ASX ANNOUNCEMENT

3Q24 UPDATE

19 AUGUST 2024

FINANCIAL HIGHLIGHTS

Westpac Third Quarter 2024 Update

Peter King – Chief Executive Officer

"Our consistent focus on customer service has contributed to another solid quarter. We grew the business and maintained a strong financial position.

Our unaudited net profit of \$1.8 billion was up 6% compared to the first half 2024 quarterly average. Excluding the impact of Notable Items, related solely to hedge accounting which will reverse over time, unaudited net profit increased 2% to \$1.8 billion. The slight decline in pre-provision profit was more than offset by a reduction in impairment charges.

Net interest margin (NIM) of 1.92% was well managed with Core NIM rising 2 basis points to 1.82%.

Operating momentum was positive with customer deposit growth of \$15.4 billion and loan growth of \$14.7 billion. This includes Australian household deposit growth of 3%³ and housing loan growth of 8%³, which outperformed system⁴.

I'm particularly pleased with our efforts to enhance customer experience and keep customers safe. This quarter we:

- Launched an online ID verification process for new to bank home loan customers;
- Introduced mobile notifications alerting customers of bonus interest opportunities on their savings;
- Reduced the time for existing small business customers to receive a cash-backed Bank Guarantee from up to five days to less than two days; and
- Released a new version of Westpac Verify to enhance detection of payment scams and reduce mistaken payments.

We were joint lead manager on the first issuance under the Australian Government Green Bond Framework, a \$7 billion 10-year sovereign green bond.

ASX ANNOUNCEMENT | WESTPAC 3Q24 UPDATE

We continue to prioritise financial strength with capital, funding and liquidity well above regulatory minimums.

The cost of living and high interest rates remain a challenge for some customers while many businesses are facing cost pressures and experiencing lower demand. We encourage customers to call us if they need help."

Operating trends

The NIM of 1.92% comprised:

- Core NIM of 1.82%, up 2 basis points, reflecting the benefit of higher earnings on capital and hedged deposits;
- Treasury and Markets income of 12 basis points, down 2 basis points; and
- Hedging items, that will reverse over time, which detracted 2 basis points.

Net interest income increased by 2% reflecting both higher net interest margin and loan growth.

Non-interest income declined by 4% on lower financial markets revenue.

Expenses increased by 2% due to higher investment spend which is weighted towards the second half 2024, along with ongoing inflationary pressures particularly in technology services.

Impairment charges to average loans of 4 basis points were down from 9 basis points, reflecting an improvement in the economic outlook.

Financial strength

The CET1 capital ratio was 12.0% as at 30 June 2024, above the target operating range of 11.0% to 11.5%. The proforma CET1 capital ratio of 11.9% incorporates the partial reduction in the APRA capital risk overlay, which became effective in July 2024, the benefit from APRA's approval of our IRRBB model and assumes completion of the remaining on market share buyback.

The quarterly average liquidity coverage ratio of 130% and net stable funding ratio of 113% remain above regulatory minimums.

The Group has raised \$36 billion of new long-term wholesale funding in the financial year to date.

Credit impairment provisions were \$5.1 billion as at 30 June 2024, \$1.6 billion above expected losses of the base case economic scenario. The ratio of CAP to credit RWA decreased slightly to 1.34%.

The Group has completed 60%⁵ of the previously announced \$2.5 billion on market share buyback.
