AR3 Releases Recording of Investor Webinar

Australian Rare Earths Limited (ASX: AR3) is pleased to announce that the recording of its recent investor webinar has been released and is now available on the Company's Investor Hub <https://investorhub.ar3.com.au/link/mepNBP>.

The webinar provided an opportunity for investors to ask questions and gain insights about Australian Rare Earths' progress on the Koppamurra Project, a significant deposit of valuable clay-hosted rare earth elements located in South Australia and Victoria. Travis Beinke, Managing Director and CEO, also discussed the Company's plans to develop a sustainable supply of energy transition metals for the clean energy transition, including the Company's recent addition of the Overland Uranium Project in South Australia.

AR3 appreciates the thoughtful questions from investors and trusts this webinar provided the answers.

The announcement has been authorised for release by the Board of Australian Rare Earths Limited.

Australian Rare Earths is committed to the timely exploration and development of its 100% owned, flagship Koppamurra Project, located in the new Koppamurra rare earths Province in southeastern South Australia and western Victoria. Koppamurra is a prospective ionic clay hosted rare earth deposit, uniquely rich in all the elements required in the manufacture of rare earth permanent magnets which are essential components in electric vehicles, wind turbines and domestic appliances. In addition, AR3 is actively reviewing other potential prospective areas which may also host uranium and ionic clay hosted rare earth deposits throughout Australia.

The Company is focused on executing a growth strategy that will ensure AR3 is positioned to become an independent and sustainable source of energy transition metals, playing a pivotal role in the global transition to a green economy.
