Replay expiration:	Thursday, June 5, 2025, at 11:59 PM (Montréal time) / Friday, June 6, 2025, at 1:59 PM (Sydney time)

About Champion Iron Limited

Champion, through its wholly-owned subsidiary Quebec Iron Ore Inc., owns and operates the Bloom Lake Mining Complex located on the south end of the Labrador Trough, approximately 13 km north of Fermont, Québec. Bloom Lake is an open-pit operation with two concentration plants that primarily source energy from renewable hydroelectric power, having a combined nameplate capacity of 15M wmt per year that produce low contaminant high-grade 66.2% Fe iron ore concentrate with a proven ability to produce a 67.5% Fe direct reduction quality iron ore concentrate. Benefiting from one of the highest purity resources globally, Champion is investing to upgrade half of Bloom Lake's mine capacity to a direct reduction quality pellet feed iron ore with up to 69% Fe. Bloom Lake's high-grade and low contaminant iron ore products have attracted a premium to the Platts IODEX 62% Fe iron ore benchmark. Champion ships iron ore concentrate from Bloom Lake by rail, to a ship loading port in Sept-Îles, Québec, and has delivered its iron ore concentrate globally, including in China, Japan, the Middle East, Europe, South Korea, India and Canada. In addition to Bloom Lake, Champion owns the Kamistiatusset mining properties, a project with an estimated annual production of 9M wmt per year of direct reduction quality iron grading above 67.5% Fe, located near available infrastructure and only a few kilometres south-east of Bloom Lake. In December 2024, Champion entered into a binding agreement with Nippon Steel Corporation and Sojitz Corporation to form a partnership to

evaluate the potential development of the Kami project, including the completion of a definitive feasibility study. Champion also owns a portfolio of exploration and development projects in the Labrador Trough, including the Cluster II portfolio of properties, located within 60 km south of Bloom Lake.
