World Meteorological Organization Report

State of the Climate 2024 Update for COP29

PUBLICATION

11 November 2024

Key messages

- Jan-Sept 2024 global average temperature 1.54 (±0.13) °C above preindustrial level
- Long-term warming measured over decades remains below 1.5°C
- Past 10 years are warmest on record and ocean heat rises
- Antarctic sea ice second lowest on record and glacier loss accelerates
- Extreme weather and climate events lead to massive economic and human losses

Policies driving decarbonisation

CCUS support in the U.S., carbon penalties, tariffs, & policy support in Europe, & coming in Asia-Pacific...

Europe

- Free EU ETS allowances will be progressively phased out following the introduction of CBAM, reducing by 48.5% by 2030 and 100% by 2034.¹
- New Clean Industrial Deal and Industrial Decarbonisation Accelerator Act expected in early 2025
- European Commission Industrial Carbon Management communication states:³
 - To 2030: "focus will be on capturing CO₂ from process emissions"
 - 280 million tonnes of CCS targeted by 2040
 - 450 million tonnes of CCS targeted by 2050
 - Capture of CO₂ from the atmosphere is an "essential complement" to emissions reduction

Supporting policies

- Emissions Trading Scheme (EU ETS)
- Carbon Border Adjustment Mechanism (CBAM)
- Innovation Fund
- Net-Zero Industry Act

USA

- Strong bipartisan support for 45Q⁴
 - Introduced in 2008, 45Q is a US tax incentive underpinning investment in CCUS & DAC
 - Most beneficiaries are oil & gas companies located in Republican states
- CCUS infrastructure, such as Class VI wells and CO2 pipelines could be expedited under an incoming Republican administration
- State based schemes for industrial decarbonization, such as the RISE PA scheme, provide a hedge against changes to other Federal funding schemes.

Supporting policies

- 45Q Tax credit
- US-Australia Climate, Critical Minerals & Clean Energy **Transformation Compact**
- Direct Air Capture (DAC) hubs

Asia-Pacific

- China carbon pricing ⁷
 - China will add cement, steel and alumina to its Emissions Trading Scheme (ETS) by end 2024
 - Chinese ETS already 4x the size of EU ETS by volume.⁸
 - Prices expected to remain low before increasing as emissions peak closer to 2030
- Jan 2024: ETS momentum emerging across APAC⁷
 - India, Malaysia, Indonesia, Thailand, Vietnam and others have introduced regulatory frameworks for ETS launch
- Australian CBAM under review

Supporting policies

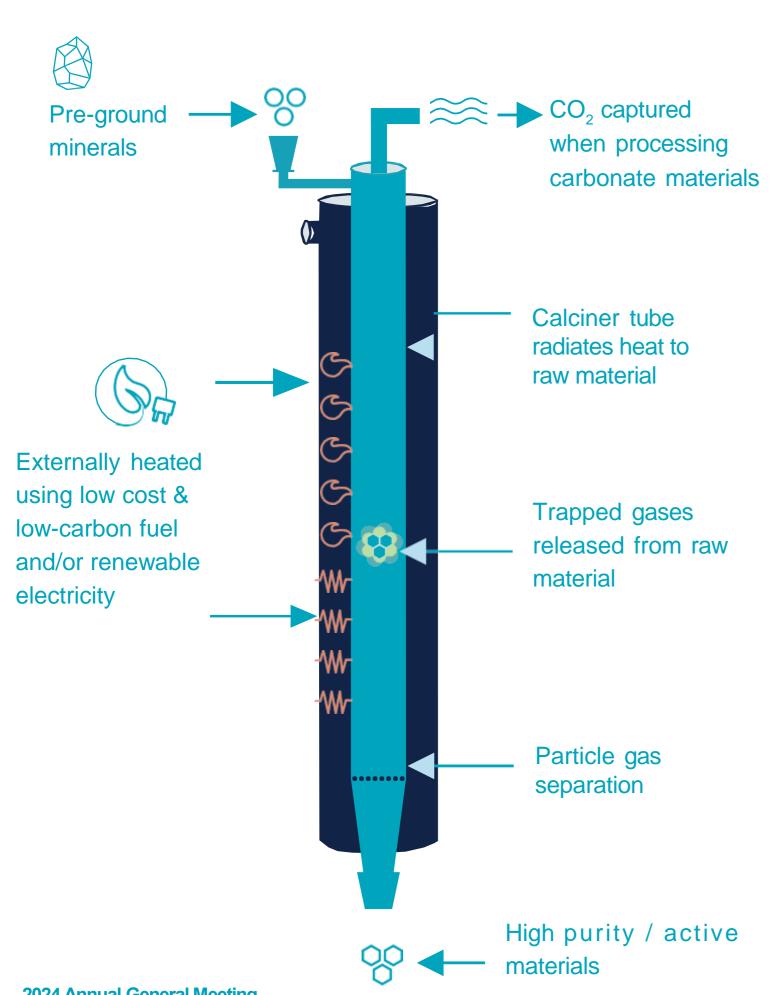

- Safeguard Mechanism
- AU\$15b National Reconstruction Fund
- AU\$1.9b Powering the Regions Fund
- Carbon Capture Technologies Program
- Critical Minerals Strategy

- Carbon border adjustment mechanism as part of the European Green Deal. European Parliament. 20 Jan 2024
- Europe's 2040 climate target and path to climate neutrality by 2050 building a sustainable, just and prosperous society. European Commission. 6 Feb 2024
- Industrial Carbon Management Communication. European Commission. 6 Feb 2024

Calix's core platform technology

A new way to "heat stuff up"

Carbon Capture

Unavoidable process CO₂ emissions from cement & lime production & CO₂ from the atmosphere are captured for use or storage.

Sustainable Processing

Compatible with electricity & alternative fuels to provide viable, flexible and economical pathways to sustainable processing.

Magnesia

Produces high purity / active materials with enhanced chemical and / or bioactivity.

ZESTY wins global Net-Zero Industry Award at COP29

"ARENA is pleased to be supporting Calix's Australian technology aiming to decarbonise this 'hard-to-abate' sector and help protect Australia's valuable export industry."

"We congratulate Calix on winning the Net-Zero Industry Award. Calix represents great Australian innovation and highlights what is possible in finding practical solutions for reducing emissions in the metals refining process."

Darren Miller, CEO, Australian Renewable Energy Agency

Calix's Company Structure

Governance and board renewal

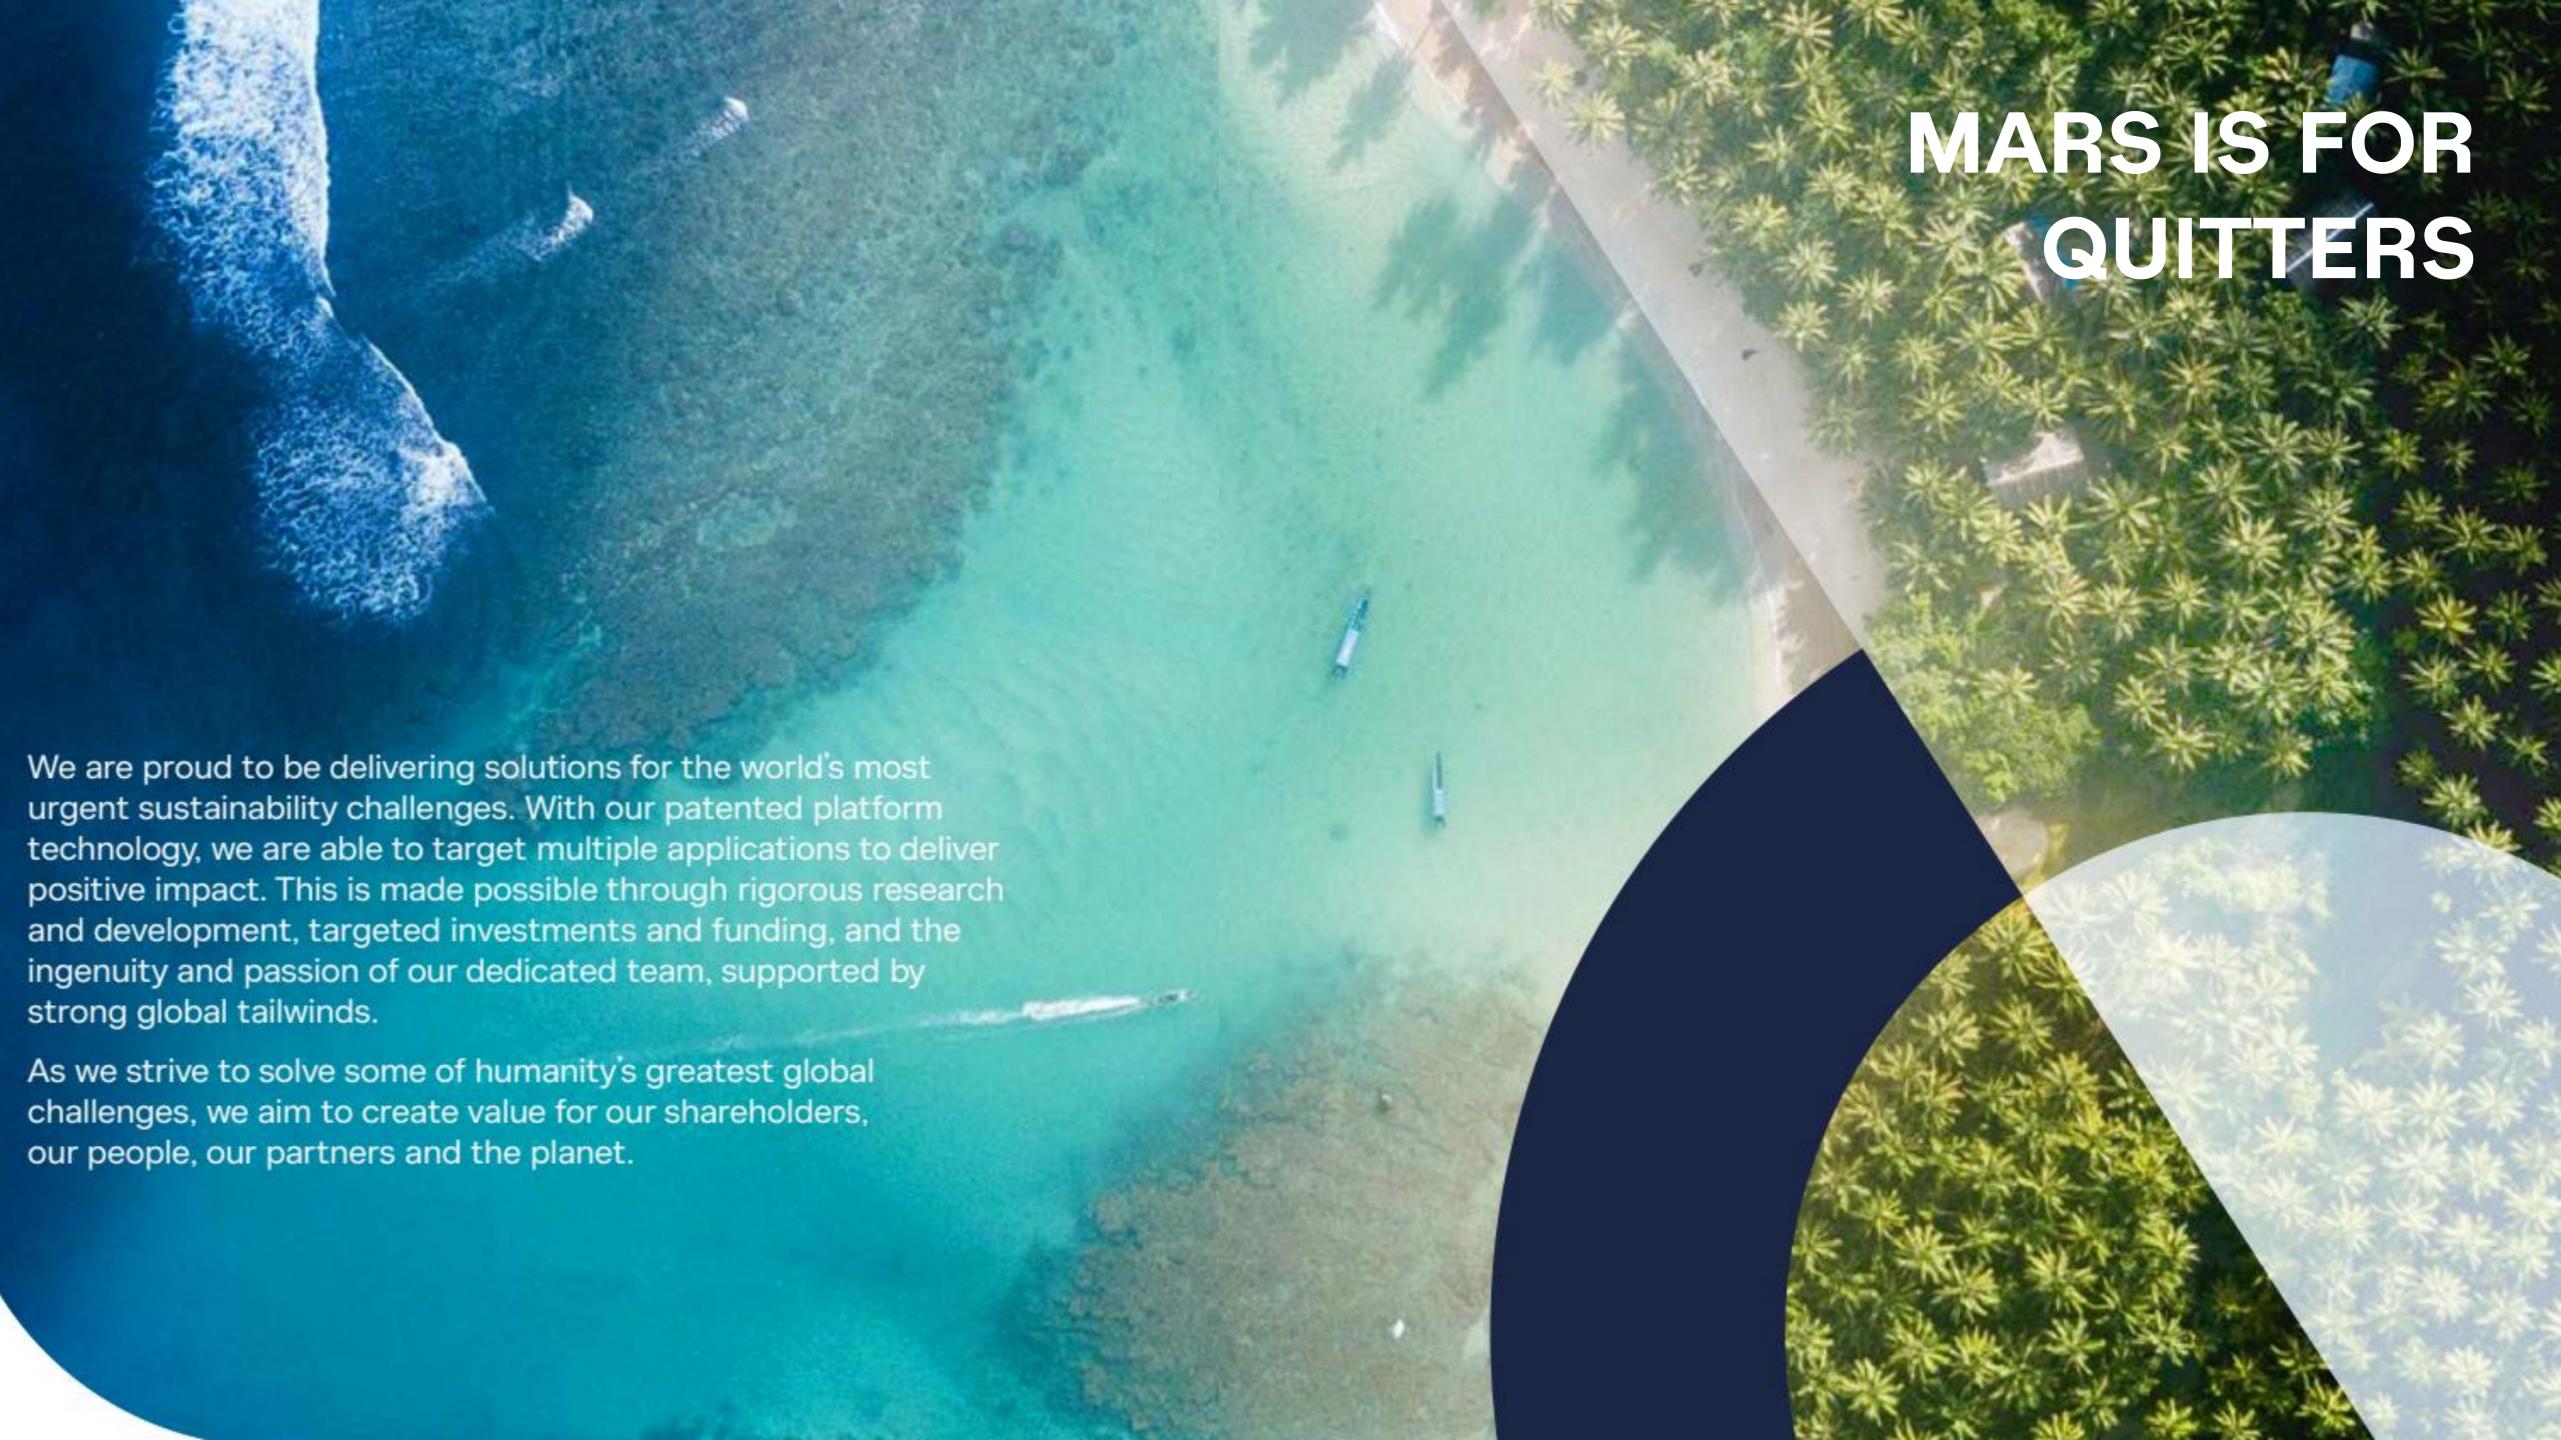

Calix

Phil Hodgson
Managing Director and
Chief Executive Officer

CEO's Address

FY25 strategy & priorities update

Focus on revenue generation & diligent cost management

Strategy & prioritisation

- FY25 has seen a continuation of difficult market conditions due to low commodity prices, political uncertainty & challenging capital markets.
- To navigate these market conditions, we have focused on revenue generation and cost reductions to create a sustainable basis for growth.
- Project prioritisation further refined to concentrate resources on our most prospective industry sectors.

Revenue growth

- Focus on paid engineering work in Leilac and Sustainable Processing, and growth in direct sales in Magnesia business.
- FY25 revenues show continued growth in the first quarter.

Cost reductions

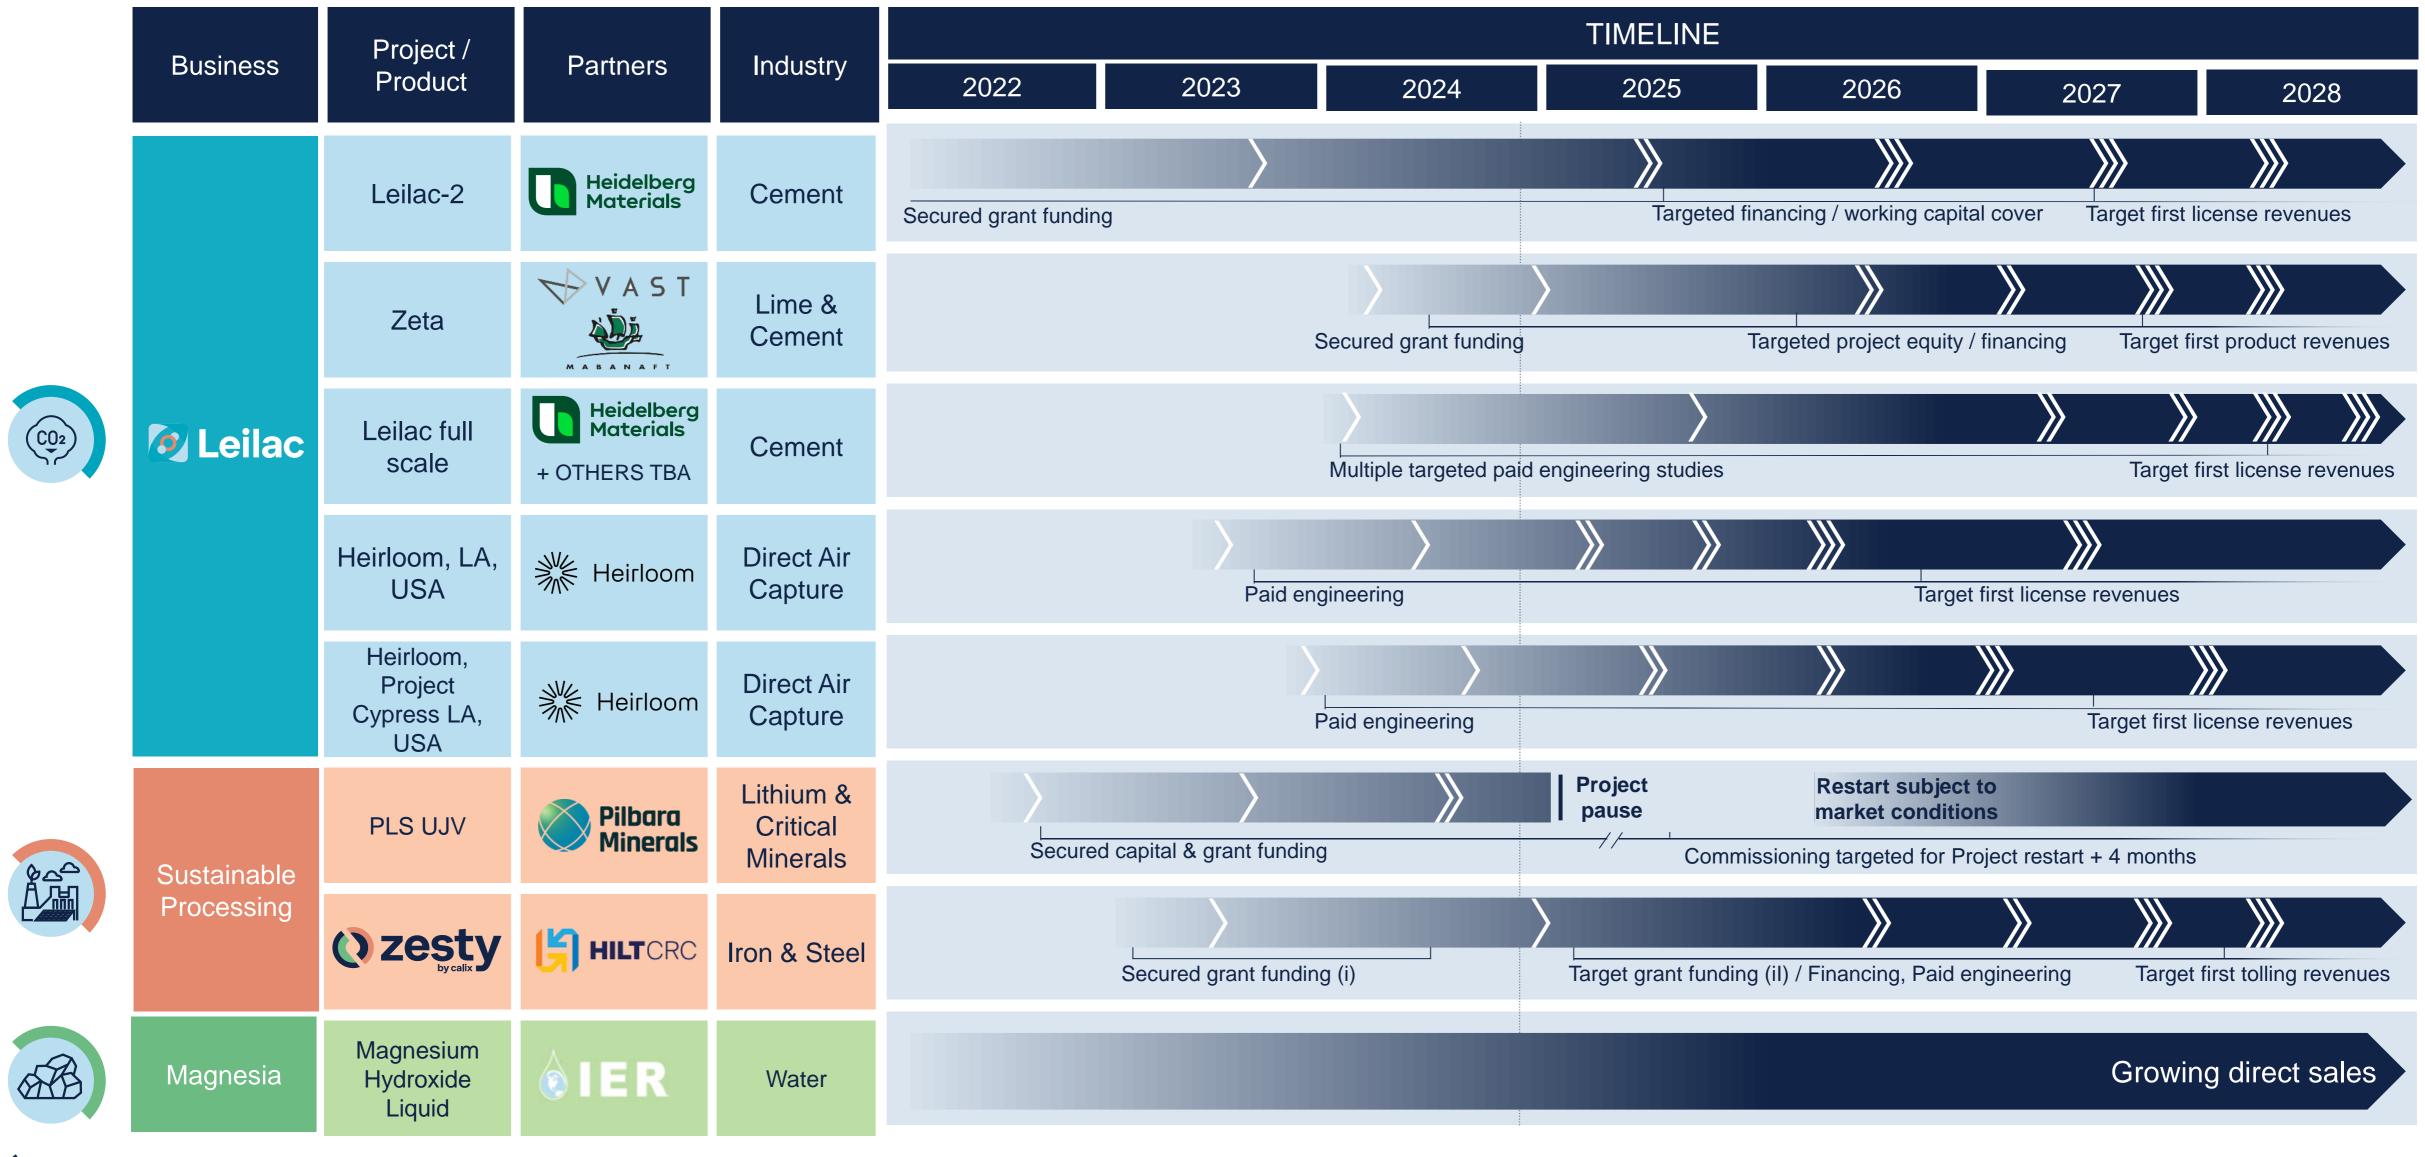

- Paused activity in Magnesia 'specialties' and magnesium metal in addition to batteries in FY24.
- Streamlined technology development and engineering functions through integration and harmonisation of teams and technology designs.
- Reduced headcount by ~20%.
- Reduced annualised costs by ~AU\$6m.

Indicative project & revenue timeline

Engineering

Project Partner Funding support Industry Market size

Leilac-2 Heidelberg Materials

Leilac-2 Cement & lime 1.4 BTpa CO₂¹

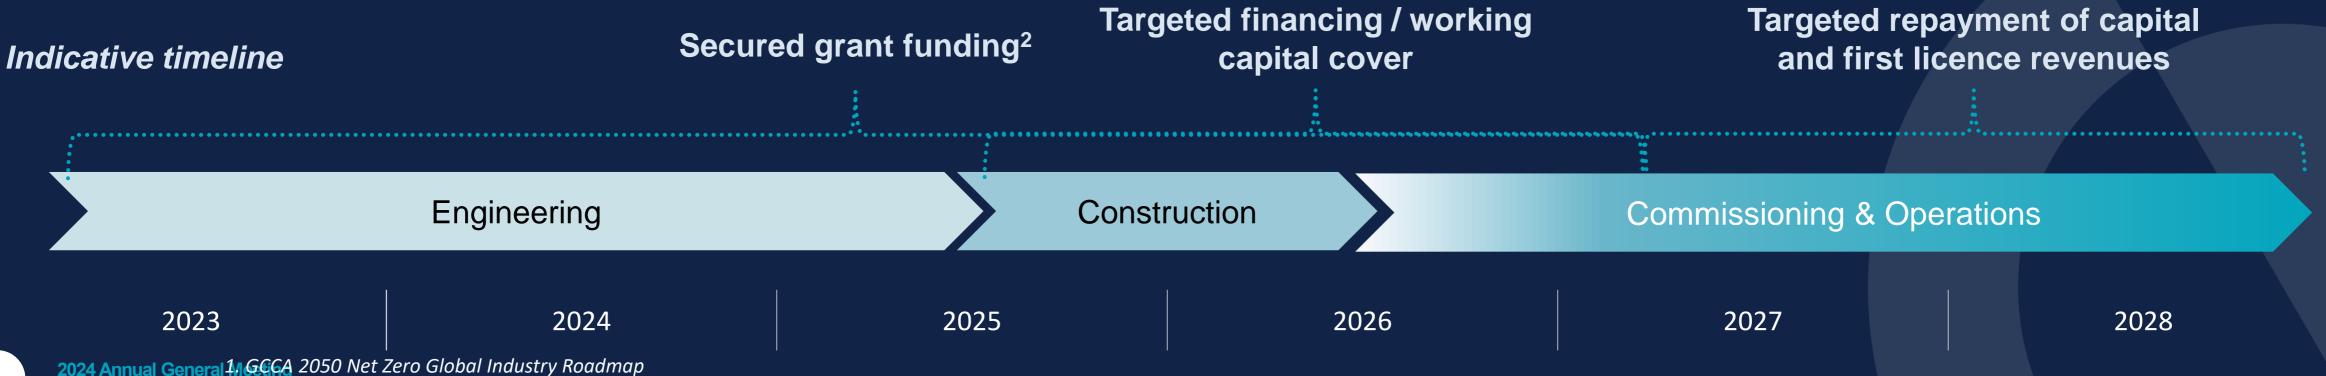

Objectives

- Demonstrate a replicable module that can efficiently capture up to 100ktpa of unavoidable process emissions
- Successfully retrofit the Leilac module to an operational cement plant with minimal downtime
- Demonstrate the ability to use low-cost and lowcarbon fuels

Status

- Project successfully relocated to Heidelberg Materials' Ennigerloh cement plant, following closure of Hannover plant³
- JV formed with Heidelberg Materials for the construction, operation & future ownership of the Leilac-2 plant, subject to performance testing
- Upon transfer of ownership, Heidelberg Materials would repay Leilac's capital contribution, less depreciation

- Complete permitting process
- Commence construction in 2025
- Begin commissioning & operations in 2026

 Project
 Partners
 Funding support
 Industry
 Market size

 Project ZETA
 ♦ VAST
 VAST
 Cement & lime
 1.4 BTpa CO₂¹

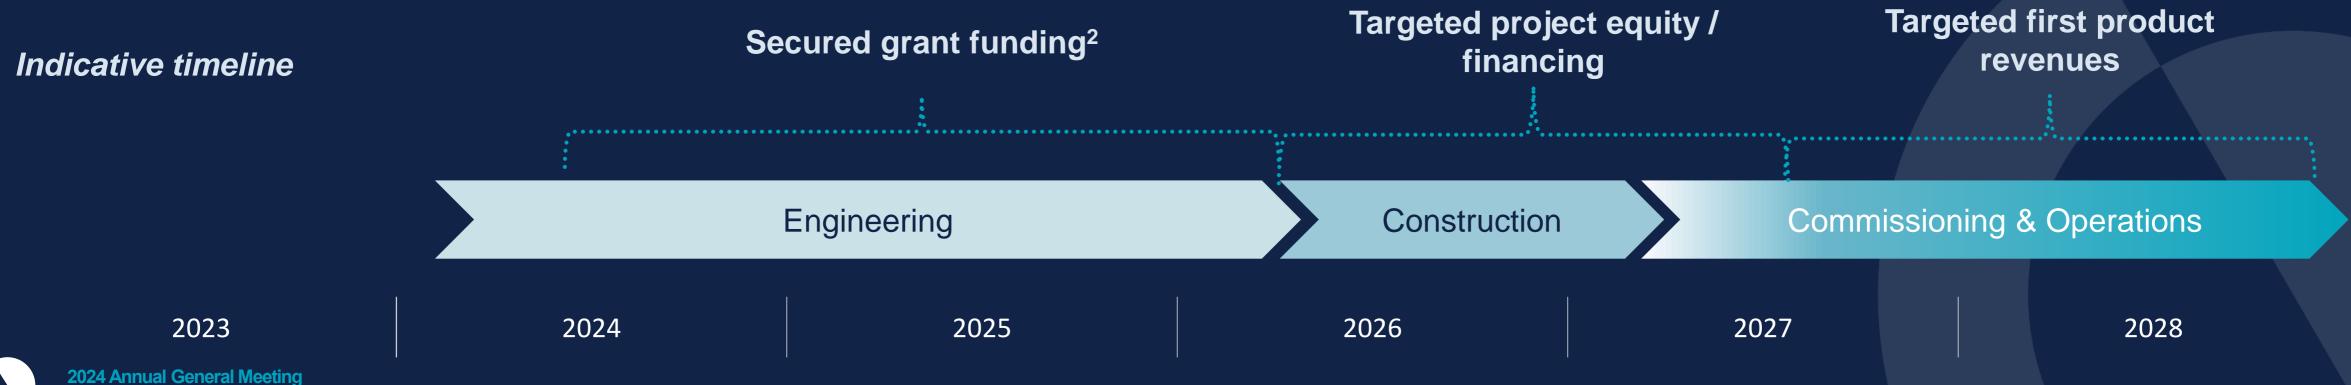

Objectives

- Build a commercial demonstration electric calciner for near zero emissions lime & cement
- Sell captured process CO₂ emissions to the Solar Methanol 1 project³ to produce green methanol
- Sell decarbonised lime products in collaboration with partners
- Develop a novel zero emissions cement making process that reduces cost, energy consumption & footprint

Status

- \$15m grant from the Australian Government secured
- Collaborations & partnerships established in firstof-a-kind Carbon Capture & Use project
- Engineering & design of the plant continues to progress

- Complete pre-FEED study
- Progress FEED study to enable a Final Investment Decision

Leilac-3: Full-scale cement & lime deployment

Projects	Partners	Funding support	Industry	Market size
Multiple in development	Heidelberg Materials + Others	TBC	Cement & Lime	1.4 BTpa CO ₂ ¹

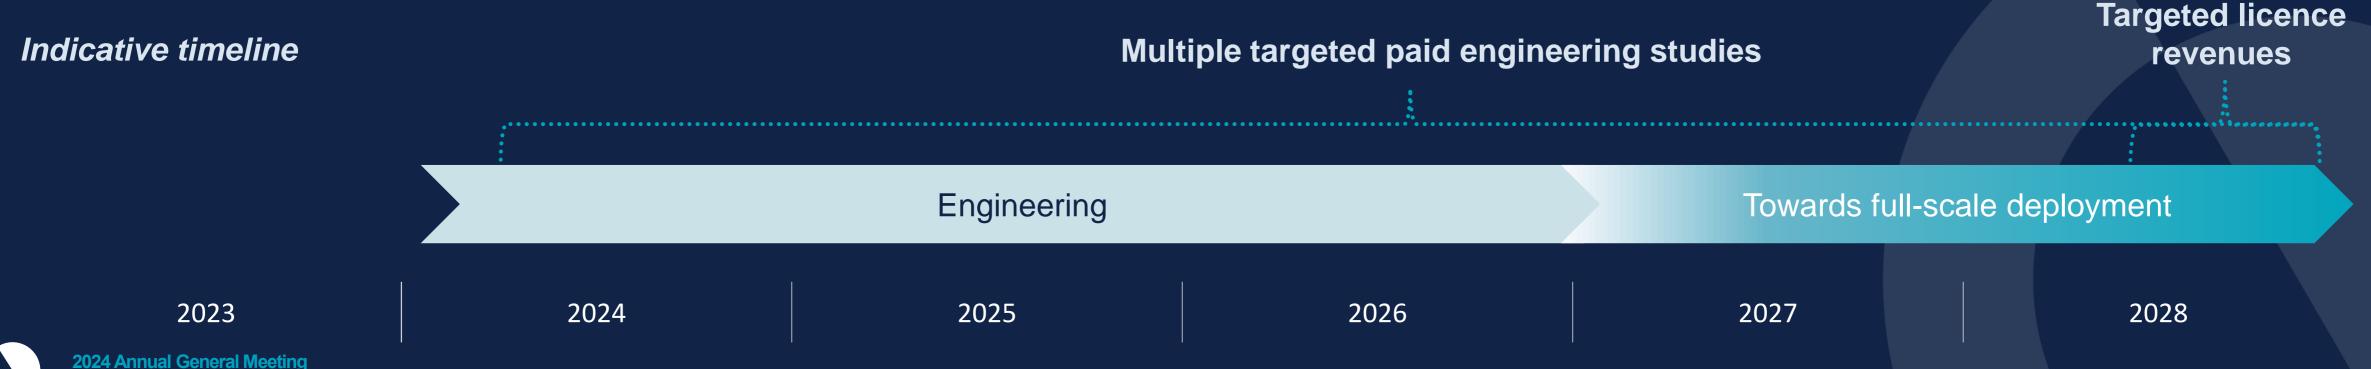

Objectives

- Deploy Leilac's technology at full-scale with multiple partners in the cement & lime industry
- Commercial demonstration of Leilac's technology as the leading decarbonisation solution in key target markets

Status

- Heidelberg Materials & Leilac continue to explore the development of a full-scale commercial installation²
- Multiple projects in the pipeline continue to progress
- Ongoing technology development & engineering work for full-scale designs

- Continue to progress commercial partnerships for full-scale applications of the Leilac technology
- Pursue funding support in target markets
- Continue to progress technology development & engineering work for full-scale designs

U.S. market update

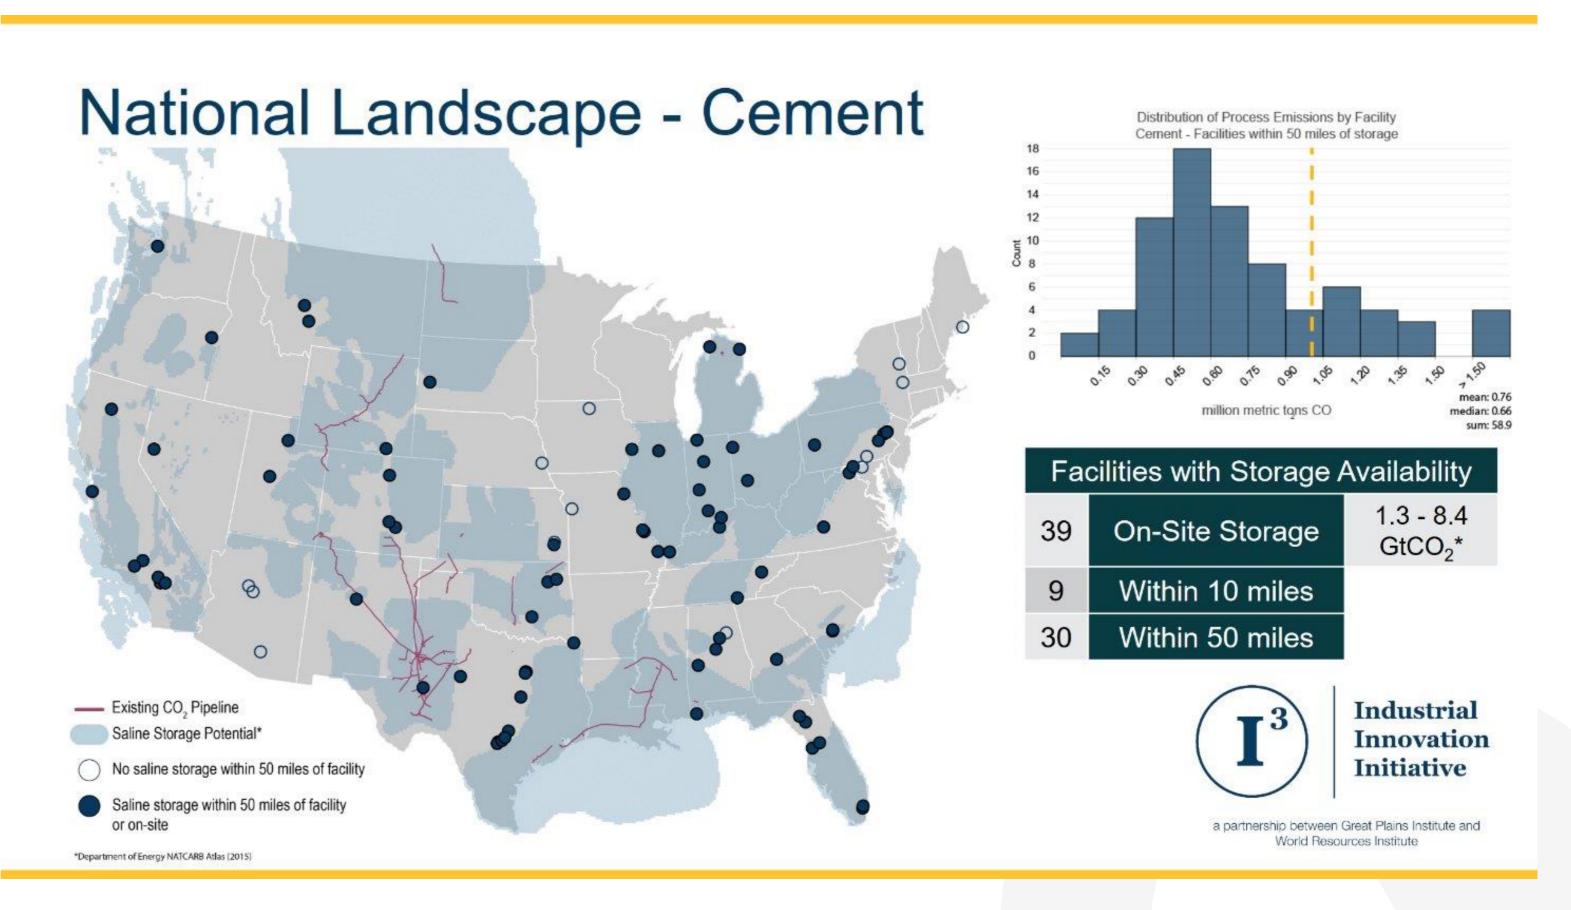

What about a Trump administration?

Market size:

- The US operates around 100 cement plants (out of a global total of around 5000).
- It remains an important market to establish Leilac Lighthouse projects, prior to wider deployment in the global south.

Policy support:

- 45Q has strong bipartisan support and is likely to be maintained. It primarily funds projects in Republican states, including for oil and gas and enhanced oil recovery.
 - US\$60 / tCO₂ for carbon capture and use, including Enhanced Oil Recovery
 - US\$85 / tCO₂ for Carbon capture and permanent storage from industrial facilities
 - US\$180/tCO₂ for DAC and permanent storage
- A Republican administration may also accelerate the development of CCUS infrastructure, including approvals for Class VI wells for CO₂ sequestration

Source: Industrial Innovation Initiave

Enabling hybrid fuel use and grid-load balancing

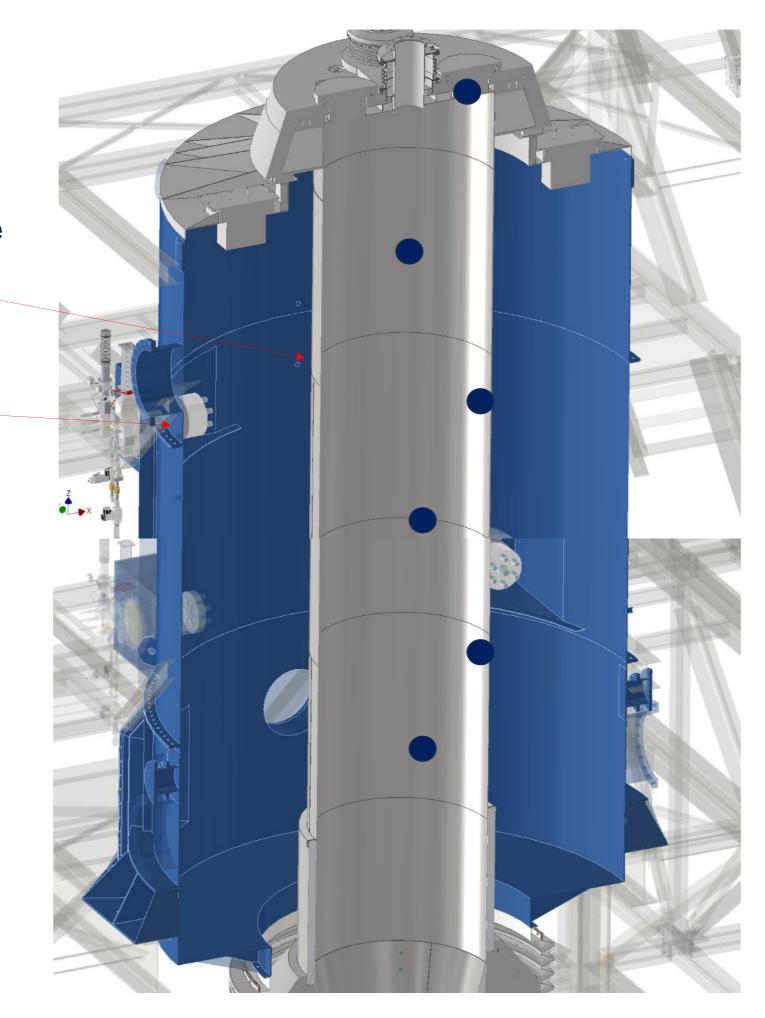

Potential to optimise energy operating costs and create new revenues by providing a stabilising service to the grid

Two responsive energy inputs:

- 1. Electrical heat from renewable power, or the grid, is controlled by the current in resistive heaters.
- 2. Combustion heat from burners using conventional or alternative fuels is controlled by the flow of a combustion gas and air.

This solution has the potential to allow rapid switching between electricity and combustion depending on:

- Fuel / electricity prices
- Grid load balancing requirements

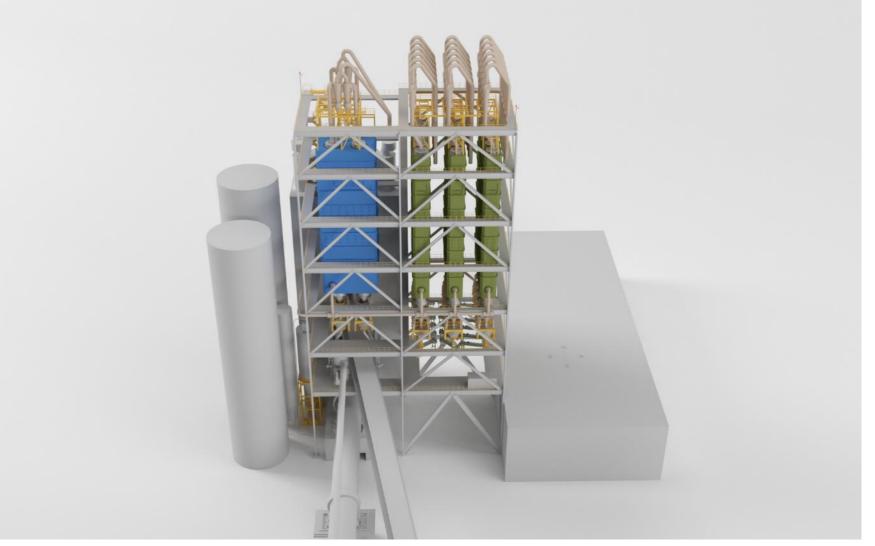

Direct electrical heating has been proven at pilot scale at the Calix Technology Centre.

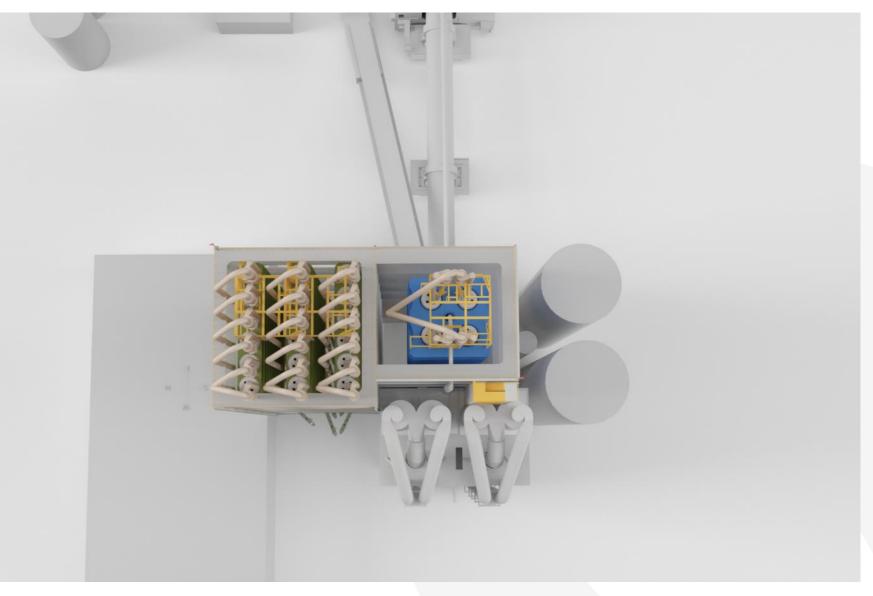

Leilac-3 design

Incorporating next generation hybrid-fuel technology and reduced footprint

Partner funding **Partner Industry Market size Project** support Heirloom U.S. DEPARTMENT OF ENERGY Heirloom – LA, USA >1 BTpa CO₂¹ Direct Air Capture

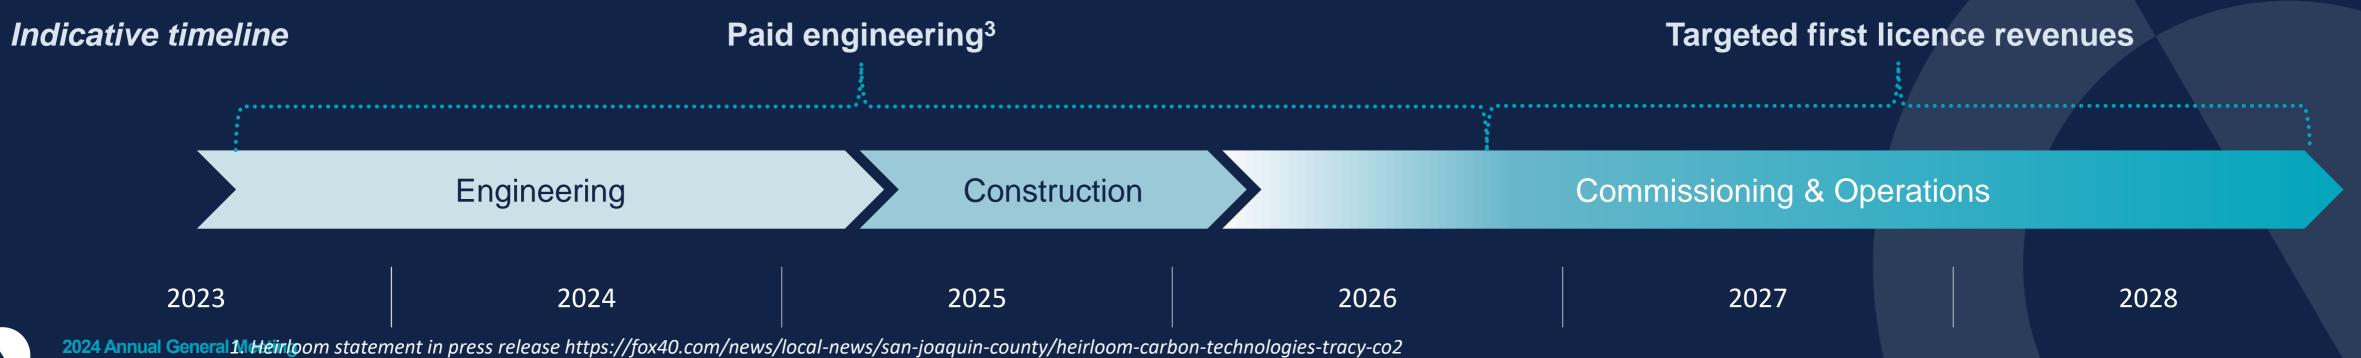

Objectives

- Build Leilac's electric calcination and carbon capture technology at Heirloom DAC facilities in Shreveport, Louisiana, USA.
- A first facility aims to enable CO₂ removal of ~17,000 tons per year
- A second, co-located facility aims to add an additional ~300,000 tons per year of CO₂ removal capacity as a part of Project Cypress²

Status

- Global & perpetual licence agreement signed for the exclusive use of Leilac's technology by Heirloom³, US\$3 / tonne CO₂ base royalty rate
- Paid engineering underway for the design of electric single & multi-tube modules for Heirloom's DAC process
- Second successful R&D campaign with Heirloom using Calix's BATMn electric calciner completed

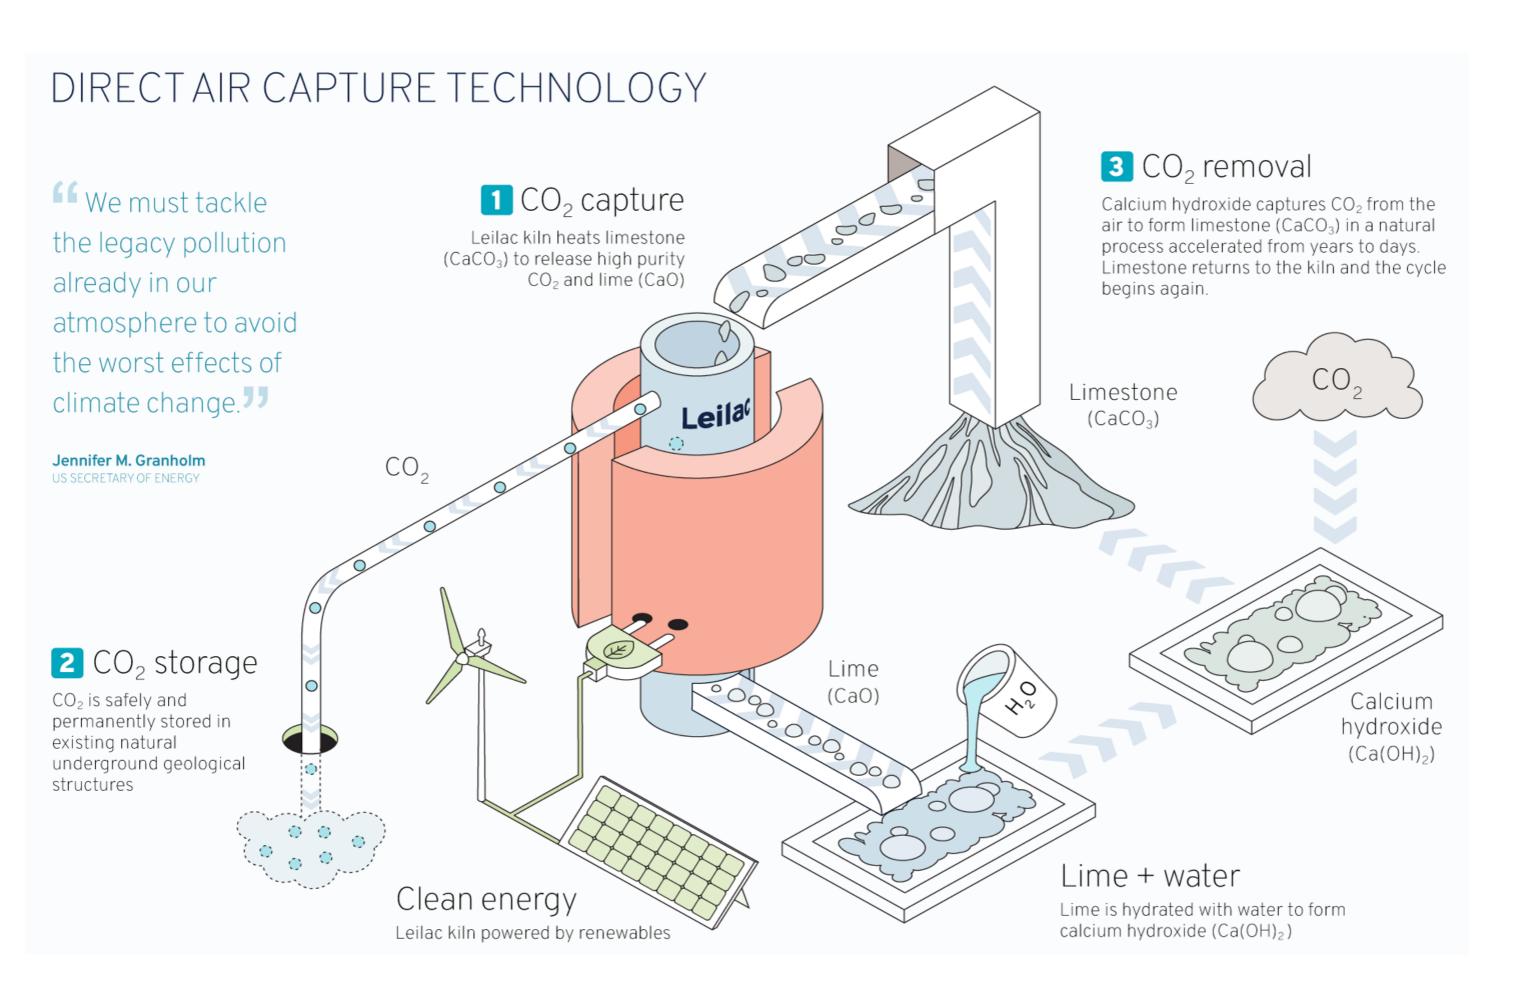

- Continue to deliver paid engineering services to complete detailed engineering & design work
- Construct a ~17,000 tons of CO₂ per annum facility, with operations targeted to commence in 2026
- Construct a ~300,000 tons of CO₂ per annum facility, with operations targeted to commence in 2027

Direct Air Capture with Heirloom

Impression of a 17kpta DAC facility in Louisiana, USA

Mid-stream demonstration plant with Pilbara Minerals UJV

Project	Partner	Funding support	Industry	Market size
PLS UJV Mid-Stream	Pilbara Minerals	Australian Government Department of Industry, Science and Resources	Lithium	Royalty % of US\$7Bpa ¹

Objectives

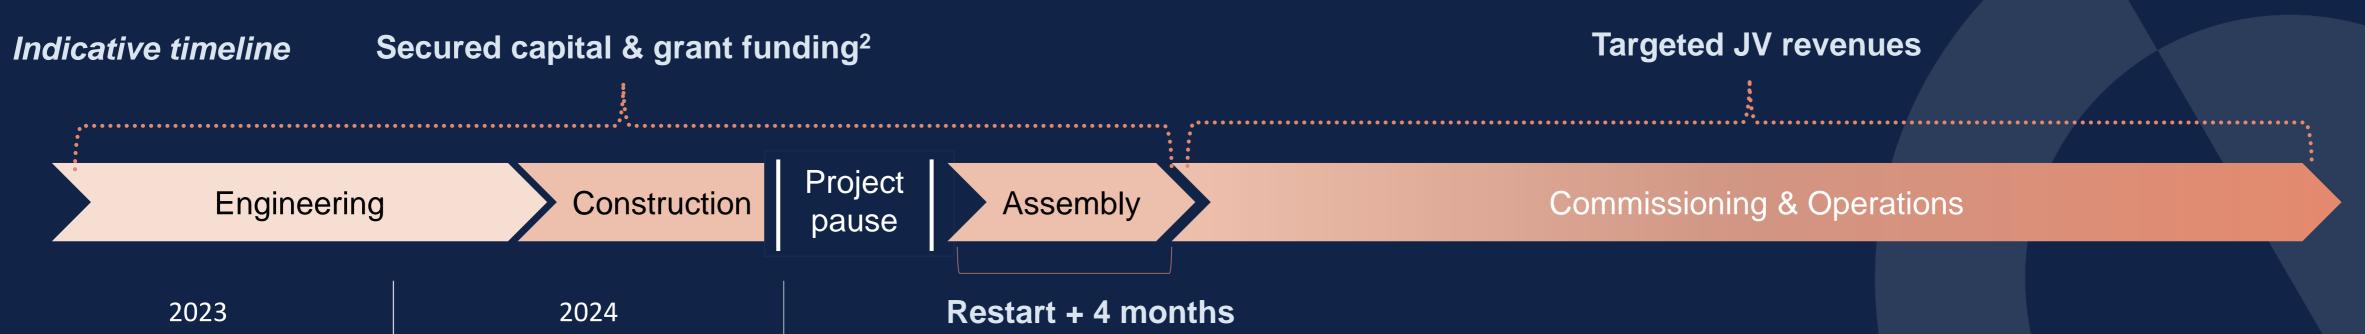

- Demonstrate lower CAPEX & OPEX for mineral processing with electric calcination
- Create a concentrated & low-carbon lithium product at the mine site
- Demonstrate the ability to simplify supply chains and unlock logistically challenging ore deposits

Status

- Project remains on budget³ & 60% complete to the end of Sept 2024
- Construction commenced bulk earthworks complete & preferred contractors selected
- Fabrication of key equipment well progressed
- Delivery of all committed orders expected to be completed in December 2024

Targeted next steps

- The Project will be paused until market conditions are supportive or further government support can be secured
- Both Companies remain committed to the progression of the Project and continue to work with various government bodies in relation to further funding options
- Project will stand ready to recommence construction and quickly progress to commissioning when conditions allow

24

Rapid restart planned when conditions improve

Key equipment fabricated and being delivered to site. Construction expected to be completed in 4 months following restart

ZESTY Green Iron Demo

Australian Government Australian Renewable Energy Agency

ARENA Iron & Steel US\$640Bpa1

Objectives

- Develop industry leading H₂-DRI technology
- Demonstrate green iron production from Australian ores & fines
- Minimise hydrogen use & green iron costs
- Enable multiple decarbonisation pathways for iron
 & steel

Status

- ZESTY proven at pilot scale, with metallisation rates up to 98% from Australian hematite/goethite ores²
- First green iron briquettes produced
- FEED Study completed²
- Prospective techno-economic findings²
- Progress towards FID³

Targeted next steps

- Finalise commercial & financing contracts for ZESTY Demo plant
- Reach FID
- Continue to test & develop the technology

ZESTY wins global Net-Zero Industry Award at COP29

ZESTY wins COP29 global Net-Zero Industry Award for Outstanding Project

The award was presented by Ministers Chris Bowen (Australia) and Leonore Gewessler (Austria).

Organised by Mission Innovation's Net-Zero Industries Mission:

- The Mission is led by Austria and Australia, in collaboration with Canada, China, the European Commission, Finland, Germany, the Republic of Korea, the UK and the USA
- Member countries account for over 50% of global industrial emissions, and USD\$13 billion in annual investment in research, development and demonstration
- The Mission aims to deliver at least 50 large-scale demonstration projects around the world by 2030.

HILT CRC

ZESTY recognised at HILT CRC 2024 Annual Conference

The Project "Testing of Australian iron ores in a hydrogen flash smelting process" was awarded the Best Contribution to Industry-Research Collaboration at the HILT CRC 2024 Annual Conference. The project was delivered through a collaboration between Calix, Swinburne, University of Adelaide, Fortescue, Roy Hill, Liberty and Grange Minerals.

"The innovative thinking behind the ZESTY project is a prime example of what industry needs to develop cost-competitive and scalable technology for low-emissions iron ore processing.

It has been gratifying to work with Calix on accelerating the development of this technology, which can contribute to the decarbonisation of heavy industry. Congratulations to the Calix team for this well-deserved recognition."

Jenny Selway, CEO, HILT CRC

Product	Partners	Funding support	Industries	Market size
Magnesium Hydroxide	Centre for Environmental and Agricultural Solutions to Antimicrobial Resistance SAAFE CRC Solving Antimicrobial Resistance in	N/A	Water, Agriculture, Bio	Multi US\$Bpa ¹

Objectives

- Grow sales of MHL products for sustainable water & wastewater treatment
- Develop crop protection products using Calix's safe & sustainable bioactive materials
- Develop non-toxic marine coatings solutions
- Develop non-lethal control of pathogens to help prevent antimicrobial resistance

Status

- Development of 'specialties' applications and Mg metal project paused to allow prioritisation of resources
- Ongoing revenue and margin growth
- Unity Water project commenced

Targeted next steps

*Project timelines are indicative only. Please refer to ASX announcements for latest project timelines

 Accelerating revenue growth in Calix's Water business

Summary and FY25 Outlook

Creating a sustainable basis for growth & acceleration

- Challenging market conditions have slowed the pace of decarbonisation across the world. However, strong global commitments and policy drivers remain.
- To navigate current conditions, Calix has introduced diligent cost reduction measures and refined our prioritisation of projects.
- Core focus is on progressing priority projects to commercially demonstrate core technology in cement & lime, iron & steel, lithium & Direct Air Capture industries.
- Magnesia business is continuing to grow revenue & margins.
- Focusing on revenue growth, secured grant funding & cost management to provide the cash support required to fund current operations & technology development.
- Capital management & funding strategy continues to focus on opportunities
 to secure capital in the form of equity, debt or grants at the subsidiary &
 project level to fund projects & accelerate industry application.
- Calix remains poised to accelerate and deploy its unique platform technology to some of the world's largest and most carbon-intensive industrial sectors.

Q&A

(calix

Alison Deans
Non-Executive Chair

Formal business of the meeting

Item of business

Consideration of the financial report

Consideration of Financial Report:

"To consider and discuss the Financial Report, including the Directors' Report and the Auditor's Report, for the year ended 30 June 2024."

There is no vote on this item.

Item of business

Resolution 1 – The Remuneration Report

To consider and, if thought fit, to pass the following Resolution as an ordinary resolution:

"That the Remuneration Report of the Company for the financial year ended 30 June 2024, which forms part of the Directors' Report, be adopted."

For Resolution 1, the proxy votes received are as follows:

Proxy votes: Resolution 1

For	68,182,780	99.05%
Against	188,292	0.28%
Open	467,095	0.68%
Exclusions	_	_
Abstained	83,856	-

Item of business

Resolution 2 – The election of Peter Dixon

To consider and, if thought fit, to pass the following Resolution as an ordinary resolution:

"That Peter Dixon, who retires after having been appointed by the Directors as a director to fill a casual vacancy under clause 13.10 of the Company Constitution and being eligible, offers himself for election, be elected as a Director of the Company."

For Resolution 2, the proxy votes received are as follows:

Proxy votes: Resolution 2

For	68,319,067	99.21%
Against	49,933	0.001%
Open	487,391	0.007%
Exclusions	_	-
Abstained	57,539	-

Resolution 3 – The election of Dr Sarah Ryan

To consider and, if thought fit, to pass the following Resolution as an ordinary resolution:

"That Dr Sarah Ryan, who retires after having been appointed by the Directors as a director to fill a casual vacancy under clause 13.10 of the Company Constitution and being eligible, offers herself for election, be elected as a Director of the Company."

For Resolution 3, the proxy votes received are as follows:

Proxy votes: Resolution 3

For	68,327,160	99.22%
Against	49,933	0.001%
Open	487,391	0.007%
Exclusions	-	_
Abstained	57,539	-

Resolution 4 – The approval of the issue of performance rights to Phil Hodgson under the Calix EIS

To consider and, if thought fit, to pass the following Resolution as an ordinary resolution:

"That for the purposes of ASX listing rule 10.14 and for all other purposes, the issue of 117,856 performance rights under the Calix EIS to Phil Hodgson be approved."

For Resolution 4, the proxy votes received are as follows:

Proxy votes: Resolution 4

For	68,138,787	98.95%
Against	254,795	0.04%
Open	470,175	0.07%
Exclusions	_	-
Abstained	58,266	_

Resolution 5 – The approval of the issue of performance rights to Mark Sceats under the Calix EIS

To consider and, if thought fit, to pass the following Resolution as an ordinary resolution:

"That for the purposes of ASX listing rule 10.14 and for all other purposes, the issue of 70,457 performance rights under the Calix EIS to Mark Sceats be approved."

For Resolution 5, the proxy votes received are as follows:

Proxy votes: Resolution 5

For	68,139,422	98.95%
Against	245,802	0.04%
Open	480,633	0.07%
Exclusions	-	_
Abstained	56,166	_

Resolution 6 – The approval of the issue of shares to the directors in lieu of fees

To consider and, if thought fit, to pass the following Resolution as an ordinary resolution:

"That, pursuant to and in accordance with Listing Rule 10.11 and for all other purposes, Shareholders approve the issue of Director Shares as follows:"

- (a) Up to \$107,500 worth of Director Shares to Alison Deans;
- (b) Up to \$67,500 worth of Director Shares to Helen Fisher;
- (c) Up to \$67,500 worth of Director Shares to Dr Sarah Ryan; and
- (d) Up to \$67,500 worth of Director Shares to Peter Dixon,

or their respective nominees, on the terms and conditions set out in the explanatory memorandum."

For Resolution 6, the proxy votes received are as follows:

Proxy votes: Resolution 6	(a)	(b)	(c)	(d)
For	68,238,453	68,238,567	68,236,196	68,236,467

Q&A

Appendix

Term	Meaning
Aluminium (Al)	Chemical element with the symbol Al
Antimicrobial	Antimicrobial products kill or slow the spread of microorganisms, including bacteria, viruses and fungi.
AMR	Antimicrobial resistance – the development of resistance in bacteria, viruses, fungi and parasites to antimicrobials
ARENA	The Australian Renewable Energy Agency
ASX	The Australian Securities Exchange
APVMA	Australian Pesticides and Veterinary Medicines Authority
ASRS	Australian Sustainability Reporting Standards
BATMn	Calix's core kiln technology – electrified – for battery and catalyst materials production and other applications testing
BOD	Basis of Design
BOS	Basic Oxygen Steelmaking
CAGR	Compound Average Growth Rate (%)
Calcium (Ca)	Chemical element with the symbol Ca
Carbonation	The capture of carbon dioxide by contacting with lime (calcium oxide), to form limestone (calcium carbonate)
Cathode	The positive electrode of a battery
CBAM	Carbon Border Adjustment Mechanism
СВР	Community Benefits Plan
ccs	Carbon Capture and Storage
CCU	Carbon Capture and Use
CCUS	Carbon Capture, Utilisation and/or Storage
CEA StAR	Centre for Environmental and Agricultural Solutions to Antimicrobial Resistance
CO ₂	Carbon Dioxide
Copper (Cu)	Chemical element with the symbol Cu

Term	Meaning
CRC	Cooperative Research Centre – Australian Government supported industry-led collaborative research centres
CRC SAAFE	Cooperative Research Centre Solving Antimicrobial Resistance in Agribusiness, Food, and Environments
DAC	Direct Air Capture – the extraction of carbon dioxide directly from the atmosphere
DE&I	Diversity, Equality and Inclusion
EAF	Electric arc furnace – a furnace that heats material by means of an electric arc between two electrodes
EAP	Employee Assistance Program
EBITDA	Earnings Before Interest, Tax, Depreciation and Amortisation
EIS	Employee Incentive Scheme
ESF	Electric Smelting Furnace – Used to convert Direct Reduced Iron (DRI) to iron suitable for a Basic Oxygen Steelmaking (BOS) process.
ESG	Environment, Social and Governance considerations
EU	European Union
ETS	Emissions Trading Scheme
FEED	Front-End Engineering Design
FID	Final Investment Decision
Fines	Small particles, which are usually very difficult to handle in mineral processing and are often discarded as waste
FY	Financial Year
GHG	Greenhouse gas, often measured in tonnes of CO ₂ equivalent (tCO ₂ e)
Green Hydrogen	Hydrogen that is produced from an electrolyser using renewable energy
Goethite	A mineral that is an ore of iron
НВІ	Hot Briquetted Iron – "bricks" of relatively high purity iron ready for steel-making
H ₂ -DRI	The process of directly reducing iron ore to metallic iron with hydrogen as the reductant

Term	Meaning
Hematite	A mineral that is an ore of iron
HILT CRC	Heavy Industry Low-carbon Transition Cooperative Research Centre
Hydrometallurgy	A metal recovery method used to obtain metals from ores and waste materials
HyGATE	German-Australian Hydrogen Innovation and Technology Incubator
IBCs	Intermediate Bulk Containers
IFRS	International Financial Reporting Standards
Iron (Fe)	The chemical element, represented by "Fe" on the periodic table
Iron Ore	Iron oxide mixed with various other minerals, as mined and "pre-processed" (purified) as best as possible
JV	Joint venture
LCA	Lifecycle Assessment or Lifecycle Analysis, is a methodology for assessing environmental impacts associated with all the stages of a product or process
Leilac	Calix's core calciner technology for Low Emissions Intensity Lime and Cement production with CO ₂ capture of process emissions
LFP	Lithium Iron Phosphate – a battery cathode material
Lithium (Li)	Chemical element with the symbol Li
Lithium-phosphate / Lithium Salt / "Mid-Stream" Lithium	A form of lithium that is high in lithium content, to be shipped and utilised by battery producers
Lithium ion	The ionic form of lithium (Li+) – a positively charged atom of lithium
Manganese Carbonate (MnCO3)	Form of manganese used mainly in agriculture as a fertiliser supplement
Magnesium (Mg)	Chemical element with the symbol Mg
Manganese (Mn)	Chemical element with the symbol Mn
Magnetite	A mineral that is an ore of iron
Metallurgical Coal	Very high carbon coal
MgO	Magnesium Oxide

Term	Meaning	
MHL	Magnesium Hydroxide Liquid	
MOU	Memorandum of Understanding	
Nanoporous	A material with a regular, porous structure, with a pore size generally less than 100 nanometres.	
Pelletisation	The formation of pellets from finer materials to aid in handling	
PLS	Pilbara Minerals, an Australian lithium mining company	
Potassium (K)	Chemical element with the symbol K	
Process emissions	Process emissions are inherent to the chemical reaction and are released directly and unavoidably from the chemical processing of raw material.	
SDGs	The UN's Sustainable Development Goals designed to serve as a "shared blueprint for peace and prosperity for people and the planet, now and into the future."	
Siderite	A mineral that is an ore of iron	
Spodumene	A high lithium-containing ore, and the source of the majority of the world's lithium supply	
α-Spodumene	A tight Li-crystal formation, from which extraction of Li is difficult	
β-Spodumene	A loose Li-crystal formation, from which extraction of Li is much easier than the alpha-form	
Reduce / Reduction	The process by which oxygen is removed	
Reductant	A material that, through its chemical properties, carries out reduction	
RDF	Refuse-derived fuel – a fuel produced from various types of waste	
Sponge Iron	Iron Ore that has been reduced (had the oxygen removed) to form metallic iron	
Steel	Mainly iron, with some carbon and other trace metals such as nickel, manganese etc depending upon the grade of steel being made	
ТАМ	Total Addressable Market	
Тра	Tonnes per annum	
TRL	Technology Readiness Level, as measured on the NASA scale	
UJV	Unincorporated Joint Venture	
UNGC	The United Nations Global Compact, the world's largest corporate sustainability initiative	
Wh / kWh	Watt-hours / kilowatt-hours – a measure of energy	
ZEAL	Calix's Zero Emissions ALumina technology	
ZESTY	Calix's Zero Emissions Steel TechnologY	
ZETA	Calix's 'Zero Emissions Technology Made in Australia' CCU project for zero emissions lime and cement in South Australia

This presentation contains summary information about the Company and its subsidiaries ("Calix") and their activities current as at 27 August 2024. The information in this presentation is a general background and does not purport to be complete.

NOT FINANCIAL PRODUCT ADVICE

This presentation is for information purposes only and is not a prospectus, product disclosure statement or other offer document under Australian law or the law of any other jurisdiction. This presentation is not financial product or investment advice, a recommendation to acquire Calix securities or accounting, legal or tax advice. It has been prepared without taking into account the objectives, financial or tax situation or needs of individuals. Before making an investment decision, prospective investors should consider the appropriateness of the information having regard to their own objectives, financial and tax situation and needs and seek legal and taxation advice appropriate to their jurisdiction. Calix is not licensed to provide financial product advice in respect of Calix securities. Cooling off rights do not apply to the acquisition of Calix securities.

FINANCIAL DATA

All dollar values are in Australian dollars (\$ or A\$) and financial data is presented as at or for the full financial year ended 30 June 2021, unless stated otherwise.

PAST PERFORMANCE

Past performance information given in this presentation is given for illustrative purposes only and should not be relied upon as (and is not) an indication of the Company's views on its future financial performance or condition. Investors should note that past performance, including past share price performance, of Calix cannot be relied upon as an indicator of (and provides no guidance as to) future Calix performance including future share price performance.

FUTURE PERFORMANCE

This presentation contains certain "forward-looking statements". The words "expect", "future", "anticipate", "estimate", "intend", "believe", "guidance", "should", "could", "may", "will", "predict", "plan" and other similar expressions are intended to identify forward-looking statements. Indications of, and guidance on, future earnings and financial position and performance are also forward-looking statements. Forward-looking statements, opinions and estimates provided in this presentation are based on assumptions and contingencies which are subject to change without notice, as are statements about market and industry trends, which are based on interpretations of current market conditions. Forward-looking statements, including projections, guidance on future earnings and estimates are provided as a general guide only and should not be relied upon as an indication or guarantee of future performance. Such forward-looking statements are by their nature subject to significant uncertainties and contingencies and are based on a number of estimates and assumptions that are subject to change (and in many cases are outside the control of Calix and its directors) which may cause the actual results or performance of Calix to be materially different from any future results or performance expressed or implied by such forward-looking statements. The forward-looking statements should not be relied on as an indication of future value or for any other purpose.. No representation, warranty or assurance (express or implied) is given or made in relation to any forward-looking statement by any person (including the Company). In particular, no representation, warranty or assurance (express or implied) is given that the occurrence of the events expressed or implied in any forward-looking statements in this presentation will actually occur. Actual results, performance or achievement may vary materially from any projections and forward-looking statements and the assumptions on which those statements are based. The forward-looking statements in this presentation speak only as of the date of this presentation. Subject to any continuing obligations under applicable law, the Company disclaims any obligation or undertaking to provide any updates or revisions to any forward-looking statements in this presentation to reflect any change in expectations in relation to any forwardlooking statements or any change in events, conditions or circumstances on which any such statement is based. Nothing in this presentation will under any circumstances create an implication that there has been no change in the affairs of Calix since the date of this presentation.

INVESTMENT RISK

An investment in Calix securities is subject to investment and other known and unknown risks, some of which are beyond the control of Calix, including possible delays in repayment and loss of income and principal invested. Calix does not guarantee any particular rate of return or the performance of Calix, nor does it guarantee the repayment of capital from Calix or any particular tax treatment. Persons should have regard to the risks outlined in this presentation and appendices.

NOT AN OFFER

This presentation is not and should not be considered an offer or an invitation to acquire Calix securities or any other financial products and does not and will not form any part of any contract for the acquisition of Calix securities.

This presentation does not constitute an offer to sell, or the solicitation of an offer to buy, any securities in the United States or to, or for the account or benefit of, any 'U.S. person' (as defined in Regulation S under the U.S. Securities Act ("U.S. Person")). The new shares to be offered and sold in the placement ("Offer") have not been, and none of them will be, registered under the U.S. Securities Act or the securities laws of any state or other jurisdiction of the United States. In addition, Calix has not been, and will not be, registered under the U.S. Investment Company Act of 1940, as amended (the "U.S. Investment Company Act") in reliance on the exception from the definition of "investment company" provided by Section 3(c)(7) thereof. The New Shares to be offered and sold in the Offer may not be offered and sold to, directly or indirectly, any person in the United States or any person that is, or is acting for the account or benefit of, a U.S. Person except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable U.S. state securities laws and pursuant to an exception from the registration requirements of the U.S. Investment Company Act provided by Section 3(c)(7) thereof. This presentation may not be distributed or released in the United States or to any U.S Person. The distribution of this presentation in other jurisdictions outside Australia may also be restricted by law and any such restrictions should be observed. Any failure to comply with such restrictions may constitute a violation of applicable securities laws. Offers in Australia of the shares are only being made to persons who are "sophisticated investors" or "professional investors" (within the meaning of section 708(8) and section 708(11) of the Australian Corporations Act (Act) respectively) or otherwise pursuant to one or more exemptions under Section 708 of the Act so that it is lawful to offer the shares in Australia without disclosure to investors under Part 6D.2 of the Act.

NO ADVICE

None of Calix's respective advisers or any of their respective affiliates, related bodies corporate, directors, officers, partners, employees and agents, have authorised, permitted or caused the issue, submission, dispatch or provision of this presentation and none of them makes or purports to make any statement in this presentation and there is no statement in this presentation which is based on any statement by any of them. For the avoidance of doubt, the advisers and their respective affiliates, related bodies corporate, directors, officers, partners, employees and agents have not made or purported to make any statement in this presentation and there is no statement in this presentation which is based on any statement by any of them. To the maximum extent permitted by law, Calix and its advisers and their respective affiliates, related bodies corporate, directors, officers, partners, employees and agents exclude and disclaim all liability, for any expenses, losses, damages or costs incurred by you as a result of your participation in the Offer and the information in this presentation being inaccurate or incomplete in any way for any reason, whether by negligence or otherwise. To the maximum extent permitted by law, Calix and its advisers and their respective affiliates, related bodies corporate, directors, officers, partners, employees and agents make no representation or warranty, express or implied, as to the currency, accuracy, reliability or completeness of information in this presentation and Calix's advisers and its affiliates, related bodies corporate, directors, officers, partners, employees and agents, take no responsibility for any part of this presentation or the Offer. Calix and Calix's advisers and their affiliates, related bodies corporate, directors, officers, partners, employees and agents make no recommendations as to whether you or your related parties should participate in the Offer nor do they make any representations or warranties to you concerning the Offer, and you represent, warrant and agree that you have not relied on any statements made by any of them in relation to the Offer and you further expressly disclaim that you are in a fiduciary relationship with any of them. Statements made in this presentation are made only as the date of this presentation. The information in this presentation remains subject to change without notice. Calix reserves the right to withdraw the Offer or vary the timetable for the Offer without notice.
