Q1 2025

Investors Updates

Apr - 2025

ARR (USD)

At the end of 2024, there was growth driven mainly by Mercer. During Q1, we experienced two significant churns: **NX** (after a 6-year relationship) and **Alsea Cono Sur**. Thanks to the renewed efforts of the Sales team, we were able to generate new business and get back on the growth track.

Churn

After a thorough analysis of the reasons behind churn that we've been conducting, we identified the main cause as the lack of certain functionalities that have become standard for our clients. In addition to implementing an incentive scheme for our CCSS team tied to renewal success, we are launching new features such as the improved Journeys module for both current and new clients.

* Annual Churn (\$) = Lost MRR during last 12 months / Current MRR

Total Clients

Thanks to our strategic partnership with Mercer and a renewed focus on commercial execution, we have successfully grown our base of active clients by nearly 2x over the past 12 months. This growth reflects the strength of our value proposition, the effectiveness of our go-to-market strategy and our upsell potential.

Financial Performance

Our financial performance has continued to strengthen. We have consistently improved our liquid assets (cash & equivalents plus accounts receivable) through operating income. Previously, maintaining a solid liquidity position required support from investors. Today, we have achieved it through the strength of our own operations.

Liquid Assets

Funding

During Q4 2024, we signed and began executing a USD 250K investment from angel investors through SAFEs. In addition, we are moving forward with a venture debt investment of USD 500K from a prominent Mexican VC fund to continue investing in Sales and Product.

This funding will help Slik accelerate its growth trajectory by scaling our proven sales process and reducing churn.

Venture Debt Investment overall terms:

- Credit Line: USD 500,000, disbursed in 3 tranches over 6 months.
- Term: 48 months.
- Interest Rate: 22% annual ordinary interest, with the possibility of reduction if the risk profile improves (e.g., increased runway).
- Interest Payments: Monthly, starting from the first month.
- Amortization: 25% of the principal due at the end of each year.
- Warrant (No Cap): Right to convert the outstanding loan balance into equity at the valuation of the most recent fundraising round, less a 30% discount.
- Default Clause (120+ days overdue): Conversion at 2x multiplier, at the valuation of the most recent fundraising round, less a 30% discount
- Use of Funds: CapEx / OpEx only.
- Restrictions: No dividend distributions allowed.
- Sales Target Clause: If sales targets are not met, a cost-reduction action plan must be implemented.
- Prepayment: Loan can be prepaid.

Use of Proceeds

The investment in the next 12 months will be used to develop more functionalities (Journeys + People Analytics) and expand our customer portfolio, as well as generate up-sells from the Customer Success area.

Projected ARR 2025 - Income mix

Slik's growth plan is focused on two main pillars: **1- Scaling the Sales team**, given the excellent results we've been seeing with the new outbound methodology; **2- Expanding the offering** of new features.

Given the long sales cycle, it is expected that growth in 2025 will not be as pronounced as in 2026.

Thanks!
