

ASX Announcement

US Patent granted for Terragen's microbial feed supplement

Coolum, Australia / 3 July 2025 – Australian research, development and commercialisation Company Terragen Holdings Limited (**Terragen**) announces that the United States Patent and Trademark Office (**USPTO**) has issued a patent covering Terragen's microbial feed supplement, commercialised as Terragen Probiotic for Ruminants™ and MYLO®.

The Patent details are as follows:

<i>Patent Number</i>	US 12,329,181 B2
<i>Title:</i>	"Microbial Feed Supplement Composition and Method"
<i>Date of Patent:</i>	17 June 2025
<i>Expiry:</i>	27 March 2041

This Patent provides intellectual property protection in the United States, a significant target market for Terragen products, regarding the use of Terragen Probiotic for Ruminants™ and MYLO® for improving growth and productivity (including meat production and milk production) of animals. It strengthens Terragen's position in the global animal probiotics market and recognises the unique output of Terragen's Research and Development program with patent protection until 2041.

The grant of the US patent underpins the continued investment to progress the necessary regulatory approvals required for a launch of Terragen Probiotic for Ruminants™ into the US market.

About Terragen

Terragen specialises in the development of biological products that improve animal and plant health for use in agriculture. Our proprietary research has led to the creation of innovative products that improve livestock and crop yields and deliver positive environmental outcomes, helping to decarbonise agriculture.

Currently, the Terragen product range includes animal probiotics (MYLO® and Terragen Probiotic for Ruminants™) and a plant bio-stimulant (Great Land Plus®). MYLO® (liquid format) and Terragen Probiotic for Ruminants™ (dry format) are animal feed supplement probiotics that increase average daily weight gain and reduce methane production. Great Land Plus® is a plant bio-stimulant targeted for use in cropping that reduces reliance on chemical-based fertilisers, decreasing scope emissions. Great Land Plus® also increases crop yields and soil organic carbon levels.
