The investment objective of the fund is to provide unitholders with income and long-term capital growth. As described in the PDS, the fund invests in a portfolio of global equities specifically selected to provide investors with lower volatility than the benchmark. In addition, the fund aims to achieve its

objective by selling (also known as “writing”) listed equity call options and/or listed equity index call options, to generate income through the option premiums.

The notional listed derivatives exposure reported above is the total market value of the underlying securities over which the options contracts have been written. This is distinct from the market value of the derivatives contracts and the profit or loss of the derivative contracts.
