

## TEM | Yalgoo Update - Commencement Of Drilling At Remorse

### Key Points

- Commencement of 5,000m of reverse circulation drilling at the Remorse Target

### Summary

Tempest Minerals Ltd (ASX: TEM) ("Tempest" or "the Company") is pleased to announce the commencement of drilling operations at its highly prospective Remorse Copper Target within the Yalgoo Project, Western Australia.

Don Smith, Managing Director of Tempest Minerals, commented: "Despite some challenges, we've commenced drilling at Remorse. Our methodical approach to exploration has led us to this point, and we are excited to be testing the potential of this promising copper target. We look forward to updating shareholders as results become available."

### Yalgoo Project

#### Background

The current drilling program is designed to test the central area of the Remorse Target, which has demonstrated significant potential through previous geochemical and geophysical surveys. The program consists of approximately 5,000 metres of RC drilling.

The Remorse Target is part of Tempest's broader Yalgoo Project, which spans over 1,000 square kilometres of prospective terrain for base and precious metals. Several long-term exploration efforts, including ground truthing and detailed geological mapping led to the expansion of the current drilling program. Recent multi-data analyses have further reinforced the target's potential.

#### Next Steps

- Ongoing analysis of drill results as they become available
- Potential for further drilling based on initial results
- Continued exploration activities across multiple promising targets within the portfolio
