## Licence agreement with Novus

As advised in the ASX announcement dated 24 March 2025, Galilee entered into a technology license agreement with Novus Energy Trading Company Pty Ltd (**Novus**) to explore solutions for key reservoir challenges at its Glenaras Gas Project in Queensland's Galilee Basin.

Novus is a Queensland-based oil and gas company specialising in subsurface engineering, permeability modification, and lateral well developments. Novus has also been developing its interest in Australia's oil and gas permits. With a strong track record of optimizing reservoir performance, Novus brings cutting-edge expertise to assist Galilee in refining its approach at Glenaras and beyond.

Galilee is committed to applying the latest technology to address challenges such as water influx and complex reservoir dynamics, ensuring the best path to commercialising its assets, commencing with Glenaras.

The first of four instalment payments for the licence fee was made in March 2025 (\$300,000 plus GST) and secondment of Novus staff to Galilee to enable the technology will commence in the next quarter. Under the licence agreement, Galilee will be entitled to all data derived from the assessment, although will not acquire any interest in Novus' proprietary technologies. The findings generated from this engagement will inform potential applications across Galilee's broader portfolio, including the Denison Trough.

## Glenaras Gas Project (ATP 2019) – Galilee 100%

The Glenaras Gas Project ("Project") (Figure 2) is located in ATP 2019, which is 100% owned and operated by Galilee.

The Permit covers an area of approximately  $3,200 \text{km}^2$ .

The production well rotation strategy has continued over the quarter with the objective of collecting further subsurface data to assist in determining the extent of any preferential, directional reservoir characteristics.

At the time of this release all wells were offline.

The integrated subsurface model is being reviewed by the experienced Novus team with the aim of providing alternate solutions to achieving commercial production from the pilot and maturing the material Contingent Resource certified in ATP 2019.

# Springsure Project (ATP 2050), Denison Trough – Galilee 100%

The Novus team are conducting a comprehensive technical review of the permit, assessing both conventional and coal seam gas opportunities to inform future exploration strategies.
