

ASX / MEDIA ANNOUNCEMENT

December 2024 Quarterly Report & Appendix 5B

24 January 2025

HIGHLIGHTS

- **R&D tax refund of \$1.9 million received**
- **Merger with Vintage Energy Ltd (Vintage) terminated, alternative options under review**
- **Analysis of the updated Glenaras integrated subsurface model continues**
- **Single well remains online at Glenaras, with reduced expenditure consistent with prior Quarters**
- **Cash balance of \$4.38 million following the completion of recent capital raise and receipt from ATO of R&D Refund**

Proposed Merger with Vintage Energy

Galilee and Vintage advised during the Quarter that they had mutually agreed to terminate the previously announced scheme implementation deed (SID). The termination of the SID followed extensive discussions between the parties whereby, unfortunately, the Scheme as originally proposed was no longer believed to be in the best interests of Galilee and Vintage shareholders and the parties were unable to agree revised terms acceptable to both parties.

Glenaras Gas Project (ATP 2019) – Galilee 100%

The Glenaras Gas Project (“Project”) (Figure 2) is located in ATP 2019, which is 100% owned and operated by Galilee. The Permit covers an area of approximately 3,200km².

At present, the Pilot has a single well online, consistent with prior Quarters, with a rotation strategy in place to collect further subsurface data to assist in determining the extent of any preferential, directional reservoir characteristics.

The integrated subsurface model has been updated with the extensive suite of contemporary pressure data and the previously acquired and interpreted Glenaras Pad 3D Seismic Survey, which has provided substantially increased resolution of the structural and stratigraphic architecture of the Betts Creek Beds.

With the new data and confirmation that the coals are only now approaching the critical desorption pressure required for material gas rates to result, this revised modelling exercise is crucial in progressing the Pilot into the final

stages of achieving commercial gas rates and maturing the material Contingent Resource certified in ATP 2019. Work to utilise the outputs of the model in the design of future well configurations is ongoing.

Springsure Project (ATP 2050) – Galilee 100%

Technical evaluation of the conventional gas prospectivity of the Wandana Prospect and associated leads in ATP 2050 is ongoing. Integration of the petrophysical, geophysical and geological data is continuing with strong indications that the Wandana Prospect potentially has gas pools in multiple, stacked reservoirs throughout the Permian section in a structure that is drill-ready.

Corporate

During the period the Company's application to the ATO for an R&D Refund for FY23/24 activity was approved and an R&D tax offset of \$1.9 million was received. Following the receipt of these funds, as well as the capital raise completed in the September quarter, Galilee's cash balance as at 31 December 2024 was \$4.38 million.

The Company retains a disciplined approach to expenditure at the Glenaras Gas Project. Spend for the quarter remained modest. During the period, the Company spent \$0.34 million on exploration and evaluation activities, primarily Glenaras operations. Following the capital raisings during the period the Company's cash position remains strong cash as at 31 December 2024 of \$4.38 million, with no debt. The Appendix 5B includes an amount in item 6.1 which constitutes director's fees paid in the December Quarter.

The cashflow for the Quarter is presented in the accompanying Appendix 5B (Quarterly Cashflow Report).

During the Quarter, Galilee announced the resignation of its Chief Financial Officer, Milton Cooper.

About Galilee

Galilee Energy is advancing towards becoming an integrated and diversified sustainable energy company and a material supplier of natural gas to the east coast market of Australia. The company is the 100% owner of one of the largest uncontracted natural gas resources on the east coast of Australia, located within the Glenaras Gas Project in Queensland's Galilee Basin. The Glenaras project's location and environmental credentials, including the production of fresh water from its coals for beneficial use in crop production along with low CO₂ levels, positions Galilee to be a material supplier of sustainable energy.
