

BATHURST RESOURCES LIMITED

Q1 FY25 RESULTS UPDATE (ASX: BRL)

DISCLOSURE

General information

This document is authorised for release by the board of directors of Bathurst Resources Limited (“Bathurst”) on the 5 November 2024. Bathurst’s address is Level 12, 1 Willeston Street, Wellington 6011, New Zealand.

General disclaimer

This presentation contains forward-looking statements. Forward-looking statements often include words such as “anticipate”, “expect”, “intend”, “plan”, “believe”, “guidance” or similar words in connection with discussions of future operating or financial performance, they also include all figures noted as FY25/FY25E which are forecasted financial year June 2025 results. The forward-looking statements are based on management's and directors’ current expectations and assumptions regarding Bathurst’s businesses and performance, the economy and other future conditions, circumstances and results.

As with any projection or forecast, forward-looking statements are inherently susceptible to uncertainty and changes in circumstances. Bathurst’s actual results may vary materially from those expressed or implied in its forward-looking statements. Bathurst, its directors, employees and/or shareholders shall have no liability whatsoever to any person for any loss arising from this presentation or any information supplied in connection with it. Bathurst is under no obligation to update this presentation or the information contained in it after it has been released. Nothing in this presentation constitutes financial, legal, tax or other advice.

Resources and reserves

All references to reserve and resource estimates should be read in conjunction with Bathurst’s ASX announcement – 2024 “Resources and Reserves Compilation” reported on the 31 October 2024, and all disclosures made in this document with reference to resources and reserves are quoted as per this announcement. A marketable coal reserve table has been included as an appendix to this document.

Bathurst confirms that it is not aware of any new information or data that may materially effect the information included in this market announcement. In the case of estimates of coal resources or reserves for material mining projects, all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed since the 31 October 2024 announcement, noting that production activity for operating mining projects has occurred between the date of the initial report and this presentation.

Consolidated financial presentation

Consolidated in this document where used refers to consolidated 100 percent Bathurst and 65 percent equity share of BT Mining Limited. Financial figures noted in this document are consolidated unless otherwise noted. This presentation does not reflect reporting under NZ GAAP or NZ IFRS but is intended to show a combined operating view of the two businesses for information purposes only.

FINANCIAL SUMMARY

Consolidated 100% Bathurst and 65% BT Mining, as at 30 September 2024. This presentation does not reflect reporting under NZ GAAP or NZ IFRS but is intended to show a combined operating view of the two businesses for information purposes only.

EBITDA is a non-GAAP measure and reflects earnings before net finance costs (including interest), tax, depreciation, amortisation, impairment, non-cash movements on deferred consideration and rehabilitation provisions.

FY25 CONSOLIDATED EBITDA GUIDANCE

\$55M - \$65M

- Export market earnings are forecast to reduce from FY24 levels.
- Reduction in export sales volumes due to Tawhai tunnel closure.
- Reduction for both NID & SID including overheads driven by planned reduction in sales volumes and increased costs of mining at the NID mines.
- Full year of operating costs incurred during the Environment Assessment application for the new Tenas Project in Telkwa, Canada.

TAWHAI TUNNEL UPDATE (Kiwi Rail)

Background

- Tunnel closure occurred 15th June 2024
- Trucking plan implemented immediately
- Shipping plan updated to maximise freight capacity

Progress

- Initial shotcrete and anchors installed
- Second coat of shotcrete work underway

Outlook

- Repairs remain on target
- Line forecast to open again in January
- Shipping plan aligned with reopening

EXPORT MARKET OUTLOOK

- The HCC price reached a low of US\$180/t in mid-September, the lowest price since June 2021, as demand out of both China and India remained very weak on the back of a poor steel market.
- An announcement of new Chinese Government stimulus during September helped lift pricing and market confidence with the price increasing back above US\$200/t by the end of September.
- It is not expected that the coal prices will improve remarkably over the next few months with Indian buyers expected to remain on the sidelines for longer than expected post monsoon on lower construction activity.

USD monthly actual export pricing based on a monthly average of the S&P Global Platts Premium Low Vol daily spot pricing. Guidance is the export benchmark pricing assumed in the export segment's EBITDA guidance. Forward curve based on 30 September 2024 S&P Global Platts derivatives assessments.

Buller Plateau (Export)

- Expected first production FY27
- Expected annual production – 800kt
- Buller coal to be blended with Stockton HCC
- Subject to Fast Track approval
- Positive cashflows available for dividends and project funding

NZ EXPORTS STRONGER DUE TO COMBINATION

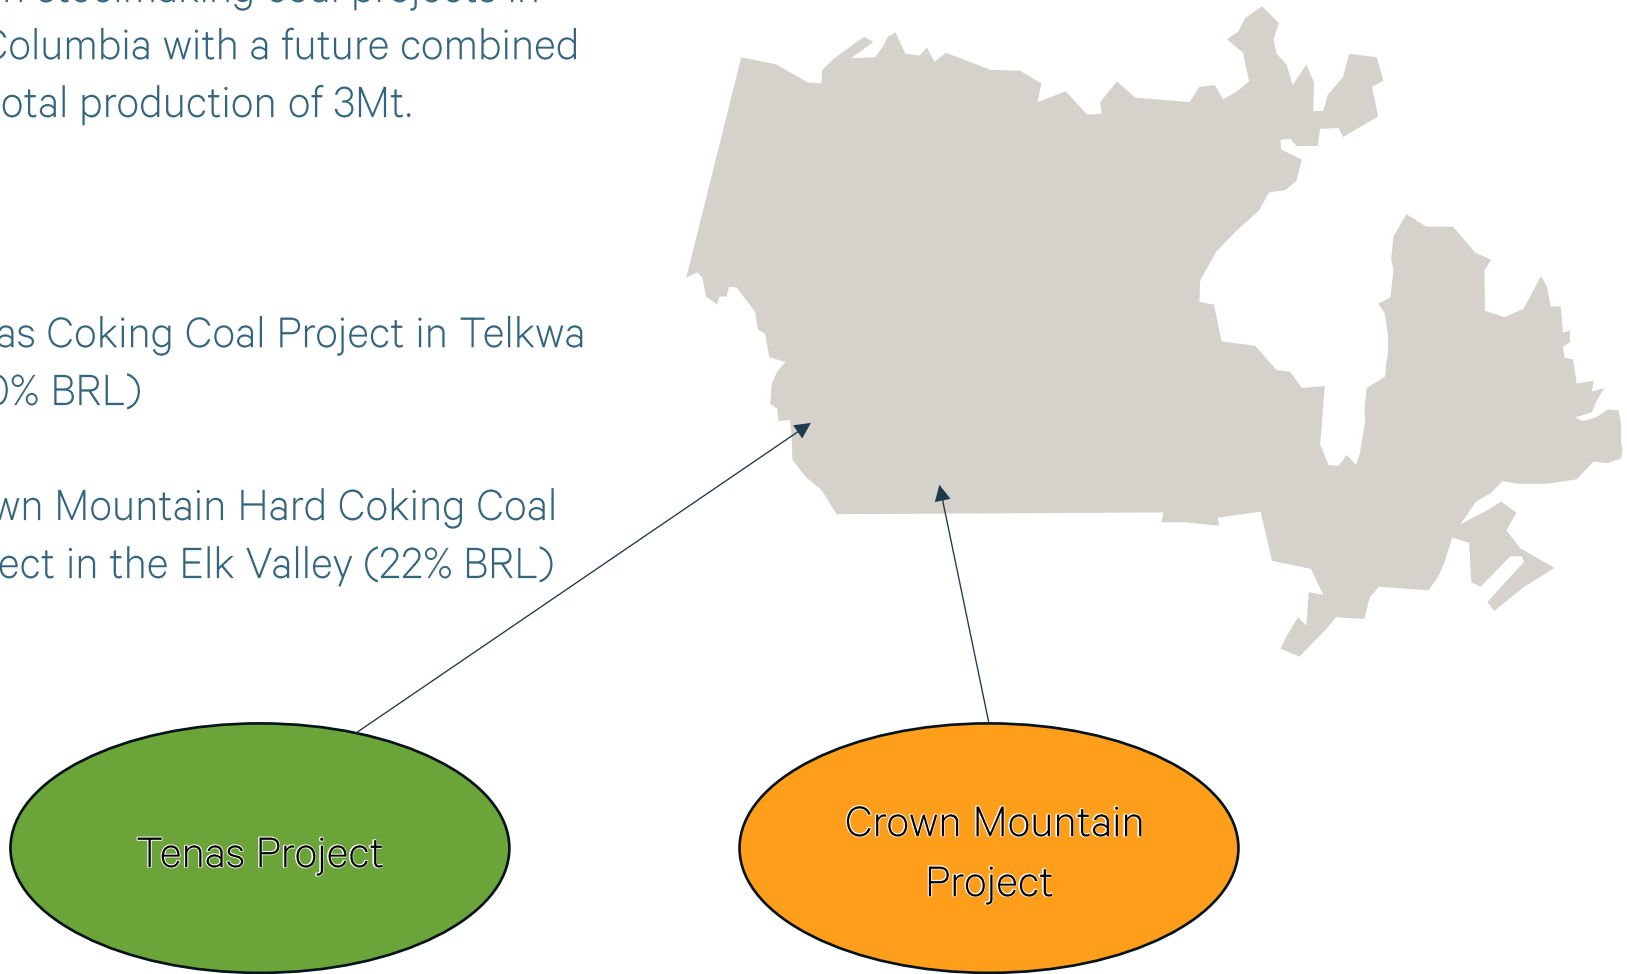

- The combination of BTM and BRL assets into the future creates a strong outlook for positive cashflow and the potential for BRL to have increased independent profit and cash generation after Takitimu closes.
- The focus of the NZ production is for steelmaking customers for both in domestic and international steelmakers.
- Blending of Bathurst & BT Mining coal to optimise value.
- Joint use of Stockton mining infrastructure as well as rail and port contracts and facilities.
- Close proximity to existing roading infrastructure and wash plant facility.

BATHURST IN BRITISH COLUMBIA

Bathurst also has an interest in two exciting Canadian steelmaking coal projects in British Columbia with a future combined annual total production of 3Mt.

A woman wearing a white hard hat, safety glasses, a high-visibility yellow and black jacket, and black rubber boots stands in the center of the frame. She is positioned in front of two large yellow and black Komatsu off-road trucks. The truck on the left is clearly marked with 'KOMATSU' and 'AT310' on its front. The truck on the right is partially visible and also has 'AT310' on its side. The ground is muddy and uneven, typical of a mining or construction site. The sky is blue with some white clouds.
