

30 April 2025

**ASX Market Announcements** Level 6, Exchange Centre 20 Bridge Street Sydney NSW 2000

#### QUARTERLY ACTIVITIES REPORT 31 MARCH 2025

#### HIGHLIGHTS

- The Company announced a maiden gold pour at Santa Barbara Project took place on 30 January 2024. A number of other pours occurred during quarter during the ramp-up phase.
- The Company announced drill testing of 7 km of mineralised veins was to commence at the high-grade Santa Barbara gold project.
- Underground mining rates increased steadily throughout the guarter. Development metres increased month-on-month with 57.6 metres developed in March.
- Underground sampling of the development completed has indicated that the historical • grades mined and processed in the trial mining exercise undertaken by the previous operators is a reliable indicator of the grade of the vein system.
- The Company has secured "Right of Way" agreements with local farmers to construct a • 5.5km water pipeline from a reliable continuous source of water to the plant site at Santa Barbara. The pipeline and pumping system is expected to be operational early in May.
- Major equipment items continue to be installed at the processing plant with a new 750kva generator now on site and fabrication of the bins and conveyors for the crushing circuit underway.
- In Brazil, the Company signed a long-term lease agreement to operate a 100,000 tpa phosphate processing facility, located in Cacapava do Sul, to treat ore mined at the Company's 100% owned Tres Estradas deposit.
- The Company raised \$1.52m through the issue of approximately 40 million new fully paid ordinary shares in the Company at \$0.038 per share. Subsequent to the close of the quarter, a further \$1.5m was raised at \$0.05 per share.

**Sydney, Australia**: Aguia Resources Limited ABN 94 128 256 888 (ASX:AGR) ('Aguia' or the 'Company') is pleased to report on its activities for the March 2025 Quarter (the 'Quarter').

#### **COLOMBIA**

#### MAIDEN GOLD POUR AT SANTA BARBARA MINE

On the 30 January 2025, The Company, was pleased to provide shareholders with an update on the 100%owned Santa Barbara gold project (Project) located in Bolivar Department, Colombia informing the market that the first gold had been poured from processing high-grade development mineralisation through the existing plant as part of the Santa Barbara project recommissioning. Work continues on the upgrade of the project including underground development, processing and general facilities which will enable Santa Barbara to operate at an expanded processing rate of 50 tonnes per day ('tpd').

The Company's wholly owned subsidiary, Minera La Fortuna SAS (La Fortuna), after receiving all necessary approvals for concession contract 0-439C1 to operate the underground workings and processing facility located at Santa Barbara, commenced with underground mining in early December with processing of the development material commencing thereafter.

Underground development has commenced on the Mariana and Santa Barbara vein systems after substantive rehabilitation works. Previous underground development and mining on the Mariana and Santa Barbara vein systems exposed gold bearing quartz veins with average grades <sup>(1)</sup> close to one ounce gold per tonne. Opening up of the old Mariana workings has exposed the Mariana vein system while development of a new crosscut from the Santa Barbara workings, which will access the old Mariana mine workings below the historic mined zones, has commenced.

Having successfully commenced operations using the pre-existing treatment plant, the Company is now going through a continuous process of expanding operations. The first objective is to lift the capacity of the plant to 50 tpd through the installation of additional processing equipment. Thereafter, the capacity of the project will be enhanced through expanded underground development activities.

While the Company is constrained by what it can disclose to the market due to the requirements of Chapter 5 of the ASX listing rules, which requires a JORC resource before using the word "mine", it is using terminology such as "project" and "mineralisation" in substitute for "mine" and "ore". This is a short-term constraint on market releases that will be addressed with the commencement of drilling late in April 2025, that will enable the calculation of JORC resources. Notwithstanding these procedural requirements, the directors are very confident that Santa Barbara will prove to be very rewarding for shareholders in the immediate future.

<sup>&</sup>lt;sup>1</sup> Santa Barbara Grades. Refer to the Independent Technical Assessment and Valuation Report on the Mineral Assets of Andean Mining and Limited and Aguia Resources Limited JORC Code 2012 Statement Released to the ASX released 16/3/24, pages 129-221 of the ASX Release. Page (viii) refers to "sampling in parallel veins that yielded a combined average of 21.4 gpt in the entire interval." On page 6 of the Report states that the previous owner, the TSX-listed Baroyeca Gold and Silver Inc (TSX-V:BSGCA) provides more detailed information, adding that channel samples on Vein 2 averaged 30.99 gpt Au and 67.52 gpt Ag. Reference; a news release on 18 October 2021, with supporting tables, maps and AQC details. *https://finance.yahoo.com/news/baroyeca-channel-samples-average-31-09000089.html*. Also, the corporate presentation of Baroyeca, dated November 2022, quotes "channel samples collected from the exploratory tunnel returned gold values up to 102.4 gpt and averaged 38.91 gpt". Further, "channel samples collected from the new ... exploration tunnel on Vein 2 ... retuned 60.12 gpt and all averaged 31 gpt" over 18m.

# DRILL TESTING OF 7 KM OF MINERALISED VEINS TO COMMENCE AT THE HIGH-GRADE SANTA BARBARA GOLD PROJECT

On 7 March 2025, The Company announced exploration diamond drilling would commence at Santa Barbara early 3Q2025 with an initial 25 drill holes for 2,500m planned. The drilling is intended to test the strike and dip continuity of the known mineralisation at the Santa Barbara and Mariana workings. With over 7 km of mineralised veins mapped at surface on the Company's licenses, it is highly likely that this exploration drilling will lead to the identification of further mineralised targets and an eventual maiden JORC Resource.

The property hosts high-grade gold and silver mineralisation within a mesothermal vein swarm with average grades on the Santa Barbara # 1 and # 2 veins from underground channel sampling of 38.91g/t and 31g/t gold respectively<sup>(1)</sup> Aguia is currently extending the historical underground development on the Santa Barbara vein system and is rehabilitating the underground workings at Mariana with a view to conducting further development. A crosscut from the Santa Barbara workings is currently being developed to access the Mariana vein system some 200m below the current deepest development at the Mariana workings. This crosscut will provide a platform for ongoing exploration diamond drilling of both the Santa Barbara and Mariana vein systems and extraction of mineralisation from the Mariana workings. The Mariana Vein system has been historically mapped at widths of 0.4m with similar grades to the grades intersected in the Santa Barbara exploration development. The Mariana vein system has a potential strike length in excess of 500m based on surface pits and trenches excavated along the surface exposure of the vein.

No other matter or circumstance has arisen since 31 December 2024, that has significantly affected, or may significantly affect the consolidated entity's operations, the results of those operations, or the consolidated entity's state of affairs in future financial years.

#### **MINING STATISTICS FOR THE QUARTER**

Mining rates increased steadily during the quarter with development rates increasing month on month from January (11.4 metres) to March (57.6 metres) a fivefold increase in metres developed. Subsequent to the end of the quarter metres developed in April increased to 112.9 m on the introduction of two 12 hour shifts per day roster, 5 days per week. The introduction of the additional shifts was made possible after three months of intensive training of underground blast hole drillers who previously had never worked in mining.

During the quarter capital equipment introduced into the underground workings included two 75kva generators to power ventilation fans, pumps, lighting and scrapers used in stoping operations to increase productivity in broken material handling. A second 430cfm air compressor was also introduced to provide standby capacity and to boost compressed air to the underground enabling multiple blast hole drills to operate simultaneously including the operation of the pneumatic loader. The introduction of this equipment has been specifically designed to improve productivity underground in material handling so as to guarantee the treatment capacity of 50tpd in the coming months.

195.2 tonnes

- Meters Developed in the quarter: 89.8 meters
- Mineralised tonnes extracted in the quarter:
- Total tonnes extracted in the quarter: 1,092.8 tonnes

### PROCESSING

The processing plant has processed all of the mineralised tonnes delivered to the ROM (Run of Mine stockpile) during the quarter even though the processing plant treatment rate was constrained by the crushing system inherited with the purchase of the project, which has now been decommissioned. A further constraint to treatment rates in the processing plant was the lack of water for processing due to a prolonged drought. To overcome this constraint the Company is currently installing a 5.5 km water pipeline, holding dam and pumping system from a reliable water source to the mine (under construction) which when completed will remove water as a risk to production.

#### <u>BRAZIL</u>

#### SIGNING OF BINDING 10 YEAR LEASE AGREEMENT TO PROCESS PHOSPHATE IN BRAZIL

On 25 February 2025, the Company announced that Aguia's Brazilian subsidiary Águia Fertilizantes S.A. has signed a Lease Agreement with Brazilian Company Dagoberto Barcelos S.A. (DB) to treat Pampafos ore through their existing processing facility close to Cacapava do Sul, Brazil. See images 1-5 below. The Lease Agreement in line with the MOU announced November 7 2024, states that Aguia will lease the DB processing facility for a 10 year period with an option to extend the lease for a further 10 years.

The current facility has already operated at a rate of approximately 100,000 tonnes p.a. ('tpa') of product over an eight-year period. Adding an additional hammer mill, second drying unit and minor upgrades to the system could increase annual production to up to 300,000 tpa.

A once-off payment of BRL\$5 million (A\$1.4m), will be made to DB to reimburse them for planned capital works for the site and to offset costs associated with ceasing operations through the plant. A monthly lease of BRL\$163,000 (A\$43,000) is payable to DB upon assuming site control 6 months from today's signing date. Aguia anticipates processing first ore by third quarter 2025 and is fast-tracking exploration and development of two 100%-owned deposits located within 9 km of the DB plant. The Brazilian phosphate market is a huge opportunity for Aguia given Rio Grande do Sul, where the Company operates, is 100% dependent upon imports currently costing A\$344 per tonne. Aguia expects to receive A\$150-\$160 per tonne for its high-grade product based on current market prices. Aguia is continuing negotiations with another processing facility in the Cacapava do Sul region for an expanded production profile from its 100%-owned phosphate projects

## **CAPITAL RAISING**

#### **COMPLETION OF \$1.5M PLACEMENT**

On 7 March 2025, the Company, announced it had completed a Private Placement of 40 million fully paid ordinary shares at \$0.038 per share to raise \$1.520m before costs. The 40 million shares were issued under ASX Listing Rule 7.1. This includes 1 million shares that will be issued, following receipt of shareholder approval as required under listing rule 10.11. Funds raised will be for the expansion of Santa Barbara gold processing plant, commencement of drilling at Santa Barbara leading to JORC resources and general administration and working capital.

#### EXPENDITURE AND CASH BALANCE

Operating expenditure during the Quarter totalled A\$1,471,000. In addition, expenditure on exploration and evaluation activities totalled A\$855,000 while acquisitions of Property, plant and Equipment totalled \$144,000

#### Quarterly cash outflows from operating activities

Q3 FY2024	Q4 FY2024	Q1 FY2025	Q2 FY2025	Q3 FY2025
A\$785,000	A\$1,245,000	A\$1,931,000	A\$1,312,000	A\$1,471,000

During the Quarter, A\$41,000 in payments were made to related parties of the Company. These payments were to Directors of the Company in the form of Director's fees and salary payments. At the end of the Quarter, the Company had cash and bullion of A\$1.34m.

#### **OTHER INFORMATION**

During the Quarter there were no substantive mining exploration activities and there were no substantive mining production and development activities.

As previously reported, the extension of license and exploration of tenements 811294/2015 and 811549/2015 were denied. Aguia is appealing the ANM decision. No new tenements were acquired between 1 April 2024 and 30 June 2024. In addition, there were no farm-in or farm-out agreements entered into during the quarter.

Please refer to Appendix A, which provides a full listing of Aguia's tenements and those that have been cancelled or disposed off, during the quarter.

#### EVENTS SUBSEQUENT TO THE END OF THE QUARTER

Aguia Resources Limited ("Aguia" or the "Company") ASX: AGR was pleased to announce that it has entered into a binding share placement agreement with Patras Capital Pte. Limited ("Patras"), a Hong Kongbased investment company with a strong track record of supporting companies in growth sectors, including mining, energy and technology.

Aguia has entered into a share placement agreement for the placement of 60 million shares to raise \$3 million, ("Share Placement Agreement"). This represents a small premium to the price of Aguia's shares immediately prior to the execution of the Agreement.

Under the Share Placement Agreement, Aguia will issue 60 million shares ("Placement Shares") to Patras at an issue price of A\$0.05 per share ("Placement Price") to raise \$3 million. The Placement proceeds will be paid to the Company as follows:

50% of Placement proceeds (i.e. \$1.5 million) is to be paid on completion; and
payment of the remaining 50% ("Swap Deposit") will be deferred until the Trading Day immediately after the relevant Pricing Period (Swap Payment Date")

#### **COMPLETION OF \$1.5M PLACEMENT**

On 22 April 2025 ,The Company, announced it had completed 50% of the Placement being for 60 million fully paid ordinary shares at \$0.05 per share to raise \$1.5m. The 60 million shares will be issued under ASX Listing Rule 7.1.

#### SANTA BARBARA PROJECT

Subsequent to the end of the quarter, metres developed increased to 120 metres in April, more than twice the metres advanced in March, demonstrating the rapid rate of advance achieved underground due to the introduction of two shifts per day.

The mine has commissioned the new secondary and tertiary crushers during April which will be integrated into the new crushing circuit. The introduction of these crushers will provide sufficient crushing capacity in the short term to achieve a treatment rate of 30tpd. The new crushing circuit, including the installation of the primary crusher, is expected to be completed by July 2025.

The installation of a new 750kva diesel generator during April will provide sufficient power for the expanded plant facilities and the camp.

**Executive Chairman, Warwick Grigor, commented**: *It's been a very productive quarter for Aguia including the maiden gold pour at the Santa Barbara gold project in Colombia. As we have stated, we have brought the project back into operation for less than \$A3m, an exceptional result which firmly establishes Aguia as a gold company. Our efforts are now focused on firstly establishing regular throughput from our current 30tpd operation, then scaling this up to 50tpd. . Our maiden exploration and development drill program is kicking off shortly and we are confident that it will yield excellent results and unlock considerable value. In Brazil, we are making good progress advancing our phosphate operations with the lease of the DB plant being a key catalyst to establish a second and meaningful revenue stream and establish Aguia as a reliable local supplier. The current quarter is shaping up well and we are encouraged with the progress we are making in Colombia and Brazil."*

#### **About Aguia:**

Aguia Resources Limited ("Aguia") is an ASX-listed multi-commodity company (AGR:ASX) with a pre-production phosphate project and extensive copper exploration targets located in Rio Grande do Sul, the southernmost state of Brazil. Aguia has an established and highly experienced in-country team based in Porto Alegre, the capital of Rio Grande do Sul. Aguia is committed to advancing its existing projects into production whilst pursuing other opportunities within the sector.

On 22 December 2023 Aguia announced the proposed takeover of 100% of unlisted public company Andean Mining Limited which has a portfolio of 100%-owned, high-grade gold, silver and copper projects in the Republic of Colombia, South America:

- Santa Barbara Gold Mine: high-grade mesothermal gold project with a 30 tonnes per day pilot plant that has treated 500 tonnes of ore, with average recoveries of 20 g/t Au; early cashflow opportunity.
- Atocha: high-grade silver/gold exploration project with reported drill intercepts that include 20.14g/t Au and 723g/t Ag over a true width of 0.8m in drill hole AT-21-02.

El Dovio: high grade copper/gold project: VMS-style mineralisation, with 34 drill hole intercepts that include 8.14g/t Au, 6.92% Cu, 39.41g/t Ag and 1.46% Zn over 5.80 metres in drill hole D13-05 and an exploration adit having been completed.

#### **Competent Person**

Raul Sanabria, M.Sc., P.Geo., EurGeol., and a Competent/Qualified person ("QP") as defined by Australian JORC (2012 Edition) and Canadian National Instrument 43-101, has reviewed and approved the technical information contained in this document.

#### **JORC Code Competent Person Statements:**

The technical information contained in this press release has been prepared and reviewed by Raul Sanabria, M. Sc., P.Geo, EurGeol, member in good standing of the APEGBC and EFG, and Qualified Person as described in NI43-101 Canadian Guidelines and Competent Person as described in JORC Guidelines for standards of public reporting technical information relevant to exploration results. Mr Sanabria has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Sanabria consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
