## INFOMEDIA TO ACQUIRE 50% OF INTELLEGAM – AN ENTREPRENEURIAL AUTOMOTIVE AI STARTUP IN EUROPE

**14 February 2025 – Sydney, Australia** Infomedia Ltd (ASX:IFM) (**Infomedia**) is pleased to announce that it has entered into a binding agreement to acquire 50% of European AI startup, Intellegam GmbH (Intellegam), for a purchase price of €6.1 million. This is a strategic move that will accelerate our innovation agenda and unlock product-led growth across our global data ecosystem. This partnership combines Infomedia’s deep automotive expertise and trusted global OEM relationships with Intellegam’s cutting-edge generative AI technology, creating a powerhouse for innovation.

Together, we will redefine solutions for OEMs, dealerships, and vehicle owners – **making insights smarter, operations faster, and customer experiences more meaningful.**

### Transaction Summary

The purchase price of €6.1 million is split between cash paid over two years and approximately 2.85 million Infomedia shares to be issued at closing escrowed for 2 years. €1.2 million of the consideration will be invested directly into Intellegam to provide the business with working capital.

The agreement provides Infomedia with the pathway to acquire the remaining 50% of Intellegam over five years, subject to the achievement of defined financial and strategic hurdles.

The future valuations of Intellegam are linked to both revenues and profitability and are capped at appropriate levels that ensure the dual objectives of providing incentives for the selling shareholders of Intellegam and financial certainty to Infomedia.

### Strategic Highlights

- Intellegam is an early-stage European AI startup, primarily servicing the retail automotive sector
- Intellegam has developed –
  - a proprietary B2B generative AI technology already used by two Chinese OEM brands in Europe. This product leverages Intellegam’s innovative AI capability to enhance repair data interpretation and customer experience
  - a unique and scalable IP across the entire AI value chain including data capture, data structuring, search, agent orchestration framework, customized LLM and UI/UX integration
- Intellegam’s technologies will be integrated into Infomedia’s core product suite and together with Infomedia’s rich data assets, will enable Infomedia to offer additional AI features and functionality to cross- and upsell to its existing customer base
- Intellegam’s management team is highly incentivised to develop and grow the combined business over the coming 5 years
- Not expected to have a material impact on FY25 P&L

- **Gen AI (Generative AI)**  
Generative AI is a subset of AI that focuses on generating new content, including text, images, audio, and even code. It uses deep learning models, such as transformers, to create human-like outputs based on training data. Examples include OpenAI's GPT models and image generators like DALL·E.
- **LLM (Large Language Model)**  
A Large Language Model is an AI model trained on vast amounts of text data to understand and generate human-like text. LLMs, like GPT-4, use deep learning techniques such as transformers to process language, answer questions, and assist in various text-based tasks.
- **UI (User Interface)**  
The User Interface refers to the visual and interactive elements of software, applications, or websites that allow users to interact with a system. UI design focuses on layout, colors, typography, buttons, and other elements that ensure usability and aesthetics.
- **UX (User Experience)**

### Proposed issue of securities

*Information and documents given to ASX become ASX's property and may be made public.*

*If you are an entity incorporated outside Australia and you are proposing to issue a new class of securities that will not have CDIs issued over them, you will need to obtain and provide an International Securities Identification Number (ISIN) for that class. For offers where the securities proposed to be issued are in an existing class of security, and the event timetable includes rights (or entitlement for non-renounceable issues), and deferred settlement trading or a representation of such, ASX requires the issuer to advise ASX of the ISIN code for the rights (or entitlement), and deferred settlement trading. This code will be different to the existing class. If the securities do not rank equally with the existing class, the same ISIN code will be used for that security to continue to be quoted while it does not rank.*

*Further information on the requirement for the notification of an ISIN is available from the Create Online Forms page. ASX is unable to create the new ISIN for non-Australian issuers.*

*\*Denotes minimum information required for first lodgement of this form, with exceptions provided in specific notes for certain questions. The balance of the information, where applicable, must be provided as soon as reasonably practicable by the entity.*
