# Unlocking Tomorrow's Energy: Explore the Future of Uranium with Orpheus

INVESTOR OVERVIEW  
OCTOBER 2024

# Disclaimer

This disclaimer applies to this presentation and the information contained in it (the Presentation). By reading this disclaimer you agree to be bound by it. The Presentation has been prepared by Orpheus Uranium Limited and relates to its subsidiaries and related parties (the Company). The Presentation was prepared on 28 October 2024 and the information in it is subject to change without notice.

## **Distribution outside Australia**

Distribution or release of this document outside Australia may be restricted by law. This document may only be distributed or released to a person that is not in the United States except as permitted under the U.S. Securities Act. Persons who come into possession of this document who are not in Australia should seek advice on and observe any such restrictions. Any failure to comply with such restrictions may constitute a violation of applicable securities laws.

## **Not an offer or financial product advice**

The Presentation does not constitute an offer, invitation, solicitation or recommendation with respect to the purchase or sale of any security in the Company nor does it constitute financial product advice. The Presentation is not a prospectus, product disclosure statement or other offer document under Australian law or under any other law. The Presentation has not been filed, registered or approved by regulatory authorities in any jurisdiction.

The Presentation is not intended to be relied upon as advice or a recommendation to investors and does not take into account the investment objectives, financial situation, taxation situation or needs of any particular investor. An investor must not act on the basis of any matter contained in the Presentation but must make its own assessment of the Company and conduct its own investigations and analysis. Investors should assess their own individual financial circumstances and consider talking to a

financial adviser, professional adviser or consultant before making any investment decision.

## **Forward-looking statements**

The written presentation may contain forward-looking statement regarding the outlook for the Company's interpretation, work programs, and financial results. These forward-looking statements generally can be identified by phrases such as "anticipates", "potential", "plans", "intends", "believes", "likely", "appears", "expects", "likely", "appears" or other words or phrases of similar impact. There is inherent risk and uncertainty in any forward-looking statements. Variance will occur and some could be materially different from management's opinion. Developments that could impact the Company's expectations include a variety of known and unknown risks, uncertainties and other factors that could cause actual events or results to differ from those expressed or implied, including, without limitation, business integration risks; uncertainty of development plans and cost estimates, commodity price fluctuations; political or economic instability and regulatory changes; currency fluctuations, the state of the capital markets, Orpheus' ability to attract and retain qualified personnel and management, potential labour unrest, unpredictable risks and hazards related to the development and operation of exploration programs that are beyond the Company's control, the availability of capital to fund all of the Company's projects. These forward-looking statements are made as of the date of this presentation and the Company assumes no obligation to update these forward-looking statements, or to update the reasons why actual results differed from those projected in the forward-looking statements, except in accordance with applicable securities laws.

## **Past performance**

Past performance is not indicative of future performance and no guarantee of future returns is implied or given.

## **Financial data**

All references to dollars (\$) and cents are to Australian currency, unless otherwise stated.

## **Market and industry data**

This Presentation contains third party data relating to the industries, segments and markets in which the Company operates or aims to operate (Industry Data). This information has been prepared using publicly available data. The Industry Data includes third party market data, estimates and projections. There is no assurance regarding the accuracy of the Industry Data, and the Industry Data has not been independently verified by the Company.

## **Competent Person Statement**

Sections of information contained in this report that relate to Exploration Results were compiled or reviewed by Mr Clinton Dubieniecki BSc (Hons), who is a Member of the Australian Institute of Geoscientists and is a full-time employee of Orpheus Uranium Limited. Mr Dubieniecki has sufficient experience which is relevant to the style of mineral deposits under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the "Australasian Code for Reporting of Mineral Resources and Ore Reserves". Mr Dubieniecki consents to the inclusion in this report of the matters based on this information in the form and context in which it appears.

# Major Investment Highlights

## Who is Orpheus Uranium

- ✓ **Junior uranium focused exploration** company with a **portfolio focused** in the two jurisdictions of Australia that allow **uranium exploration** and mining, **South Australia & the Northern Territory**
- ✓ Targeting **tier-1 (world-class) uranium exploration regions**, on tenure with confirmed presence of mineral systems
- ✓ Major projects **Mt Douglas, Frome, & Radium Hill South**
- ✓ **Strategic development** of a **portfolio** that enables exploration success whilst positioning for market growth → **Continued assessment of suitable project opportunities**
- ✓ Technically intelligent team, with unique proven success in Uranium mineralisation discovery, development & production
- ✓ Advancing 100% owned, advanced uranium exploration projects towards advanced-stage activities (i.e., trenching & drilling)

# Uranium Deposit Types

## UNCONFORMITY-STYLE URANIUM (NT)

- ✓ Mineralisation occurs peripheral to major structures within Proterozoic crystalline basement (commonly meta-sediments)
- ✓ Uranium sourced from either oceanic brines associated with sedimentary basins or enriched hydrothermal brines from beneath
- ✓ Recovered through conventional (open-cut or underground) operations

## SEDIMENTARY-STYLE URANIUM (SA)

- ✓ Mineralisation occurs within permeable units, typically but not limited to saturated unconsolidated permeable sandstones
- ✓ Uranium sourced from surrounding enriched uriferous rocks e.g., granites (SAs Frome Embayment contains some of the most uriferous surface and near surface rocks globally)
- ✓ Recovered through In-Situ Recovery (ISR) – lower cost, and dynamic operations

# Northern Territory

## Significant region of historical production where Australia's large, high-grade deposits are discovered

- Targeting “Unconformity” and vein style mineralisation  
Very underexplored, particularly in difficult-to-access areas of the Orogen
- Targeting the Pine Creek Orogen  
“Australia’s economic Unconformity-Style mineral systems”
- Strategy of building ground position  
Strategic play across the Orogen, preparing multiple drill targets for the medium term
- Key Project: Mount Douglas  
Preliminary field activities commenced (Q3 2024) → In preparation for subsequent advanced-stage activities (i.e., trenching and drilling)

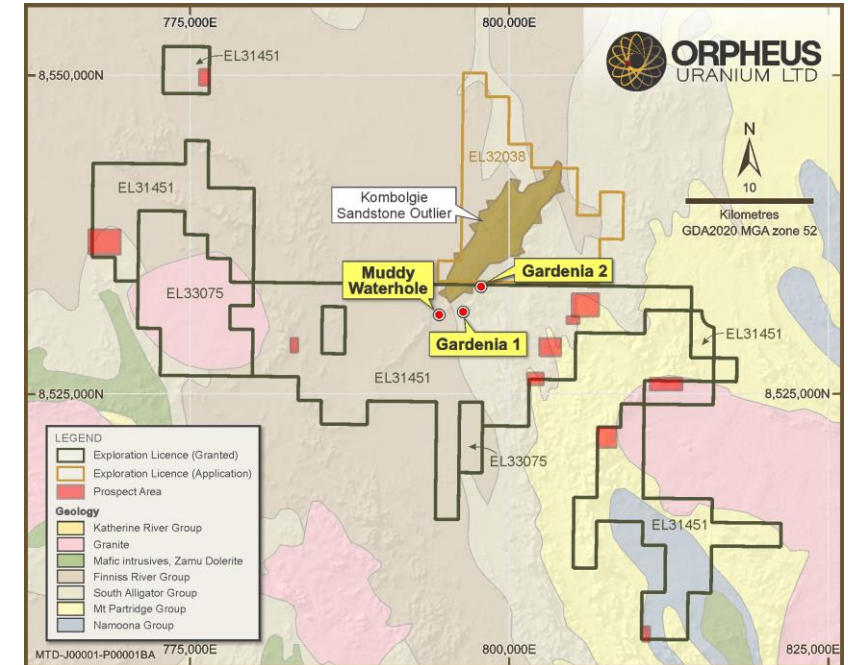

# Mount Douglas Project

EARLY  
EXPLORATION

## PROSPECTIVE FOR UNCONFORMITY AND VEIN-STYLE URANIUM MINERALISATION

- ✓ Evidence of **surficial radiometric anomalies** mapped throughout tenure
- ✓ Mapped **unconformity** contact with overlying **Kombolgie Sandstone**
- ✓ **Reconnaissance, rock chip sampling and localised radiometric grids (commenced)**
- ✓ **Collaborative geophysical program with NTGS (commenced)**

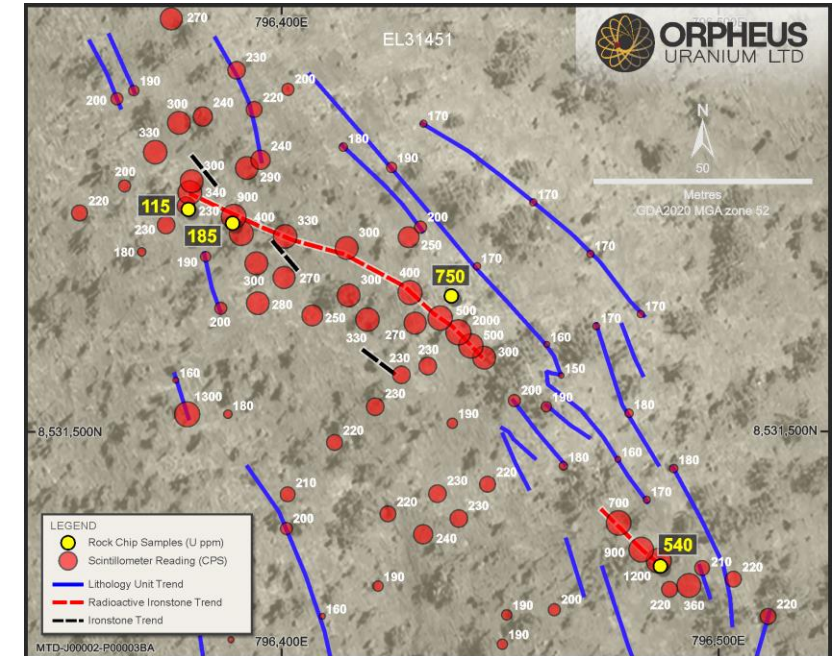

# Mount Douglas Project – Gardenia 1

EARLY  
EXPLORATION

## PROSPECTIVE FOR UNCONFORMITY AND VEIN-STYLE URANIUM MINERALISATION

- ✓ NTGS Government work approvals Mining Management Plan (MMP) granted
- ✓ Reconnaissance, rock chipping, mapping & radiometric gridding being undertaken
- ✓ Evidence of uranium mineralisation in rock chips up to **750ppm U**
- ✓ Infill geophysics to be determined by results of initial NTGS collaborative survey
- ✓ **Advanced stage activities planned**
  - Trenching – Define extents of surface anomalism
  - Drilling of refined targets – subject to preliminary activities

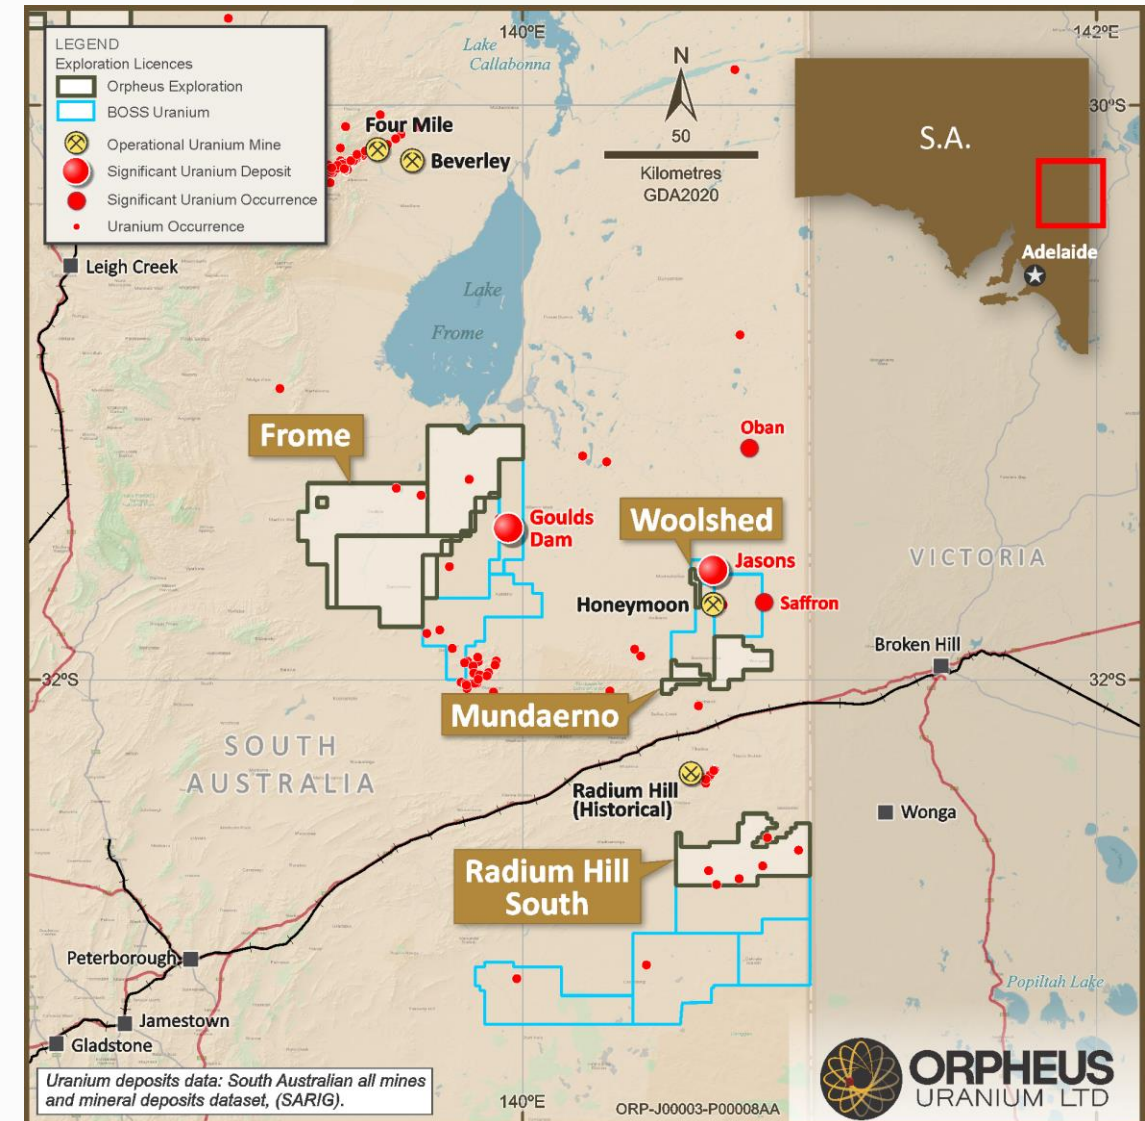

# Key South Australian Projects

## SEDIMENTARY-STYLE URANIUM

### Leveraging results of previous explorers who halted work in 2011-14

- **Frome Project**  
~12km west of Gould's Dam Uranium Deposit, located in a globally significant location in terms of discovered economic sandstone hosted uranium deposits  
- Callabonna Sub-Basin (SA) – a good place for a uranium mine
- **Radium Hill South Project**  
~20 km south of Radium Hill Uranium Field and hosts five uranium occurrences
- **Mundaerno Project**  
~12km south of Honeymoon Uranium Mine and hosts part of the highly prospective Yarramba Palaeochannel
- **Other Projects**
  - Three additional licenses constituting Marree Project located ~150km west of the operating Beverley/Four Mile
  - Ongoing project development through strategic acquisition

# Frome Project

## ADVANCED EXPLORATION

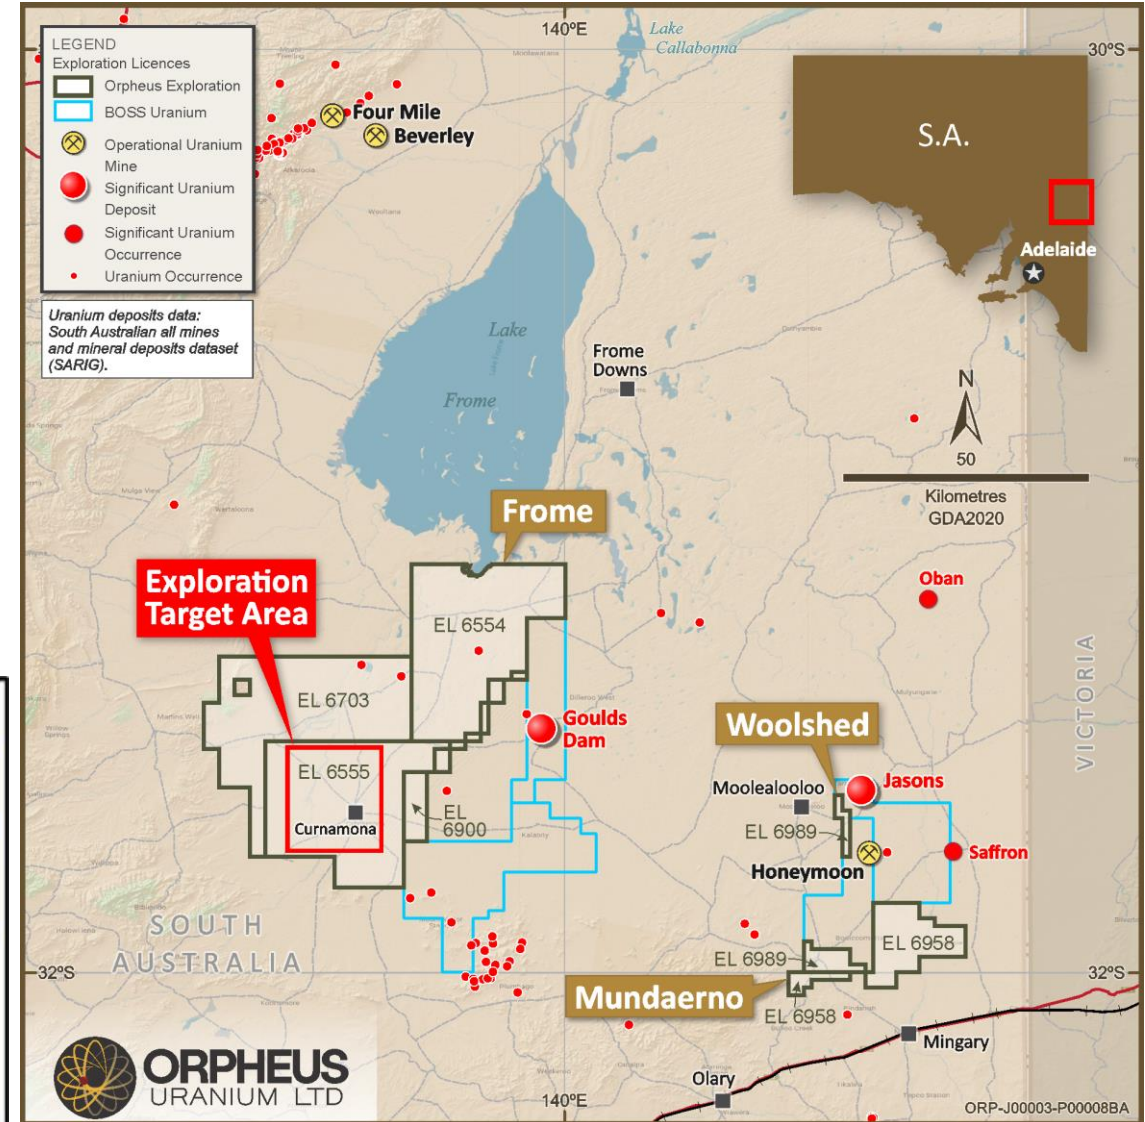

## MULTIPLE TARGETS IN MULTIPLE PALAEOCHANNEL SYSTEMS

- ✓ Actively exploring - technical reviews, reconnaissance, and stakeholder engagement in preparation for **targeted and dynamic drilling programs**
- ✓ Contains a significant footprint of prospective paleochannels: **Hosts known uranium occurrences – mineral system located**
- ✓ Mechanisms (source transport & trap) for Uranium mineralising systems similar to regional deposits in Namba and Eyre Formations
- ✓ **Erudina Exploration Target Area**   
Initial testing of multiple targets proximal to Goulds Dam (~12km)

AGE	BASIN	STRATIGRAPHIC UNIT	THERMAL MATURITY	
CENOZOIC	Lake Eyre Basin (Callabonna Sub-basin, ind. Poontana Trough)	Coonarbine Fm & equivalents	Sub-mature	
		Eurinilla Fm & equivalents		Millyera
		Willawortina Formation		Formation
		?		Namba Formation
		Eyre Formation		
MESOZOIC	Eromanga Basin (Frone Embayment)	Mackunda Formation	Marginally mature	
		Oodnadatta Formation		
		Coorikiana Ss		
		Bulldog Shale & equivalents		
		Parabarana Ss		Cadna-owie Formation

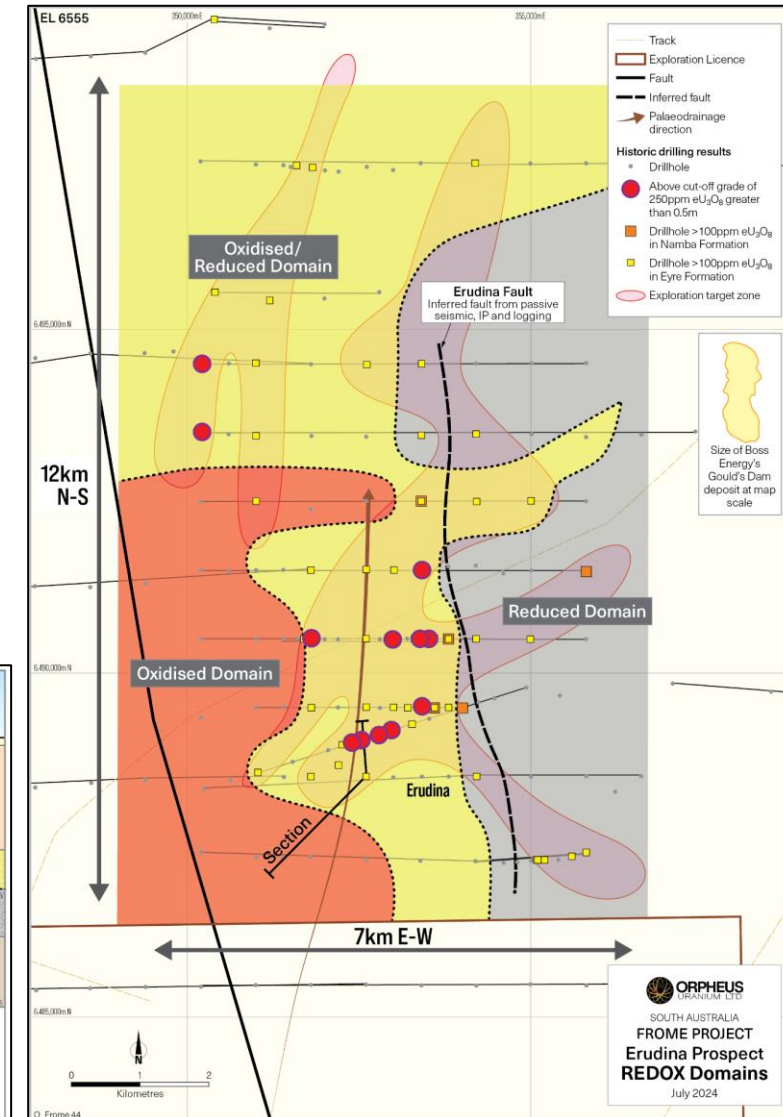

# Frome Project - Erudina Prospect

ADVANCED  
EXPLORATION

## DEFINED DRILL READY TARGETS AWAITING REGULATORY APPROVAL

- ✓ Exploration target area extends across a 12km N-S by 7km E-W area, Based on wide spaced ~1km drill traverses
- ✓ Established from downhole gamma grades, 56 historic drillholes contained >100ppm EqU3O8, with Peak grades >1,500ppm EqU3O8
- ✓ Development of subsurface reduced and oxidised sediments ("REDOX") model as a potential fluid-pathway and vector to higher-grade "roll front" style uranium mineralisation
- ✓ Continued extension of sedimentary REDOX characteristics into Erudina North

# Radium Hill South Project

ADVANCED  
EXPLORATION

## FIVE EXISTING URANIUM PROSPECTS READY FOR IMMEDIATE FOLLOW-UP

- ✓ **Exploration Licence (EL) granted through competitive tenure**, mineralising system identified, proceeding to advanced on ground activities (i.e., drilling)
- ✓ Located ~20km south of the highly radiogenic region of the historic **Radium Hill Uranium Field 2.6 Mlbs @ 1,310ppm  $U_3O_8$**
- ✓ Hosts **five uranium prospects** that were abandoned due to market conditions in 2011: uranium mineralisation at depths of ~80 to 110 metres
- ✓ Regional NE to SW trending REDOX front identified → refined drill targets based on re-interpretation of historical datasets

Prospect	Historic Results
Gairloch	<b>1.9m @ 400ppm <math>U_3O_8</math></b> from 103.8m at the contact between the base of a sand channel and underlying black carbonaceous clay
Jones Dam	<b>2m @ 401ppm <math>U_3O_8</math></b> from 86m in a strongly anomalous zone over 5.1m, within steely grey sand
Kinloch Dam	<b>3m @ 507ppm <math>U_3O_8</math></b> from 105m in sand below a silcrete layer

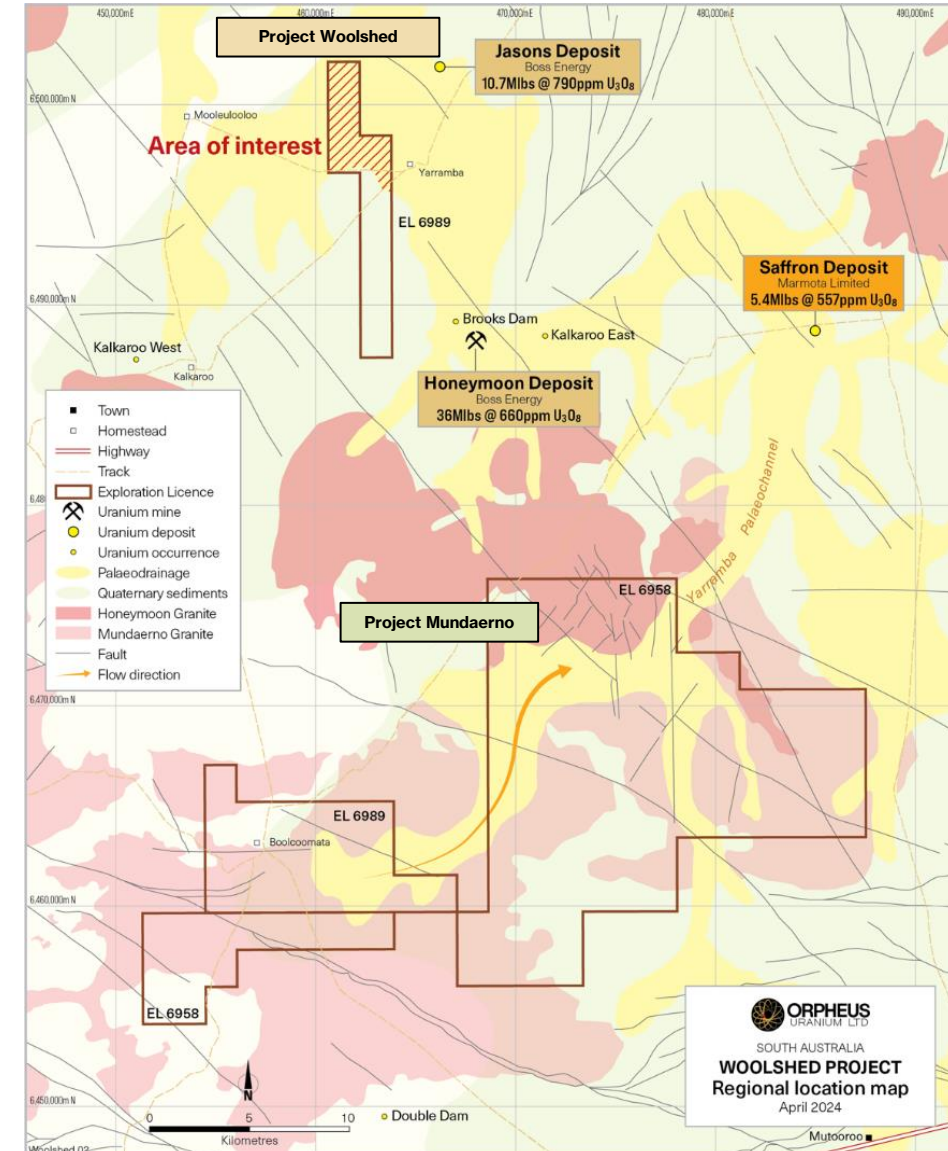

# Mundaerno & Woolshed Projects

EARLY  
EXPLORATION

## DEVELOPING MUNDAERNO & WOOLSHED EXPLORATION PROJECTS

- ✓ Woolshed hosts a bend in the **Yarramba Palaeochannel** just 4km west of **Jasons Uranium Deposit**
- ✓ Mundaerno hosts the head of the **Yarramba Palaeochannel** just 10km south of **Saffron Uranium Deposit**
- ✓ Limited historic exploration conducted in 1970's – importantly selection of holes have intersected the target Tertiary sands, including carbonaceous matter
- ✓ Prized landholding in the Yarramba Palaeochannel: host to >50 Mlbs uranium resources
  - **Honeymoon Uranium Mine 36 Mlbs @ 660ppm  $U_3O_8$**
  - **Jasons Uranium Deposit 10.7 Mlbs @ 790ppm  $U_3O_8$**
  - **Saffron Uranium Deposit 5.4 Mlbs @ 557ppm  $U_3O_8$**
- ✓ Continued assessment of projects value within Orpheus portfolio

**Mick Billing** – Non-Exec Chairman

**Simon Mitchell** – Non-Exec Director

**Todd Williams** – Non-Exec Director

**Richard Willson** – Non-Exec Director & Co Sec

\*Current valuation of 8.33M shares in ASX:PSC (\$0.076)

## Uranium

The right commodity at the right time with very strong uranium price signal, robust demand growth, constrained supply response. Current uranium mine supply structural deficit a long time in the making.

## Technical team providing unique insights

Ongoing development of technical team and support, with proven track record in uranium discovery, development and production.

## Tenure situated within tier-1 (world-class) locations

Orpheus has developed a tenure portfolio within two of the best global uriferous jurisdictions, the Frome Embayment in South Australia and the Pine Creek Orogen in the Northern Territory.

## Prospectivity

Significant recent investor interest in companies which have demonstrated success in this prime location, with Orpheus following up on known mineralisation established by previous explorers.

## Developing a Project Pipeline

A company that is actively and strategically developing a project pipeline to best position the business for continued exploration success.

# Comparable Projects

Orpheus reports Mineral Resources of uranium mines, deposits or past production that it considers comparable to the style and location of uranium mineralisation in which it explores, as presented on pages 5, 8 and 9 of this presentation, and listed in the table herein.

Project	Development Phase	Location	Company / Operator	Resource Classification	Average Grade (ppm U <sub>3</sub> O <sub>8</sub> )	Contained Metal (Mlbs, U <sub>3</sub> O <sub>8</sub> )	Source
Honeymoon Uranium Mine	Mine	Frome Embayment (Callabonna Sub-basin)  South Australia	Boss Energy Limited ASX: BOE	Mineral Resource	660	36	Refer to ASX: BOE announcement dated 23 January 2024
Jasons Uranium Deposit	Resource			Inferred Resource	790	10.7	Refer to ASX: BOE announcement dated 23 January 2024
Goulds Dam Uranium Deposit	Resource			Combined Indicated and Inferred Resource	523	25	Refer to ASX: BOE announcement dated 23 January 2024
Saffron Deposit	Resource		Marmota Limited ASX: MEU	Inferred Resource	557	5.4	Refer to ASX: MEU announcement 26 October 2023
Radium Hill Historic Mine	Historic Mine	Curnamona Province	Areas reserved from the Mining Act, 1971 and Opal Act, 1995	Past production	1,310	2.6	Refer to <a href="https://minerals.sarig.sa.gov.au/MineralDepositDetails.aspx?DEPOSIT_NO=962">https://minerals.sarig.sa.gov.au/MineralDepositDetails.aspx?DEPOSIT_NO=962</a>
Crocker Well Deposit	Resource	South Australia	Sinosteel Uranium SA Pty Ltd	Combined Indicated and Inferred Resource	281	11.7	Refer to ASX: PNN announcement 28 April 2010
