NZAS long-term deal receives Electricity Authority clearance

On 31 May 2024, Contact announced that it had reached a new long-term agreement with the New Zealand Aluminium Smelter (NZAS) to supply renewable electricity to its Tiwai Point operation in Southland, subject to a number of conditions being met.

A key condition of the agreement was approval from the Electricity Authority under the Electricity Industry Participation Code 2010. This clearance has now been received. Contact will provide a further update once all other contractual pre-conditions have been met.
