

QUARTERLY REPORT

For the period ended 31 March 2025

30 April 2025

Main features

- Sales revenue of \$1.2 million
- Production of 0.11 PJe
- Scale management successful downhole and at meter
- Further improvement in cost and cash outflow
- Closing cash of \$2.03 million

Managing Director's comment

"During the quarter we largely moderated natural decline in flow rates at Odin-1 and Vali-1, restored accurate metering and finalised a program to address a number of production uplift avenues across both fields. The potential benefits of the program on production, sales and cash generation will build on the improvement in cash flow; the March quarter was our third successive improvement in cash used in operating activities. Further savings are forecast from the first quarter of FY26 from our recent restructuring.

While recent flooding will affect commencement of the production uplift program, we are looking forward to pursuing the opportunities we have identified and other value-creating initiatives underway.

The renewal of ATP 2021 by the Queensland Government for another 6-year term ending June 2030 is welcome news. The permit is within a prominent oil and gas producing area of the Cooper/Eromanga Basins and the renewal is a reminder of the excellent oil and gas prospectivity within the permit."

Key figures	3 months to 31 Mar '25	Prior Qtr Dec'24	Qtr on qtr change	FY25 to date	FY24 to date	YTD change
Sales revenue \$'000	1,236.4	1,506.4	-18%	3,476.6	4,064.4	-14%
Sales gas ¹ PJ	0.10	0.12	-17%	0.28	0.37	-24%
Production PJ ^{e2}	0.11	0.12	-8%	0.29	0.38	-24%
Cash \$ million	2.03	2.19	-7%	2.03	3.0	-32%

Totals may not equal summation of sub-totals due to rounding.

Zero lost time injuries were recorded during the period.

This release has been authorised on behalf of the Vintage Energy board by Mr. Neil Gibbins, Managing Director.

Important information, dates, terms and abbreviations:

Forward looking statements: information on forward looking statements contained in this report provided on the final page of this report.

Dates: unless specified otherwise the term "the quarter" relates to the 3 months ended 31 March 2025 and dates quoted refer to that date in the current calendar year eg "January" refers to January 2025.

Terms and abbreviations: this report may use terminology or abbreviations used in the oil and gas industry. A glossary of such terms is provided for reference at the back of this report.

¹ Sales gas volume and revenue is inclusive of ethane

² Petajoule equivalent: comprises sales gas and gas liquids.

Sales

	3 months to 31 Mar '25	Prior Qtr Dec'24	Qtr on qtr change	FY25 to date	FY24 to date	YTD change
Sales revenue \$'000	1,236.4	1,506.4	-18%	3,476.6	4,064.4	-14%
Sales volume						
Sales gas TJ	102.7	117.3	-12%	280.7	368.9	-24%
LPG tonne	-	9.8	-100%	35.6	46.5	-23%
Condensate bbls	246	376	-35%	849	568	49%

Sales revenue of \$1.24 million was recorded for the quarter, 18% lower than the prior quarter revenue of \$1.51 million.

The reduction in revenue compared with the prior quarter is attributable to lower gas production, and the absence of LPG liftings. Discussion of factors contributing to the quarter's production is provided following.

As previously advised, sales revenue reported in respect of supply from the Vali gas field comprises sales attracting cash payment and sales for which cash payment has been prepaid. From 1 July 2023, production and sales figures include gas produced under contractual agreement towards consideration for processing and transportation. The financial value of this gas is accounted as non-cash generating sales revenue.

Finance

Cash and net debt

Cash and cash equivalents as at 31 March 2025 was \$2.03 million compared with \$2.19 million at the beginning of the quarter. Net cash outflow from operating activities of \$0.56 million compares to the corresponding outflow of \$0.87 million in the prior quarter.

The \$0.30 million, 35%, improvement in quarterly outflow from the December quarter is largely accounted for by a \$0.21 million reduction in production costs, a \$0.17 million (50%) reduction in administration and corporate costs offset by a \$0.08 million increase in staff costs. The latter item includes staff costs not ongoing from June 30 pursuant to the restructuring announced December 2024 which will result in a 41% fall in headcount. Reduced staff costs as a result of the restructuring are expected to become apparent in the first quarter of FY26.

Cash receipts from customers of \$1.14 million were 4% higher than the previous quarter receipts of \$1.10 million.

Cash flows for the quarter included \$0.60 million from equity issuance, as discussed under the heading 'Capital Raising' following.

Borrowings net of cash at 31 March were \$7.97 million compared with \$7.81 million at the beginning of the period.

Production

Production data	3 months to 31 Mar '25	Prior Qtr Dec'24	Qtr on qtr change	FY25 to date	FY24 to date	YTD change
Total production PJe	0.11	0.12	-%	0.29	0.38	-24%
Sales gas TJ	102.5	115.6	-11%	279.0	367.7	-24%
LPG tonne	23.6	24.0	-2%	56.1	42.9	31%
Condensate bbls	257.6	266.0	-3%	627.5	1045.3	-40%

Vintage share of production for the March quarter was 0.11 PJe, compared with 0.12 PJe produced in the preceding quarter. The movement in quarterly production is principally attributable to lower output from Odin-2, which came online in the preceding quarter.

Further discussion of the performance of the Vali and Odin gas fields is provided under the heading 'Operations' following.

Corporate

Capital raising

The company conducted a capital raising to fund the Production Uplift Program announced 31 January 2025. The capital raising comprised an Entitlement Offer, and a Shortfall Offer to investors for shares not taken up in the Entitlement Offer. The Entitlement Offer comprised a 1-for-4 share offer priced at 0.5 cents. Each New Share issued pursuant to the capital raising will have a free-carried Option attached. The Options have an expiry date of 7 March 2027 and exercise price of 0.9 cents. The Entitlement Offer closed on 28 February after raising \$0.45 million. The Shortfall Offer will remain open until 28 May 2025.

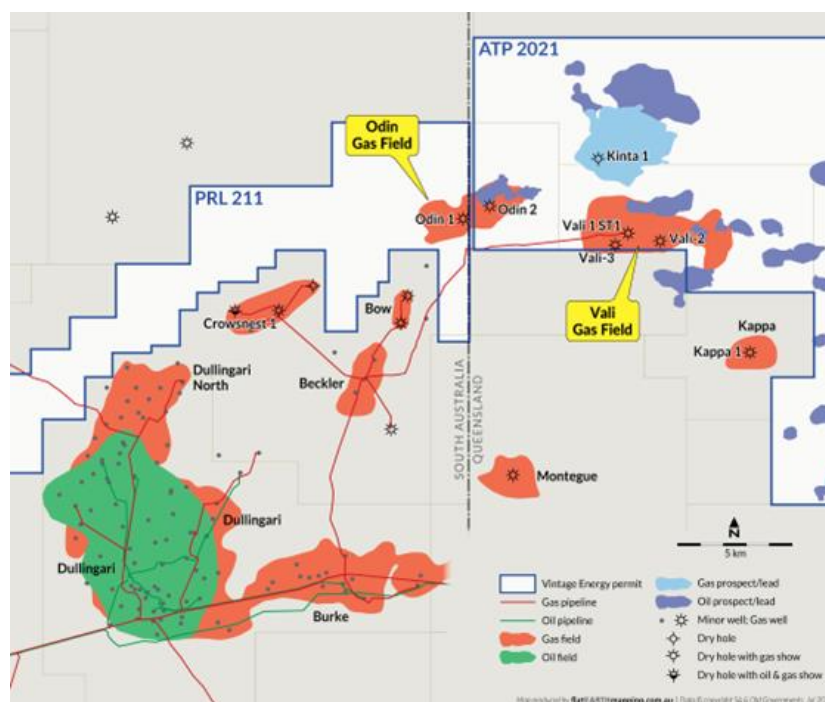

The Shortfall Offer entails 327,991,779 new fully paid ordinary shares in Vintage Energy, with a free-carried option, free of brokerage, at the same pricing as the Entitlement Offer. At 28 April the company had issued, or received commitments for a total of 229,691,955 New Shares under the Entitlement and Shortfall Offers, representing gross proceeds of approximately \$1.15 million. This includes the commitment by the PURE Resources Fund, announced 30 April.

Operations

Southern Flank gas fields

Cooper/Eromanga Basins, Queensland and South Australia

Odin and Vali gas fields, PRL 211 and ATP 2021 Cooper Basin

Odin gas field

PRL 211 & ATP 2021

Vintage 50% and operator, Metgasco Ltd 25%, Bridgeport (Cooper Basin) Pty Ltd 25%

Asset overview

The Odin gas field straddles the South Australian – Queensland border, falling within PRL 211 in South Australia and ATP 2021 in Queensland. Vintage is the Operator of both licences, conducting operations through two joint ventures of identical composition.

Odin is located in close proximity to the South Australian Cooper Basin Joint Venture’s gas production infrastructure at Beckler, Bow and Dullingari. The field was discovered by the PRL 211 joint venture in 2021 and commenced appraisal production from Odin-1 in September 2023. Odin-1 has been completed to produce from the Epsilon and Toolachee formations, supplying gas to Pelican Point Power (a wholly-owned subsidiary of ENGIE Australia) under contract to December 2026.

A second well, Odin-2, successfully appraised the north-eastern section of the field in ATP 2021 in June 2024 and was subsequently completed and connected.

Gas Reserves at Odin have been independently assessed and were most recently reported in the company’s 2024 Annual Report as comprising 46.2 PJ of Proved and Probable Reserves of gas and gas liquids (Vintage share 23.1 PJ) in the Toolachee, Epsilon, Patchawarra and Tirrawarra formations of the field. Sales gas (including ethane) is assessed to comprise 44.8 PJ (Vintage share 22.4 PJ) of this total.

Activity

The principal points of focus at Odin during the quarter were the implementation of de-bottlenecking initiatives and the management of scale accumulation previously reported.

Chemical injection commenced in February to manage scale accumulation interference to accurate metering previously reported. The chemical injection and cleaning are considered to have restored accurate metering.

Average metered daily raw gas production from the Odin gas field during the quarter was 2.73 MMscf/d compared with 3.1 MMscf/day in the previous quarter. Higher production rates were recorded following the debottlenecking conducted mid-March, with the average production rate for the week following debottlenecking being 0.4 MMscf/day higher than the week preceding.

The Odin gas field was online for 83 days during the quarter compared with 80 days during the December quarter.

A program of work to address opportunities to lift production at Odin and the adjacent Vali gas field was prepared for implementation in the June quarter. Commencement of the program will be delayed interruption to road access following heavy rainfall and flooding.

Engagement with the downstream operator on alignment of gas volumes pursuant to anomalies arising from the interference to accurate metering (now rectified) advanced and are ongoing.

Vali gas field

ATP 2021

Vintage 50% and operator, Metgasco Ltd 25% and Bridgeport (Cooper Basin) Pty Ltd 25%

Asset overview

The Vali gas field is located in Queensland, adjacent to the Queensland-South Australia border.

Vali was discovered by Vali-1 ST1 in January 2020 and successfully appraised by Vali-2 and Vali-3. Reserves at Vali have been independently certified and most recently reported in the 2024 Annual Report as comprising gross Proved and Probable reserves equivalent to 100.0 PJ (Vintage share 50.0 PJ)³ of gas and gas liquids. Sales gas and ethane account for 96.8 PJ (Vintage share: 48.4 PJ) of the 2P reserves.

The field has three wells, completed and connected to the Moomba gas gathering network for supply to the eastern Australian domestic energy market. Vali-1 is the only well currently producing, Vali-2 and Vali-3 having been shut-in pending resolution of fluid-production issues. Vali is currently subject to a long-term production appraisal program with gas produced being supplied to AGL Energy under a supply agreement to December 2026.

Activity

The Vali gas field averaged raw gas production of 0.81 MMscf/day compared with 1.01 MMscf/day in the prior quarter. The field was online for 87 days compared with 92 days in the prior quarter.

Production improvement opportunities at Vali were analysed and incorporated into a Production Uplift Program prepared for implementation in the June quarter 2025. Measures to be implemented at Vali include initiating production from the Toolachee Formation at Vali-1 and Vali-2, investigation for and, if appropriate, remediation of scale accumulation, as was found to be impeding production at Odin and reperforation of intervals at Vali-3.

Permit renewal

ATP 2021 was renewed during the quarter for a 6-year term commencing 1 June 2024. The renewal entails a minimum work program comprising a single oil well and geological and geophysical review and interpretive studies.

³ As reported in the Vintage Energy 2024 Annual Report. Vintage Energy confirms it is not aware of any new information or data that materially affects the information included in the announcement and that all the material assumptions and technical parameters underpinning the estimates in the announcements continue to apply.

Otway Basin, South Australia/Victoria

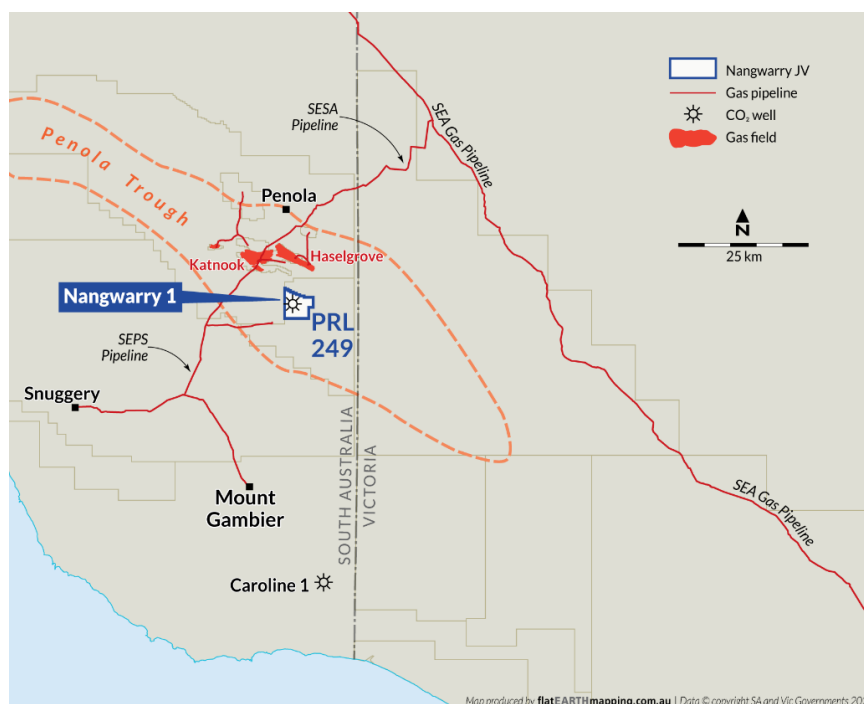

PRL 249 (ex-PEL 155)

Vintage 50%, Otway Energy Pty Ltd 50% and operator

Asset overview

PRL 249 contains the Nangwarry gas field, discovered in January 2020. On testing, Nangwarry-1 produced raw gas (~93% CO₂, ~6% methane and ~1% nitrogen), at flow rates of 10.5-10.8 MMscfd, measured through a 48/64" choke at a flowing wellhead pressure of 1,415 psi over a 36-hour period.

Location of PRL 249 and Nangwarry-1, Otway Basin, South Australia

The Nangwarry resource is assessed to have the volume, quality and reservoir properties for an economic, significant and long-life food-grade CO₂ production asset.

Recoverable CO₂ sales gas and Contingent Resources of gas hydrocarbons at Nangwarry have been independently assessed and announced to the ASX on 12 July 2021. Recoverable CO₂ sales gas was assessed at the Best Estimate level as 25.9 Bcf gross and 12.9 Bcf net to Vintage. 2C Contingent Resources of gas hydrocarbons were assessed to be 1.6 Bcf gross and 0.8 Bcf net to Vintage.

These volumes are considered sufficient to provide a multi-decade feedstock source for production of food or industrial grade CO₂, a required input for a wide range of sectors including hospitality, food and beverage manufacture, protected horticulture, chemical, cold storage, medical device and other manufacturing. Local supply of naturally occurring CO₂ was provided until 2017 by the now depleted onshore Otway Basin well Caroline-1.

Vintage is seeking an outcome which will recognise the economic value of the resource. Realisation of this value will require processing of raw gas to food grade standard and liquefaction for transport to market and storage.

Activity

Vintage's is seeking to realise value for Nangwarry, whether through collaboration in a well-head to product delivery solution, or sale of its equity interest. To this end, the company continued its strategy of engaging with participants along the product value chain and government. Discussions held confirmed interest in Nangwarry amongst industrial users of food grade CO₂ seeking a reliable and competitively priced supply source. Interested parties and Vintage are continuing engagement.

PEP 171

Vintage 25% and operator, Somerton Energy Pty Ltd (a subsidiary of Amplitude Energy Limited 75%)

PEP 171 is located in the onshore Otway Basin and effectively encompasses the entirety of the Victorian section of the Penola Trough. Exploration in the nearby South Australia section has confirmed the prospectivity of the Penola Trough for conventionally produced gas, most significantly at Haselgrove by Beach Energy Ltd.

Location of PEP 171, Otway Basin, Victoria

The expiry of the Victorian moratorium on onshore gas exploration on 1 July 2021, was followed by new regulations on 22 November 2021. All previous existing oil and gas exploration permits of good standing (which includes PEP 171), were restarted from 1 July 2021 for their first 5-year term.

Activity

An operations plan for the Sparger 3D seismic has been submitted to the regulator and Vintage is addressing the final items for approval to be granted. The 3D survey is scheduled for early CY2026.

Galilee Basin, Queensland

ATPs 743, 744, 1015 (“Deeps”) | PCA’s 319 - 324

Vintage 30%, Comet Ridge Ltd (“Comet”) 70% and operator

Asset overview

The Galilee Basin is a lightly explored gas province in proximity to market and the proposed Galilee-Moranbah pipeline. In 2017, Vintage acquired a 30% participation in the Deeps sandstone reservoir sequence of ATP 744, ATP 743 & ATP 1015 (all strata commencing underneath the Permian coals (Betts Creek Beds or Aramac coals) with the main target being the Lake Galilee Sandstone sequence).

Location of ATPs 743, 744, 1015 (“Deeps”) | PCA’s 319 - 324 Galilee Basin, Queensland

The Deeps was tested in 2019 by Albany-1, which recorded the first measurable gas flow from the Galilee Basin, flowing at 230,000 scf/d from the top 10% of the target reservoir without stimulation. Albany-2 was drilled and hydraulically stimulated. Albany-1 was side-tracked but not flow-tested due to the cessation of operations during the Covid pandemic.

Activity

The Operator is continuing to progress the geological & geophysical studies, in conjunction with commercial analysis of the Galilee Deeps project. There was no significant activity during the period.

Bonaparte Basin, Northern Territory

EP 126

Vintage 100%

Asset overview

The Bonaparte Basin is a frontier basin in the north of the Northern Territory with a proven hydrocarbon system. Several large gas fields have been discovered offshore (undeveloped Contingent Resources of 2.7 Tcf in Petrel, Tern and Frigate) and the producing Black Tip field (2P 933 Bcf) supplies gas to Darwin. The onshore Weaber Gas Field (RL-1, Advent Energy 100%), and surface bitumen seeps, provide direct evidence of a working petroleum system in the Keep Inlet Sub-Basin.

EP 126 is a low-cost entry with excellent exploration potential encompassing an area of 6,716 km², hosting multiple play types, with potential for large volumes of gas and oil. Cullen-1 was drilled in 2014, with both oil and gas shows, and was cased and suspended to be available as an option to test.

Location of EP 126, Bonaparte Basin, Northern Territory

Activity

There was no activity of significance in relation to this permit. On-site work is suspended pending resolution of discussions with the Northern Territory government in relation to the declaration of approximately 50% of the permit, including the Cullen-1 well site, as a 'Reserved Area'.

Equity

The company had 1,788,921,865 ordinary shares on issue at the end of the quarter.

Related parties

Payments to related parties, as disclosed at Item 6.1 in the company's cash flow report attached to this report (Appendix 5B) was \$0.11 million being remuneration and superannuation.

Forward looking statements

This document may include forward looking statements. Forward looking statements include, but are not necessarily limited to, statements concerning Vintage's planned operational program and other statements that are not historic facts. When used in this document, the words such as "could", "plan", "estimate", "expect", "intend", "may", "potential", "should" and similar expressions are forward looking statements. Although Vintage believes its expectations reflected in these are reasonable, such statements involve risks and uncertainties, and no assurance can be given that actual results will be consistent with these forward-looking statements. Vintage confirms that it is not aware of any new information or data that materially affects the information included in this announcement and that all material assumptions and technical parameters underpinning this announcement continue to apply and have not materially changed.

Glossary

Terms and abbreviations for resources and reserves as per the SPE-PRMS

PRMS	Petroleum Resources Management System. Reserves and Resources are defined by the Society of Petroleum Engineers ('SPE'), American Association of Petroleum Geologists ('AAPG'), World Petroleum Council ('WPG') and the Society of Petroleum Evaluation Engineers ('SPEE'). The detail of the PRMS is available as a download from the website of the SPE: www.spe.org The petroleum resources classification framework is illustrated below:
Prospective Resources	Those quantities of petroleum estimated, as of a given date, to be potentially recoverable from undiscovered (hypothetical) accumulations by application of future development projects. The categories of decreasing certainty are Low, Best and High Estimates.
Contingent Resources	Those quantities of petroleum are estimated, as of a given date, to be potentially recoverable from known accumulations, but the applied project(s) are not yet currently mature enough for commercial development due to one or more contingencies. The categories of decreasing certainty are Low, Best and High estimates.
1C	Low estimate of Contingent Resources.
2C	Best estimate of Contingent Resources.
3C	High estimate of Contingent Resources.
Reserves	Those quantities of petroleum anticipated to be commercially recoverable by application of development projects to known accumulations from a given date forward under defined conditions. The categories in decreasing certainty are Proved, Probable and Possible.
1P, Proved	Proved reserves (deterministic or probabilistic).
2P, Proved and Probable	Proved plus Probable reserves (deterministic or probabilistic).
3P, Proved, Probable and Possible	Proved plus Probable plus Possible reserves (deterministic or probabilistic).
P10 Probabilistic Estimate	From the probabilistic method there is a less than 10% cumulative probability that quantities estimated would ultimately be exceeded.

General terms and abbreviations of the petroleum industry that may appear in this report

2D	Two dimensional; usually referring to a seismic survey with a coarse grid of orthogonal lines.
3D	Three dimensional; usually referring to a seismic survey with a fine grid of orthogonal lines.
ASX	Australian Securities Exchange.
ATP	Authority to Prospect which is an exploration licence in Queensland.
B	Billion 10 ⁹ , or 1,000 million.
bbl	One barrel of crude oil contains 42 US gallons (or 34.97 imperial gallons, or, 159 litres).
Bcf	Billion cubic feet.
Boe	Barrels of oil equivalent. Natural gas is converted to barrels of oil equivalent generally using a ratio of approximately 6,000 cubic feet of natural gas as an amount equivalent to one barrel of oil.
Bopd	A liquid flow rate expressed in barrels of oil per day.
Condensate	A liquid hydrocarbon phase that is slightly lighter than and with less calorific content than crude oil. More usually occurs in association with natural gas. It is gaseous at reservoir conditions but will condense from gaseous vapour to a liquid at the lesser temperature and pressure at standard surface conditions.
EP	Exploration Permit for petroleum as in the Northern Territory.
GJ	Gigajoule. A joule is a measure of heating value. 1 GJ is equal to 1 x 10 ⁹ joules.
Km	Kilometres.
Km²	A square kilometre.
LPG	Liquified petroleum gas such as butane or propane.
m	Metres

M	1,000
MM	Millions 10 ⁶
Net pay	The thickness of reservoir considered to be gas or oil bearing and capable of contributing to production into the wellbore. Usually there will be several cutoff parameters including a porosity minimum, a shale maximum and a water saturation maximum.
PCA	Potential Commercial Area as used in Queensland
PEL	Petroleum Exploration Licence as used in South Australia.
PJ	Petajoule. A joule is a measure of heating value. 1 PJ is equal to 1 x 10 ¹⁵ joules
PRL	Petroleum Retention Licence as used in South Australia
Resources	The term "Resources" as used herein is intended to encompass all quantities of petroleum (recoverable and unrecoverable) naturally occurring on or within the Earth's crust, discovered and undiscovered, plus those quantities already produced.
scf/d	A flow rate in standard cubic feet per day.
TCF	Trillion cubic feet of gas.
TJ	Terajoule; a joule is a measure of heating value. 1 TJ is equal to 1 x 10 ¹² joules

5.2 Call deposits *	30	30
5.3 Bank overdrafts		
5.4 Other (security deposits) *	108	108
5.5 Cash and cash equivalents at end of quarter (should equal item 4.6 above)	2,030	2,187

*Amount is restricted

6. Payments to related parties of the entity and their associates	Current quarter \$A'000
6.1 Aggregate amount of payments to related parties and their associates included in item 1	111
6.2 Aggregate amount of payments to related parties and their associates included in item 2	
<i>Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.</i>	

7.	Financing facilities <i>Note: the term "facility" includes all forms of financing arrangements available to the entity.</i> <i>Add notes as necessary for an understanding of the sources of finance available to the entity.</i>	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
7.1	Loan facilities	10,000	10,000
7.2	Credit standby arrangements		
7.3	Other (please specify)		
7.4	Total financing facilities	10,000	10,000
7.5	Unused financing facilities available at quarter end		
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well. As announced to the market 14 June 2022, a \$10 million debt facility from PURE Resources Fund has been drawn down. Term: 48 months from first draw down. Interest rate: 11.0%, reducing to 8.5% once certain operational cash flow conditions are met. Security: first ranking security over Vintage assets, where joint venture arrangements permit. Financial covenants include: requiring a minimum of \$1.5 million cash in the bank. Early repayment provisions use a sliding scale penalty of 1.5% to 1.0% of the funds.		

8.	Estimated cash available for future operating activities	\$A'000
8.1	Net cash from / (used in) operating activities (item 1.9)	(562)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(60)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(622)
8.4	Cash and cash equivalents at quarter end (item 4.6) **	1,892
8.5	Unused finance facilities available at quarter end (item 7.5)	
8.6	Total available funding (item 8.4 + item 8.5)	1,892
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	3.0
	<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions: 8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not? Answer: 8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful? Answer: 8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis? Answer: <i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>	

** Difference between item 8.4 and item 4.6 reflects amounts that are restricted. Refer item 5.1.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 30 April 2025

Authorised by: By the board
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg *Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
