Market update

QBE announces outcome of North America middle-market strategic review, and provides updated colour on 1H24 performance.

Strategic review of North America middle-market

Following an extensive strategic review, QBE has determined it will commence an orderly closure of its North America middle-market segment. The segment represented gross written premium of ~\$500M in FY23, and has experienced performance challenges over several years.

The closure of middle-market will serve to refocus North America's strategy on those businesses which hold more meaningful market position, relevance and scale. The closure will have no incremental impact on appetite or strategy for North America's three core businesses, Specialty, Crop and Commercial.

QBE will begin non-renewing middle-market policies in accordance with applicable state regulations, with gross written premium expected to begin reducing in FY24, before falling more substantially in FY25. A restructuring charge of ~\$100M before tax will be recorded in the FY24 result to account for costs associated with the business closure.

The closure is expected to have limited impact on QBE's FY24 Group combined operating ratio, and further information will be provided at QBE's 1H24 result on 9 August, 2024.

1H24 performance update

Following the 1Q24 Performance update released on 10 May, QBE provides additional colour on Group performance ahead of its 1H24 result:

- **Premium growth:** 1H24 gross written premium is expected to be ~\$13.1B, representing constant currency growth of ~3% on the prior corresponding period, with net insurance revenue expected to be ~\$8.4B.
- **Catastrophe costs:** Group catastrophe costs in the five months to May-2024 are estimated at ~\$500M, relative to the 1H24 catastrophe budget of \$609M. Recent events have included US convective storms, the Dubai floods and an initial estimate of \$175M-\$225M to account for QBE's net exposure to the ongoing civil unrest in New Caledonia.
- **Prior year development:** Following the completion of recent 1H24 reserve reviews, QBE continues to expect a modest level of adverse prior year development.
- **Investment result:** Total investment income in the five months to May-2024 was \$643M, which improved from \$406M in 1Q24. The result included a favourable credit spread impact of \$76M, and a risk asset result of \$104M. To May-2024 the net impact from asset-liability management activities remained neutral.

Based on its preliminary view of the 1H24 result, QBE continues to expect FY24 Group constant currency gross written premium growth in the mid-single digits, and a FY24 Group combined operating ratio of ~93.5%.
