### Market commentary

In May, global listed infrastructure gained +2.4% (in A\$ terms) outperforming broader equities, both globally (up +2.0%) and locally (+0.9%).

The Communications (towers and data centres) subsector surged +9.0%, reversing recent losses as investors sought value in prior market laggards. Electric utilities also rose sharply (up +6.2%), spurred by enthusiasm about increasing demand for electricity to support the rapidly expanding growth of artificial intelligence applications. Holdings in both subsectors contributed positively to Argo Infrastructure's portfolio performance, up +2.5%.

We recently held information meetings in various capital cities. Thank you to all those who attended – we had record turnouts for each presentation! We are looking forward to our final meeting in Perth on Wednesday 26 June 2024.
