

2024 Half Year Financial Results

For the six months ending 30 June 2024 (1H 2024)

Issued 19 August 2024

Revenue of \$3.14 billion, compared to \$3.98 billion in 1H 2023; the 37% decrease in **realised coal price to A\$176 per tonne¹** exceeded the benefit of a 17% increase in attributable coal sales.

Operating EBITDA of \$990 million and EBITDA margin of 32% demonstrated Yancoal's capacity to deliver strong financial performance at lower coal prices.

ROM coal production of 27.9 million tonnes (100% basis), up 7% from 1H 2023.

Saleable production of 21.6 million tonnes (100% basis), up 16% from 1H 2023.

Attributable coal production of 17.0 million tonnes, up 18% after consolidation of recovery plans through 2023.

Operating cash costs of \$101 per tonne (exc. Government royalties), closely linked to the production volumes and inflation factors.

Yancoal started 2024 with cash of \$1.40 billion, and after paying \$429 million in fully franked dividends and making monthly tax payments, increased its **cash balance to \$1.55 billion at the end of June**.

The Board has not declared an interim dividend in respect of the six months ended 30 June 2024, with the retained cash providing flexibility for potential corporate initiatives and may be distributed in the future if not utilised.

Production Guidance (unchanged)

- 35-39Mt attributable saleable production.
- \$89-97/tonne cash operating costs.
- \$650-800 million attributable capital expenditure.

Yancoal aims to operate at levels similar to 2H 2023 during 2H 2024, to meet production guidance, and consequently the cash operating cost range. Capital expenditure incurred in 2024 will likely sit around the low end of the guidance range.

CEO Comment

Over the past eighteen months, Yancoal re-established its operational profile following several years of disruption. The tireless efforts of all the people at our mine sites deserve the highest praise.

Safe mines are productive and efficient mines. As such we have reinvigorated the safety initiatives that resulted in marked improvement in our safety statistics last year. We continue to focus on driving down our Total Recordable Injury Frequency Rate.

Cost inflation is a constant challenge in the coal sector, mining industry and broader economy. We are combating inflation by reinvesting in our Tier 1 assets, maximising production and optimising our cost base.

During the first half we produced an EBITDA of close to \$1 billion at a 32% margin. Delivering on our planned production uplift during the second half will go a long way toward setting the tone for a stronger financial performance over the remainder of 2024.

The Group has a robust financial position. We returned \$429 million to shareholders in April and held more than \$1.5 billion in cash by the end of June.

Yancoal has a proven history of growth through judicious acquisition and expansion. We are in a position to pursue various initiatives and aim to utilise the opportunity to benefit of our shareholders.

Coal markets appear relatively well balanced, seasonal or temporary supply and demand factors continue to determine short-term price trends. As always we aim to maximise operating cash flow by balancing volume, costs, coal quality and capital expenditure.
