These are the same series as the IVROB options currently trading on the ASX.

Investigator's Acting Managing Director, Andrew Shearer commented in relation to the placement:

***"We are delighted with the strong support for this fundraising at this time and the continued support of our largest shareholder Jupiter. We would also like to acknowledge the contributions of our existing shareholders, as well as welcome some new institutions to the Company's register."***

***"We are excited for the funding to allow drilling of our new priority targets within the 15km long Paris silver corridor, including the recently announced acquisition of the adjacent Black Hills Project. In addition, the recently permitted Curnamona Project provides a number of exciting gold and copper targets for first pass drilling. Our experienced geological team is now in the process of securing drill rigs to get on the ground and commence drilling from August through the remainder of 2025."***

***"Our key focus remains the advancement of our 100% owned Paris Silver Project through completion of the DFS. I look forward to Lachlan Wallace starting in the role as Managing Director on July 1<sup>st</sup> and bringing together all the components of the DFS already completed into a final report, that will form the basis of our application to the South Australian regulator for the grant of a Mining Licence."***

***"This highly successful Placement continues to demonstrate the demand for exposure to Investigator's Paris Project and our pipeline of priority silver focussed targets."***

The Placement will be settled through the issue of 143,333,337 shares being issued within the Company's placement capacity under ASX Listing Rule 7.1A and 57,333,318 IVROB options issued under ASX Listing Rule LR7.1 placement capacity.
