Lincoln's Kookaburra Graphite Project named in 2025 Australian Critical Minerals Prospectus

Highlights:

- **Lincoln's Kookaburra Graphite Project (KGP) included in the 2025 edition of the updated Australian Critical Minerals Prospectus**
- **Reconfirms Kookaburra Project's status as a leading critical minerals project, supporting global electrification and supply chain security.**
- **KGP is one of only ~50 featured in the publication which showcases investment-ready, critical minerals projects from across Australia.**

Lincoln Minerals Limited (LML or Company') (ASX:LML) is pleased to advise its Kookaburra Graphite Project (KGP), located on South Australia's Eyre Peninsula, features in the updated Australian Critical Minerals Prospectus for 2025, published by Austrade.

The Prospectus highlights Australia's most advanced and strategically significant critical minerals projects, helping international investors and partners identify high-potential opportunities in key supply chains.

KGP's inclusion, for the third time, recognises its favourable development status including its existing mining lease, compelling Pre-Feasibility Study results, and strategic positioning near infrastructure. Lincoln's project supports critical global trends such as decarbonisation and the transition to electric vehicles, with high-grade graphite suitable for Battery Anode Material production.

Lincoln Minerals CEO Jonathon Trewartha commented: *"We're pleased to see the Kookaburra Graphite Project once again included in this important national publication. As international markets seek high-quality, low-risk graphite sources, Kookaburra stands out as a development-ready project with strong potential to supply battery and industrial markets."*

Lincoln continues to explore strategic pathways to advance KGP, including offtake partnerships, funding solutions, and value-added graphite processing.

About Lincoln Minerals

Lincoln Minerals (ASX: LML) is an Australian exploration and development company focused on advancing critical minerals projects in South Australia's world-class Gawler Craton region. Lincoln's portfolio includes high-value copper, uranium, graphite, and magnetite assets, all strategically positioned to support the global shift towards electrification, decarbonisation, and supply chain security.

The company's key projects include the Minbrie Copper & Base Metals Project, where recent exploration has confirmed a large-scale mineralised system over a 7km strike. Lincoln is also advancing the Kookaburra Graphite Project, a high-grade, at-surface deposit on an existing mining lease, and the Green Iron Magnetite Project, a large-scale magnetite resource positioned to supply SA's emerging green steel industry. The company also holds multiple highly prospective uranium targets across its existing tenement portfolio, located in a highly prospective uranium region.

Lincoln is actively progressing exploration and development across its portfolio while seeking strategic partnerships and alternative funding pathways to accelerate project advancement.
