

Investor Webinar

Legacy Minerals Technical Director, Thomas Wall, to host a live investor webinar on Thursday, August 1, 2024

Legacy Minerals Holdings Limited (ASX: LGM) ("Legacy Minerals" or "the Company") is pleased to advise that its Technical Director, Thomas Wall, will host a live investor webinar to update investors on the Company's exploration underway across NSW, including the acquisition of the Thomson Project.

Assays are awaited from the recently completed drilling at the Bauloora Epithermal Gold Project under a Joint Venture with Newmont, and drilling is underway at the Fontenoy PGE-Ni-Cu Project and the Glenlogan Cu-Au Project with partners EarthAI and S2 Resources.

The webinar will be held on Thursday, 1st August 2024 commencing at 12.00pm AEST/10.00am WST.

Investors can register to join the webinar via the following link:

About Legacy Minerals

Legacy Minerals is an ASX-listed public Company that has been acquiring and exploring gold, copper, and basemetal projects in NSW since 2017. The Company has nine projects that present significant discovery opportunities for shareholders.

Au-Ag Black Range (EL9464, EL9589)

Caldera setting with extensive epithermal occurrences. Limited historical exploration across 30km of known prospective strike.

Cu-Au Rockley (EL8926)

Prospective for porphyry Cu-Au and situated in the Macquarie Arc Ordovician host rocks with historic high-grade copper mines that graded up to 23% Cu.

Au-Ag Bauloora (EL8994, EL9464) Newmont JV

One of NSW's largest low-sulphidation, epithermal systems with a 27km² epithermal vein field.

Cu-Au Glenlogan (EL9614) S2 Resources JV

Large, undrilled magnetic anomaly underneath Silurian cover located 55kms from Cadia Valley.

Cu-Au Drake (EL6273, EL9616, ELA6642)

Large caldera (~150km²) with similar geological characteristics to other major pacific rim low-sulphidation deposits.

Au-Cu (Pb-Zn) Cobar (EL9511)

Undrilled targets next door to the Peak Gold Mines. Several priority geophysical anomalies and gold in lag up to **1.55g/t Au.**

Au Harden (EL9657)

Large historical high-grade quartz-vein gold mineralisation. Drilling includes **3.6m at 21.7g/t Au** 116m and **2m at 17.17g/t Au** from 111m.

Au-Cu Fontenoy (EL8995) Earth Al Alliance

An 8km long zone of Au and Cu anomalism defined in soil sampling and drilling. Significant drill intercepts include **79m at 0.27% Cu** from 1.5m.

Cu-Au Thomson (EL9190, EL9194, ELA6777)

Perspective for iron oxide copper-gold and intrusion related gold systems, the project contains numerous 'bullseye' magnetic and gravity anomalies that remain untested.
