ASX release (ASX:WOR)**WORLEY LIMITED****GEH award to Worley to fabricate key system for small modular nuclear reactor**

GE Hitachi Nuclear Energy¹ (GEH) has selected Worley Chemetics® to join the BWRX-300 Qualified Supplier Group. Worley Chemetics® will be the design and fabrication supplier for the isolation condenser system for the BWRX-300 small modular nuclear reactor (SMR)² to support the first grid scale SMR in North America.

The isolation condenser system is specialized equipment and is a key passive safety feature of the BWRX-300 SMR design. As a member of the Qualified Supplier Group, Worley Chemetics® will produce a prototype for testing and then fabricate the isolation condenser systems. Worley categorizes the services under this strategic supply relationship as sustainable work.³

GEH states that the BWRX-300 SMR supports decarbonization efforts by delivering clean, reliable power to the grid. In addition to supplying electricity to the grid, GEH also states that the BWRX-300 has the capability to supply electricity and/or steam for process heat applications, district heating and hydrogen production.

Worley Chemetics® has 60 years of experience delivering sustainable process technologies and over 40 years of experience in fabricating specialized alloy heat exchangers and process equipment, and recently obtained nuclear certification (ASME⁴ Section III Div. 1 and Div. 5).

Worley Chemetics® will fabricate the isolation condenser system at Worley's newly expanded, alloy fabrication facility in Pickering, Canada, which specializes in alloy vessels, reactors, and heat exchangers for the chemical process and nuclear sectors, and equipment that requires world-class capabilities and high standards for quality, metallurgy, corrosion science, and specialized welding techniques.

"We're pleased to partner with GE Hitachi Nuclear Energy to help solve the complex challenges of the energy transition," said Chris Ashton, Chief Executive Officer of Worley.

Authorized for release by Nuala O'Leary, Group Company Secretary.
