adversely affect the operating results of the Company.</p>
