Operating results

Revenue for the year totalled \$757,000, representing a 77.7% decrease compared to \$3,392,000 recorded in the prior corresponding year. During the year, the majority of sales were generated in the United States, with moderate contributions from Europe, ANZ, and China.

The Group reported a gross profit of \$51,000 for the full year ended 31 December 2024 compared to a gross profit of \$1,742,000 for the prior year. The gross profit margin declined from 51% in the prior year, primarily due to reduced sales prices offered to distribution partners and higher freight and labour costs incurred during the period.

Underlying EBIT for the year was a loss of \$3,408,000 compared to a loss of \$8,219,000 in the prior corresponding period. During the year, the business continued to actively address costs by reducing administrative and corporate expenses, leveraging efficiencies gained from right-sizing the organisation.

NPAT for the Group for the current year amounted to a loss of \$2,739,000 compared to loss of \$2,056,000 in the prior year.

Cash flows

Operating cash flow for the full year was a cash outflow of \$2,851,000 (full year to 31 December 2023 outflow of \$2,624,000).

Cash payments from customers for the year were \$2,079,000 (full year to 31 December 2023: \$8,502,000). Cash payments to suppliers and employees for the full year were \$5,019,000 (full year to 31 December 2023: \$11,419,000). The decrease in cash outflows was primarily driven by significantly lower employee-related payments and a substantial reduction in legal and consulting expenses related to investigations. Although investigative activities concerning historical incidents of fraud and mismanagement declined significantly, this was partially offset by considerable legal and other fees incurred in relation to potential class actions.

New plant, equipment, and intangibles acquisitions for the current year totalled \$49,000. This expenditure primarily related to the Company's Chinese manufacturing facilities, research and development activities, and patent application costs.

Financial position

The Group had a net current asset position of \$9,617,000 as at 31 December 2024 (2023: \$12,274,000). At balance date, the Group had no external loan facilities.

The full year financial statements have been prepared on a going concern basis of accounting, which assumes the continuity of normal business activities and the realisation of assets and the settlement of liabilities in the ordinary course of business. The Board is committed to making the Group profitable and cash positive and will continue to revise its strategy to best meet its objectives. The Board believes that any contingent liabilities that may arise from the AFP investigation into the actions of former officers or potential class actions should not impact the current going concern assessment.

Note 1. Operating segments

Identification of reportable operating segments

The Group is organised into four operating segments based on geographical areas: Australia/NZ, Europe/UK, US/Canada/Brazil and China. These operating segments are based on the internal reports that are reviewed and used by the Board of Directors (who are identified as the Chief Operating Decision Maker ('CODM')) in assessing performance and in determining the allocation of resources. There is no aggregation of operating segments.

The CODM reviews Underlying EBIT (earnings before interest and tax adjusted for non-cash items). The accounting policies adopted for internal reporting to the CODM are consistent with those adopted in the financial statements.

The information reported to the CODM is on a monthly basis.

Intersegment transactions

Intersegment sales were made at an internally determined transfer price. The price is based on what would be realised in the event the sale was made to an external party at arm's-length. Intersegment sales are eliminated on consolidation.

Corporate charges are allocated to reporting segments based on the segment's overall proportion of revenue generation within the Group. The Board believes this is representative of likely consumption of head office expenditure that should be used in assessing segment performance and cost recoveries.

Intersegment receivables, payables and loans

Intersegment loans are initially recognised at the consideration received. Intersegment loans receivable and loans payable that earn or incur non-market interest are not adjusted to fair value based on market interest rates. Intersegment loans are eliminated on consolidation.

Major customers

During the year ended 31 December 2024, approximately 50% of the Group's external revenue was derived from sales to 3 customers (31 December 2023: approximately 61% of the Group's external revenue was derived from sales to one customer).
