

2024 Q2

QUARTERLY UPDATE

ASX RELEASE DATE: 28 AUGUST 2024

# MARKET & FUND SERIES UPDATE

In the first half of 2024, the US private equity (PE) market exhibited positive trends amidst ongoing concerns about a growing backlog of assets. The small to mid-size PE segment, particularly relevant to the CD Fund Series, demonstrated a blend of cautious optimism and strategic recalibration.

Private equity managers, known for their long-term investment perspective, strategically time their asset sales. These exits are critical to the PE capital formation cycle, influencing distributions to limited partners (LPs) and impacting future fundraising, fund deployment, and overall performance.

As noted in previous reports, the persistent gap between buyer and seller valuations has slowed exit activity, with the exit-to-investment ratio dropping to a record low of 0.36x in Q1 2024<sup>10</sup>. While exit volumes remain below the peak levels of 2020 and 2021, Q2 2024 has seen a positive shift, marked by an increase in partial sales and minority stake rollovers.

Despite the prevailing market challenges, the CD Fund Series has shown resilience. The recent market uptick in exit activity and improvements in valuation multiples suggest a cautiously optimistic outlook. Several portfolio companies are currently in the pipeline for sale, with some having already signed Letters of Intent. These sales remain the key driver of our distributions to Unitholders, with A\$75 million distributed to Fund Series Unitholders since July 2023.

We look forward to sharing more details at our upcoming Investor Webinar on Friday, September 6th (details can be found [here](#)). As always, Unitholders may reach out to the Investor Relations team via email at [cdfunds@k2am.com.au](mailto:cdfunds@k2am.com.au) or by phone at (03) 9691 6110.

## FUND 1: QUARTERLY UPDATE

### 30 JUNE 2024: KEY STATISTICS

NTA per unit	Gross assets (million)	Quarterly NTA Return
\$1.00	A\$37.5	-2.9%

Q2 2024 Net Tangible Asset (NTA) movement was largely attributed to forex movements, with the Australian dollar strengthening by 2.3% between 31 March 2024 and 30 June 2024.

The period ended **30 June 2024 (Q2 2024)** saw no additional portfolio company realisations for CD1. While we remain hopeful for a more fruitful 12-months, it is not unexpected for a portfolio of this vintage and size to see a slow down in the rate of realisations. The portfolio continues to have **25 underlying companies** spread across multiple sectors and an anticipated natural life through to 2027, absent any significant event in the interim.

We are pleased to report that the individual Fund Managers are continuing to build out their sales pipelines across the portfolio, which we outline further on *Page 4*. These commitments from the underlying Managers are encouraging for the return of capital to Unitholders.

Investors will also find a summary of a select number of the Fund's underlying portfolio companies on *Page 5*, outlining their business and some notable events for each company over the last 12 months.

## NET TANGIBLE ASSET VALUE

We acknowledge that the Fund's underlying investments and their valuations are somewhat opaque due to our commitment to confidentiality with the underlying Managers. However, we want to emphasise that the Fund's NTA is intended to be the most accurate reflection of the realisable value of individual investments in the current market.

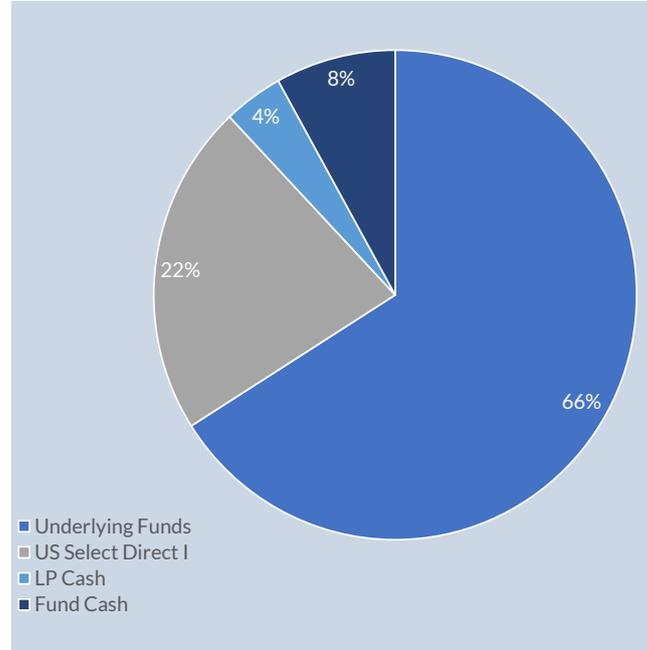

The NTA serves as a reliable measure of the Fund's value, employing various valuation techniques such as discounted cash flows, comparable companies, and EBITDA multiples<sup>11</sup>. These valuations are updated at least quarterly and are audited by independent parties throughout the year.

Private equity managers typically adopt a conservative approach to minimise significant valuation fluctuations, with an aim to realise investments at or above the current book value. This conservative approach is evidenced by the Fund's 31 realisations (including four realisations of zero value) from 2020 to date, which reflect an **average uplift of +41%** to the pre-sale valuation<sup>12</sup>, highlighting the inherent value within the portfolio.

Ultimately, K2 and the Manager maintain confidence in the robust valuation methods employed and the underlying fund managers desire to under-promise and over-deliver wherever possible. We demonstrate this graphically on *Page 3*.

### PORTFOLIO COMPOSITION<sup>1, 5, 7, 8</sup>

Note: Table excludes two funds which have no remaining assets but represent 8 portfolio company realisations. Remaining value is at the LP level.

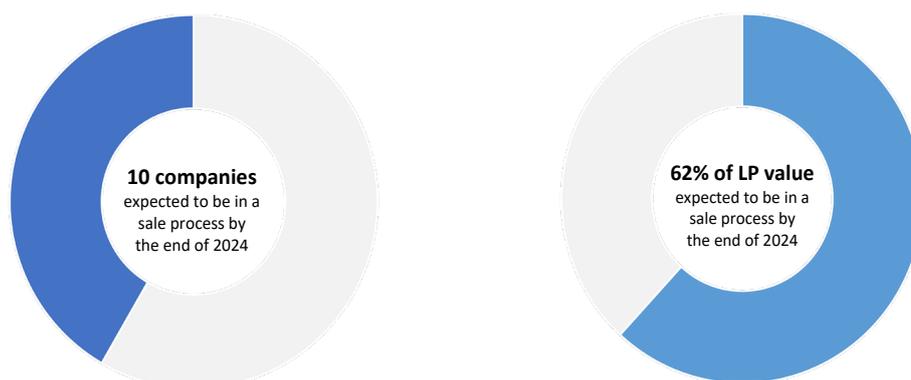

## PORTFOLIO COMPANY VINTAGE (BY NUMBER)

## LP1 12-MONTH REALISATION PIPELINE<sup>1</sup>

The Fund Managers are acutely aware of the age of their Funds, a challenge that has been compounded by unfavorable market conditions for selling. Below, you will see the short-term pipeline for sale. The sales process can involve having a signed Letter of Intent or appointing an advisor to begin marketing the assets for sale.

We expect that the below pipeline will continue to grow over the next 12-months as wider market conditions improve, organic sales opportunities present themselves, and companies reach a mature stage for a productive realisation.
