Phoslock Secures Exclusive Distributor Agreement with The Orion Companies for the US Market

Phoslock Environmental Technologies Ltd (ASX: PET) is pleased to announce that it has entered into an exclusive distributor agreement with The Orion Companies (“Orion”) for the distribution of Phoslock products in the United States.

The agreement, effective immediately, grants Orion the exclusive rights to market, sell, and distribute Phoslock’s innovative range of water treatment products across the entire United States. This strategic partnership is expected to significantly expand Phoslock’s presence in one of the world’s largest and most dynamic markets for environmental technologies.

The Orion Companies, with their extensive network and proven track record in the environmental sector, are well-positioned to drive the growth and adoption of Phoslock’s solutions. Their commitment to sustainability and expertise in water management align perfectly with Phoslock’s mission to provide effective and environmentally friendly solutions for water quality improvement.

Phoslock products, renowned for their efficacy in reducing phosphorus pollution and improving water quality, have been successfully deployed in numerous projects worldwide. This exclusive arrangement with Orion is anticipated to open new opportunities and deliver substantial benefits to both parties.

Phoslock’s CEO stated, “We are thrilled to partner with Orion as our exclusive distributor in the US. Their understanding of the local market and dedication to environmental sustainability make them an ideal partner for us. This agreement marks an important milestone in our strategy to expand our global footprint and bring our pioneering water treatment solutions to the US market.”

Matt Nespeca, the Director of Business Development for Orion added, “We are excited to collaborate with Phoslock Environmental Technologies to introduce and steward their innovative products in the US market. Phosphorus pollution and resulting harmful algal blooms in water bodies is a massive global problem, and Orion is proud to bring cutting-edge solutions that address critical water quality issues in the US.”

Phoslock Environmental Technologies Ltd will continue to focus on delivering high-quality products and services to meet the growing demand for sustainable water management solutions. Further updates regarding this partnership and other strategic initiatives will be provided in due course.

This announcement has been approved by the Chairman

Mr Fred Bart
Chairman

About PET:

Phoslock Environmental Technologies Limited (ASX: PET) specialises in water treatment products to remediate polluted lakes, rivers, canals and drinking water reservoirs. PET is headquartered in Sydney and has an office, factory and warehouse in Changxing, China. The Company is represented by licensees, distributors and agents in numerous other countries including HydroScience in Brazil.

PET's main manufactured product is Phoslock®, a lanthanum modified bentonite (LMB) that permanently binds excess phosphorus in the water column and sediments, and thus improves water quality and biodiversity. Phoslock does not harm living organisms and is certified for use in drinking water in North America, Europe, Brazil, Australia, and China.
