## Induced Polarisation Geophysical Surveys at Burra EL7389, New South Wales

Golden Cross Resources Ltd ("GCR") has commenced geophysical work at Burra EL7389, south of Canbelego and east of Cobar (**Figure 1**) to trial Pole Dipole Induced Polarisation (PDIP) geophysical surveys over interpreted mineral trends linking known occurrences of mineralisation. See **Figure 2** for the survey lines locations with prospects and interpreted trend lines.

The pole-dipole configuration is designed to provide deeper penetration and are typically used to investigate larger-scale subsurface features and structures, that generate large chargeability and resistivity anomalies.

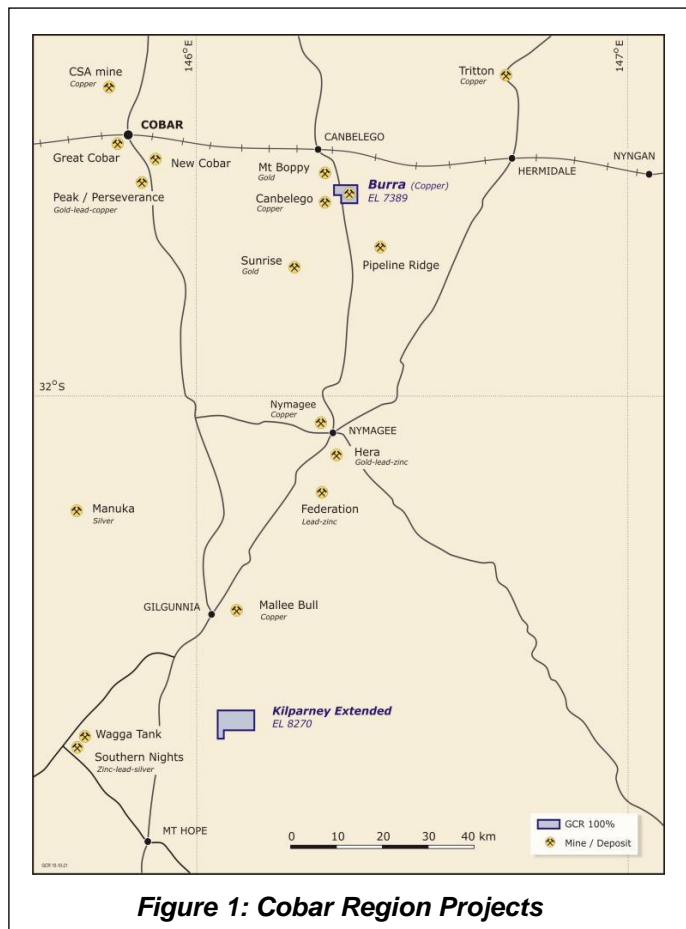

IP surveys have been widely employed in the region to detect subsurface mineralisation.

The Cobar region is well endowed with high grade polymetallic deposits supporting long life mining operations.

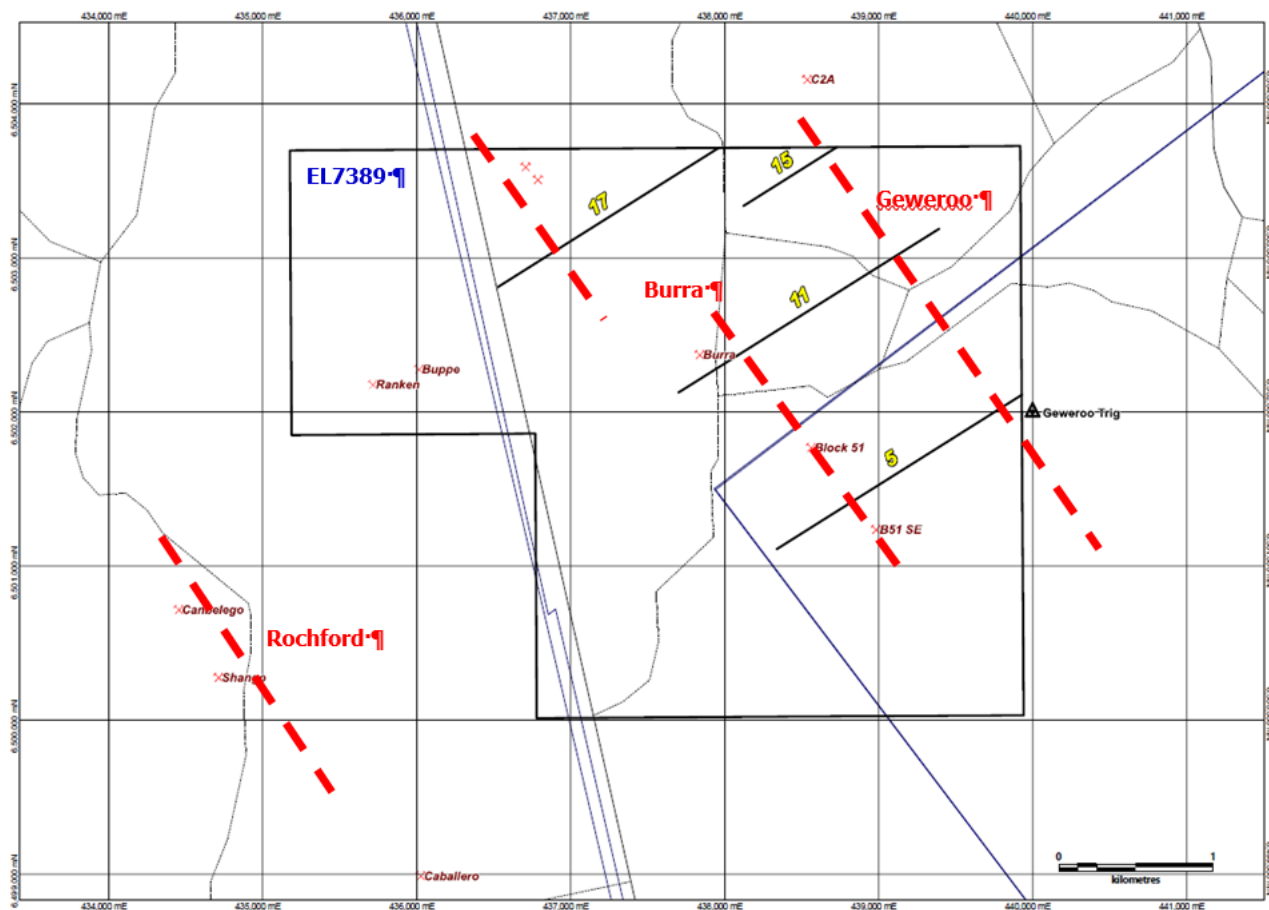

GCR holds strategically located tenements (**Figure 1**) in two areas, Canbelego (EL7389) and Gilgunnia (EL8270).

At Canbelego, EL7389 Burra is south from Mt Boppy Goldmine and east of the Canbelego Copper deposit.

Completion of the work is anticipated towards the end of July 2024 subject to weather and ground conditions.

#### **Competent Person Statement**

The information in this report that relates to Exploration Results is based on information from previous reports, compiled by Mr Bret Ferris, who is a Member of the Australasian Institute of Geoscientists. (AIG). Mr Ferris is a geological consultant to Golden Cross Resources Ltd, and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Ferris consents to the inclusion in this report of the matters based on that information in the form and context in which it appears.

#### **Forward-Looking Statement**

This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning planned exploration program and other statements that are not historical facts. When used in this document, the words such as "could", "plan", "estimate", "expect", "intend", "may", "potential", "should" and similar expressions are forward-looking statements. Although Golden Cross Resources Ltd believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.
